

SP-S200

Overview

6 watt RMS Multimedia Stereo speakers

The new S series from Genius is a 2.0-ch stereo speaker system and includes three models: SP-S120, SP-S200 and SP-S350. The compact design housing uses a simple contoured line shape and they are ideal to place on desks when using your desktop PC, notebook, MP3 player or other audio device.

With custom-made drivers and output power range, the S series speakers provide rich and clear sound from 2 watts to 10 watts depending on the model. All three systems have front-panel controls for easy-access to Power on/off and Volume controls and the headphone jack is a must-have for private listening. The SP-S200 and SP-S350 include a 3D button for virtual 3D effect. The Tone control adjusts the sound response of the SP-S350 and the extra AUX line-in jack lets you connect to second audio devices.
