

HP QuickLoop

262866-B21

The Quick Loop license enables the Quick Loop features resident in the firmware and hardware for the following HP StorageWorks SAN switches:

HP StorageWorks SAN Switch 2/16

287055-B21

HP StorageWorks SAN Switch 2/16-EL

283056-B21

HP StorageWorks SAN Switch 2/8-EL

258707-B21

An advanced Fabric service for Fibre Channel Loops QuickLoop offers a cost-effective path for Fibre Channel private-loop devices in legacy environments to migrate to a fully scalable Fabric to be used for a Storage Area Network (SAN). It supports Fibre Channel Arbitrated Loop (FC-AL) devices with a Fabric. Best described as a capability to allow arbitrated loops to be attached to a fabric without modifying their drivers, private targets on the arbitrated loops can be accessed by public or private hosts elsewhere on the fabric.

Also supports fabric assist zoning and enables operations between private initiators and public targets. The initiator and target can exist anywhere in the fabric. A public target remains public, with full fabric functionality.

STORAGE ARRAY SYSTEMS

- HP StorageWorks RAID Array 4100
- HP StorageWorks Modular SAN Array 1000
- HP StorageWorks Enterprise Virtual Array
- HP StorageWorks Modular Array 6000
- HP StorageWorks RAID Array 8000, Enterprise Modular Array 12000
- HP StorageWorks Enterprise Modular Array 16000

Refer to the SAN Design Guide for HBA and Configuration Details
