Status Icon Information

Your product displays status icons on the LCD screen for certain product status conditions.

Icons	Description
	Displays the maintenance box status screen.

Icons	Description
	Displays the network connection status; select the icon to set up or change your network connection. • The product is not connected to a wired (Ethernet) network. • The product is connected to a wired (Ethernet) network. • The product is not connected to a wireless network. • The product is searching for an SSID or experiencing a wireless network connection issue. • The product is connected to a wireless network; the number of bars indicates the connection's signal strength. • Wi-Fi Direct is not enabled. • Wi-Fi Direct is enabled.
	The **Quiet Mode** setting is enabled or disabled. Select the icon to change the setting. Depending on the selected paper type and print quality, when this feature is enabled noise is reduced during printing, but print speed may also be reduced.
	Press this icon to enable sleep mode and turn off the LCD screen.
	Indicates that the user restriction feature is enabled. You need to select a user name and then enter a password. Contact your printer administrator for login information. When enabled, a user with access permission has logged in. Select the icon to logout.
	Displays the **Fax Data Information** screen.
	Displays additional information or instructions, such as loading paper or placing a document on the scanner; select the icon to display the information.
	There is a problem with the indicated setting; select the icon for information on resolving the problem.

Parent topic: Control Panel Buttons and Lights

Entering Characters on the LCD Screen

Follow these guidelines to enter characters for passwords and other settings.
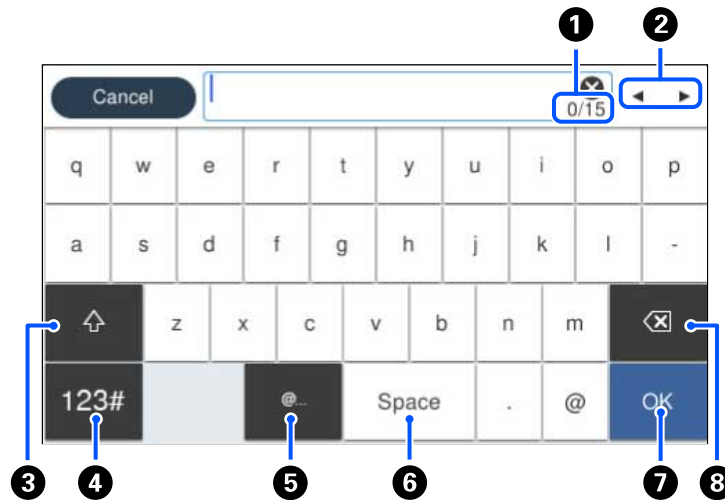

1	Displays the character count
2	Moves the cursor left or right
3	Switches between uppercase and lowercase characters, numbers and symbols
4	Switches between characters and numbers or symbols
5	Displays a list of common domain names to choose from
6	Enters a space
7	Select when you are finished
8	Deletes the previous character

Job/Status Screen

You can press the ⓘ **Job/Status** button to view the status of your product or print jobs.
1   Select to view active jobs or the job history

2   Select a job filter

3   Displays a list of ongoing jobs or the job history

4   Displays approximate maintenance box level

5   Displays any errors; select the error for details

Parent topic: Control Panel Buttons and Lights

Viewing Animations

You can view animations on the LCD screen to help guide you with a procedure or to troubleshoot a problem.

1. Select the ⓘ help icon.

2. Select **Troubleshooting** if you are experiencing a problem or **How To** to view instructions on common procedures.

3. Select a topic from the list of available topics and follow the on-screen instructions.

Parent topic: Control Panel Buttons and Lights

Selecting the Date and Time

Before using your product, select the current date, time, and daylight saving phase in your area, and choose your preferred date and time format.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Basic Settings** > **Date/Time Settings**.

   You see a screen like this:
3. Select **Daylight Saving Time**.

4. Select the setting that applies to your area:

   • **Winter**: it is winter or your region does not use Daylight Saving Time (DST)

   • **Summer**: it is spring or summer and your region uses Daylight Saving Time (DST)

   Note: If your region uses Daylight Saving Time (DST), you must change this setting to match the season. When you change from **Winter** to **Summer**, your product automatically sets its clock ahead one hour. When you change from **Summer** to **Winter**, it sets its clock back one hour.

5. Select **Date/Time**.

6. Select the date format you want to use.

7. Use the numeric keypad to enter the current date.

8. Select the time format you want to use.

9. Use the numeric keypad to enter the current time.

Parent topic: Using the Control Panel

Selecting Your Country or Region

Before using your product, select the country or region in which you are using your product.

Note: If you change the country or region, your fax settings return to their defaults, and you must select them again. This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Basic Settings** > **Country/Region**.

   You see a screen like this:
3. Scroll up or down, if necessary, and select your country or region.

   You see a confirmation screen.

4. If the setting is correct, select **Yes**. (If not, select **No** and retry.)

Parent topic:

Setting a Password and Locking the Control Panel

You can set an administrator password to lock the following settings and prevent them from being changed:

- Network settings
- Web Service settings
- Scan settings
- System Administration settings
- Fax settings
- Web Config settings
- EpsonNet Config settings

Note: For more information on administration settings, see the *Administrator's Guide*.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **System Administration** > **Security Settings** > **Admin Settings** > **Admin Password** > **Register**.

    You see a screen like this:
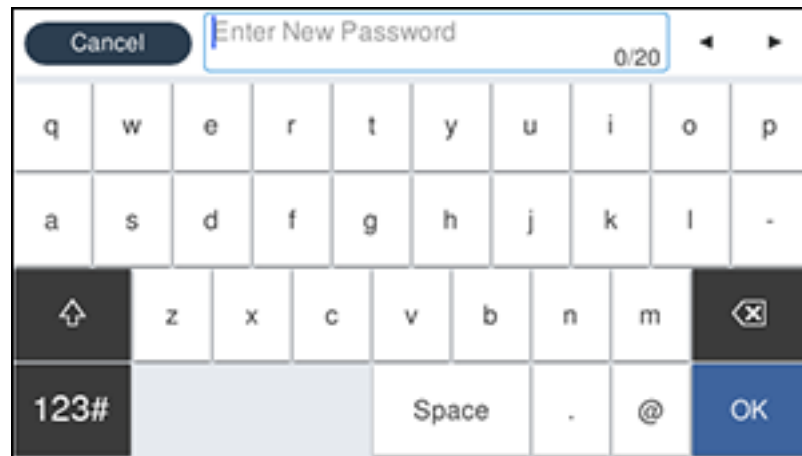

3. Use the displayed keyboard to enter a password and select **OK**.

4. Enter your password again to confirm.

    Note: Keep a copy of your password in a safe place.

5. Select **OK**.

6. Turn **Lock Setting** on.

When the control panel is locked, you must enter the password to access any of the locked settings.

Note: If you forget your password, contact Epson for assistance.

Using Presets

Parent topic: Using the Control Panel

Related tasks

Setting User Feature Restrictions (Access Control)

Using Presets

You can save frequently used copy, fax, and scan settings as presets. This lets you easily reuse them whenever necessary.

Note: The presets can be locked by an administrator. If you cannot access or change presets, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Presets**.

You see a screen like this:

> Presets
>
> No Presets.
> Add a new preset.
>
> Add New
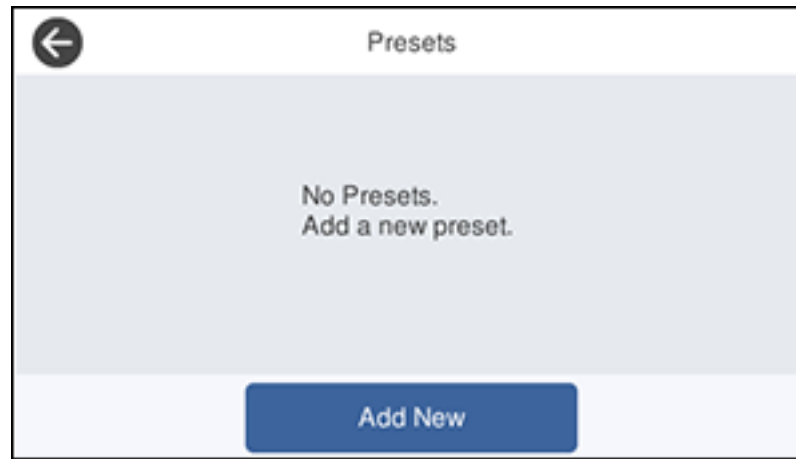

3. Select **Add New**. Enter the Administrator password, if necessary.
   Note: You can save up to 50 presets.

4. Select the function for which you want to set up a preset.

   You see the main screen for that function, such as the Copy screen:
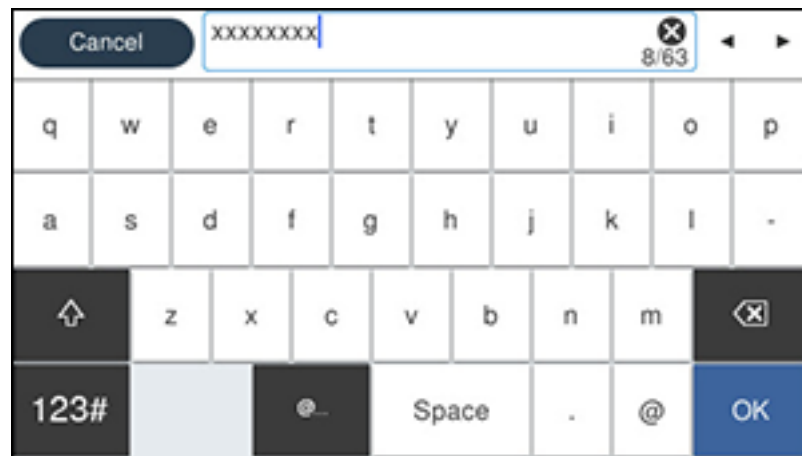

5. Select the settings you want to save and select **Register**.

   You see a screen like this:

6. Select **Name**.

   You see a screen like this:

7. Use the displayed keyboard to enter a name for the preset and select **OK**.

8. Select **OK**.

When you copy, fax, or scan, you can use the preset by selecting **Presets** and selecting your preset name from the list.

