USB-C to VGA Adapter Cable - 1m (3 ft.) - 1920x1200

StarTech ID: CDP2VGAMM1MB

This USB-C™ to VGA adapter cable offers a convenient solution for directly connecting your DisplayPort over USB Type-C™ device to your VGA monitor, television or projector.

The adapter supports a connection distance of up to 1 m (3 ft.) and works with USB-C devices that support DP alt mode, such as the MacBook, ChromeBook Pixel™ and Dell™ XPS™ models 15 and 13. It's also compatible with Thunderbolt™ 3 ports.

Clutter-free installation

At 1 m (3 ft.) in length, the adapter cable delivers a direct connection between your USB-C device and your VGA monitor. This means you don't have to use additional adapters or cabling, which helps ensure a tidy and professional installation. For longer installations, we also offer a 2 m (6 ft.) USB-C to VGA cable, enabling you to choose the right cable length for your custom installation needs.

Hassle-free connection with USB Type-C

The USB-C to VGA adapter cable is easy to connect, through the versatility and convenience of the USB Type-C port on your device. USB-C is a reversible connector, so it doesn't matter which way you plug it in, the adapter will always connect. This saves you the frustration of trying to insert it correctly when you're docking your computer to your workstation or office hot desk.

Crystal-clear picture quality

The adapter harnesses the video capabilities that are built into your USB Type-C connector to deliver video resolutions up to 1920x1200 and 1080p, providing full high-definition support for your high-resolution VGA monitors. It's a great accessory for multitasking on high-resolution VGA displays at home, in the office or other HD work environments.

The CDP2VGAMM1MB is backed by a 2-year StarTech.com warranty and free lifetime technical support.

Note:

Your USB-C equipped device must support video (DP alt mode) to work with this adapter.
