

iOS and Android Printing Made Easy

Print from your iPad, iPhone, Chromebook, Android smartphones and tablets to your printers.

The xPrintServer Office is a 'plug-and-print' solution enabling wireless printing from for iOS, Android and Chrome OS devices without any proprietary apps.

Print from Your Mobile Devices

The easy-to-use xPrintServer is the perfect 'plug-and-print' solution to enable AirPrint and Google Cloud Print on your printers in the office, school, or home. Once installed, the xPrintServer automatically discovers and provisions your printers without the need for manual set up, and without losing your capability to print from Mac OS and Windows PCs. Designed for a wide range of businesses, this small print server provides enterprise features, and enables wireless printing from an unlimited number of mobile devices to multiple printers without any licensing fees.

Simple and Quick Set-Up

Simply plug in xPrintServer to your network, and within seconds the xPrintServer will automatically discover and provision your network and USB printers making them available in your mobile device's native menu.

User Administration and Integrated Security

The xPrintServer supports remote authentication with Active Directory for printer access authentication, and uses TLS data encryption so that your print job is securely transferred from your mobile devices. It also provides administrators with a web browser-based interface with for managing user accounts, printer options, proxy server configurations, and firmware settings.

xPrintServer Office Highlights:

- Enables AirPrint and Google Cloud Print on your printers letting you print wirelessly from iOS and Android devices
- Simple 'plug-and-print' installation and intuitive use
- Supports unlimited number of iOS and Android devices
- No need to download proprietary apps
- Administrative and security configurations via web UI
- Print job monitoring and log exporting
- Network (wired/wireless) and USB printer support
- Supports over 2000 printer models from major manufacturers
- Supports both DHCP and static IP address assignments

What is AirPrint and Google Cloud Print?

The Lantronix xPrintServer Office is both Apple AirPrint and Google Cloud Print certified. It applies these technologies to make your existing printers compatible with your mobile devices that use iOS, Android and Chrome operating systems.

Apple AirPrint Compatible

AirPrint is an Apple technology that allows you to print directly to printers via wireless LAN (Wi-Fi) without the need to download proprietary apps or additional drivers on your iPhone, iPad and iPod touch.

Google Cloud Print Ready

Google Cloud Print is a Google technology that connects your printers to the web, enabling you to print from your Android phone, tablet, Chromebook, PC and any other web-connected device to your home and work printers.