Setting User Feature Restrictions (Access Control)

Using Web Config Access Control Settings, you can restrict product features for individual users to prevent misuse of the product. To access restricted features, the user must enter an ID and password on the product control panel.

After you setup feature restrictions, you must enable them using the product control panel.

Note: For more information on administration settings, see the *Administrator's Guide*.

1. Press the ⌂ home button, if necessary.
2. Select **Settings** > **General Settings**.

   You see a screen like this:

3. Scroll down and select **System Administration** > **Security Settings** > **Access Control**.

4. Select **On**.

5. Enable **Accept Unknown User Jobs** to allow users to print from generic drivers or use the WSD scanning function.

Parent topic: Using the Control Panel

Entering a User ID and Password for Printing

Changing LCD Screen Language

You can change the language used on the LCD screen.

Note: An administrator can lock this setting. If you cannot access or change it, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings**.

   You see a screen like this:
3. Select **Basic Settings**.

4. Scroll down and select **Language**.

5. Select a language.

Parent topic:

Adjusting Control Panel Sounds

You can adjust the sound level heard when you press buttons on the control panel.

Note: An administrator can lock this setting. If you cannot access or change it, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Basic Settings** > **Sounds**.

   You see a screen like this:
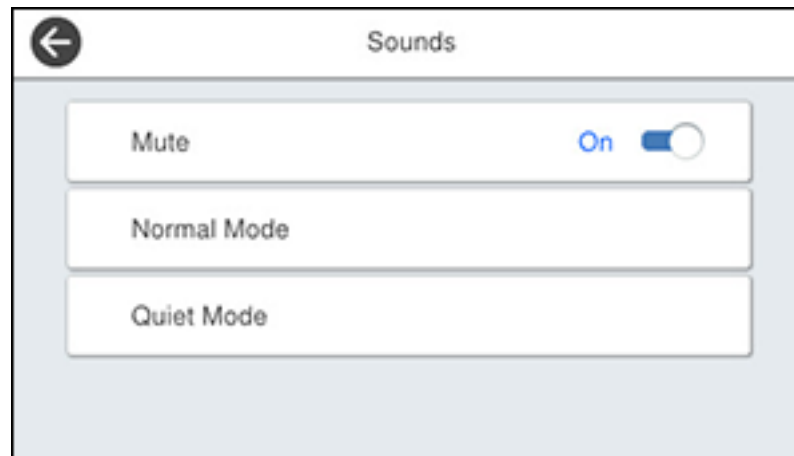

3. Do one of the following:

   • To mute all control panel sounds, turn the **Mute** setting on.

- To select a specific sound level, select **Normal Mode** or **Quiet Mode**.

Note: Press the ▦ icon on the home screen to switch between Normal Mode and Quiet Mode.

4. If you did not mute the sounds, select **Button Press** to adjust the volume level.

5. Press 🔈 to decrease or 🔊 to increase the sound.

6. Select **OK** to exit.

Note: You can also adjust the **Sound Type** and the sound level for various product functions.

Parent topic: Using the Control Panel

Adjusting the Screen Brightness

You can adjust the brightness of the LCD screen.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings**.

   You see a screen like this:

3. Select **Basic Settings** > **LCD Brightness**.

4. Press the **–** or **+** icons to decrease or increase the brightness.

5. Select **OK** to exit.

Parent topic:

Turning Off the Operation Time Out Setting

The Operation Time Out setting causes the LCD screen to return to the Home screen after a few minutes of inactivity. This feature is enabled by default, but you can disable it.

Note: An administrator can lock this setting. If you cannot access or change it, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings**.

   You see a screen like this:

3. Select **Basic Settings**.

4. Scroll down and set **Operation Time Out** to **Off**.

Parent topic:

Preventing PC Connection via USB

You can disable access from a USB-connected computer. This restricts non-network access to the product and protects the security of confidential scanned documents.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Printer Settings** > **PC Connection via USB**.

    You see a screen like this:

Close	PC Connection via USB
Enable	
Disable	

3. Select **Disable**.

Epson Connect Solutions for Smartphones, Tablets, and More

Use your smartphone, tablet, or computer to print and scan documents, photos, emails, and web pages from your home, office, or even across the globe.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Print from anywhere with these Epson Connect solutions:

• Epson Email Print

• Epson iPrint Mobile App

• Epson Remote Print

Scan and send a file as an email or upload it to an online service directly from your Epson product with Epson Scan to Cloud or the Epson iPrint Mobile App.

Parent topic: Product Basics

Setting Up Epson Connect Services

If you did not activate your product's email address for use with Epson Connect when you set up your product, you can activate it using the product control panel.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings**.

   You see a screen like this:

3. Select **Web Service Settings** > **Epson Connect Services**.

   You see a screen like this:
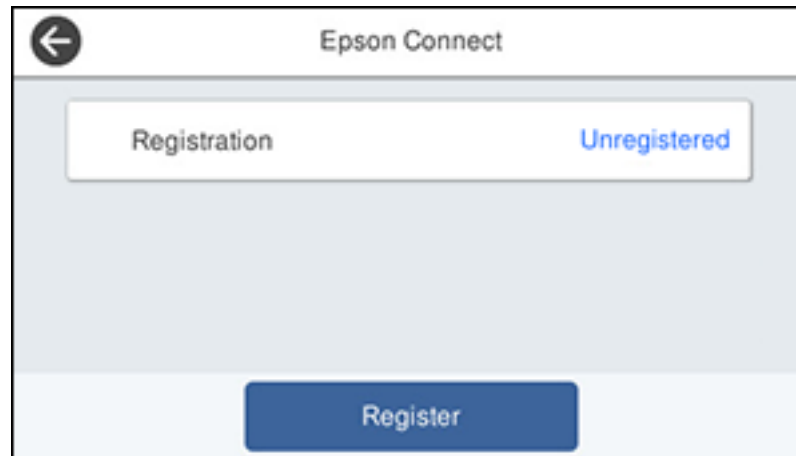

4. Select **Register**.

5. Follow the instructions on the screen to activate your product's email address.

Parent topic: Epson Connect Solutions for Smartphones, Tablets, and More

Using Epson Email Print

With Epson Email Print, you can print from any device that can send email, such as your smartphone, tablet, or laptop. Just activate your product's unique email address. When you want to print, attach a PDF, Microsoft Office document, or photo to an email and send it to your product. Both the email and the attachments will print automatically.

1. Connect your product to your network. See the link below.

2. If you did not already set up Email Print when you installed your product software, see the link below to use your product control panel to activate your unique email address. Or visit epson.com/connect (U.S.) or epson.ca/connect (Canada) to learn more about Email Print, create your Epson Connect account, and register your product to the Epson Connect service.

3. Now you are ready to send and print emails to your product's Email Print address.

Note: Go to epsonconnect.com and log into your Epson Connect account to personalize your product's email, adjust print settings, and set up other Epson Connect services.

Using the Epson iPrint Mobile App

Use this free Apple and Android app to print and scan with networked Epson products. Epson iPrint lets you print PDFs, Microsoft Office documents, photos, and web pages over a wireless network. You can also scan and save a file on your device, send it as an email, or upload it to an online service such as Box, Dropbox, Evernote, or Google Drive.

1. Connect your product to your wireless network. See the link below.

2. Visit epson.com/connect (U.S), epson.ca/connect (Canada), or latin.epson.com/connect (Latin America) to learn more about Epson iPrint and check the compatibility of your mobile device.

3. Download Epson iPrint from the Apple App Store or Google Play.

4. Connect your mobile device to the same wireless network as your product.

5. Open Epson iPrint and select your Epson product.

Now you are ready to print or scan with your mobile device and your Epson product.

Wi-Fi or Wired Networking

Wi-Fi or Wired Networking

See these sections to use your product on a Wi-Fi or wired network.

Network Security Recommendations

To help deter unauthorized access to your product over a network, you should protect your network environment using appropriate security measures.

Security measures such as these can help deter threats such as loss of user data, use of telephone and fax lines, and other intrusions:

- **Enable security on your wireless LAN**

  Enable the appropriate security on the wireless LAN you plan to use with your product. Network security such as a network password can deter interception of traffic over the wireless LAN. Your router may already have a default password enabled by your Internet service provider (ISP). See your ISP and router documentation for instructions on how to change the default password and better secure your network.

- **Connect your product only to a network protected by a firewall**

  Connecting your product directly to the Internet may leave it vulnerable to security threats. Instead, connect it to a router or other network connection protected by a firewall. Your router may already have a firewall set up by your Internet service provider; check with your ISP for confirmation. For best results, set up and use a private IP address for your network connection.

- **Change the default administrator password on your product**

  If your product has the option to set an administrator password, change the default administrator password to deter access by unauthorized users to personal data stored on your product, such as IDs, passwords, and contact lists.

