

FG123S Privacy Screen for Pixel Slate

Designed for Google Pixel Slate.

K55700WW

Product Description

Touch screen compatible, the FG123S Privacy Screen for Pixel Slate limits the field of vision to +/- 30 degrees (in landscape mode), so a person off to the side only sees a dark screen. It is easy to install, filters out harmful blue light by up to 30%, and uses an anti-reflective coating to reduce glare.

Features

- A narrow horizontal viewing angle limits the field of vision on the screen to +/- 30 degrees (in landscape mode), helping you keep the information on your screen private, and reducing the chances of a visual data breach, which is important in the office or in a public setting.
- Blue light reduction filters out harmful rays by up to 30%, easing eye strain and reducing the chances of blue light interrupting your natural sleep patterns.
- Designed for Google Pixel Slate, this privacy screen is fully compatible with the touch screen, allowing full access to all features while maintaining privacy.
- Anti-reflective coating reduces glare from light sources that can interfere with viewing clarity.
- A washable, reusable adhesive makes installation — and re-installation — a breeze.
- A black frame with camera and speaker cutouts perfectly complements the design of the Pixel Slate.
- Applies to matte side

Specifications

- **Screen Size** 12.3"/31.2cm
- **PDP Request Quote** Yes
