

AG353UCG

35 inch (89 cm) LCD MONITOR

Ultimate gaming experience on a 35" monitor with 200Hz, HDR and WQHD resolution

200Hz

A 200Hz refresh rate is more than triple the industry standard of 60Hz. Unleash the full potential of your graphics card: with screen tearing and motion blur and stuttering all eradicated, your game will finally flow like it was meant to, and your skills can reach new heights.

1ms

A pixel response time of 1ms means speed without the smear for an enhanced experience. Fast-moving action and dramatic transitions will be rendered smoothly without the effects of ghosting.

G-SYNC (pending)

NVIDIA's G-SYNC technology guarantees smooth and fluid gameplay even when frames per second drop below a certain threshold, by eliminating stuttering and distortion. By aligning your graphics card's FPS numbers with the refresh rate of your monitor, G-SYNC delivers steady performance whenever your system can't.
