## ***Disclaimers***

Intel technologies' features and benefits depend on system configuration and may require enabled hardware, software, or service activation. Performance varies depending on system configuration. No computer system can be absolutely secure. Check with your system manufacturer or retailer or learn more at [intel.com](http://intel.com).

You may not use or facilitate the use of this document in connection with any infringement or other legal analysis concerning Intel products described herein. You agree to grant Intel a non-exclusive, royalty-free license to any patent claim thereafter drafted which includes subject matter disclosed herein.

No license (express or implied, by estoppel or otherwise) to any intellectual property rights is granted by this document.

The products described may contain design defects or errors known as errata which may cause the product to deviate from published specifications. Current characterized errata are available on request.

Intel disclaims all express and implied warranties, including without limitation, the implied warranties of merchantability, fitness for a particular purpose, and non-infringement, as well as any warranty arising from course of performance, course of dealing, or usage in trade.

This document contains information on products, services and/or processes in development. All information provided here is subject to change without notice. Contact your Intel representative to obtain the latest Intel product specifications.

# 1. Intel® Server M50CYP Family Overview

This document provides a catalog of available Intel server products, accessories, and spares for the Intel® Server M50CYP family.

**Figure 1. Intel® Server M50CYP Family Overview**

For a complete overview of the Intel® Server Board M50CYP2SB family features and functions, see the *Intel® Server Board M50CYP2SB Family Technical Product Specification (TPS)*.

For a complete overview of the Intel® Server System M50CYP1UR family features and functions, see the *Intel® Server System M50CYP1UR Family Technical Product Specification (TPS)*.

For a complete overview of the Intel® Server System M50CYP2UR family features and functions, see the *Intel® Server System M50CYP2UR Family Technical Product Specification (TPS)*.

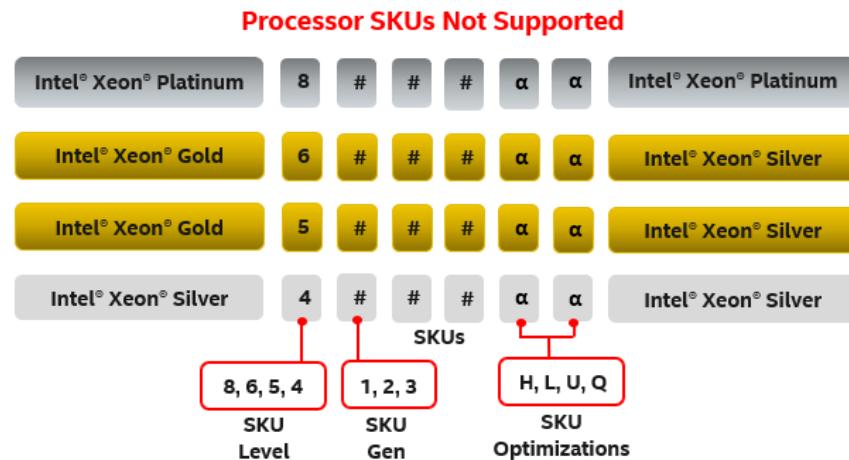

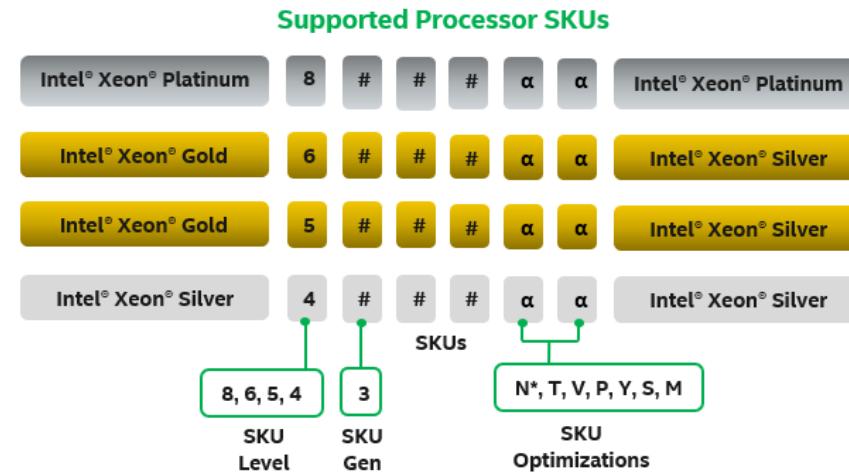

## 1.1 Configuration Overview

The Intel Server M50CYP family is offered as both server board options and L6 integrated server systems.

- Server board options:
  - **Intel® Server Board M50CYP2SB1U**
  - **Intel® Server Board M50CYP2SBSTD**
- Integrated server system (L6) options:
  - **Intel® Server System M50CYP1UR family** – A family of 1U rack mount server system integrated at level L6 with an Intel® Server Board M50CYP2SB1U and chassis.
  - **Intel® Server System M50CYP2UR family** – A family of 2U rack mount server system integrated at level L6 with an Intel® Server Board M50CYP2SBSTD and chassis.

## 1.1.1 Processor Support

The Intel® Server M50CYP family supports the 3<sup>rd</sup> Gen Intel® Xeon® Scalable processor family. Processor shelves within the product family are identified as shown in the following figure.

**Figure 2. 3<sup>rd</sup> Gen Intel® Xeon® Scalable Processor Identification**

**Note:** Supported 3<sup>rd</sup> Gen Intel® Xeon® Scalable processor SKUs must Not end in (H), (L), (U), or (Q). All other processor SKUs are supported.

**\* Note:** The 8351N SKU is a single-socket optimized SKU and is not supported on the Intel® Server M50CYP family.

The Intel® Server M50CYP family supports the following 3<sup>rd</sup> Gen Intel® Xeon® Scalable processor family shelves:

- Intel® Xeon® Platinum 8300 processors
- Intel® Xeon® Gold 6300 processors
- Intel® Xeon® Gold 5300 processors
- Intel® Xeon® Silver 4300 processors

---

**Note:** Previous generation Intel® Xeon® processors and previous-generation processor heat sinks are not compatible on server boards and server systems described in this document.

---

**Table 1. 3<sup>rd</sup> Gen Intel® Xeon® Scalable Processor Family Feature Comparison**

Feature	Platinum 8300 Processors	Gold 6300 Processors	Gold 5300 Processors	Silver 4300 Processor
# of Intel® UPI Links	3	3	3	2
Intel® UPI Speed	11.2 GT/s	11.2 GT/s	11.2 GT/s	10.4 GT/s
Supported Topologies	2S-2UPI 2S-3UPI	2S-2UPI 2S-3UPI	2S-2UPI 2S-3UPI	2S-2UPI
Node Controller Support	No	No	No	No
RAS Capability	Advanced	Advanced	Advanced	Standard
Intel® Turbo Boost Technology	Yes	Yes	Yes	Yes
Intel® HT Technology	Yes	Yes	Yes	Yes
Intel® AVX-512 ISA Support	Yes	Yes	Yes	Yes
Intel® AVX-512 - # of 512b FMA Units	2	2	2	2
# of PCIe* Lanes	64	64	64	64
Intel® VMD	Yes	Yes	Yes	Yes

**Note:** Features may vary between processor SKUs.

Reference 3<sup>rd</sup> Gen Intel® Xeon® Scalable processor specification sheets and product briefs for additional information.

### 1.1.2 Memory Support

The Intel® Server M50CYP family supports the following memory features:

- 32 DIMM slots
  - 16 DIMM slots per processor, eight memory channels per processor
  - Two DIMMs per channel
- Memory capacity
  - Up to 6 TB per processor (processor SKU dependent)

- Memory data transfer rates
    - Up to 3200 MT/s at one or two DIMMs per channel
  - Registered DDR4 RDIMM, 3DS-RDIMM, Load Reduced DDR4 (LRDIMM), 3DS-LRDIMM
- Note:** 3DS = 3 Dimensional Stacking.
- Intel® Optane™ persistent memory 200 series
  - DDR4 standard voltage of 1.2V
  - All DDR4 DIMMs must support ECC

### 1.1.3 System Configuration Notes

- The Intel® Server Board M50CYP2SB supports the 3rd Gen Intel® Xeon® Scalable processor family.
- Previous generation Intel® Xeon® processors and Intel® Xeon® Scalable processor families are not supported.
- **Caution:** Installing processors into the processor sockets should be done with great care. Proper processor orientation with the socket should be made before attempting to install the processor. DO NOT touch any of the contact pins within the processor socket. Doing so could result in bending them and rendering the slot inoperable.
- CPU 1 must be populated for Riser Slot #2 and Riser Slot #3 to be functional.
- Do Not install a heat sink on an empty socket.
- For best performance, memory should be populated evenly across channels starting with the BLUE DIMM slot on each channel. For additional details, see the *Intel® Server System M50CYP1UR Family Technical Product Specification (TPS)* or *Intel® Server System M50CYP2UR Family Technical Product Specification (TPS)*.
- **Caution:** Update your server platform to the latest system software posted to RDC before attempting any validation testing. Intel highly recommends that you read the complete Update Instructions and Release Notes for each software component before updating the system.
- In a 1U system, all cables routed to the front drive bay of the server system are routed through the right, in-between the cable walls and the chassis side walls. The exception are cables from the server board SlimSAS connectors that must be routed under the fan assembly. No cables should be routed above the processors or DIMMs.
- In a 2U system, cables routed to the front of the server system are routed along the chassis side walls. The exception are cables from the server board SlimSAS connectors. These cables must be routed under the fan assembly. No cables should be routed above the processors or DIMMs. The fan assembly must be removed when routing cables. Care should be taken not to pinch any cables when reinstalling the fan assembly.
- The back edge of the server board has a bank of eight diagnostic LEDs that display a sequence of POST codes during the boot process. Should your system hang during POST, the LEDs will display the last POST event run before the hang. The decoder for these POST code LED sequences can be found in the product *Technical Product Specifications (TPS)* document that can be downloaded from RDC.

## Intel DDR4 DIMM Support Disclaimer:

Intel validates and will only provide support for system configurations where all installed DDR4 DIMMs have matching "Identical" or "Like" attributes. See [Table 2](#). A system configured concurrently with DDR4 DIMMs from different vendors will be supported by Intel if all other DDR4 "Like" DIMM attributes match.

Intel does not perform system validation testing nor will it provide support for system configurations where all populated DDR4 DIMMs do not have matching "Like" DIMM attributes as listed in [Table 2](#).

Intel will only provide support for Intel server systems configured with DDR4 DIMMs that have been validated by Intel and are listed on Intel's Tested Memory list for the given Intel server product family.

