

USB-C to DVI Adapter with USB Power Delivery - 1920 x 1200 - White

Product ID: CDP2DVIUCPW

This USB-C™ to DVI adapter lets you connect a USB-C laptop, such as an Ultrabook™ or MacBook Pro, to a DVI display. The video adapter features USB Power Delivery, which enables you to power and charge your laptop while you're outputting video to a DVI display. To match the aesthetics of your device, this adapter is colored white.

USB Type-C™ is a universal connectivity standard that combines all of your essential functions into one dynamic port. This adapter works with USB-C devices that pass a DisplayPort video signal, such as the latest MacBook or Windows® laptops. It's also compatible with Thunderbolt™ 3 ports.

Charge your device at the same time

Unlike some video adapters that use up one of your laptop's USB-C ports to output video, this video adapter offers an additional USB-C charge port that supports USB Power Delivery up to 60 watts. This means you can charge your laptop and output video using the same laptop port, by simply connecting the laptop's power adapter to the additional USB-C port on the adapter. It's the perfect solution for laptops that have only a limited number of USB-C ports.

Take it with you

This USB Type-C video adapter maximizes portability with a lightweight, small-footprint design. It's the perfect accessory to carry with your device, fitting easily into your laptop bag or carrying case. Its ultra-portable design makes this adapter perfect for BYOD (Bring Your Own Device) applications at the office.

Connect quickly

This adapter lets you utilize the versatile USB Type-C port on your portable device. USB Type-C is a reversible connector, so no matter how you plug it in, the adapter will always connect. This saves you the hassle and embarrassment of struggling with your device when you're trying to deliver a presentation or sharing information.

The CDP2DVIUCPW is backed by a 2-year StarTech.com warranty and free lifetime technical support.

Certifications, Reports and Compatibility

Applications

- Charge your USB Type-C laptop and output video using the same USB-C port
- Carry the adapter with you when you travel, and connect to any DVI monitor or projector
- Connect to BYOD (Bring Your Own Device) and CYOD (Choose Your Own Device) workstations at your office

Features

- Charge your laptop and output DVI video using the same USB-C port, with USB Power Delivery
- Hassle-free connection with the reversible USB-C connector
- Crystal-clear picture quality with support for video resolutions up to 1920x1200
- Maximum portability with a small footprint and lightweight design
- Thunderbolt 3 port compatible