Wi-Fi Infrastructure Mode Setup

You can set up your product to communicate with your computer using a wireless router or access point. The wireless router or access point can be connected to your computer over a wireless or wired network.
1	Epson product
2	Wireless router or access point
3	Computer with a wireless interface
4	Computer
5	Internet
6	Ethernet cable (used only for wired connection to the wireless router or access point)

Selecting Wireless Network Settings from the Control Panel

Parent topic: Wi-Fi or Wired Networking

Selecting Wireless Network Settings from the Control Panel

Your product control panel allows you to select or change wireless network settings.

To install your product on a wireless network, follow the instructions on the *Start Here* sheet and install the necessary software by downloading it from the Epson website. The installer program will guide you through the network setup.

Note: Breakdown or repair of this product may cause loss of network data and settings. Epson is not responsible for backing up or recovering data and settings during or after the warranty period. We recommend that you make your own backup or print out your network data and settings.

1. Press the ⌂ home icon, if necessary.
2. Select the 📶 icon.

    You see a screen like this:
3. Select **Router**.
4. Select **Start Setup**, **Change Settings**, or **Change to Wi-Fi connection**, depending on your current connection settings.
5. Select **Wi-Fi Setup Wizard**.
6. Select the name of your wireless network or select **Enter Manually** to enter the name manually. Use the displayed keyboard to enter your network name.

7. Select the **Enter Password** field and enter your wireless password using the on-screen keyboard.
Note: The network name and password are case sensitive. Be sure to correctly enter uppercase and lowercase letters, and numeric or special characters.

- To move the cursor, press the left or right arrows.

- To change the case of letters, select ⬆.

- To delete the previous character, select ⌫.

- To enter numbers and symbols, select 123#.

- To enter a space, select **Space**.

8. Select **OK** when you finish entering your password.

9. Confirm the displayed network settings and select **Start Setup** to save them.

10. Do one of the following:

- If setup was successful, select **Close** to exit.

- If setup was unsuccessful, select **Print Check Report** to print a network setup report or select **Re-enter** to re-enter your network name and password.

11. Press the ⌂ home icon to return to the Home screen.

The ![Wi-Fi icon] Wi-Fi icon displayed on the LCD screen indicates your wireless connection status. If the product is not connected to the network, you may have selected the wrong network name or entered the password incorrectly. Repeat these steps to try again.

If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

Modifying the Wi-Fi Direct Network Name or Password

You can modify the Wi-Fi Direct name and password to create a more descriptive and secure Wi-Fi Direct network.

Note: If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

1. Press the 🏠 home button, if necessary.
2. Select the 🖼 icon.

    You see a screen like this:
3. Select **Wi-Fi Direct**.
4. Select **Start Setup**.
5. Select **Change**.

You see this screen:
6. Do one of the following:

   • To change the Wi-Fi Direct network name, select **Change Network Name** and select **Yes**. Select **Change**, then use the on-screen keyboard to enter the new network name.

   • To change the Wi-Fi Direct password, select **Change Password** and select **Yes**. Use the on-screen keyboard to enter your new Wi-Fi Direct password.

   Note: Your password must be at least 8 and no more than 22 characters long.

   Note: If you have already connected devices or computers to your product via Wi-Fi Direct, they will be disconnected when you change the network name or password.

7. When entering your Wi-Fi Direct network name or password, do the following:

   • To move the cursor, press the left or right arrow.

   • To change the case of letters, select ⇧ .

   • To delete the previous character, select ⌫ .

   • To enter numbers and symbols, select 123# .

- To enter a space, select **Space**.

- To finish entering your network name or password, select **OK**.

8. Use your computer or wireless device to select the Wi-Fi network name (SSID) displayed on the LCD screen, then enter the password shown.

   Note: Make a note of the SSID and password that appear.

9. Press the ⌂ home button to return to the Home screen.

   Computers and wireless devices can now access the product using the new network name and password.

Parent topic: Wi-Fi Direct Mode Setup

Wi-Fi Protected Setup (WPS)

If your network uses a WPS-enabled wireless router or access point, you can quickly connect your product to the network using Wi-Fi Protected Setup (WPS).

Note: To check if your router is WPS-enabled, look for a button labeled **WPS** on your router or access point. If there is no hardware button, there may be a virtual WPS button in the device's software. Check your network product documentation for details.

Using WPS to Connect to a Network

Parent topic: Wi-Fi or Wired Networking

Using WPS to Connect to a Network

If you have a WPS-enabled wireless router or access point, you can use Wi-Fi Protected Setup (WPS) to connect your product to the network.

1. Press the ⌂ home icon, if necessary.

2. Select the icon.

You see a screen like this:
3. Select **Router**.

4. Select **Start Setup** or **Change Settings**.

5. Select **Push Button Setup (WPS)**.

6. Follow the instructions on the LCD screen to complete WPS setup.

   Note: Make sure you press **Start Setup** within two minutes of activating WPS on your router.

7. Press the 🏠 home icon to return to the Home screen.

   The 📶 Wi-Fi icon displayed on the LCD screen indicates your wireless connection status. If the product is not connected to the network, repeat these steps to try again.

   If you are printing from a computer, make sure you installed the network software as described on the *Start Here* sheet.

Parent topic: Wi-Fi Protected Setup (WPS)

Printing a Network Status Sheet

You can print a network status sheet to help you determine the causes of any network-related problems you may have with your product.

1. Make sure a few sheets of plain paper are loaded in the cassette.

2. Press the ⌂ home icon, if necessary.

3. Select **Settings** > **General Settings** > **Network Settings**.

   You see a screen like this:
4. Select **Network Status** > **Print Status Sheet**.

5. Select **Print**.

Examine the settings shown on the network status sheet to diagnose any problems you have.

Parent topic: Wi-Fi or Wired Networking

Printing a Network Connection Report

You can print a network connection report to view solutions to any problems you may have using your product on a network.

1. Make sure a few sheets of plain paper are loaded in the lower cassette.

2. Press the ⌂ home icon, if necessary.

3. Select **Settings** > **General Settings** > **Network Settings**.

You see a screen like this:
4. Select **Connection Check**.

5. Select **Print Check Report** to print the network connection report.

Examine any error codes and solutions shown on the network connection report.
Network Connection Report Codes and Messages

Parent topic: Wi-Fi or Wired Networking

Network Connection Report Codes and Messages

Check the error codes and messages on the network connection report to solve problems you may encounter with network connections. The tables here list solutions to problems based on the error codes and messages that may appear at the top of the report.
1 Error code

2 Message

Note: Error codes and messages listed here may not all apply to your product.

Error Codes and Messages

Error code and message	Solution
E-1 Confirm that the network cable is connected and network devices such as a hub, router, or access point are turned on.	Make sure your router, access point, and/or hub are turned on, and the network cable is securely connected to your device and your product. If you are trying to set up Wi-Fi, remove the network cable and set up Wi-Fi again. Ethernet and Wi-Fi cannot be connected at the same time.

Error code and message	Solution
E-2, E-3, or E-7 No wireless network names (SSID) found. Confirm that the router/access point is turned on and the wireless network (SSID) is set up correctly. Contact your network administrator for assistance. No wireless network names (SSID) found. Confirm that the wireless network name (SSID) of the PC you wish to connect is set up correctly. Contact your network administrator for assistance. Entered security key/password does not match the one set for your router/access point. Confirm security key/password. Contact your network administrator for assistance.	Check the following: • Make sure your router or access point is turned on and is correctly connected to your computer or network device. • Turn off the router or access point, wait about 10 seconds, and turn it on again. • Move your product closer to your router or access point, and remove any obstacles between them. Also move your product away from devices such as wireless phones or microwaves. • Confirm that the SSID shown on the network connection report matches the label on your router or access point. Also make sure your SSID uses only ASCII characters and symbols, or your product cannot display the SSID correctly. • If you are trying to connect using the WPS push button method, make sure your router or access point supports it. • If you are using a network password, check the label on your router or access point to confirm that you are using the correct password, or check with your network administrator or router/access point documentation. • If you are connecting to a smart device that generates an SSID, check the device documentation for the SSID and password you should use. • If your wireless connection suddenly disconnects, and another smart device was added to the network using a WPS push button method, or your network was set up using a non-WPS push button method, try downloading and installing your product software again.

Error code and message	Solution
E-5 Security mode (e.g. WEP, WPA) does not match the current setting of the printer. Confirm security mode, and contact the network administrator for assistance.	If the security on your router or access point is not one of the following types, change the type of security on your router or access point and reset your product's network settings. • WEP-64 bit (40 bit) • WEP-128 bit (104 bit) • WPA PSK (TKIP/AES); also known as WPA Personal • WPA2 PSK (TKIP/AES); also known as WPA2 Personal • WPA (TKIP/AES) • WPA2 (TKIP/AES) • WPA3-SAE (AES) • WPA2/WPA3-Enterprise
E-6 MAC address of your printer may be filtered. Check whether your router/access point has restrictions such as MAC address filtering. See the documentation of the router/access point or contact your network administrator for assistance.	If your router or access point has MAC address filtering enabled, register your product's MAC address so it is not filtered. Locate the MAC address on the network connection report and check your router or access point documentation for instructions. If your router or access point is using shared authentication with WEP security, confirm that you are using the correct authentication key and index. If your router or access point limits the number of connected devices, raise the connection limit. See your router or access point documentation for instructions.
E-8 Incorrect IP address is assigned to the printer. Confirm IP address setup of the network device (hub, router, or access point). Contact your network administrator for assistance.	If your product's **Obtain IP Address** setting is set to **Auto**, enable DHCP on your router or access point. If it is set to **Manual**, the IP address may be out of range or on a different network segment; set a valid IP address using your product control panel or the Web Config utility. You can also try turning off your product and the router or access point, waiting about 10 seconds, and turning them on again.