Intel configures and ships pre-integrated L9 server systems. All DDR4 DIMMs within a given L9 server system as shipped by Intel will be identical. All installed DIMMs will have matching attributes as those listed in the "Identical" DDR4 DIMM Attributes column in [Table 2](#).

When purchasing more than one integrated L9 server system with the same configuration from Intel, Intel reserves the right to use "Like" DIMMs between server systems. At a minimum "Like" DIMMs will have matching DIMM attributes as listed in the table below. However, the DIMM model #, revision #, or vendor may be different.

For warranty replacement, Intel will make every effort to ship back an exact match to the one returned. However, Intel may ship back a validated "Like" DIMM. A "Like" DIMM may be from the same vendor but may not be the same revision # or model #, or it may be an Intel validated DIMM from a different vendor. At a minimum, all "Like" DIMMs shipped from Intel will match attributes of the original part according to the definition of "Like" DIMMs in the following table.

**Table 2. DDR4 DIMM Attributes Table for "Identical" and "Like" DIMMs**

<ul style="list-style-type: none"> <li>DDR4 DIMMs are considered "Identical" when ALL listed attributes between the DIMMs match</li> <li>Two or more DDR4 DIMMs are considered "Like" DIMMs when all attributes minus the Vendor, and/or DIMM Part # and/or DIMM Revision#, are the same.</li> </ul>			
Attribute	"Identical" DDR4 DIMM Attributes	"Like" DDR4 DIMM Attributes	Possible DDR4 Attribute Values
Vendor	Match	Maybe Different	Memory Vendor Name
DIMM Part #	Match	Maybe Different	Memory Vendor Part #
DIMM Revision #	Match	Maybe Different	Memory Vendor Part Revision #
SDRAM Type	<b>Match</b>	<b>Match</b>	DDR4
DIMM Type	<b>Match</b>	<b>Match</b>	RDIMM, LRDIMM

**Table 5. Intel® Server System M50CYP1UR Family Features**

Feature	Details
<b>Chassis Type</b>	1U rack mount chassis
<b>Server Board</b>	Intel® Server Board M50CYP2SB1U
<b>Processor Support</b>	<ul style="list-style-type: none"> <li>Dual Socket-P4 LGA4189</li> <li>Supported 3<sup>rd</sup> Gen Intel® Xeon® Scalable processor family SKUs: <ul style="list-style-type: none"> <li>Intel® Xeon® Platinum 8300 processor</li> <li>Intel® Xeon® Gold 6300 processor</li> <li>Intel® Xeon® Gold 5300 processor</li> <li>Intel® Xeon® Silver 4300 processor</li> </ul> </li> </ul> <p><b>Note:</b> Supported 3<sup>rd</sup> Gen Intel® Xeon® Scalable processor SKUs must Not end in (H), (L), (U), or (Q). All other processor SKUs are supported.</p> <ul style="list-style-type: none"> <li>UPI links: up to three at 11.2 GT/s (Platinum and Gold families) or up to two at 10.4 GT/s (Silver family)</li> </ul> <p><b>Note:</b> Previous generation Intel® Xeon® processor and Intel® Xeon® Scalable processor families are not supported.</p>
<b>Maximum Supported Processor Thermal Design Power (TDP)</b>	<ul style="list-style-type: none"> <li>3<sup>rd</sup> Gen Intel® Xeon® Scalable processors up to 270 W.</li> </ul> <p><b>Note:</b> The maximum supported processor TDP depends on system configuration.</p>
<b>Chipset</b>	<ul style="list-style-type: none"> <li>Intel® C621A Platform Controller Hub (PCH) chipset</li> </ul>
<b>Memory Support</b>	<ul style="list-style-type: none"> <li>32 DIMM slots <ul style="list-style-type: none"> <li>16 DIMM slots per processor, eight memory channels per processor</li> <li>Two DIMMs per channel</li> </ul> </li> <li>All DDR4 DIMMs must support ECC</li> <li>Registered DDR4 (RDIMM), 3DS-RDIMM, Load Reduced DDR4 (LRDIMM), 3DS-LRDIMM</li> </ul> <p><b>Note:</b> 3DS = 3 Dimensional Stacking</p> <ul style="list-style-type: none"> <li>Intel® Optane™ persistent memory 200 series</li> <li>Memory capacity <ul style="list-style-type: none"> <li>Up to 6 TB per processor (processor SKU dependent)</li> </ul> </li> <li>Memory data transfer rates <ul style="list-style-type: none"> <li>Up to 3200 MT/s at one or two DIMMs per channel (processor SKU dependent)</li> </ul> </li> <li>DDR4 standard voltage of 1.2V</li> </ul>
<b>System Fans</b>	<ul style="list-style-type: none"> <li>Eight managed 40 mm hot swap capable system fans</li> <li>Integrated fans included with each installed power supply module</li> </ul> <p><b>Note:</b> System fan redundancy is supported on specific system configurations.</p>
<b>Power Supply Options</b>	The server system can have up to two power supply modules installed, supporting the following power configurations: 1+0, 1+1 redundant power, and 2+0 combined power.  Three power supply options: <ul style="list-style-type: none"> <li>AC 1300 W Titanium</li> <li>AC 1600 W Titanium</li> </ul>
<b>Server Board Network Support</b>	See optional Open Compute Project (OCP*) adapter support below.

