

Evoluent 3

The Evoluent3 vertical mouse is part of the Evoluent mouse family and has already proven its great features over many years.

The Evoluent3 has the patented ergonomic shape with an extra lip, which supports the last finger. This vertical mouse has great features, like four mouse buttons, a scroll-wheel, and a button to adjust the DPI. Further you can programme the buttons with the Evoluent Mouse Manager software. Relieve your hand, wrist, and forearm with the support of the vertical design, and work in a more relaxed and productive way.

Ergonomic background

Prolonged use of a regular mouse can lead to pain and discomfort in the shoulders, forearms, and hands (Chang et al., 2007 & Andersen et al., 2008). The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013). Research has shown that the use of a vertical joystick mouse ensures a faster recovery from forearm, wrist and hand complaints (Aarås, et al., 2001). And therefore, vertical mice compared to standard mice lead to a healthier and more comfortable way of working.