Error code and message	Solution
E-9 Confirm the connection and network setup of the PC or other device. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	Make sure your computer or network device are turned on. Also make sure that you can access the Internet and other devices on the same network from the devices you are trying to connect to your product. If you still cannot connect to your product, turn off your router or access point, wait about 10 seconds, and turn it on again. Download and install your product software again to reset your network settings.
E-10 Confirm IP address, subnet mask, and default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	Make sure other devices on the network are turned on and do the following: • If your product's **Obtain IP Address** setting is set to **Manual**, check the IP address, subnet mask, and default gateway addresses on the network connection report to see if they are correct. If not, correct the settings. • If DHCP is enabled, set your product's **Obtain IP Address** setting to **Auto**. If you want to use the DHCP-assigned address as a static address, set the **Obtain IP Address** setting to **Manual**, enter the product's IP address as listed on the network connection report, and set the subnet mask to 255.255.255.0. If you still cannot connect to your product, turn off your router or access point, wait about 10 seconds, and turn it on again.
E-11 Setup is incomplete. Confirm default gateway setup. Connection using the EpsonNet Setup is available. Contact your network administrator for assistance.	If you set your product's **TCP/IP Setup** setting to **Manual**, check that the default gateway address listed on the network connection report is correct. Also turn on the device that is set as the default gateway.

Error code and message	Solution
E-12 Confirm the following: -Entered security key/password is correct -Index of the security key/password is set to the first number -IP address, subnet mask, or default gateway setup is correct Contact your network administrator for assistance.	Make sure other devices on the network are turned on and do the following: • Make sure the IP address, subnet mask, and default gateway addresses are correct, if you are entering them manually. • Confirm that the subnet mask and default gateway addresses for other devices are the same. • Make sure the IP address does not conflict with other devices. If you still cannot connect to your product, do the following: • Turn off your router or access point, wait about 10 seconds, and turn it on again. • Download and install your product software again to reset your network settings. • If your router or access point uses WEP security with several registered passwords, make sure that the first registered password is set on your product.
E-13 Confirm the following: -Entered security key/password is correct -Index of the security key/password is set to the first number -Connection and network setup of the PC or other device is correct Contact your network administrator for assistance.	Make sure your router, access point, and/or hub are turned on. Also make sure the TCP/IP setup on your router, access point, and/or hub is not set manually; this may cause your product's network settings to differ from the manually set up devices. If you still cannot connect to your product, do the following: • Turn off your router or access point, wait about 10 seconds, and turn it on again. • Download and install your product software again to reset your network settings. • If your router or access point uses WEP security with several registered passwords, make sure that the first registered password is set on your product.

Network Environment Messages

Message	Solution
The Wi-Fi environment needs to be improved. Turn the wireless router off and then turn it on. If the connection does not improve, see the documentation for the wireless router.	Move your product closer to your router or access point, and remove any obstacles between them. Then turn off your router or access point, wait about 10 seconds, and turn it back on again. If you still cannot connect to your product, check the documentation that came with your router or access point for solutions.
*No more devices can be connected. Disconnect one of the connected devices if you want to add another one.	You can connect up to 8 computers or other devices to your product using a Wi-Fi Direct (Simple AP) connection. If you want to add another device, disconnect an existing connected device first.
The same SSID as Wi-Fi Direct exists in the environment. Change the Wi-Fi Direct SSID if you cannot connect a smart device to the printer.	Change the Wi-Fi Direct SSID. You can change the network name after "DIRECT-XX-". The custom name must be 22 characters or less.

Configuring Email Server Settings

To use features such as scanning to email or forwarding faxes to email, you need to configure the email server. You can select settings for the email server using the product control panel.

Note: These settings can be locked by an administrator. If you cannot access these settings, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Network Settings**.

You see a screen like this:
3. Select **Advanced** > **Email Server** > **Server Settings**.

    You see a screen like this:
4. Select one of the options shown above, then select the settings you want to use. Contact your internet service provider if necessary to confirm the authentication method for the email server.

5. Select **Proceed** to save your settings.

6. Select **Close** to exit.

7. Select **Connection Check** to verify the connection to the email server.

Changing a USB Connection to a Wi-Fi Connection

If you have already connected your product to your computer using a USB connection, you can change to a Wi-Fi connection.

1. Disconnect the USB cable from your product.

2. Uninstall your product software.

3. Download and install your product software from the Epson website using the instructions on the *Start Here* sheet.

Parent topic: Changing or Updating Network Connections

Changing a Wi-Fi Connection to a Wired Network Connection

If you have already connected your product to your computer wirelessly, you can change to a wired network connection if necessary.

1. Disable your product's Wi-Fi features.

2. Connect one end of an Ethernet network cable to the product's **LAN** port.

3. Connect the other end to any available LAN port on your router or access point.

4. Uninstall your product software.

5. Download and install your product software from the Epson website.

6. Follow the on-screen instructions to install the software.

7. When you see the Select Your Connection screen, select **Wired network connection**.

8. If you see a Select Setup Option screen, select **Set up printer for the first time**.

9. Continue following the rest of the on-screen instructions.

Uninstall Your Product Software

Disabling Wi-Fi Features

You may need to disable your product's Wi-Fi features if you change your network connection type or need to solve a problem with your network connection.

Note: Before disabling Wi-Fi features, make a note of your product's SSID (network name) and password, and any network settings selected for the Epson Connect services you may use.

1. Press the 🏠 home icon, if necessary.

2. Select the icon.

You see a screen like this:
3. Select **Router**.

4. Select **Change Settings**.

5. Select **Others**.

6. Select **Disable Wi-Fi**.

7. Select **Start Setup** to disable Wi-Fi.

8. Select **Close**.

Parent topic: Changing or Updating Network Connections

Disabling Wi-Fi Direct Features

You may need to disable your product's Wi-Fi Direct features if you change your connection type or need to solve a problem with your Wi-Fi Direct connection.

1. Press the ⌂ home icon, if necessary.

2. Select the icon.

You see a screen like this:
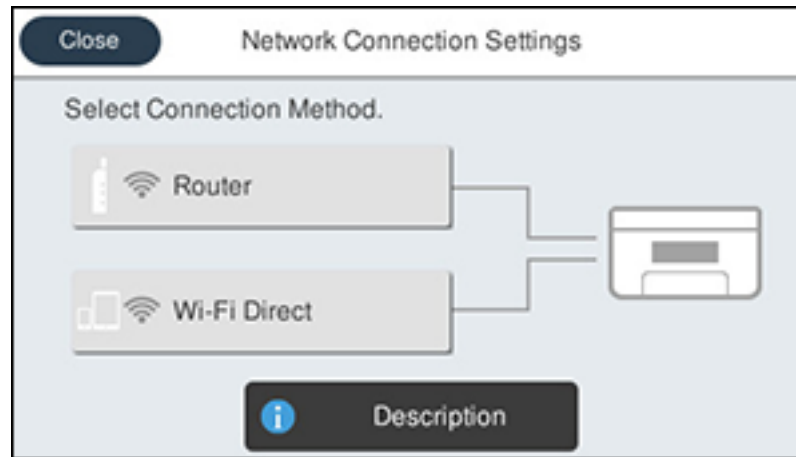

3. Select **Wi-Fi Direct**.

4. Select **Change**.

5. Select **Disable Wi-Fi Direct**.

6. Select **Disable the settings** to disable Wi-Fi Direct.

7. Select **Close**.

Enabling PCL or PostScript Printing

Before enabling PCL or PostScript printing on your product, make sure you have installed the software as described on the *Start Here* sheet (ST-C5500).

To download the PCL or PostScript drivers, visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product.

Installing the PCL Driver - Windows

Installing the PostScript (PS3) Printer Software - Windows

Installing the PostScript (PS3) Printer Software - Mac

Selecting PDL (Page Description Language) Settings

Selecting Printer Language and Interface Settings

Printing a PCL or PS3 (PostScript) Status Sheet

Installing the PCL Driver - Windows

The PCL driver can be installed on a Windows computer. Before enabling PCL printing on your product, make sure you have installed the software as described on the *Start Here* sheet.

Note: Make sure your product is turned on and connected to the same network as your computer before installing the printer software. Depending on your model, not all printer languages may be supported.

1. To download the PCL file, visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product.

2. After downloading the installer file, double-click the downloaded file to install the software.

3. Follow the on-screen instructions until you see this screen:

    EPSON Printer Utilities Setup

    Detect the printer, and automatically configure the port.
    Is the printer connected via a network?

    ⊙ Yes: Network connection   Search options....

    ○ No: USB connection

    OK   Abort
4. If your product is already connected to a network, select **Yes: Network connection** and click **OK**.
    You see a screen like this:

    EPSON Printer Utilities Setup

    Select the printer port from the Available Ports list and click OK.

    Current Port:
    EPSON Series

    Available Ports:

Model Name	IP Address(MAC Address)
EPSON Series	XXX.XXX.X.XXX

    OK   Back   Abort
5. Make sure your product is selected, and click **OK**.

   A message appears when the installation is complete.

6. If your product is not connected to a network, select **No: USB connection** and click **OK**. Connect a USB cable to your product's USB port, and connect the other end of the cable to your computer.