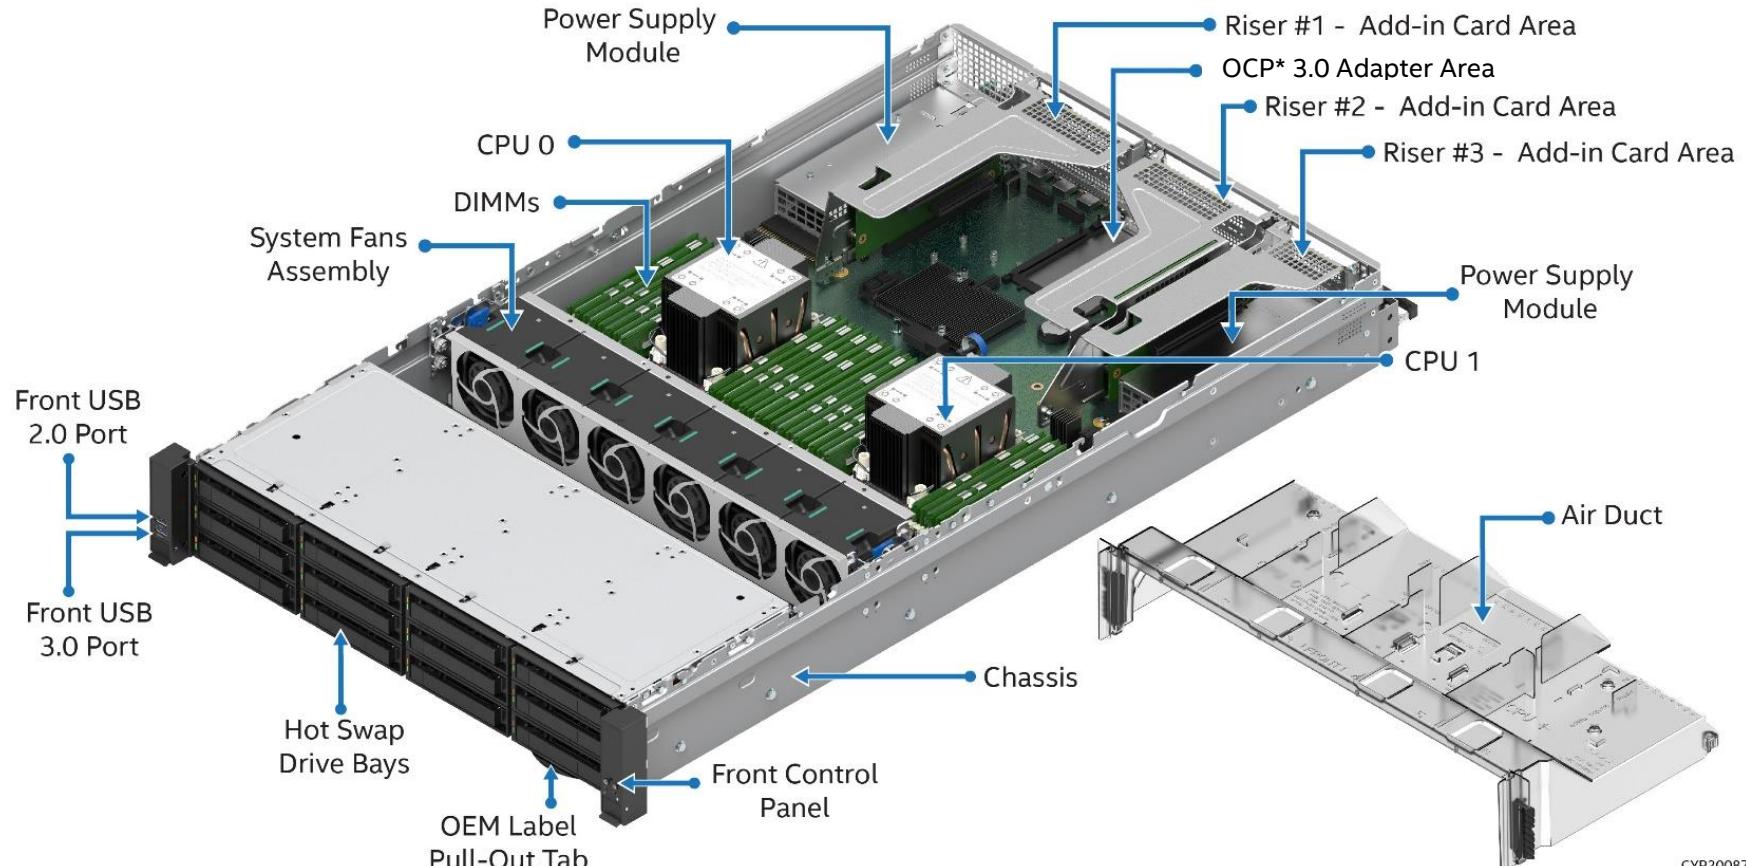

Feature	Details
<b>Open Compute Project* (OCP*) Adapter Support</b>	<p>Onboard x16 PCIe* 4.0 OCP 3.0 Mezzanine connector (Small Form-Factor) supports the following Intel accessory options:</p> <ul style="list-style-type: none"> <li>• Dual port, RJ45, 10/1 GbE, - iPC- X710T2LOCPV3</li> <li>• Quad port, SFP+ DA, 4x 10 GbE - iPC- X710DA4OCPV3</li> <li>• Dual Port, QSFP28 100/50/25/10 GbE - iPC- E810CQDA2OCPV3</li> <li>• Dual Port, SFP28 25/10 GbE - iPC-E810XXVDA2OCPV3</li> </ul>
<b>Riser Card Support</b>	<p>Concurrent support for up to four riser cards, including one Interposer riser card with support for up to three PCIe* add-in cards. In the below description HL = Half Length, LP = Low Profile.</p> <p><b>Riser Slot #1:</b></p> <ul style="list-style-type: none"> <li>• Riser Slot #1 supports x16 PCIe* lanes routed from CPU 0</li> <li>• PCIe* 4.0 support for up to 32 GB/s</li> </ul> <p><b>Riser Slot #1 supports the following Intel Riser Card option:</b></p> <ul style="list-style-type: none"> <li>• One PCIe* slot riser card supporting (one) – LP/HL, single-width slot (x16 electrical, x16 mechanical) iPC – CYP1URISER1STD</li> </ul> <p><b>Riser Slot #2:</b></p> <ul style="list-style-type: none"> <li>• Riser Slot #2 supports X24 PCIe* lanes routed from CPU 1</li> <li>• PCIe* 4.0 support for up to 32 GB/s</li> </ul> <p><b>Riser Slot #2 supports the following Intel Riser Card options:</b></p> <ul style="list-style-type: none"> <li>• One PCIe* slot riser card supporting (one) – LP/HL, single-width slot (x16 electrical, x16 mechanical) iPC – CYP1URISER2STD</li> <li>• NVMe* riser card supporting (one) – LP/HL, single-width slot (x16 electrical, x16 mechanical) + (one) - x8 PCIe* NVMe* SlimSAS* connector with re-timer. Included in iPC – CYP1URISER2KIT</li> </ul> <p><b>PCIe* Interposer Riser Slot (requires PCIe* NVMe* riser card in Riser Slot #2)</b></p> <ul style="list-style-type: none"> <li>• PCIe* Interposer Riser Slot supports the PCIe* interposer riser card as an accessory option. This card supports one PCIe* add-in card (x8 electrical, x8 mechanical). The PCIe* interposer riser card can be used only when it is connected to the PCIe* NVMe* riser card in Riser Slot #2. The interposer card uses x8 PCIe* data lanes routed from the PCIe* SlimSAS* connector on the PCIe* NVMe* riser card. The Intel accessory kit includes the PCIe* interposer riser card, PCIe* NVMe* riser card, and PCIe* interposer cable. iPC – CYP1URISER2KIT</li> </ul> <p><b>Riser Slot #3:</b></p> <ul style="list-style-type: none"> <li>• Riser Slot #3 supports x16 PCIe* lanes routed from CPU 1</li> <li>• PCIe* 4.0 support for up to 32 GB/s</li> </ul> <p><b>Riser Slot #3 supports the following Intel Riser Card option:</b></p> <ul style="list-style-type: none"> <li>• NVMe* riser card supporting (two) – PCIe* NVMe* SlimSAS* connectors iPC – CYPRISER3RTM</li> </ul> <p><b>Note:</b> Riser Slot #3 does not support add-In cards</p>

Feature	Details
<b>PCIe® NVMe® Support</b>	<ul style="list-style-type: none"> <li>Support for up to 10 PCIe® NVMe® Interconnects             <ul style="list-style-type: none"> <li>Eight server board SlimSAS® connectors, four per processor</li> <li>Two M.2 NVMe/SATA connectors</li> </ul> </li> <li>Additional NVMe® support through select Riser Card options (See Riser Card Support)</li> <li>Intel® Volume Management Device 2.0 (Intel® VMD 2.0) support</li> <li>Intel® Virtual RAID on CPU 7.5 (Intel® VROC 7.5) support using one of the three types of VROC keys (available as an Intel accessory option)</li> </ul>
<b>Video Support</b>	<ul style="list-style-type: none"> <li>Integrated 2D video controller</li> <li>128 MB of DDR4 video memory</li> <li>One VGA DB-15 external connector in the back</li> </ul>
<b>Server Board SATA Support</b>	<ul style="list-style-type: none"> <li>10 x SATA III ports (6 Gb/s, 3 Gb/s and 1.5 Gb/s transfer rates supported)             <ul style="list-style-type: none"> <li>Two M.2 connectors – SATA / PCIe®</li> <li>Two 4-port Mini-SAS HD (SFF-8643) connectors</li> </ul> </li> </ul>
<b>USB Support</b>	<ul style="list-style-type: none"> <li>Three USB 3.0 connectors on the back panel</li> <li>One USB 3.0 and one USB 2.0 connector on the front panel</li> <li>One USB 2.0 internal Type-A connector</li> </ul>
<b>Serial Support</b>	<ul style="list-style-type: none"> <li>One external RJ-45 Serial Port A connector on the back panel</li> <li>One internal DH-10 Serial Port B header for optional front or rear serial port support. The port follows the DTK pinout specifications.</li> </ul>
<b>Front Drive Bay Options</b>	<ul style="list-style-type: none"> <li>4 x 2.5" SAS/SATA/NVMe® hot swap drive bays</li> <li>12 x 2.5" SAS/SATA/NVMe® hot swap drive bays</li> </ul>
<b>Server Management</b>	<ul style="list-style-type: none"> <li>Integrated Baseboard Management Controller (BMC)</li> <li>Intelligent Platform Management Interface (IPMI) 2.0 compliant</li> <li>Redfish® compliant</li> <li>Support for Intel® Data Center Manager (DCM)</li> <li>Support for Intel® Server Debug and Provisioning Tool (SDPTool)</li> <li>Dedicated server board RJ45 1 GbE management port</li> <li>Light Guided Diagnostics</li> </ul>
<b>System Configuration and Recovery Jumpers</b>	<ul style="list-style-type: none"> <li>BIOS load defaults</li> <li>BIOS Password clear</li> <li>Intel® Management Engine firmware force update Jumper</li> <li>BMC force update</li> <li>BIOS SVN Downgrade</li> <li>BMC SVN Downgrade</li> </ul> <p>For more information, see the <i>Intel® Server Board M50CYP2SB Family Technical Product Specification (TPS)</i>.</p>
<b>Security Support</b>	<ul style="list-style-type: none"> <li>Intel® Platform Firmware Resilience (Intel® PFR) technology with an I<sup>2</sup>C interface</li> <li>Intel® Software Guard Extensions (Intel® SGX)</li> <li>Intel® CBnT – Converged Intel® Boot Guard and Trusted Execution Technology (Intel® TXT)</li> <li>Intel® Total Memory Encryption (Intel® TME)</li> <li>Trusted platform module 2.0 (Rest of World) – iPC J33567-151 (accessory option)</li> <li>Trusted platform module 2.0 (China Version) – iPC J12350-150 (accessory option)</li> </ul>
<b>Supported Rack Mount Kit Accessory Options</b>	<ul style="list-style-type: none"> <li><b>CYPHALFEXTRAIL</b> – Value Rack Mount Rail Kit</li> <li><b>CYPFULLEXTRAIL</b> – Premium Rail Kit with cable management arm (CMA) support</li> <li><b>AXXCMA2</b> – Cable Management Arm (supports <b>CYPFULLEXTRAIL</b> only)</li> </ul>

<b>Maximum Supported Processor Thermal Design Power (TDP)</b>	<ul style="list-style-type: none"> <li>3<sup>rd</sup> Gen Intel® Xeon® Scalable processors up to 270 W.</li> </ul> <p><b>Note:</b> The maximum supported processor TDP depends on system configuration.</p>
<b>Chipset</b>	<ul style="list-style-type: none"> <li>Intel® C621A Platform Controller Hub (PCH) chipset</li> </ul>
<b>Memory Support</b>	<ul style="list-style-type: none"> <li>32 DIMM slots <ul style="list-style-type: none"> <li>16 DIMM slots per processor, eight memory channels per processor</li> <li>Two DIMMs per channel</li> </ul> </li> <li>All DDR4 DIMMs must support ECC</li> <li>Registered DDR4 (RDIMM), 3DS-RDIMM, Load Reduced DDR4 (LRDIMM), 3DS-LRDIMM</li> </ul> <p><b>Note:</b> 3DS = 3 Dimensional Stacking</p> <ul style="list-style-type: none"> <li>Intel® Optane™ persistent memory 200 series</li> <li>Memory capacity <ul style="list-style-type: none"> <li>Up to 6 TB per processor (processor SKU dependent)</li> </ul> </li> <li>Memory data transfer rates <ul style="list-style-type: none"> <li>Up to 3200 MT/s at one or two DIMMs per channel (processor SKU dependent)</li> </ul> </li> <li>DDR4 standard voltage of 1.2 V</li> </ul>
<b>System Fans</b>	<ul style="list-style-type: none"> <li>Six managed 60 mm hot swap capable system fans</li> <li>Integrated fans included with each installed power supply module</li> </ul>
<b>Power Supply Options</b>	<p>The server system can have up to two power supply modules installed, supporting the following power configurations: 1+0, 1+1 redundant power, and 2+0 combined power.</p> <p>Three power supply options:</p> <ul style="list-style-type: none"> <li>AC 1300 W Titanium</li> <li>AC 1600 W Titanium</li> <li>AC 2100 W Platinum</li> </ul>
<b>Onboard Network Support</b>	Provided by optional Open Compute Project (OCP*) adapter support. See below.
<b>Open Compute Project* (OCP*) Adapter Support</b>	<p>Server board x16 PCIe* 4.0 OCP 3.0 Mezzanine connector (Small Form-Factor) slot supports the following Intel accessory options:</p> <ul style="list-style-type: none"> <li>Dual port, RJ45, 10/1 GbE - iPC- X710T2LOCPV3</li> <li>Quad port, SFP+ DA, 4x 10 GbE - iPC- X710DA4OCPV3</li> <li>Dual Port, QSFP28 100/50/25/10 GbE - iPC- E810CQDA2OCPV3</li> <li>Dual Port, SFP28 25/10 GbE - iPC-E810XXVDA2OCPV3</li> </ul>

