

## Slim NanoSaver® 2.0 EQ Combination Laptop Lock - Serialized Single-Pack

Trusted keyless security for ultra-thin devices.

K65091WW

### Product Description

Managing physical device security can be cumbersome, particularly when it comes to key management. Combination locks present several unique advantages, including enhanced convenience, security, and durability. The Slim NanoSaver® 2.0 EQ Combination Laptop Lock is the ideal keyless solution for securing ultra-thin devices. It features sustainability attributes and eliminates the hassles of lost or misplaced keys. The preset code provides convenient keyless security, and its slim design allows the laptop to lie flat and stable while ensuring full access to valuable ports.

### Features

- Uses 78% less plastic than prior generation
- and ships in Forest Stewardship Council (FSC®) certified packaging.
- Plastic removed from cable jacket, crimp cover, ferrule cover, and key cover.
- Long 1.8m (6ft) stainless steel cable resists cutting attempts and provides ample length for easy anchoring.
- Does not block I/O ports and allows device to lie flat and stable.
- Unique lock engagement creates a strong connection to device frame to resist and deter theft.
- Verified and tested to resist and deter theft.
- Pre-programmed for immediate use.
- Register & Retrieve™ allows simple and secure lookup for forgotten codes.
- Also available as a 25-pack (K65102WW).
- 5-year limited warranty.
