### Product Description

The ClickSafe® 2.0 Universal Keyed Laptop Lock fits any laptop security slot — standard T-bar, nano, or wedge-shaped — to lock down your laptop, regardless of brand or generation. Master keyed option allows administrative access for IT managers, while simplifying key management. Features include patented anti-pick Hidden Pin™ technology; ClickSafe® locking technology allowing the lock head to be attached with one hand in a single click; a cut-resistant carbon-steel cable; a pivoting and rotating head, for flexible movement and easy key insertion; Register & Retrieve™ for quick, secure, and easy key replacement; and a five-year warranty backed by Kensington, inventor and worldwide leader in laptop security locks.

### Features

- One lock for any slot — fits standard T-bar, nano, or wedge-shaped laptop security slots, regardless of brand or generation.
- 5mm keying system is common across all of Kensington's latest locks, so there's only one keying system to manage. Master keyed option allows administrative access for IT managers, while simplifying key management.
- ClickSafe® locking technology allows the lock head to be attached with one hand in a single click.
- Patented anti-pick Hidden Pin™ technology resists tampering and offers peace-of-mind. 1.8m (6 ft.) carbon steel cable with plastic sheath delivers the same level of cut and theft resistance as thicker cables.
- A special pivot and rotate hinge on the cable allows flexible movement and easy key insertion.
- Register & Retrieve™, Kensington's online key registration program, allows for quick, secure, and free key replacement if ever lost or stolen.
- Kensington locks are verified and tested. Each lock is precision engineered to meet or exceed rigorous industry standards for strength, physical endurance, and mechanical resilience.
- A five-year warranty means you can rest assured knowing you're covered by Kensington, inventor and worldwide leader in laptop security locks.
