

# HDMI over Cat5/6 Passive Extender, Box-Style Remote Receiver for Video/Audio, Up to 100 ft. (30 m), TAA

MODEL NUMBER: B126-1P0

Works with Tripp Lite's B126-Series transmitters to extend an HDMI signal via Cat5e/6 cable up to 100 ft. to a projector, monitor or television. Ideal for digital signs, schools and trade show presentations.

#### **Description**

The B126-1P0 HDMI over Cat5/Cat6 Passive Remote Receiver works with a B126-002 or B126-004 transmitter (sold separately) to extend an HDMI signal to multiple projectors, monitors or televisions in a chain. It's ideal for digital signs, trade shows, presentations, classrooms, churches, retail settings and other applications where the video source is located farther than conventional cables allow. The B126-1P0 can extend a 1080i (60 Hz) signal up to 100 feet (30.5 meters) or a 1080p (60 Hz) signal up to 50 feet (15.2 meters) with a single Cat5e/6 cable (for best results, use 24 AWG solid-wire Cat5e/6 cable, such as N202-Series) between it and the transmitter. The built-in HDMI cable features a latching connector that helps prevent accidental disconnection. No external power is required. In addition to crystal-clear video, the B126-1P0 delivers full, rich stereo and 7.1-channel surround sound (multi-channel or PCM) audio when paired with a B126-002 or B126-004 transmitter. Supports 24-bit True Color (8 bits per channel) and HDCP compatibility. Easy to set up with no software or drivers to install.