Feature	Details
Riser Card Support	<p>Concurrent support for up to three riser cards with support for up to eight PCIe* add-in cards. In the below description FH = Full Height, FL = Full Length, HL = Half Length, LP = Low Profile.</p> <p><b>Riser Slot #1:</b></p> <ul style="list-style-type: none"> <li>• Riser Slot #1 supports x32 PCIe* lanes, routed from CPU 0</li> <li>• PCIe* 4.0 support for up to 64 GB/s</li> </ul> <p><b>Riser Slot #1 supports the following Intel Riser Card options:</b></p> <ul style="list-style-type: none"> <li>• Two PCIe* slot riser card supporting (one) - FH/FL double-width slot (x16 electrical, x16 mechanical) + (one) - FH/HL single-width slot (x16 electrical, x16 mechanical) iPC – CYP2URISER1DBL</li> <li>• Three PCIe* slot riser card supporting (one) - FH/FL single-width slot (x16 electrical, x16 mechanical) + (one) - FH/FL single-width slot (x8 electrical, x16 mechanical) + (one) - FH/HL single-width slot (x8 electrical, x8 mechanical) iPC – CYP2URISER1STD</li> <li>• NVMe* riser card supporting (one) – HL or FL single-width slot (x16 electrical, x16 mechanical) + (two) - x8 PCIe* NVMe* SlimSAS* connectors, each with a re-timer. iPC – CYP2URISER1RTM</li> </ul> <p><b>Riser Slot #2:</b></p> <ul style="list-style-type: none"> <li>• Riser Slot #2 supports x32 PCIe* lanes, routed from CPU 1</li> <li>• PCIe* 4.0 support for up to 64 GB/s</li> </ul> <p><b>Riser Slot #2 supports the following Intel Riser Card options:</b></p> <ul style="list-style-type: none"> <li>• Two PCIe* slot riser card supporting (one) - FH/FL double-width slot (x16 electrical, x16 mechanical) + (one) - FH/HL single-width slot (x16 electrical, x16 mechanical) iPC – CYP2URISER2DBL</li> <li>• Three PCIe* slot riser card supporting (one) - FH/FL single-width slot (x16 electrical, x16 mechanical) + (one) - FH/FL single-width slot (x8 electrical, x16 mechanical) + (one) FH/HL single-width slot (x8 electrical, x8 mechanical) iPC – CYP2URISER2STD</li> </ul> <p><b>Riser Slot #3:</b></p> <ul style="list-style-type: none"> <li>• Riser Slot #3 supports x16 PCIe* lanes, route from CPU 1</li> <li>• PCIe* 4.0 support for up to 32 GB/s</li> </ul> <p><b>Riser Slot #3 supports the following Intel Riser Card options:</b></p> <ul style="list-style-type: none"> <li>• Two PCIe* slot riser card supporting (two) LP/HL single-width slots (x8 electrical, x16 mechanical) iPC – CYP2URISER3STD</li> <li>• NVMe* riser card supporting (two) – PCIe* NVMe* SlimSAS* connectors with re-timers iPC – CYPRISER3RTM</li> </ul>
PCIe* NVMe* Support	<ul style="list-style-type: none"> <li>• Support for up to 10 PCIe* NVMe* Interconnects <ul style="list-style-type: none"> <li>◦ Eight server board SlimSAS* connectors, four per processor</li> <li>◦ Two M.2 NVMe/SATA connectors</li> </ul> </li> <li>• Additional NVMe* support through select Riser Card options (See Riser Card Support)</li> <li>• Intel® Volume Management Device (Intel® VMD) 2.0 support</li> <li>• Intel® Virtual RAID on CPU 7.5 (Intel® VROC 7.5) support using one of the three types of VROC keys (available as an Intel accessory option)</li> </ul>
Video Support	<ul style="list-style-type: none"> <li>• Integrated 2D video controller</li> <li>• 128 MB of DDR4 video memory</li> <li>• One VGA DB-15 external connector in the back</li> </ul>

Feature	Details
<b>Onboard SATA Support</b>	<ul style="list-style-type: none"> <li>• 10 x SATA III ports (6 Gb/s, 3 Gb/s and 1.5 Gb/s transfer rates supported)           <ul style="list-style-type: none"> <li>◦ Two M.2 connectors – SATA/PCIe*</li> <li>◦ Two 4-port Mini-SAS HD (SFF-8643) connectors</li> </ul> </li> </ul>
<b>USB Support</b>	<ul style="list-style-type: none"> <li>• Three USB 3.0 connectors on the back panel</li> <li>• One USB 3.0 and one USB 2.0 connector on the front panel</li> <li>• One USB 2.0 internal Type-A connector</li> </ul>
<b>Serial Support</b>	<ul style="list-style-type: none"> <li>• One external RJ-45 Serial Port A connector on the back panel</li> <li>• One internal DH-10 Serial Port B header for optional front or rear serial port support. The port follows DTK pinout specifications.</li> </ul>
<b>Front Drive Bay Options</b>	<ul style="list-style-type: none"> <li>• 8 x 2.5" SAS/SATA/NVMe* hot swap drive bays</li> <li>• 16 x 2.5" SAS/SATA/NVMe* hot swap drive bays</li> <li>• 24 x 2.5" SAS/SATA/NVMe* hot swap drive bays</li> <li>• 12 x 3.5" SAS/SATA hot swap drive bays (supports up to 4 NVMe* drives)</li> </ul>
<b>Server Management</b>	<ul style="list-style-type: none"> <li>• Integrated Baseboard Management Controller (BMC)</li> <li>• Intelligent Platform Management Interface (IPMI) 2.0 compliant</li> <li>• Redfish* compliant</li> <li>• Support for Intel® Data Center Manager (DCM)</li> <li>• Support for Intel® Server Debug and Provisioning Tool (SDPTool)</li> <li>• Support for Intel® Server Management Software</li> <li>• Dedicated server board RJ45 1 GbE management port</li> <li>• Light Guided Diagnostics</li> </ul>
<b>System Configuration and Recovery Jumpers</b>	<ul style="list-style-type: none"> <li>• BIOS load defaults</li> <li>• BIOS Password clear</li> <li>• Intel® Management Engine firmware force update Jumper</li> <li>• BMC force update</li> <li>• BIOS_SVN Downgrade</li> <li>• BMC_SVN Downgrade</li> </ul> <p>For more information, see the <i>Intel® Server Board M50CYP2SB Family Technical Product Specification (TPS)</i>.</p>
<b>Security Support</b>	<ul style="list-style-type: none"> <li>• Intel® Platform Firmware Resilience (Intel® PFR) technology with an I<sup>2</sup>C interface</li> <li>• Intel® Software Guard Extensions (Intel® SGX)</li> <li>• Intel® CBnT – Converged Intel® Boot Guard and Trusted Execution Technology (Intel® TXT)</li> <li>• Intel® Total Memory Encryption (Intel® TME)</li> <li>• Trusted platform module 2.0 (Rest of World) – iPC J33567-151 (accessory option)</li> <li>• Trusted platform module 2.0 (China Version) – iPC J12350-150 (accessory option)</li> </ul>
<b>Supported Rack Mount Kit Accessory Options</b>	<b>CYPHALFEXTRAIL</b> –Value Rack Mount Rail Kit <b>CYPFULLEXTRAIL</b> – Premium Rail Kit with cable management arm (CMA) support <b>AXXCMA2</b> – Cable Management Arm (supports <b>CYPFULLEXTRAIL</b> only)
<b>BIOS</b>	Unified Extensible Firmware Interface (UEFI)-based BIOS (legacy boot not supported)

## 1.6 Available Server Board, Chassis, and System SKU Summary

The following tables provide an overview of available Intel product codes for server boards and systems within the Intel® Server M50CYP family. Each line item identifies key features supported in the shipping Intel SKU. Additional order code information and full product descriptions for each option are provided in later sections.

The following terms are used in the tables:

- N/A:** Not applicable.
- Opt:** Accessory option sold separately.
- Yes:** Option included.
- BIK:** Intel term for integrated (L6 and L9) system product.
- L3:** Server System Building Block – Server board only
- L6:** Integrated system – Chassis and server board, with no processors, memory, power supply, or storage devices.

**Table 7. Server Board (L3) Family Summary**

Intel Product Code (iPC)	# of CPU sockets	# of DIMM Slots	# of Riser Slots	Onboard SATA ports (6 Gb)	Onboard NVMe* Ports	Intel® SAS RAID Module support	Intel® Ethernet Network Adapter for OCP* Support	Onboard Video	Onboard System Fan	EVAC Heat Sink Support
M50CYP2SB1U	2	32	3	8	8	Opt	Opt	Yes	8	Yes
M50CYP2SBSTD	2	32	3	8	8	Opt	Opt	Yes	6	No

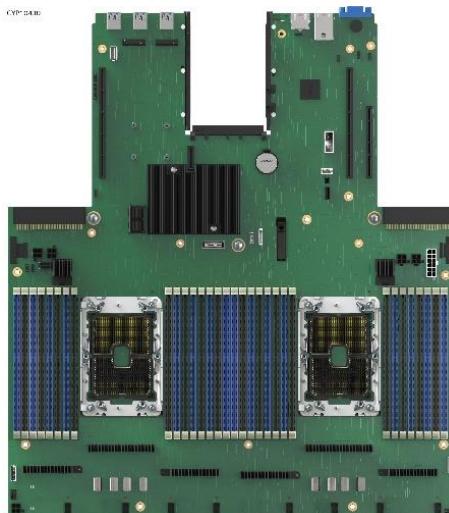

**Table 8. Server System (L6 BIK) Family Summary**

Intel Product Code (iPC)	Chassis Form Factor	Server Board Option	Drive Form Factor	# of Drives (front)	2.5" NVMe* Support	# of SSD Drives (internal fixed)	# of PCIe* Add-in Card Slots	Power Supply Modules	Rails	SAS RAID	SAS Expander	Memory Included	Processor Included
M50CYP1UR212	1U	M50CYP2SB1U	2.5"	12	Opt (up to 12)	N/A	3	Opt (up to 2)	Opt	Opt (up to 1)	Opt (up to 1)	No	No
M50CYP1UR204	1U	M50CYP2SB1U	2.5"	4	Opt (up to 4)	N/A	3	Opt (up to 2)	Opt	Opt (up to 1)	Opt (up to 1)	No	No
M50CYP2UR208	2U	M50CYP2SBSTD	2.5"	8, 16, 24	Opt (up to 24)	Opt (up to 2)	8	Opt (up to 2)	Opt	Opt (up to 1)	Opt (up to 1)	No	No
M50CYP2UR312	2U	M50CYP2SBSTD	3.5"	12	Opt (up to 4)	Opt (up to 2)	8	Opt (up to 2)	Opt	Opt (up to 1)	Opt (up to 1)	No	No

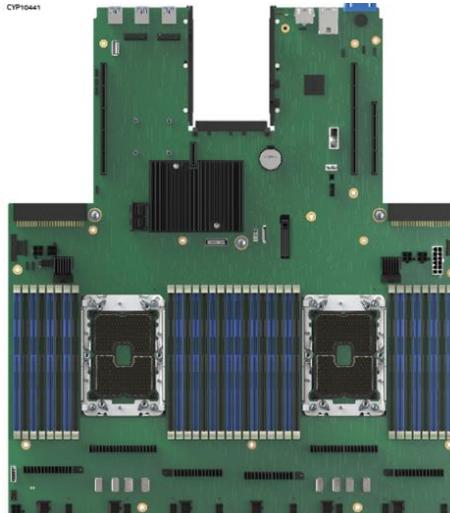

## 2. Server Board Options

Server board options are offered to create a custom system configuration from the board up. Each building block component and optional accessory is purchased separately and assembled by a system integrator. At a minimum, a base functional server system using building blocks requires the following:

- Server Chassis (Not sold by Intel)
- Intel® Server Board M50CYP2SB1U or M50CYP2SBSTD option
- Power supply module(s)
- SATA/NVMe\* data cables
- Power cord(s)
- Rack mount kit – rails or fixed mount
- Processor
- Memory
- Storage devices

Intel® Server Board M50CYP2SB1U

Intel® Server Board M50CYP2SBSTD

Power supply modules

PCIe\* riser cards

**Figure 15. Illustration of Building Block Options**

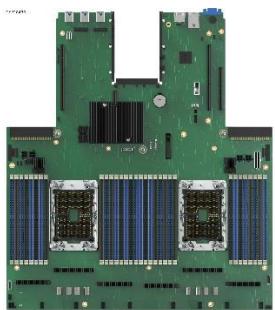

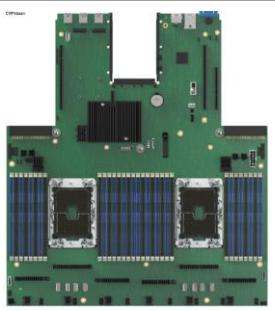

Optional Intel accessories that can be added include the following:

- PCIe riser card options
- Intel® SAS/SAS RAID support – PCIe\* add-in card and appropriate SAS data cable(s)
- Intel® Ethernet Network Adapter for OCP\* - to add additional features without losing a PCIe\* add-in slot

See [Chapter 5](#) for all available options.

