

Truly compatible and truly powerful.
SD cards from Sony.

Suited to your camera. Suited to your needs.

Sony® SD cards are compatible with multiple SD/SDHC manufacturer devices. You get the exceptional Sony quality you trust no matter what brand camera you're using. Whether you are a point-and-shoot user or a more serious photographer, Sony SD cards come in various classes and storage speeds that provide the flexibility you need.

Which SD card is right for me?

For the everyday user: **CLASS 4**
CL4 SD/SDHC cards are available in 2, 4, 8, 16, or 32GB and are great for everyday use.

Recommended for high res photos and full HD shooting.

For high speed and performance: **CLASS 10**
CL10 SDHC is the latest high speed technology available in 8, 16 or 32 GB capacities and designed to support up to 22mb per second¹ transfer speed. CL10 SDHC cards are ideal for supporting HD and 3D shooting.

Recommended for continuous shooting with DSLR cameras.

Approximate recording times and storage.²

Whether it's Class 4 or 10, Sony SD cards are ideal for high-speed applications such as HD video recording or continuous shooting.

Capacity ³	#of photos	Recording Time	
		HD (5 Mbps)	Full HD (28Mbps)
2 GB	260	45 minutes	9 minutes
4 GB	530	1 hour 30 minutes	15 minutes
8 GB	1,000	3 hours 10 minutes	35 minutes
16 GB	2,100	6 hours 20 minutes	1 hour 15 minutes
32 GB	4,200	12 hours 50 minutes	2 hours 30 minutes
