## Ultra Long Range Wireless HDMI Transmitter

### 600ft - Wireless HDMI Transmitter

The Ultra Long Range Wireless HDMI Transmitter is the latest addition to IOGEAR's extensive and award winning Wireless Video lineup. Wirelessly transmit A/V signals from your source device such as PC or Blu-ray player to a display or projector at never before possible distances of up to 600ft (183m) line of sight.

### Versatile sources and displays combination

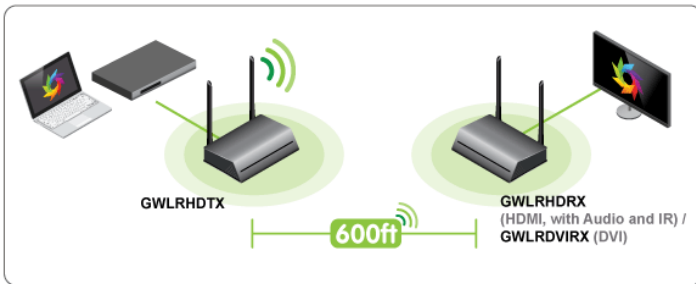

This wireless HDMI Transmitter works with receivers with HDMI output (GWLRHDRX), or DVI output (GWLRDVIRX). \*\* Ideal for application with mixed DVI and HDMI displays.

### Control Source Device Remotely - Infrared (IR) Support

The included IR blast cable and IR extension cable allows you to control your source device remotely. Signal transmission between your remote and audio / video equipment is activated by simply pointing your remote control at the receiver and pressing the remote control's button. This feature only works with an HDMI receiver (GWLRHDRX).

- Transmits High Definition Video for up to 600ft away
- Supports resolutions of up to 1080p @ 60fps
- Plug-N-Play solution
- Mix & Match between DVI and HDMI receivers
- Perfect for retail and commercial applications
- Supports Infrared (IR) Remote signal transmission to control source device, with HDMI receivers only
- HDMI 1.3V and HDCP Compliant

**Requirements**

- **Display**
- Display or Projector with HDMI or DVI Input