## 2.1 Intel® Server Board M50CYP2SB Family Options

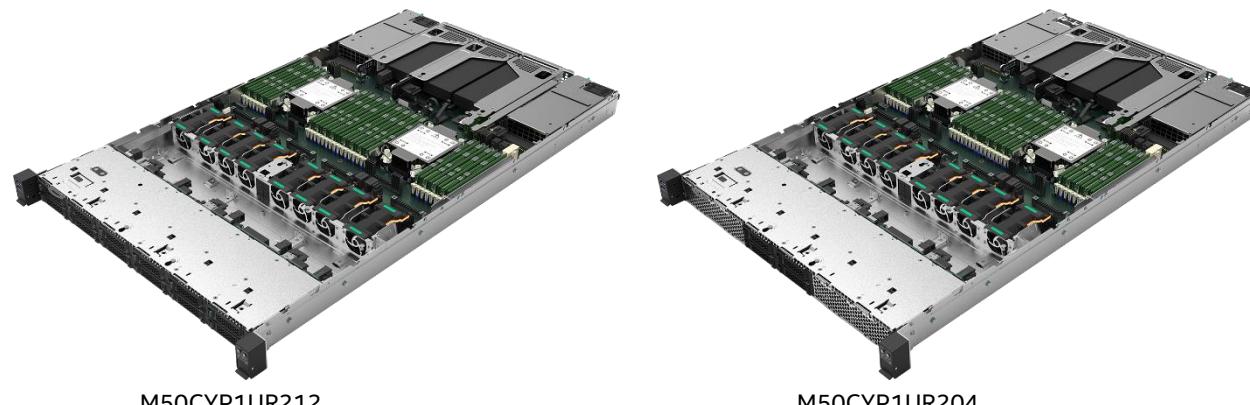

**Table 9. Intel® Server Board M50CYP2SB Family Options**

Product Image	Details	Description
	<p><b>Intel® Server Board M50CYP2SB1U</b></p> <p><b>iPC</b> M50CYP2SB1U  <b>MM#</b> 99A3TR  <b>UPC</b> 00735858471671  <b>EAN</b> 5032037210119  <b>MOQ</b> 1</p> <p><b>Product type</b> Server board only  <b>Packaged gross wt.</b> Building block/spare FRU  <b>Un-packed net wt.</b> 9.24 lbs.  <b>Un-packed net wt.</b> 4.95 lbs. (1 board)</p>	<p>See <a href="#">Table 4</a> for the complete feature set. Unique board features include:</p> <ul style="list-style-type: none"> <li>• (8) – Server board SlimSAS connectors, four per processor</li> <li>• (10) – SATA 6 Gbps ports including two M.2 SSD ports</li> <li>• Fans <ul style="list-style-type: none"> <li>- Eight 8-pin fan connectors</li> <li>- CPU fan headers (one for each CPU)</li> </ul> </li> <li>• 32 DIMM slots, 16 per processor</li> <li>• Support for Intel® Optane™ persistent memory 200 series</li> <li>• Intel® C621A chipset</li> <li>• Support for EVAC heat sink</li> </ul> <p><b>Box includes:</b> (1) server board</p> <p><b>Note:</b> All necessary mounting hardware, cabling, and shielding ship with the chassis and optional accessory kits.</p>
	<p><b>Intel® Server Board M50CYP2SBSTD</b></p> <p><b>iPC</b> M50CYP2SBSTD  <b>MM#</b> 99A5A0  <b>UPC</b> 00735858471664  <b>EAN</b> 5032037210102  <b>MOQ</b> 1</p> <p><b>Product type</b> Server board only  <b>Packaged gross wt.</b> Building block/spare FRU  <b>Un-packed net wt.</b> 40.2 lbs.  <b>Un-packed net wt.</b> 24.75 lbs. (5 boards)</p>	<p>See <a href="#">Table 5</a> for the complete feature set. Unique board features include:</p> <ul style="list-style-type: none"> <li>• (8) – Server board SlimSAS connectors, four per processor</li> <li>• (10) – SATA 6 Gbps ports including two M.2 SSD ports</li> <li>• Fans <ul style="list-style-type: none"> <li>- Six 6-pin fan connectors</li> <li>- Eight 8-pin fan connectors</li> <li>- CPU fan headers (one for each CPU)</li> </ul> </li> <li>• 32 DIMM slots, 16 per processor</li> <li>• Support for Intel® Optane™ persistent memory 200 series</li> <li>• Intel® C621A chipset</li> </ul> <p><b>Box includes:</b> (5) server boards</p> <p><b>Note:</b> All necessary mounting hardware, cabling, and shielding ship with the chassis and optional accessory kits.</p>

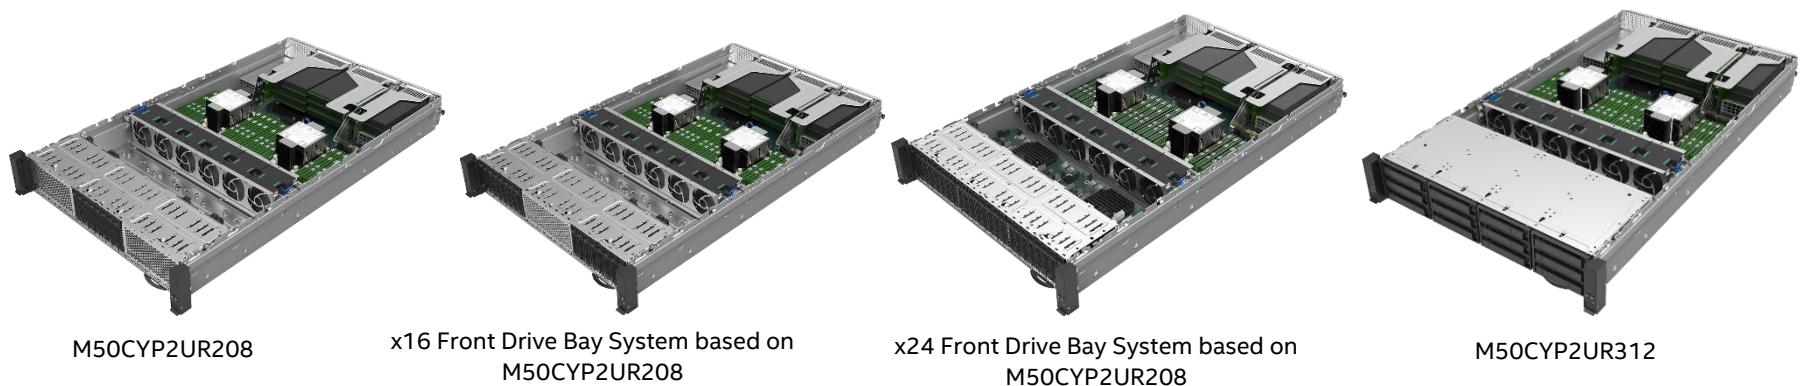

### 3. Server System Configurations

The Intel® Server M50CYP family includes several integrated server system options that include a 1U or 2U chassis with different hot swap drive bay configurations and a specific server board. At a minimum, building a functional server from one of these options requires the following:

- Rack mount kit – rails or fixed mount
- Power supply unit with power cords
- Processor(s)
- Memory
- Storage drives

**Figure 16. Intel® Server System M50CYP1UR Family Options**

**Figure 17. Intel® Server System M50CYP2UR Family Options**

Optional Intel accessories that can be added include:

- Second power supply module to add power redundancy
- Intel® RAID support – PCIe\* add-in card or module and appropriate SAS data cable(s)
- Intel® RAID Maintenance Free Backup unit – Intel RAID backup accessory
- Intel® Ethernet Network Adapter for OCP\* modules

See [Chapter 5](#) and [Chapter 6](#) for a full list of available options.

### 3.1 Intel® Server System M50CYP1UR Family – (1U Rack Mount System)

The product tables found in this section provide order code information and detailed descriptions for each available 1U L6 Intel Server System option. The lower sections of each table identify:

- **Included** – The ship along components of the specified chassis product code (product BOM).
- **Required items** – Hardware required to be installed to the base system to achieve basic functionality using the default system feature set. Required items are sold separately.
- **Optional accessories** – Some of the available accessories that can be installed to enhance the basic feature set of the server board/chassis. Optional accessories are sold separately. Additional accessories are in [Chapter 5](#).

---

**Note:** Items identified with an iPC (Intel Product Code) are orderable building block options, accessories, or spare Field Replaceable Units (FRUs). To provide the complete product bill of materials, the ship along components list in each product table include items identified by description and by iPN (Intel Part Number). The iPN information is provided for reference only. These components are not orderable as spares or accessories.

---

This product family offers two levels of server system integration:

- **L6** – Integrated system: Chassis and server board, with no processors, memory, or storage devices.

