

DJI O3 Air Unit Release Notes

Date:	2023.1.6
DJI O3 Air Unit Firmware:	V01.02.0000
DJI FPV Goggles V2 Firmware:	V01.06.0000
DJI Goggles 2 Firmware:	V01.04.0000
Remote Controller Firmware:	V02.00.0500

What's New?

- Added support for the DJI O3 Air Unit to record video at 4K@30fps, 2.7K@30fps, and 1080p@30fps. When used with DJI Goggles 2, 4K@120fps, 2.7K@120fps, and 1080p@120fps are also supported.
- Added ability to set the sharpness and noise reduction value. Go to **Settings** → **Camera** → **Advanced Camera Settings** in the goggles menu to set the value.
- The time for DJI O3 Air Unit to enter low-power state after stopping the aircraft motors has been changed from three seconds to six seconds.
- Improved D-Cinelike to 10bit, providing more possibilities for post-processing.
- Optimized the camera exposure in some backlighting scenarios to avoid over-dark in shadow areas.
- Optimized the remote controller signal in some scenarios.

Notes:

- Restart DJI O3 Air Unit, the remote controller, and goggles after the update is complete.
- If update fails, restart DJI O3 Air Unit and DJI Assistant 2 (Consumer Drones Series), then try again.

DJI O3 Air Unit Release Notes

Date:	2022.11.22
DJI O3 Air Unit Firmware:	V01.01.0000
DJI FPV Goggles V2 Firmware:	V01.04.0000
DJI Goggles 2 Firmware:	V01.02.0000
Remote Controller Firmware:	V02.00.0300

What's New?

- Added the following video recording specification:
 - ◆ With DJI FPV Goggles V2: 4K@120fps, 4K@100fps
 - ◆ With DJI Goggles 2: 4K@100fps
- Added the function to use DJI Assistant 2 (Consumer Drones Series) to update the camera calibration file to guarantee image quality after the camera module is replaced.
- Optimized the power consumption strategy in low-power state to improve the stand-by time.

Notes:

- Restart DJI O3 Air Unit, the remote controller, and goggles after the update is complete.
- If update fails, restart DJI O3 Air Unit and DJI Assistant 2 (Consumer Drones Series), then try again.
