

QD lock to firmly attach to
your headset bottom cable

AL10™ Smart Limiter

Noise@Work compliance with
your Plantronics professional
corded headsets.

Simply add the AL10 in-line limiter with your Plantronics® professional headset.
Helps businesses comply with the latest EU Noise@Work legislation by keeping
headset daily noise exposure level below the 85dBA legislative limit*.

IDEAL FOR:

- Contact Centres that are concerned about compliance with the EU Noise@Work legislation

AL10™ Smart Limiter

Contact centre compliance. To help meet the EU Noise@Work legislation requirements, simply add the AL10 to the following Plantronics headsets, fitted with a Quick Disconnect™ (QD) – SupraPlus®, EncorePro™ and Entera™.

KEY FEATURES

Noise at Work compliance

- Helps businesses comply with EN 2003/10/EC European directive (Noise@Work legislation) by keeping headset daily noise exposure level below the 85dBA legislative limit*.

Universal fit

- For simplicity of installation, AL10 can be installed in any orientation either to the headset or bottom cable QD connectors. We recommend the AL10 is attached to the bottom cable in case of hot desking requirement.

No additional power requirements

- The AL10 only requires a tiny amount of power and uses the AC power which is surplus in the telephone receive line without having any noticeable effect on speech quality.

Security

- Included QD lock to permanently attach the AL10 in-line with your Plantronics professional corded headset. The AL10 fits in between the headset and bottom cable using the Quick Disconnect. The QD lock prevents the user from accidentally removing the AL10 from the bottom cable.

ADDITIONAL INFORMATION

Connects to	SupraPlus, EncorePro, Entera
Ideal for	Contact Centres that are concerned about compliance with the EU Noise@Work legislation
TWA (time weighted average)	85dBA (average over 8 Hours)
