

HP Anyware

Secured digital workspaces

Overview

HP Anyware is the enterprise software IT needs to keep people productive, with secure access to their digital workspaces. Introducing the new and evolved HP Anyware, now easier than ever to manage and scale. The enhanced HP Anyware combines the existing high-performance solution with new deployment and scalability capabilities—ensuring a secure remote access environment for your diverse workforce needs. The evolved HP Anyware manageability solution is based on a modern, multi-tenant, SaaS control plane that enables deployment flexibility across devices and networks.

HP Anyware now includes HP hosted cloud gateway services that enable IT administrators to seamlessly provision Anyware-powered digital workspaces without the need to install connectors and gateways in the customer’s environment.

Software benefits

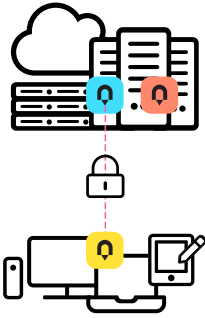

- **Accelerate deployments:**
Enable rapid, flexible, and scalable management of hybrid, multi-cloud virtual desktops and remote workstations with a multi-tenant SaaS control plane
- **Automate tasks:**
Proactively automate repetitive tasks and remediate issues faster to help lower operational expenses and improve IT efficiency
- **Secure remote access:**
Zero trust security model allows secure remote access for data and applications to help meet security and compliance regulations
- **Consistent user experience:**
Enhance user experience and provide a consistent and seamless user experience, for greater user satisfaction across a diverse workforce, from knowledge workers to graphic professionals.

Software highlights

- Deploy on virtually any mix of operating system, infrastructure environment, and use case
- No VPN required, additionally supported with Anyware Trust Center
- Zero trust security model allows secure remote access for data and applications to help meet security and compliance regulations
- UI-driven workflows for rapid deployment and management of hybrid, multi-cloud virtual desktops and remote workstations
- Scalable SaaS, multi-tenant management solution with role-based access controls
- Simplified management via HP hosted cloud gateways, minimizing customer IT footprint

Deployment options

Have it your way with flexibility to make digital workspaces a reality for virtually any¹ IT infrastructure through the 3 lightweight software components of HP Anyware.

Anyware Agents can be installed in a Windows®, Linux®, or macOS® host environment, including workstations or virtual machines running on the edge, a datacenter, a private or public cloud, multiple clouds, or as part of a hybrid environment.

Anyware Clients can be installed on a Windows®, Linux®, Android®, macOS®, iOS®, and ChromeOS® end user device, including a PC, Mac, laptop, tablet, Chromebook®, or Thin Client.

Anyware Manager Enterprise a multi-tenant SaaS control plane for rapid deployment and management of hybrid, multi-cloud virtual desktops and remote workstations.

Subscription details

Through a single subscription,¹ you get support and updates for HP Anyware and Anyware Manager. The HP Anyware subscriptions¹ allow you to scale based on your internal demand for remote desktops and workstations. Your subscription is based on the number of concurrent PCoIP® connections used (minimum 10). Another way to think about it is you pay for the connection, not the software.
