

Samsung Hospitality Displays

HJ670U Series (North America)

Highlights

- Elevate featured content to UHD resolution through dedicated upscaling technology
- Improve picture clarity and detail with HDR10+ refinement
- Streamline operations through coaxial infrastructure compatibility
- Gauge and address maintenance needs in anticipation of guest needs
- Tailor content and home menu creation to suit guests' individual needs
- Enjoy in-depth monitor performance visibility across the powerful TIZEN operating system

UHD-Quality Content Delivery

Samsung's hospitality displays offer hotel guests the vivid picture quality of home entertainment systems on their in-room screens. Through UHD upscaling technology, these refined displays showcase all content at UHD resolution (3,840 x 2,160), and with four times the pixels of the FHD standard.

Refined Picture Quality

Beyond consistent UHD quality, Samsung's displays bring the power of High Dynamic Range (HDR10+) picture refinement to any hotel room. Using dynamic metadata that fine-tunes each frame within a given program, HDR10+ technology delivers an optimal, detail-rich and memorable viewing experience.

Powerful Performance, Enhanced Security

Backed by the powerful TIZEN operating system, Samsung hospitality displays reinforce secure content delivery across the application, platform and system layers. This rigid security also enables TIZEN's H.Browser technology to render 2D and 3D content and achieve faster upload and response times.

A Tailored Home Menu

Each Samsung hospitality display includes an intuitive, customizable home menu that streamlines content exchange between hotels and guests. Content managers can easily incorporate images, logos and feature icons specific to guest needs, and which reinforce special offers and hotel branding.

Seamless Coaxial Network Integration

As a unified, coaxial-compatible content management solution, LYNK REACH 4.0 amplifies service processes and maintains consistent hotel-to-guest interaction. Through the platform's centralized, real-time monitoring, hotel managers can quickly remedy issues across single displays or display groups.

Personalized Guest Engagement

Coaxial-structured hotels additionally can use LYNK REACH 4.0 to deliver customized messages to guests relevant to their specific stay details or interests. As guests arrive, hotel operators can greet them with a personalized welcome message while also promoting on-site amenities and promotions.