## 3.2 Intel® Server System M50CYP2UR Family – (2U Rack Mount System)

The product tables found in this section provide order code information and detailed descriptions for the specified L6 Integrated 2U Intel® Server System. The lower sections of each table identify:

- **Included** – The ship along components of the specified chassis product code – (product BOM)
- **Required Items** – The options required to be installed to the base system to achieve basic functionality using the default system feature set
- **Optional Accessories** – Some of the available accessories that can be installed to enhance the basic feature set of the server board / chassis. Additional accessories can be found in [Chapter 4](#)

### Notes:

- Each **required item** and **optional accessory** are sold separately for the specified Intel L6 server system
- Items identified as **iPC** (Intel Product Code) are an orderable building block option, accessory, or spare FRU
- To provide the complete product bill of materials, the ship along components list in each product table will include items identified by description and by **iPN** (Intel Part Number). The iPN information is provided for reference only. These components are **not** orderable as a spare or accessory.
- **L6** – Integrated system: Chassis and server board, with no processors, memory, or storage devices

## 4. SAS / SATA / NVMe\* Data Cable Guide

SAS/SATA/NVMe\* data cables are not included with any of the L3 or L6 SKUs. They must be ordered separately to match the desired system configuration.

Figure 18 through Figure 21 show the back side of the 1U and 2U backplane options. The backside of each installed backplane has a four-port SFF-8643 Mini-SAS HD data connector for each set of four SAS/SATA drives. Each port supports one SAS/SATA drive. The back side of each backplane also includes PCIe\* NVMe SlimSAS connectors to support PCIe NVMe drives. Drive numbers in the cable configuration tables match the specific cable connectors found on the given backplane.

**Figure 18. 2U 8 x 2.5" SAS / SATA / NVMe\* Hot-Swap Backplane – Back Side**

**Figure 19. 2U 12 x 3.5" HSBP Connector Identification – Back Side**

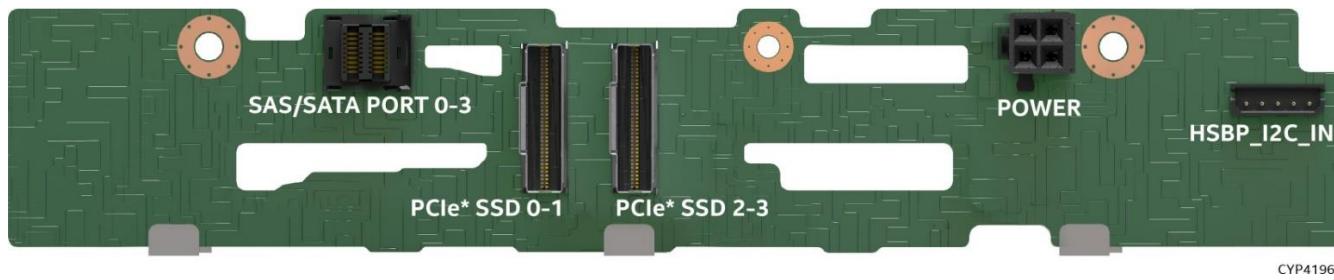

Figure 20. 1U 4 x 2.5" SAS / SATA / NVMe\* Hot Swap Backplane – Back Side

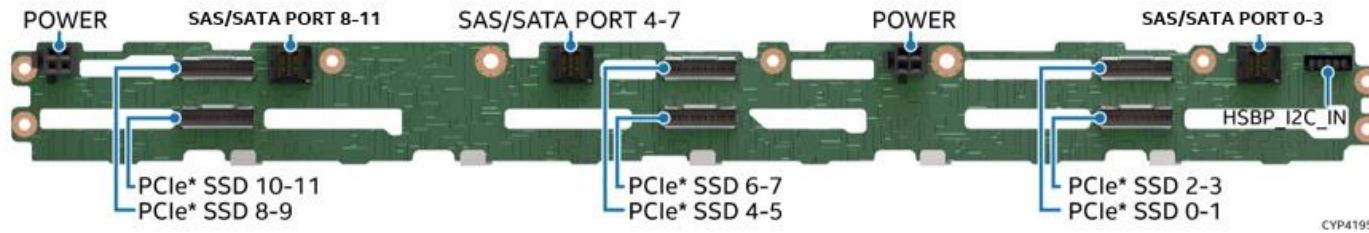

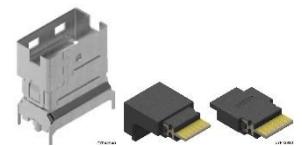

Figure 21. 1U 12 x 2.5" SAS / SATA / NVMe\* Hot Swap Backplane – Back Side

## 4.1 Data Cable Connector Types

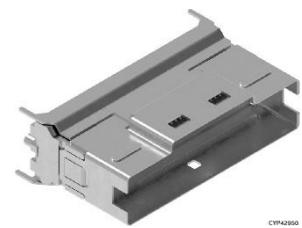

**Table 14. Multiport Mini SAS HD Cable Connectors**

Image	Description
	<p><b>SFF-8643 (mini SAS HD)</b>  Support for up to 12 Gb/Sec SAS  Where used: <ul style="list-style-type: none"> <li>On the server board – (2) 4-port SATA connectors (SATA 0–3 &amp; SATA 4–7)</li> <li>All 12 Gb/sec SAS capable hot swap backplanes</li> <li>All 12 Gb/sec SAS RAID Controllers</li> <li>12 Gb/sec SAS Expander Card</li> </ul> </p>

**Table 15. x4 PCIe\* SlimSAS Cable Connectors**

Image	Description
	<p><b>x4 SlimSAS connectors</b>  Support for PCIe NVMe SFF (2.5") SSDs  Where used: <ul style="list-style-type: none"> <li>On the server board – 8 connectors (4 per processor)</li> <li>On 2U 3.5" SAS/SATA/NVMe backplane</li> </ul> </p>

**Table 16. x8 PCIe\* SlimSAS Cable Connectors**

Image	Description
	<p><b>x8 SlimSAS connector</b>  Support for PCIe NVMe SFF (2.5") SSDs  Where used:  <b>HSBP Options:</b> <ul style="list-style-type: none"> <li>4 x 2.5" SAS/SATA/NVMe* hot swap backplane</li> <li>12 x 2.5" SAS/SATA/NVMe* hot swap backplane</li> <li>8 x 2.5" Drive SAS/SATA/NVMe* Combo backplane</li> </ul> <b>Riser Card Options:</b> <ul style="list-style-type: none"> <li>Interposer riser card option – iPC <b>CYP1URISER2KIT</b></li> <li>1U/2U PCIe* NVMe* riser card, Riser Slot #3 – iPC <b>CYPRISER3RTM</b></li> <li>PCIe* NVMe* riser card for Riser Slot #1 – iPC <b>CYP2URISER3RTM</b></li> </ul> </p>

## 4.2 1U / 2U Server System SAS / SATA / NVMe\* Cable Kits

The following table identifies the different data cable connector types and the identifiers used in the cable kit product codes.

Product tables in this section reference specific SAS/SATA and NVMe cables. Different cable kits are offered to support specific system configurations. The product order code for each cable kit is made up of a string of letters and numbers to identify the type of cable included in the kit.

The following table identifies the different data cable connector types and the identifiers used in the cable kit product codes.

**Table 17.Data Cable Connector Identification**

Connector Image	Cable Connector Type	Description
	RA Mini-SAS HD	Right angle SFF-8643 (mini SAS HD) connector
	VT Mini-SAS HD	Straight/Vertical SFF-8643 mini SAS HD connector
	RS Mini-SAS HD	Right side SFF-8643 mini SAS HD connector
	LS Mini-SAS HD	Left side SFF-8643 mini SAS HD connector
	VT X4 SlimSAS	Straight/Vertical X4 SlimSAS PCIe NVMe connector
	RA X4 SlimSAS	Right angle X4 SlimSAS PCIe NVMe connector
	RRA X4 SlimSAS	Reversed right angle X4 SlimSAS PCIe NVMe connector
	VT X8 SlimSAS	X8 SlimSAS PCIe NVMe connector

## 4.2.1 Cable Kit Product Code Decoder Examples

Abbreviation	Description
CBL	Cable
COMM	Common Cables
Kit	Data cable kit
CYP	Intel Server System M50CYP Family
INT	SAS Interposer
RT	Riser with re-timer
HD	Mini-SAS HD Connector
SL	SlimSAS connector

### SAS/SATA Data Cable Example – iPC **CYPCBLHDHDXXX**

- CYPCBL – Identifies a M50CYP accessory cable kit
- HD – Identifies that both ends of the cable are Mini-SAS HD SFF-8643 type connector

### NVMe SlimSAS Cable Example – iPC **CYPCBLSL104KIT**

- CYPCBL – Identifies a M50CYP accessory cable kit
- SL – Identifies that both ends of cable have SlimSAS connector type
- 104 – Identifies that the cable kit is for 1U x4 front drive bay system

## 4.2.2 Cable Kit Order Information

**Note:** A splitter cable is a cable that has two or more connectors on one end.

**Table 18. SAS/SATA/NVMe\* Data Cable Kit Description and Order Information**

#### 4.2.3 Cable Recommendations

Each table in the following sections identifies the cable connections and recommended cable lengths for each supported storage controller option in the specified system. Each recommended cable length for a given connector pair provides enough cable to attach the two devices and provides the least amount of excess cable, providing the cleanest cable routing.

Refer to the following diagrams when **Right** or **Left** cable routing is specified for a given cable configuration. All cable recommendations are for a system configured for two processors.

**2U Server System Cable Routing**

**1U Server System Cable Routing**

**Figure 22. Server System Cable Routing**

## 4.5 2U 2.5" Front Mount Drive Bay Cable Guide

The 2U 2.5" system can support up to 24 front drive bays using three 8 x 2.5" SAS/SATA NVMe drive combo backplanes.

The 2U 2.5" system supports the following system configurations: 8 drives (**M50CYP2UR208**), 16 drives (**M50CYP2UR208 + 8 Drive Accessory Kit**), or 24 drives (**M50CYP2UR208 + two 8 Drive Accessory Kits**).

The front side of the backplane includes eight 68-pin SFF-8639 drive interface (U.2) connectors, each capable of supporting SAS, SATA, or NVMe\* drives. The connectors are labeled "SSD\_0" through "SSD\_7".

The backside of the backplane includes two multiport Mini-SAS HD connectors labeled "SAS/SATA PORT 0–3" and "SAS/SATA PORT 4–7", and four x8 PCIe\* SlimSAS\* connectors, labeled "PCIe\* SSD 0–1", "PCIe\* SSD 2–3", "PCIe\* SSD 4–5", and "PCIe\* SSD 6–7". Each x8 PCIe\* SlimSAS\* connector is routed to two U.2 connectors on the front side. For example, PCIe\* SSD 0–1 is routed to SSD\_0 and SSD\_1.

### 4.5.1 M50CYP2UR208 SAS / SATA / NVMe\* Data Cable Guide for up to 8 Front Drive Bays

---

**Note:** Drive numbering in the system illustrations is for general reference only. Actual drive numbering is dependent on SAS/SATA controller configuration and how they are cabled to the backplane.

