MV6 USB GAMING MICROPHONE

USB-C CARDIOID DYNAMIC MICROPHONE FOR PC GAMERS & STREAMERS

OVERVIEW

We've taken everything we know about dynamic vocal microphones and packed it into the MV6 to produce a USB microphone that is easy for anyone to use, right out of the box. With design and technology borrowed from our iconic SM7 and MV7 range of microphones, the MV6 has been created to enable gamers and streamers to take their first step into Shure dynamic vocal microphones and sound like a pro.

FEATURES

- **Auto Level Mode:** With our state-of-the-art Auto Level Mode, your MV6 intelligently adjusts microphone gain in real-time based on your distance from the microphone and volume level for consistent sound at all times. Whether you're in the heat of an intense gaming session or quietly chatting with your followers on stream, the MV6 guarantees perfect audio levels at all times.
- **Digital Popper Stopper™:** Inspired by our acclaimed MV7+, the Digital Popper Stopper™ technology effectively eliminates harsh plosive sounds, delivering clear, distraction-free audio without needing a physical pop filter.
- **Real-time Denoiser:** Our intelligent DSP technology within the MV6 removes unwanted background noise, from humming fans to whirring air conditioners to ensure only your voice is captured and nothing else.
- **Voice Isolation Technology:** The MV6's combination of dynamic capsule and cardioid pick up pattern ensures that the microphone doesn't capture any unwanted background or room noise for crystal-clear audio every time.
- **Tap-to-mute Button:** Privacy at your fingertips. The MV6's tap-to-mute button offers immediate control, allowing you to mute your microphone instantly whenever you need a moment of silence.
- **USB-C and 3.5mm Headphone Output:** The MV6 is designed for modern setups, featuring a USB-C output for instant connection to any computer or laptop, and a 3.5mm output for real-time headphone monitoring. Don't forget to configure your monitor mix in our free MOTIV Mix™ app to customize what you're hearing in your headphones between computer audio and microphone playback.
- **Everything Included:** We aim to make audio as simple as possible. The MV6 comes with everything you need to start your audio journey – including a sturdy round base desktop stand and a 1m USB-C cable. Get connected and start creating instantly.

MOTIV MIX™ DESKTOP APP FEATURES

MOTIV Mix enables users to configure the following onboard DSP features of your MV6 microphone when connected via USB to a computer.

Auto Level Mode	Adjusts your microphone gain in real time for consistent audio output.
Digital Popper Stopper™	Controls plosives digitally without the need for a physical pop filter screen.
Real-time Denoiser	Removes ambient background noise to keep the your voice at the forefront of your recording with no unwanted distractions.
Tone Slider	When using Auto Level Mode, toggle the tone to DARK to emphasis the low end, NATURAL to leave your tone unaffected, and BRIGHT to add clarity to your audio. Or choose from anything in between for the perfect sound for your voice.
Monitor Mix	Mix your mic output and system audio playback levels individually with dedicated sliders.