   A message appears when the installation is complete.

Parent topic: Enabling PCL or PostScript Printing

Installing the PostScript (PS3) Printer Software - Windows

If you did not install the standard Epson printer software, you need to install the PostScript (PS3) printer software before you can adjust the print settings and print to your network printer.

Note: Make sure your product is turned on and connected to the same network as your computer before installing the printer software.

1. To download the PS3/Postscript software package, visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product.

2. After downloading the installer file, double-click the downloaded file to install the software.

3. Click **OK**.

4. Click **Accept**.

5. Click **Install**.

6. Click **Next** and follow the on-screen instructions.

Parent topic: Enabling PCL or PostScript Printing

Installing the PostScript (PS3) Printer Software - Mac

If you did not install the standard Epson printer software, you need to install the PostScript (PS3) printer software before you can adjust the print settings and print to your network printer.

Note: Make sure your product is turned on and connected to the same network as your computer before installing the printer software.

1. To download the PS3 Postscript software package, visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product.

2. After downloading the installer file, double-click the downloaded file to install the software.

3. Double-click **EPSON**.

4. Click **Continue** on the next two screens.

5. Click **Agree**.

6. Click **Install**.

7. If necessary, enter the administrator password.

8. Click **Start** and follow the on-screen instructions.

Parent topic: Enabling PCL or PostScript Printing

Selecting PDL (Page Description Language) Settings

You can select settings for PCL and PostScript printing using the control panel on the product.

Note: These settings can be locked by an administrator. If you cannot access these settings, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Printer Settings** > **PDL Print Configuration**.

   You see a screen like this:

3. Select one of the options shown above, then select the PDL print configuration options you want to use.

4. When you are finished, press the ⌂ home return to the Home screen.

Loading Paper

Before you print, load paper for the type of printing you will do.

Loading Paper in the Cassettes

You can load paper up to this size in the paper cassettes: Legal (8.5 × 14 inches [216 × 356 mm])

1. Make sure the product is not operating and pull out the paper cassette.
2. Slide the side edge guides outward all the way, then slide the side front edge guide to the paper size you are using.
3. Load paper with the printable side facedown.
4. Slide the side edge guides against the paper.
Note: Make sure the paper fits beneath the arrow mark inside the edge guides.
5. Insert the paper cassette all the way into the product.
6. Do one of the following:

   • Select the size and type of paper you loaded on the LCD screen.

   • Select **Settings** > **General Settings** > **Printer Settings** > **Paper Source Settings** > **Paper Setting** to select the size and type of paper you loaded.

Always follow these paper loading guidelines:

• Load only the recommended number of sheets.

• Load only plain paper in cassette 2.

• Load paper short edge first, no matter which way your document faces.

- Load the printable side facedown.
- Load letterhead or pre-printed paper top edge first.
- Do not load paper above the line underneath the arrow mark inside the edge guides.
- Check the paper package for any additional loading instructions.

Note: When printing on glossy photo papers, ink drying times increase considerably (humidity, temperature, and other environmental conditions can also affect photo drying times). To avoid smearing your photos, do not touch the printed side until the ink is completely dry. Moisture and oils from your skin can also affect print quality, so avoid rubbing or scratching the surface of your photos even after they dry.

Placing Originals on the Product

Follow the instructions here to place your original documents or photos on the product.

Caution: Do not place anything on top of your product or use its cover as a writing surface to avoid damaging it.

Placing Originals on the Scanner Glass
Placing Originals in the Automatic Document Feeder

Placing Originals on the Scanner Glass

You can place originals up to this size on the scanner glass: Letter (8.5 × 11 inches [216 × 279 mm]) or A4 (8.3 × 11.7 inches [210 × 297 mm]).

Note: To view animated instructions on how to place originals on the scanner glass, press the ⑦ help button and select **How To** > **Place Originals**.

1. Open the document cover.
Caution: Be careful not to trap your hands or fingers when opening or closing the document cover.

Note: If there is any dust or dirt on the scanner glass, the scanning range may expand to include it, so the image of the original may be displaced or reduced. Use a soft, dry, clean cloth to remove any dust and dirt on the scanner glass before scanning.

2. Place your original facedown on the scanner glass with the top facing into the corner. Slide the original to the edges of the indicated corner.
Note: The edges of your original may be cropped by 0.06 inch (1.5 mm) from the edge of the scanner glass. Manually position your original away from the edges to prevent cropping.

3. Close the document cover gently to keep your original in place.

   Caution: Do not push down on the document cover or scanner glass or you may damage the product.

Remove your originals after scanning. If you leave the originals on the scanner glass for a long time, they may stick to the glass surface.

Placing Originals in the Automatic Document Feeder

You can place single- or multi-page original documents in the Automatic Document Feeder (ADF). You can also use the ADF to scan both sides of a 2-sided document. Make sure the originals meet the Automatic Document Feeder specifications before loading them.

Caution: Make sure your originals are not creased or folded and do not contain holes, staples, tape, or other materials that could obstruct the feeder.

Caution: Do not place photographs or valuable artwork in the ADF. Place fragile or valuable originals on the scanner glass to avoid wrinkling or damaging them.

Note: To view animated instructions on how to place originals on the scanner glass, press the ⊘ button and select **How To** > **Place Originals**.

Note: When originals are placed in the ADF and on the scanner glass, priority is given to the originals in the ADF.

1. Slide the ADF edge guides outward.
2. Fan your stack of originals and tap them gently on a flat surface to even the edges.
3. Insert the originals into the ADF faceup and short edge first.
Note: Do not load originals above the arrow mark on the ADF edge guide.
The **ADF** icon on the Copy, Scan, and Fax screens lights up.

4. Slide the ADF edge guides against the originals, but not too tightly.
Note: Do not add originals while scanning.

Printing from a Computer

Before printing from your computer, make sure you have set up your product and installed its software as described on the *Start Here* sheet.

Note: If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website. If you see a Software Update screen, select **Enable automatic checking** and click **OK**. The update scans your system to see if you have the latest product software. Follow the on-screen instructions.

Selecting Basic Print Settings - Windows

Select the basic settings for the document or photo you want to print.

1. Open a photo or document for printing.

2. Select the print command in your application.

    Note: You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

    Note: You may also need to select **Properties** or **Preferences** to view your print settings.

You see the Main tab of your printer settings window:

4. For the **Paper Source** setting, select where you loaded the paper you want to print on.

5. Select the size of the paper you loaded as the **Document Size** setting.

   Note: You can also select the **User-Defined** setting to create a custom paper size.

6. If you are printing a borderless photo, select **Borderless**. You can click **Settings** to access additional options for borderless printing.

   Note: You must select a compatible borderless paper type and size to print without borders. Check the borderless paper compatibility list for details.

7. Select the orientation of your document.

   Note: If you are printing an envelope, select **Landscape**.

8. Select the type of paper you loaded as the **Paper Type** setting.

   Note: The setting may not exactly match the name of your paper. Check the paper type settings list for details.

9. Select the **Quality** setting that matches the print quality you want to use.

10. Select a Color option:
    • To print a color document or photo, select the **Color** setting.
    • To print text and graphics in black or shades of gray, select the **Black/Grayscale** setting.

11. To print on both sides of the paper, select a **2-Sided Printing** option.

12. To print multiple pages on one sheet of paper, or print one image on multiple sheets of paper, select one of the settings in the **Multi-Page** menu and select the printing options you want.

13. To print multiple copies and arrange their print order, select the **Copies** options.

14. To reduce noise during printing, turn on **Quiet Mode** (printing will be slower).

15. To preview your job before printing, select **Print Preview**.

16. To save your print job as a project that can be modified and combined with other print jobs, select **Job Arranger Lite**.

Selecting Double-sided Printing Settings - Windows

You can print on both sides of the paper by selecting one of the 2-Sided Printing options on the Main tab.

Note: Some options may be pre-selected or unavailable, depending on other settings you have chosen or if you are accessing the product over a network.

1. Select one of the following options for **2-Sided Printing**:

    *   **Auto (Long-edge binding)** to print your double-sided print job by automatically flipping the paper on the long edge.

    *   **Auto (Short-edge binding)** to print your double-sided print job by automatically flipping the paper on the short edge.

    *   **Manual (Long-edge binding)** to print your double-sided print job by printing one side and prompting you to flip the paper over on the long edge to print the other side (recommended for paper types that do not support automatic duplexing).

2. Click the **Settings** button.

You see this window:
3. Select the double-sided printing options you want to use.

4. Click **OK** to return to the Main tab.

5. Select the type of document you are printing as the Document Type setting. The software automatically sets the Adjustments options for that document type.

6. If necessary, select the Adjustments options you want to use.

7. Click **OK** to return to the Main tab.

8. Print a test copy of your double-sided document to test the selected settings.

9. Follow any instructions displayed on the screen during printing.

Color Controls
Lets you select a **Color Mode** setting, individual settings for **Brightness**, **Contrast**, **Saturation**, and **Density**, and individual color tones. Depending on the selected color mode, you can also adjust the midtone density using the **Gamma** setting.

Fix Photo
Improves the color, contrast, and sharpness of flawed photos.

Note: Fix Photo uses a sophisticated face recognition technology to optimize photos that include faces. For this to work, both eyes and the nose must be visible in the subject's face. If your photo includes a face with an intentional color cast, such as a statue, you may want to turn off **Fix Photo** to retain the special color effects.

ICM

Lets you manage color using installed color printing profiles.

