

# HPE 570SFP+ Ethernet Adapters

Accelerates high frequency trading

## HPE Ethernet dual-port 10G Ethernet SFP+ Onload server adapters

The HPE Ethernet 570SFP+ adapter is designed to address issues facing data center managers today. Equipped to handle increasing application loads of the latest

multi-core processors, it delivers superior throughput and low latency, with minimal CPU load for the consolidation and deployment of high-density servers. The 570SFP+ supports data networking with concurrent support of iSCSI and NAS traffic—while remaining true to the need for cost-effective, power-efficient, and high-performance network I/O.

## Ideal for financial services industry

HPE 10GbE Server Adapters Optimized for Low-Latency, High-Performance Applications HPE 570SFP+ server adapters with Solarflare's OpenOnload are optimized to provide the performance demanded by high-frequency trading and other high-performance financial services applications. While other vendors rely on third-party software stacks, Hewlett Packard Enterprise delivers a complete, integrated, fully tested, and fully supported solution for financial services application acceleration.

## Lowest latency at highest message rates

HPE 570SFP+ accelerates TCP traffic, delivering the lowest TCP latency. This accelerates orders to exchanges or data

transmitted reliably to other parties, enhancing overall performance. The capability also enables a single high-performance networking solution to be used for receiving feeds and other crucial data using UDP, and transmitting orders, confirmations, and other latency-critical data using TCP.

## Complete application acceleration solution

You want the highest message rates possible with the lowest latency. But you don't want to give up predictable, consistent performance for your most demanding applications. Based on industry standards and fully compatible with existing applications and APIs the HPE 570SFP+ delivers just that, achieving accelerated performance without application modifications, without proprietary or double-ended protocols, and without specialized networks.

## Technical specifications

Hardware features	HPE Ethernet 570FLR-SFP+ Adapter	HPE Ethernet 570SFP+ Adapter
<b>Part Number</b>	717491-B21	718904-B21
<b>Speed</b>	10 Gb	10 Gb
<b>Supported servers</b>	HPE ProLiant DL360p Gen8, HPE ProLiant DL380p Gen8	HPE ProLiant DL360p Gen8, HPE ProLiant DL380p Gen8
<b>Interface Type</b>	HPE Ethernet 10Gb 2-port SFP+ Adapter	HPE Ethernet 10Gb 2-port SFP+ Adapter
<b>Ports</b>	2	2
<b>Form factor</b>	FlexibleLOM Rack	Standard and low-profile adapter
<b>Network controller</b>	Solarflare (SFC9020)	Solarflare (SFC9020)
<b>OS Support</b>	Red Hat® Enterprise Linux® 5.8, 5.9, 6.2, and 6.3, SLES 10 SP4 and 11SP2	Red Hat Enterprise Linux 5.8, 5.9, 6.2, and 6.3, SLES 10 SP4 and 11SP2
<b>Technical Specifications</b>	x8 PCI Express 2.0 (5.0 GT/s) Hardware and stateless offload PCI Bus Power Management Interface (v1.2) Advanced Error Reporting Jumbo Frame Support TCP segmentation/large send offload Preboot Execution Environment (PXE Boot) ACPI v2.0 SMBus 2.0 IEEE 802.1q—Virtual LAN (VLAN) tagging IEEE 802.3x—Flow control IEEE 802.3z (Clause 30)—Statistics for SNMP MIB II IPv4 and IPv6 offload Teaming support MSI-X supports independent queues	

---

Optimize your IT investment strategy with new ways to acquire, pay for and use technology, in lock-step with your business and transformation goals.

#### Customer Technical Training

Gain the skills you need with ExpertOne training and certification from Hewlett Packard Enterprise. With HPE ProLiant, training, you will accelerate your technology transition, improve operational performance, and get the best return on your HPE investment. Our training is available when and where you need it, through flexible delivery options and a global training capability.

## HPE Services

### When technology works, business works

The challenge of virtually every IT organization is similar: to develop and maintain an agile, virtualized, and efficient server and network infrastructure that delivers the service levels your business needs. HPE Technology Services offers a comprehensive portfolio of HPE Care Pack Services to help design, deploy, manage, and support your ProLiant virtualized environment.

### Minimum recommended HPE Care Pack Services offerings

- 3-year, 4-hour response onsite, 24x7 hardware support
- Installation and Startup Services

### Enhanced service-level Care Pack Services offerings

- 3-year Support Plus 24: Integrated 24x7 hardware and software support
- HPE Proactive Select: Access to HPE first-rate technical consultants; purchase service credits and obtain expertise as needed

### HPE Care Pack Services can help you

- Reduce deployment time for faster return on investment
- Increase uptime, performance, and server availability to your business
- Detect and diagnose problems automatically, resulting in quick repairs—saving time, money, and resources
