PERFORMANCE WITH FEELING

Built for players who want the feel as much as the win. Magnetic linear switches deliver a smoother, deeper press with refined acoustics that make every keystroke satisfying. O-ring mounting style and frictionless actuation enhance the typing experience, transforming speed into something you can feel and hear. With tuning options like actuation adjustment and Rapid Trigger, plus personalization through swappable housings¹, hot swap switches², NGENUITY⁴ profiles, and 3D-print designs⁵, you can shape both the look and the feel until it's uniquely yours.

Key features

Magnetic Motion

Magnetic linear switches reduce friction for smoother inputs and faster reactions. Each keystroke delivers a premium feeling and cleaner sound profile, enhanced by the O-ring mounting style for a more refined typing and gaming experience. It's speed you can feel and sound you can enjoy.

No Delay. No Doubt.

Rapid Trigger technology resets the keys the moment you lift, so you can fire off actions without hesitation. Whether you're strafing, peeking, or stringing together combos, every input is sharp, clean, and ready the instant you are.

8k on Tap

With an adjustable polling rate up to 8,000 Hz⁶, your inputs are reported faster and more frequently than standard boards. That means smoother motion, lower latency, and a competitive edge when split-second reactions decide the match.

Find the Perfect Angle

A high-profile design with adjustable feet lets you dial in the typing and gaming position that feels best. Play longer, stay sharper, and help reduce strain without compromise.

Swap it. Style it. Own it.

Easily swappable housing¹ lets you change the outer shell to match your setup or your mood. Go from clean and minimal to bold and expressive, without losing performance or responsiveness.

Cushioned Control

O-ring mounting adds subtle cushioning to each press, softening impact while reducing noise. The result is a keystroke that feels smoother under your fingers and sounds more balanced — perfect for long sessions or enthusiasts who demand a premium touch.

Small Frame. Big Game.

The 65% layout³ trims away unnecessary keys while keeping the essentials close at hand. Save valuable desk space for sweeping mouse movements without sacrificing functionality.

Personalize with NGENUITY

HyperX NGENUITY⁴ software unlocks deep personalization. Adjust actuation points, set per-key lighting, or fine-tune performance profiles until your setup matches your exact style of play.