No Color Adjustment

Turns off color management in your printer software so you can manage color using only your application software.

Parent topic:

Image Options and Additional Settings - Windows

You can select any of the Image Options and Additional Settings to customize your print. Some options may be pre-selected or unavailable, depending on other settings you have chosen.

Image Options

Emphasize Text

Adjusts the weight of printed text to increase readability.

Emphasize Thin Lines

Adjusts the weight of printed lines to increase visibility.

Edge Smoothing

Smooths jagged edges in low-resolution images such as screen captures or images from the Web.

Fix Red-Eye

Reduces or removes red-eye in photos.

Additional Settings Options

Rotate 180º

Prints the image rotated 180º from its original orientation.

Bidirectional Printing

Prints in both directions (right-to-left and left-to-right), speeding up printing, but may reduce print quality.

Mirror Image

Flips the printed image left to right.

Parent topic:

Header/Footer Settings - Windows

You can select any of the Header/Footer Settings options to add headers or footers when you print. The items are available to print at the top or bottom of your pages, in either the left, right, or center of the page.

Note: These settings are not saved with your document.

You can select to print the following information:

- User Name
- Computer Name
- Date
- Date/Time
- Document Name
- Collate Number
- Page Number

- Text

You can also adjust the text settings for the printed information.

Note: The user name, computer name, date, and time come from the Windows Control Panel on your computer.

Parent topic:

Selecting a Printing Preset - Windows

For quick access to common groups of print settings, you can select a printing preset on the **Main** or **More Options** tab.

Note: You can create your own preset by clicking the **Add/Remove Presets** button.

1. Click the **Main** or **More Options** tab.

You see the available **Printing Presets** on the left:

Printing Presets

Add/Remove Presets...

- Document - Fast
- Document - Standard Quality
- Document - High Quality
- Document - 2-Sided
- Document - 2-Up
- Document - 2-Sided with 2-Up
- Document - Fast Grayscale
- Document - Grayscale
- Document - 11 x 17 in
- Document - A3

Show Settings

Restore Defaults   Ink Levels
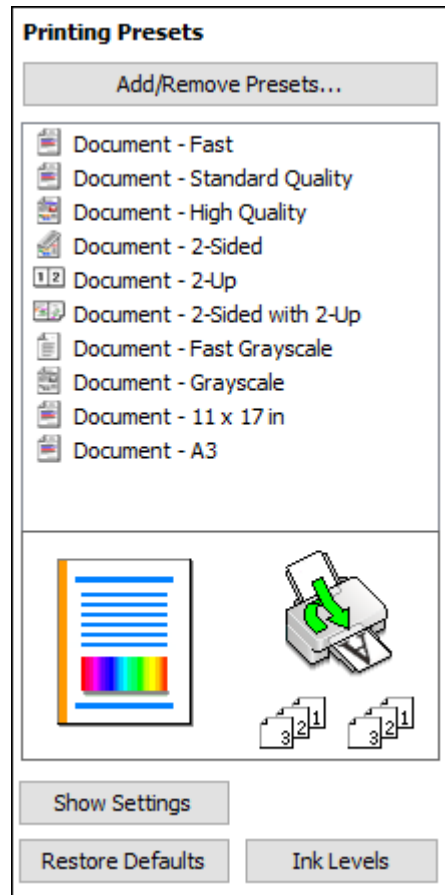

2. Place your cursor over one of the **Printing Presets** to view its list of settings.

3. Click on a preset to change its settings or delete it, or use any of the available options on the screen to control your printing presets.

4. To choose a preset for printing, select it.

5. Click **OK**.

Parent topic: Printing with the Standard Epson Printer Software - Windows

Selecting Extended Settings - Windows

You can select additional settings that apply to all the print jobs you send to your product.

1. Access the Windows Desktop and right-click the ![icon] icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click ![icon].

2. Select **Printer Settings**.

3. Click the **Maintenance** tab.

   You see the maintenance options:
4. Click the **Extended Settings** button.

You see this window:
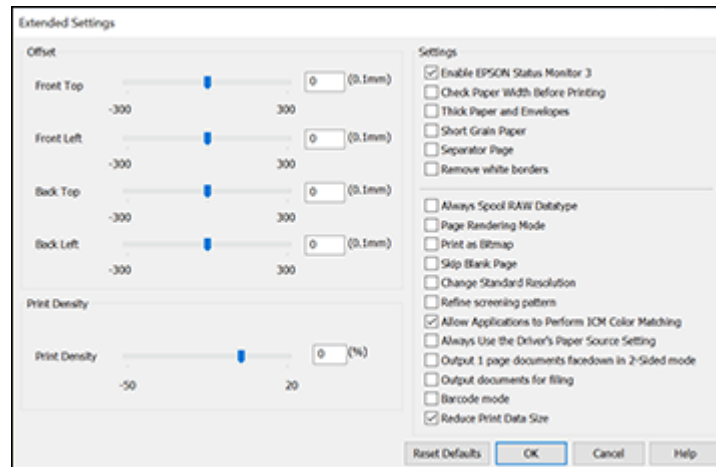

5. Select any of the extended settings to customize your print.

6. Click **OK** to close the Extended Settings window.

7. Click **OK** to close the printer software window.

Extended Settings - Windows

Parent topic: Printing with the Standard Epson Printer Software - Windows

Extended Settings - Windows

You can select these settings on the Extended Settings window.

Enable EPSON Status Monitor 3
Enables product monitoring for ink and paper supplies and other issues.

Check Paper Width Before Printing
Prevents printing beyond the edges of the paper if the paper size setting is incorrect; may reduce print speed.

Thick Paper and Envelopes
Prevents ink from smearing when you print on envelopes or other thick paper.

Short Grain Paper
Prevents ink from smearing when you print on envelopes or other thick paper, and the **Thick Paper** setting does not help.

Separator Page

Before each document, prints a separator page containing the title, user, date, and time.

Remove white borders

Removes white margins that may appear when you print borderless photos.

Always Spool RAW Datatype

Increases print speed and may solve other printing problems.

Page Rendering Mode

Increases print speed when printing is extremely slow or the print head stops during printing.

Print as Bitmap

Increases print speed when printing is extremely slow or the print head stops during printing, and other settings do not help.

Skip Blank Page

Ensures that your product does not print pages that contain no text or images.

Change Standard Resolution

Reduces the resolution of print data to correct printing problems.

Refine screening pattern

Prints graphics with a finer screening pattern.

Allow Applications to Perform ICM Color Matching

Allows applications to perform ICM color matching.

Always Use the Driver's Paper Source Setting

Prints using the paper source setting in the printer driver, rather than the setting in your application.

Output 1 page documents facedown in 2-Sided mode

Outputs single-sided pages in a 2-sided print job facedown instead of faceup.

Output documents for filing

Outputs all landscape, portrait, 1-sided, and 2-sided documents in the same orientation for easier filing.

Barcode mode

Reduces bleeding when printing barcodes on plain paper, letterhead paper, recycled paper, preprinted paper, envelopes, and thick paper.

Reduce Print Data Size

Increases print data compression to improve print speed. Not recommended when printing fine patterns.

Parent topic: Selecting Extended Settings - Windows

Printing Your Document or Photo - Windows

Once you have selected your print settings, you are ready to save your settings and print.

1. Click **OK** to save your settings.

   You see your application's Print window, such as this one:
2. Click **OK** or **Print** to start printing.

Locking Printer Settings - Windows

Windows administrators can lock access to some printer settings to prevent unauthorized changes.

1. Do one of the following:

   • **Windows 11:** Click [icon], search for **Settings** and select it. Select **Bluetooth & devices** > **Printers & scanners**. Select your product name and select **Printer properties**.

- **Windows 10:** Click ▦ and select ⚙ (Settings) > **Devices** > **Printers & scanners**. Select your product name and select **Manage** > **Printer properties**.

- **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click your product and select **Printer properties**.

- **Windows 7:** Click 🟠 and select **Devices and Printers**. Right-click your product and select **Printer properties**.

2. Click the **Optional Settings** tab.

   Note: You can prevent access to the **Optional Settings** tab by changing the user or group permissions in the **Security** tab.

3. Click **Driver Settings**.

   You see this window:
4. Select the checkbox for each setting you want to lock. To lock all print settings, select **All Document Settings**.

5. Under **Advanced Settings**, select the setting option you want to use for each locked setting.

6. Click **OK**.

Locked Setting Options

Parent topic: Printing with the Standard Epson Printer Software - Windows

Locked Setting Options

Select the options you want to use for any locked print settings.

Setting	Options	Description
Anti-Copy Pattern	Various data items	Lets you select the data to use for the pattern or prohibit anti-copy patterns
	Add/Delete	Lets you add or delete a customized anti-copy pattern
	Settings	Lets you select the arrangement, size, and other settings for the custom anti-copy pattern
Watermark	Various text watermarks	Lets you select the text for the watermark or prohibit watermarks
	Add/Delete	Lets you add or delete a customized text or image-based watermark
	Settings	Lets you select the size, position, and other watermark settings
Header/Footer	Off	Prohibits headers or footers
	On	Allows headers and footers
	Settings	Lets you select the text and position for printing headers and footers
Color	**Color**	Allows color printing
	Grayscale	Allows printing in black or shades of gray only

Setting	Options	Description
Multi-Page	Off	Prohibits multi-page settings
	2-Up	Allows printing of 2 pages on one sheet of paper
	4-Up	Allows printing of 4 pages on one sheet of paper
	6-Up	Allows printing of 6 pages on one sheet of paper
	8-Up	Allows printing of 8 pages on one sheet of paper
	9-Up	Allows printing of 9 pages on one sheet of paper
	16-Up	Allows printing of 16 pages on one sheet of paper
All Document Settings	—	Lets you lock all print settings

Parent topic: Locking Printer Settings - Windows

Entering a User ID and Password for Printing

If you enabled Access Control on the product, you must enter a user ID and password in the printer driver to be able to print.