---

#### 4.5.2 M50CYP2UR 16 x 2.5" SAS / SATA / NVMe\* Data Cable Guide

---

**Note:** For M50CYP2UR 16 x 2.5" configurations, ensure the ventilation blank is installed in the middle of the chassis as shown in the following figure.

---

**Note:** Drive numbering in the system illustrations is for general reference only. Actual drive numbering is dependent on SAS/SATA controller configuration and how they are cabled to the backplane.

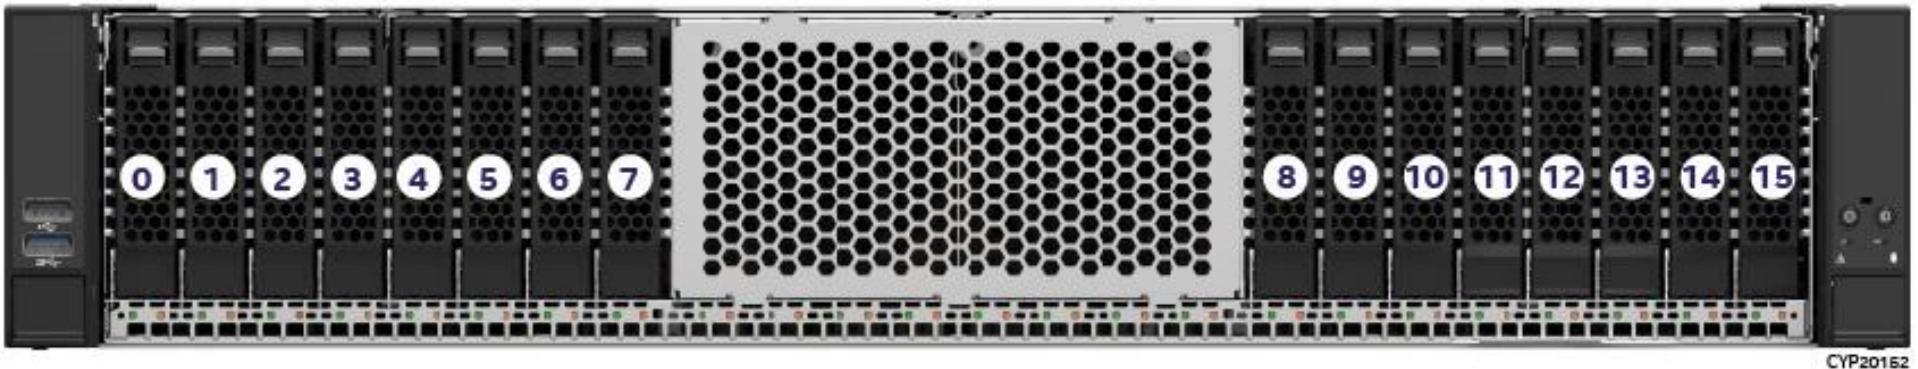

Figure 25. 2U 16 x 2.5" Front Drive Bay Configuration

The following accessory kits are needed to convert a M50CYP2UR208 system into a 9–16 front drive bay configuration.

- (1) 8 x 2.5" Hot Swap backplane kit **CYPHSBP2208**
- (8) 2.5" front drive bay module **CYP25HSCARRIER**

---

**Note:** Support for connectivity between 12 Gb SAS RAID PCIe add-in card and SAS Expander card is planned as part of post product launch release.

---

### 4.5.3 M50CYP2UR 24 x 2.5" SAS / SATA / NVMe\* Data Cable Guide

**Note:** Drive numbering in the system illustrations is for general reference only. Actual drive numbering is dependent on SAS/SATA controller configuration and how they are cabled to the backplane

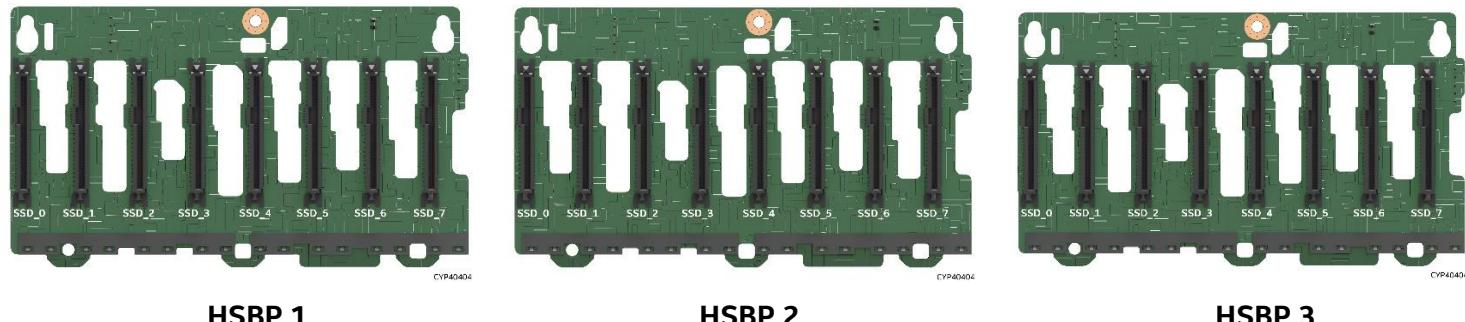

**Figure 27. 2U 24 x 2.5" M50CYP2UR208 Front Drive Bay Configuration**

The following accessory kits are needed to convert a M50CYP2UR208 system into a 17– 24 front drive bay configuration.

- (2) 8 x 2.5" Hot Swap backplane kit CYPHSBP2208
- (16) 2.5" front drive bay module CYP25HSCARRIER

**Note:** Support for connectivity between 12 Gb SAS RAID PCIe add-in card and SAS Expander card is planned as part of post product launch releases.

**Figure 28. 2U 2.5" x 24 System HSBP Enumeration**

## 5.2 Intel® Ethernet Network Adapters for OCP\*

The server system supports several types of Intel® Ethernet Network Adapters (see [Table 29](#)). These adapters are compatible with the Open Compute Project\* (OCP\*) 3.0 specification. The OCP-compatible modules are mounted to a high-density 168-pin mezzanine connector on the server board labeled “OCP\_IO\_Module”. The following figure shows the OCP\* adapter placement on the server board.

---

**Note:** The Intel® Server M50CYP family only supports Intel® Ethernet Network Adapters for OCP\* that are listed in [Table 29](#).

---

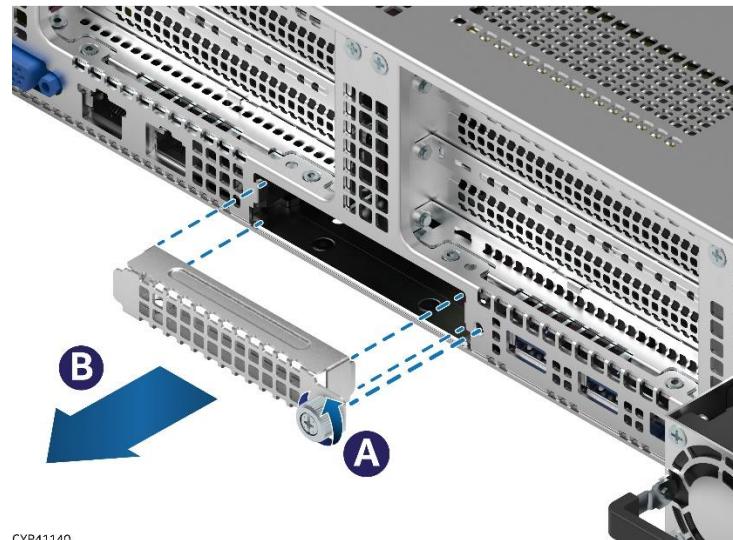

**Figure 30. Intel® Ethernet Network Adapter Placement**

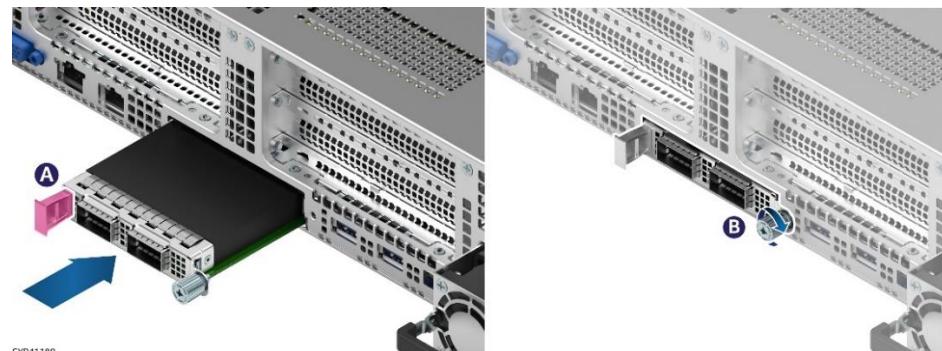

All OCP\* module types support one of the three engagement mechanisms: pull tab, ejector latch, and internal lock. The engagement mechanism refers to the mechanism required to install / remove the OCP\* module.

OCP\* modules supported by the Intel® Server M50CYP family are installed into an OCP bay in the back of the server chassis. The modules are installed from the outside of the chassis. The following shows the installation of the pull tab engagement mechanism.

First remove the bay filler panel (see [Figure 31](#)). Then, carefully slide the module into the bay until it is fully seated in the OCP slot on the server board and is locked in place (see [Figure 32](#)). For more information on OCP\* module installation and removal of each OCP\* module type, see the *Intel® Server System M50CYP2UR Family System Integration and Service Guide* or *Intel® Server System M50CYP1UR Family System Integration and Service Guide*.

**Figure 31. OCP\* Module Bay Filler Removal (2U System Shown)**

**Figure 32. OCP\* Module with Pull tab Installation (2U System Shown)**

### 5.3.3 Intel® VROC Keys

Three supported types of Intel® VROC Keys are shown in the following table.

