

Slim NanoSaver® 2.0 Dual Headed Lock

Two locks, one key.

Product Description

The latest laptops from HP, Lenovo, and Asus increasingly feature the Kensington Nano Security Slot, offering all the security and benefits of the standard Kensington Security Slot™, yet 70% smaller. However, these ultra-thin devices may be so slim that while a standard cable lock will fit, the thickness of the lock can be greater than the laptop itself. This prevents the device from lying flat on a surface, making the keyboard and trackpad uncomfortable to use. With connectivity ports placed closer and closer together, a standard lock can also block adjacent ports, compromising functionality. A re-designed version of the innovative Slim NanoSaver® Laptop Lock, the Slim NanoSaver® 2.0 Dual Headed Lock features a smaller lock head, with the locking cleat positioned low, and the key cylinder up high and out of the way. This careful sizing and positioning of components has created a premium locking solution that won't block ports and allows ultra-thin and 2-in-1 laptops with nano lock slots to lie flat and stable. A MicroSaver® 2.0 secondary lock secures peripheral accessories such as a monitor, hard drive, printer, or docking station with a standard size Kensington security slot — all in one solution. Strength tested and verified for industry-leading standards in torque/pull, foreign implements, lock lifecycle, corrosion, and other environmental conditions, the lock is backed by a five-year limited warranty, so you can rest assured knowing you're covered by Kensington, inventor and a worldwide leader in laptop security locks.

Features

- A NanoSaver® primary lock secures laptops and other devices with Kensington's NanoSaver slot. A MicroSaver® 2.0 secondary lock secures peripheral accessories featuring the standard size Kensington security slot. Cut-resistant carbon steel cable includes a protective sheathing to help keep attachment points such as desks and tables free from scratches.
- Slim nano lock head design won't interfere with I/O ports or raise the device off its surface.
- Each Kensington lock is precision engineered to meet or exceed rigorous industry standards for strength, physical endurance, and mechanical resilience.
- 5mm keying system, common across all of Kensington's latest locks, so there's only one keying system to manage. Smaller key opening helps thwart picking attempts.
- Register & Retrieve™, Kensington's online key registration program that allows for quick, secure, and free key replacement if ever lost or stolen.
- Five-year limited warranty, so you can rest assured knowing you're covered by Kensington, inventor and a worldwide leader in laptop security locks.