Note: If you do not know the user ID or password, contact your administrator for assistance.

1. Access the Windows Desktop and right-click the ⬚ icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click ⬚. Select **Printer Settings** and click the **Maintenance** tab.
2. Click the **Printer and Option Information** button.

3. Select the **Save Access Control settings** checkbox.

4. Click the **Settings** button.

5. Enter your user name and password.

6. Click **OK**.

Parent topic: Printing with the Standard Epson Printer Software - Windows

Selecting Default Print Settings - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Access the Windows Desktop and right-click the ![icon] icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click ![icon].

2. Select **Printer Settings**.

   You see the printer settings window:

   ![image: Epson printer settings window Main tab showing Printing Presets, Paper Source, Document Size, Orientation, Paper Type, Quality, Color, 2-Sided Printing, Multi-Page, Copies, Quiet Mode and related options]
3. Select the print settings you want to use as defaults in all your Windows programs.

4. Click **OK**.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Changing the Language of the Printer Software Screens

Parent topic: Printing with the Standard Epson Printer Software - Windows

Changing the Language of the Printer Software Screens

You can change the language used on the Windows printer software screens.

1. Access the Windows Desktop and right-click the ⬛ icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click ⬛.

2. Select **Printer Settings**.

    You see the printer settings window.

3. Click the **Maintenance** tab.

    You see the maintenance options:
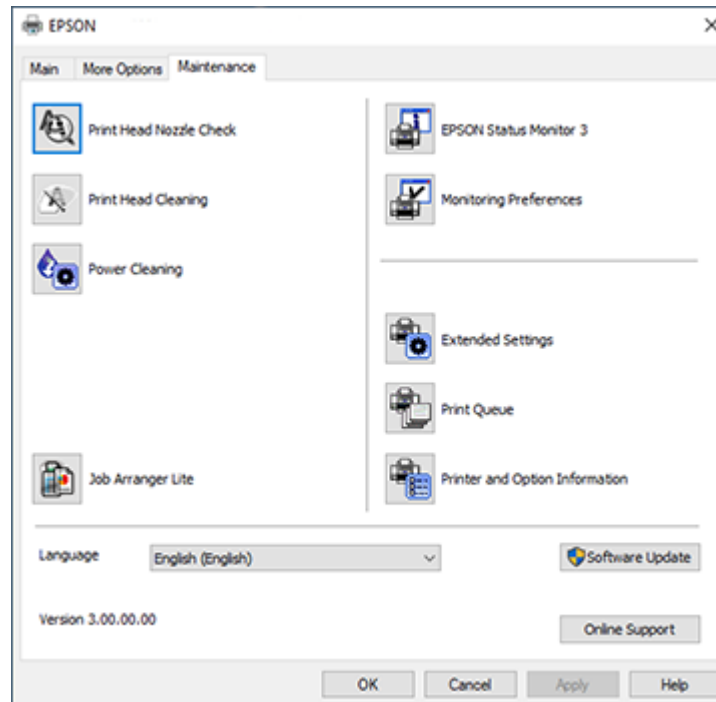

4. Select the language you want to use as the **Language** setting.

5. Click **OK** to close the printer software window.

The printer software screens appear in the language you selected the next time you access them.

Parent topic: Selecting Default Print Settings - Windows

Changing Automatic Update Options

Your printer software for Windows automatically checks for updates to the product software. You can change how often the software checks for updates or disable this feature.

1. Access the Windows Desktop and right-click the ⬛ icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click ⬛.

2. Select **Software Update Settings**.

You see this window:
3. Do one of the following:

   • To change how often the software checks for updates, select a setting in the **Check every** menu.
   • To disable the automatic update feature, select the **Never** option.

4. Click **OK** to exit.

Note: If you choose to disable the automatic update feature, you can check for updates manually.

Parent topic: Printing with the Standard Epson Printer Software - Windows

Printing with the Built-in Epson Driver - Windows 10 S

You can print with the built-in Epson printer driver using any printing program on Windows 10 S, as described in these sections.

Note: The built-in Epson driver in Windows 10 S does not include all the available print settings for your product. To print with additional settings, download and install the Epson Print and Scan utility from the Windows Store. You cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

Selecting Print Settings - Windows 10 S

Parent topic: Printing from a Computer

Selecting Print Settings - Windows 10 S

Select the settings for your print job in your Windows 10 S application.

1. Open a photo or document for printing.

2. Select the print command in your application.

   Note: You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use.

   Note: You may also need to select **Properties** or **Preferences** to view your print settings.

You see a window like this:
4. Select the type of paper you loaded as the **Media** setting.

    Note: The setting may not exactly match the name of your paper. Check the paper type settings list for details.

5. Click the **Advanced** button.

You see a window like this:
6. Select the size of the paper you loaded as the **Paper Size** setting.
7. To print multiple copies, select or enter the number as the **Copy Count** setting.
8. To print multiple copies of multi-page documents in sets, select the **Collated** checkbox.
9. Click **OK**.

    You return to the printing preferences window.

10. Select the **Layout** tab.
11. Select the orientation of your document as the **Orientation** setting.

12. To print double-sided, select one of the **Print on Both Sides** options, depending on how you want to orient the page layout. The icon next to each option shows the layout.
13. Click **OK** to save your settings.

    You see your application's **Print** window.

14. Click **OK** or **Print** to start printing.

Parent topic: Printing with the Built-in Epson Driver - Windows 10 S

Printing with the Epson Standard Printer Software - Mac

You can print with your product using any Mac printing program, as described in these sections.

Note: If you have an Internet connection, it is a good idea to check for updates to your product software on Epson's support website.

Selecting Basic Print Settings - Mac

Selecting Default Print Settings - PostScript Printer Software - Windows

Parent topic:

Selecting Basic Print Settings - PostScript Printer Software - Windows

Select the basic settings for the document or photo you want to print.

The PostScript printer software supports plain paper printing on these paper and envelope sizes:

- A4 (8.3 × 11.7 inches [210 × 297 mm])
- Letter (8.5 × 11 inches [216 × 279 mm])
- Legal (8.5 × 14 inches [216 × 356 mm])
- A6 (4.1 × 5.8 inches [105 × 148 mm])
- Executive (7.25 × 10.5 inches [184 × 267 mm])
- No. 10 (4.1 × 9.5 inches [105 × 241 mm])

1. Open a photo or document for printing.

2. Select the print command in your application.

   Note: You may need to select a print icon on your screen, the **Print** option in the **File** menu, or another command. See your application's help utility for details.

3. If necessary, select your product name as the printer you want to use, and then click the **Preferences** button.

You see this window:

4. Select the **Paper Source** that matches where you loaded the paper you want to print on.

5. Select **Plain** as the **Media** setting.

6. Select one of the following as the Color setting:

   • To print text and graphics in black only, select the **Black & White** setting.

   • To print a color document or photo, select the **Color** setting.

7. To select additional layout and printing options, select **Advanced** and select additional settings as necessary.

8. Click the **Layout** tab.

You see this window:
9. Select the print options as necessary.

10. Click **OK** when you are finished.

Selecting Default Print Settings - PostScript Printer Software - Windows

When you change your print settings in a program, the changes apply only while you are printing in that program session. If you want to change the print settings you use in all your Windows programs, you can select new default print settings.

1. Do one of the following:

   - **Windows 11:** Click ⊞, search for **Settings** and select it. Select **Bluetooth & devices** > **Printers & scanners**. Right-click on your product and select **Printer properties**.

   - **Windows 10:** Click ⊞ and select ⚙ (Settings) > **Devices** > **Printers & scanners**. Select your product name and select **Manage** > **Printing preferences**.

   - **Windows 8.x:** Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click your product name and select **Print Preferences**.

   - **Windows 7:** Click ⊕ and select **Devices and Printers**. Right-click your product name and select **Printing Preferences**.

   You see the printer settings window:

2. Select the print settings you want to use as defaults in all your Windows programs.

3. Click **OK**.

These settings are now the defaults selected for printing. You can still change them as needed for printing in any program session.

Starting a Scan Using the Product Control Panel

You can scan an image to a variety of destinations using your product's control panel.

1. Make sure you installed the product software and connected the product to your computer or network.

   Note: Restart your computer after installing the product software to enable scanning from the control panel.

2. Place your original on the product for scanning.

   Note: To scan a double-sided or multi-page document, place your originals in the ADF.

3. Press the ⌂ home button, if necessary.

4. Select **Scan**.

   You see a screen like this:
5. Select one of the following **Scan to** options:

   • **Network Folder/FTP** saves your scan file to a specified folder on a network.

   • **Email** lets you send scanned files through a pre-configured email server.

   • **Computer** lets you scan to a connected computer using your saved scan settings.

   • **Memory Device** saves your scan file on a USB device and lets you select the file format, quality, and other settings.

   • **Cloud** sends your scanned files to a destination that you have registered with Epson Connect.

   • **WSD** lets you manage network scanning in Windows 11, Windows 10, Windows 8.x, or Windows 7. To use this feature, you must first set up a WSD (Web Services for Devices) port on your Windows 7 computer (the port is set up automatically on Windows 11, Windows 10, and Windows 8.x).