**Table 32. Optional VROC 7.5 Upgrade Key - Supported NVMe\* RAID Features**

NVMe* RAID Major Features	Standard Intel® VROC 7.5 Key (iPC VROCSTANMOD)	Premium Intel® VROC 7.5 Key (iPC VROCPREMMOD)	Intel® SSD Only VROC 7.5 Key (iPC VROCISSDMOD)
<b>Processor-attached NVMe* SSD – high performance</b>	Yes	Yes	Yes
<b>Boot on RAID volume</b>	Yes	Yes	Yes
<b>Third party vendor SSD support</b>	Yes	Yes	No
<b>RAID 0/1/10</b>	Yes	Yes	Yes
<b>RAID 0/1/5/10</b>	No	Yes	Yes
<b>RAID write hole closed (RMFBU replacement)</b>	No	Yes	Yes
<b>Hot plug/ surprise removal (2.5" SSD form factor only)</b>	Yes	Yes	Yes
<b>Enclosure LED management</b>	Yes	Yes	Yes

**Table 33. Intel® VROC Key Option**

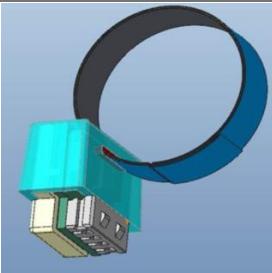

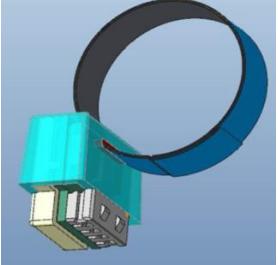

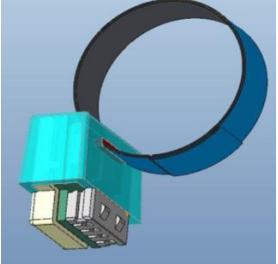

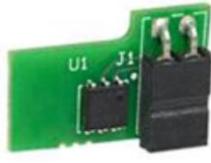

Image	Details	Description
	<b>Standard Intel® VROC Key</b> <b>iPC</b> VROCSTANMOD <b>MM#</b> 951605 <b>UPC</b> 00735858337243 <b>EAN</b> 5032037100007 <b>MOQ</b> 1  <b>Product type</b> 1U/2U building block/spare FRU 1U/2U accessory kit	<b>Intel® VROC 7.5 Key for 1U/2U systems</b> <b>Kit includes:</b> (1) – Standard Intel® VROC 7.5 key

## 5.5 1U / 2U Rack Mount Kits

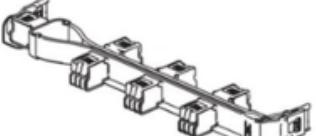

**Advisory Note:** Available rack and cabinet mounting kits are not designed to support shipment of the server system while installed in a rack. If you choose to do so, Intel advises verification of your shipping configuration with appropriate shock and vibration testing before shipment. Intel does not perform shipping tests that cover the complex combination of unique rack offerings and custom packaging options.

**Caution:** Exceeding the specified maximum weight limit of a given rail kit or misalignment of the server in the rack may result in failure of the rack rails, damaging the system or causing personal injury. Using two people or the use of a mechanical assist tool to install and align the server into the rack is highly recommended.

**Caution:** Exceeding the rail kit's specified maximum weight limit or misalignment of the server in the rack may result in failure of the rack rails. This situation could damage the system or cause personal injury. Using two people or the use of a mechanical assist tool to install and align the server into the rack is highly recommended.

**Table 36. Rack Mount Kits**

Image	Details	Description
	<b>1U/2U Full Extension Rail Kit</b> <b>iPC</b> CYPFULLEXTRAIL <b>MM#</b> 999ZCN <b>UPC</b> 00735858447096 <b>EAN</b> 5032037188180 <b>MOQ</b> 1  <b>Product type</b> 2U accessory kit	<b>CYPFULLEXTRAIL</b> – Premium Rail Kit with cable management arm (CMA) support <ul style="list-style-type: none"> <li>• 1U, 2U compatible</li> <li>• Tool-less installation</li> <li>• Rack installation front and rear post distance adjustment from 623 mm ~ 942 mm</li> <li>• 820 mm travel distance</li> <li>• Full extension from rack</li> <li>• 31 Kgs (68.34 lbs.) maximum supported weight</li> <li>• Support for Cable Management Arm AXXCMA2</li> </ul>

For more information, see the <i>Intel® Server Board M50CYP2SB Family Technical Product Specification</i>.</p>

## 7. 1U / 2U Spare and Replacement Parts (FRUs)

System integrators and distributors may choose to hold additional stock of individual system components. Intel makes available the following spare and replacement parts (FRUs) compatible with the specified Intel® server family.

**Table 38. Spare and Replacement Parts**

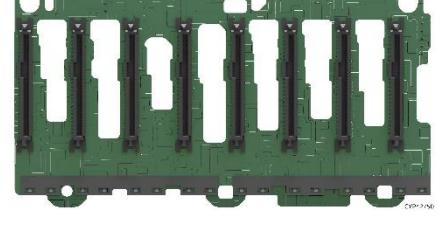

Image	Details	Description
	<b>1U 4 x 2.5" Spare Hot Swap Backplane</b> <b>iPC</b> CYPHSBP1204 <b>MM#</b> 99A3NM <b>UPC</b> 00735858471800 <b>EAN</b> 5032037210249 <b>MOQ</b> 1  <b>Product type</b> 1U spare FRU	<p>Hot swap backplane board spare supporting SAS/SATA and NVMe* drives in the M50CYP1UR204 system.</p> <p><b>Kit Includes:</b>          (1) – Backplane board.</p>
	<b>1U 12 x 2.5" SAS/SATA/NVMe Hot Swap Backplane</b> <b>iPC</b> CYPHSBP1212 <b>MM#</b> 99A3NN <b>UPC</b> 00735858471817 <b>EAN</b> 5032037210256 <b>MOQ</b> 1  <b>Product type</b> 1U spare FRU	<p>Hot swap backplane board spare supporting SAS/SATA and NVMe* drives in the M50CYP1UR212 system.</p> <p><b>Kit Includes:</b>          (1) – Backplane board.</p>
	<b>2U 8 x 2.5" Hot Swap Backplane</b> <b>iPC</b> CYPHSBP2208 <b>MM#</b> 99A3NF <b>UPC</b> 00735858471787 <b>EAN</b> 5032037210225 <b>MOQ</b> 1  <b>Product type</b> 2U spare FRU	<p>Hot swap backplane board spare supporting SAS/SATA and NVMe* drives in the M50CYP2UR208-based systems.</p> <p><b>Kit Includes:</b>          (1) – Backplane board.          (1) – <b>75 mm</b> cable, HSBP I<sup>2</sup>C connector to HSBP I<sup>2</sup>C connector                    (5 pin to 5 pin)          (1) – <b>250 mm</b> cable, server board I<sup>2</sup>C connector (Left) to HSBP I<sup>2</sup>C connector                    (Left) (5 pin to 5 pin)          (1) – <b>350 mm</b> cable, server board I<sup>2</sup>C connector (Left) to HSBP (Middle) I<sup>2</sup>C                    connector (5 pin to 5 pin)       </p>

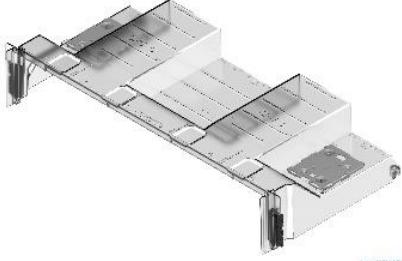

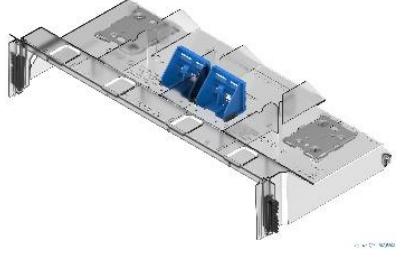

Image	Details	Description
	<b>12 x 3.5" SAS/SATA/NVMe Hot Swap Backplane</b> <b>iPC</b> CYPHSBP2312 <b>MM#</b> 99A3NL <b>UPC</b> 00735858471794 <b>EAN</b> 5032037210232 <b>MOQ</b> 1  <b>Product type</b> 2U spare FRU	Combination hot swap backplane board spare supporting SAS and NVMe* drives in the M50CYP2UR312 systems. <b>Kit Includes:</b> (1) – Backplane board.
	<b>2U Tall Air Duct</b> <b>iPC</b> BRPDUCTSTD <b>MM#</b> 99A3NW <b>UPC</b> 00735858471633 <b>EAN</b> 5032037210072 <b>MOQ</b> 1  <b>Product Type</b> 2U spare FRU	Air duct for 2U-Tall heat sink <b>Kit Includes:</b> (1) – Air duct with holders for full length add-in cards. (2) – Intel® RAID Maintenance Free Backup Unit (RMFBU) bracket installed on top of air duct.

## Appendix A. Glossary

Term	Definition
<b>BIK</b>	Baseboard In Knock-Down-Kit – Integrated System
<b>CMA</b>	Cable Management Arm
<b>CRPS</b>	Common Redundant Power Supply
<b>DDDC</b>	Double Device Data Correction
<b>EAN</b>	International Article Number (Barcode)
<b>ECC</b>	Error Correcting Code
<b>EMI</b>	Electromagnetic Interference
<b>FRU</b>	Field Replaceable Unit
<b>GPGPU</b>	General Purpose computing on Graphics Processing Unit
<b>iPC</b>	Intel Product Code
<b>iPN</b>	Intel Product Number
<b>JBOD</b>	Just a bunch of drives
<b>L6 BIK</b>	Integrated system with no processors, memory, or storage devices installed
<b>L9 BIK</b>	Integrated system including storage devices, but no processors or memory
<b>KDK</b>	Knock-Down-Kit – (Chassis only product)
<b>KVM</b>	Keyboard, Video, Mouse
<b>MM#</b>	Master Material order number
<b>MOQ</b>	Minimum Order Quantity
<b>NVMe*</b>	NVM Express* – based on Non-Volatile Memory Host Controller Interface Specification (NVMHCl)
<b>ODD</b>	Optical disk drive
<b>Intel® OP HFI</b>	Intel® Omni-Path Host Fabric Interface
<b>Optional Accessory</b>	Hardware that can be added to the system to enhance the default feature set of the shipping configuration
<b>PCBA</b>	Printed Circuit Board Assembly
<b>QSFP</b>	Quad Small Form Factor Pluggable
<b>RAID</b>	Redundant Array of Independent Drives
<b>Required Option</b>	Hardware that must be added to the shipping configuration for the system to operate
<b>RMFBU</b>	RAID Maintenance Free Backup Unit
<b>ROC</b>	RAID on Chip
<b>RA</b>	Right Angle cable connector position
<b>RRA</b>	Reverse Right Angle cable connector position
<b>SAS</b>	Serial Attached SCSI

Term	Definition
SATA	Serial ATA
SFF NVMe*	NVMe SSD in a 2.5" form factor
SFF	Small Form Factor
SFP	Small Form factor Pluggable
SKU	Stock Keeping Unit
SSD	Solid State Drive
TPM	Trusted Platform Manager
UPC	Universal Product Code (Barcode)
VT	Vertical connector position (also known as horizontal, straight)
Intel® VCA	Intel® Visual Compute Accelerator
Intel® VROC	Intel® Virtual RAID on CPU
PCN	Product Change Notification
