

MAN & MACHINE presents

Slim Cool +

Medical Grade™
Keyboard With Touchpad

LOOKING FOR THE PERFECT FIT? As computers proliferate in medical settings, it's becoming harder to find keyboards that don't ask the user to compromise.

You don't have to settle for fewer features, or a less rugged design, or open-style keys that harbor bio burden even after disinfectants are applied. You can select Slim Cool+ instead.

Slim Cool+ keyboards are fully functional and easy to disinfect. They are made by hand in the American workrooms of Man & Machine, specialists in custom-engineered computer peripherals.

Rated Medical Grade™, these keyboards are sealed, seamless and silent. They clean up fast in 10% bleach solution or with any EPA-certified disinfectant. Our low

profile keys are easy to clean and great to type on. Users feel instantly at home with the laptop-like design and touchpad. It's equally comfortable for left-handed and right-handed users.

Optional three-way backlighting permits accurate typing in low-light conditions. The ingenious magnetic attachment system holds your keyboard tight. Dirty tape and Velcro™ are a thing of the past.

Slim Cool+. How cool is that?