6. Follow the instructions in the links below to complete your scan.

Setting Up and Scanning to a Network Folder or FTP Server

Before you can scan to a network folder on your computer or on an FTP server, you need to create a shared folder and optionally register its location to your product's Contacts list. Select the links below as necessary to create and register the folder, and to scan to it over the network.

Creating a Shared Network Folder

Registering Contacts for Network Folder or FTP Scanning - Web Config

Registering Contacts for Email, Network, or FTP Scanning - Control Panel

Scanning to a Network Folder or FTP Server

Parent topic:

Creating a Shared Network Folder

You can create a shared network folder on your computer or an FTP site and register its location to your product's Contacts list.

Note: If you are creating a shared network folder on a Mac, see your Mac documentation for instructions on creating the folder. The instructions here are for Windows.

First make sure you connected your product and computer to the same network.

Note: If you are running a Home version of the Windows operating system, you cannot create a shared folder on your Windows desktop or in the Documents or Pictures folder unless you have created a Home Group Configuration for sharing. You can, however, create a shared folder in the root of the C: drive on your system.

If you want to scan to a folder on an FTP server, contact the FTP server administrator for the server address and authentication access to a shared folder on the server.

1. If you are scanning to a network folder on your computer, do one of the following to check the format of your computer name:

   - **Windows 11, Windows 10, or Windows 8.x**: Hold down the Windows key on your keyboard and press the **X** key. Select **System** from the list that appears. Check the Computer Name or Device Name listed for your computer on the System window.

   - **Windows 7**: Click ![icon], right-click **Computer**, and select **Properties**. Check the Computer Name listed for your computer on the System window.

   Note: The settings in these steps may vary, depending on your version of Windows. See Windows Help for details on your operating system.

2. If the computer's name uses any characters that are not alphanumeric (letters or numbers), do one of the following to change the computer's name:

   - **Windows 11, Windows 10, or Windows 8.x**: Select **Rename this PC** and follow the on-screen prompts.

   - **Windows 7**: Select **Change Settings**, change the computer's name, and click **OK**. (See Windows Help for instructions, if necessary.)

   Note: You need to be logged into Windows as an administrator to change the computer's name. After changing the name, restart your computer.

3. Start File Explorer or Windows Explorer.

4. Create a folder on the Windows desktop with a folder name of 12 characters or less; otherwise, your product may not be able to access the folder.

   Note: You need to be logged into Windows as an administrator to access the desktop folder and the document folder under each User folder.

5. Right-click the folder you created and select **Properties**.

6. On the **General** tab, deselect the **Read-only** checkbox to allow users to access the folder over the network.

7. Select the **Sharing** tab and click the **Advanced Sharing** button.

Note: You need to be logged into Windows as an administrator to select the **Advanced Sharing** button.

8. On the Advanced Sharing screen, select the **Share this folder** checkbox.

9. Click the **Permissions** button and select the following on the Share Permissions tab:

   • Select **Everyone** under Group or user names.

   • Select the checkbox in the **Allow** column for the **Change** setting.

10. Click **OK** to save the settings, then click **OK** again to close the Advanced Sharing window.

11. Select the **Security** tab and check that the Group or user names list at the top includes the current computer user and the administrators who can now access the folder.

12. Select the **Sharing** tab again and write down the **Network Path** listed under Network File and Folder Sharing at the top. This is the path you will register to your product's Contacts list so you can select it for network scanning.

13. Click **OK** or **Close**.

Now you can register the folder path to your product's Contacts list.

Parent topic: Setting Up and Scanning to a Network Folder or FTP Server

Registering Contacts for Network Folder or FTP Scanning - Web Config

You can register a list of contacts for scanning to a network folder or FTP server using Web Config and your computer's internet browser.

Before you begin, print a network status sheet and locate the IP address for your product on the sheet.

Note: These instructions use Internet Explorer as an example browser.

1. Start Internet Explorer on a computer that is using the same network as your product.

2. Type your product's IP address into the address bar and press **Enter**.

3. Click **Continue to this website (not recommended)**.

4. Click the **Scan/Copy** tab.

5. Click **Contacts**.

6. Select an empty number you want to use for the contact you are adding and click **Edit**.

7. Enter the following information for the contact:

   - **Name**: The name to display in your product's contact list.

   - **Index Word**: Enter a word to identify this entry when searching for it (up to 30 characters). This field is optional.

   - **Type**: Select **Network Folder (SMB)** or **FTP**.

   - **Assign to Frequent Use**: If you want to identify the contact as a frequently used address, select **On**. This makes it quicker to select the contact when you scan.

   - **Save to**: The network path to the shared folder.

     Enter the folder path name in one of the following formats depending on the **Type** setting you selected:

     - **SMB**: host_name\folder

     - **FTP**: host_name/folder_name

   - **Secure Connection**: For FTP locations, select the secure connection type.

   - **User Name** and **Password**: Enter only if you have set up a password on your computer.

   - **Connection Mode**: For FTP locations, select **Passive Mode** if there is a firewall between the product and FTP server.

   - **Port Number**: For FTP locations, enter the port number.

   - **Certificate Validation**: For FTP locations, choose to enable or disable an imported certificate.

8. Click **Apply**.

   After a moment, you see a message telling you that contact registration is complete.

9. Close your web browser.

Parent topic: Setting Up and Scanning to a Network Folder or FTP Server

Registering Contacts for Email, Network, or FTP Scanning - Control Panel

You can create a list of contacts for scanning to email or to a network folder or FTP.

Note: Contacts can be locked by an administrator. If you cannot access or change contacts, contact your administrator for assistance. You can create up to 200 contacts and contact groups combined (including fax contacts).

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **Contacts Manager** > **Register/Delete**.

   You see a screen like this:
3. Select **Add Entry**.
4. Select **Add Contact**.
5. Do one of the following:
   - To create a contact for scanning to fax, select **Fax**.
   - To create a contact for scanning to email, select **Email**.
   - To create a location for scanning to a network folder or FTP, select **Network Folder/FTP**.
6. Select the number you want to use for the contact you are adding.
7. Select the **Name** field. Use the on-screen keyboard to enter the contact name (up to 30 characters) and select **OK**.
8. Select the **Index Word** field. Use the on-screen keyboard to enter a word to use when searching for an entry (up to 30 characters) and select **OK**. (This field is optional.)
9. Do one of the following:
   - For a fax contact, select the **Enter Fax Number** field. Use the displayed keyboard to enter the fax number and select **OK**.

     Select any other fax settings as necessary.

- For an email contact, select the **Enter Email Address** field. Use the on-screen keyboard to enter the address and select **OK**.

- For a network folder or FTP location, select the **Communication Mode** field and select an option. Then select the **Enter Location** field, use the on-screen keyboard to enter the location, and select **OK**. Enter other information if necessary.

  Enter the folder path name for the location setting in one of the following formats depending on the **Communication Mode** setting you selected:

  - **SMB**: \\host name\folder

  - **FTP**: ftp://host name/folder name

10. Select **OK**.

Note: If you need to edit or delete scanning contacts, the procedures are the same as for fax contacts.

Parent topic:

Scanning to a Network Folder or FTP Server

You can scan an image and save it to a network folder using your product's control panel. You can either enter the folder path directly on the product's control panel or select a folder from the **Destination** tab.

Note: Make sure the date and time are set correctly before using this feature.

1. Place your original on the product for scanning.

   Note: To scan a double-sided or multi-page document, place your originals in the ADF.

2. Press the ⌂ home button, if necessary.

3. Select **Scan**.

   You see a screen like this:
4. Select **Network Folder/FTP**.

   You see a screen like this:
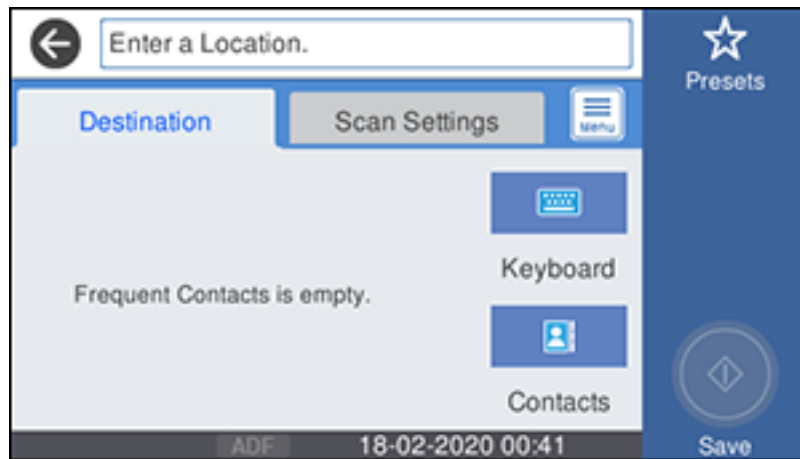

5. Do one of the following:

   • Choose a saved location on the **Destination** tab.

   • Select **Keyboard**, select the **Communication Mode** field, and select **Network Folder (SMB)** or **FTP**. Then select the **Enter Location** field, enter the folder location, and select **OK**. Enter other information as necessary.

Enter the folder path name for the location setting in one of the following formats depending on the **Communication Mode** setting you selected:

- **SMB**: \\host name\folder
- **FTP**: ftp://host name/folder name
- Select an email address from any displayed frequent contacts.

6. Select **Scan Settings**.

7. Select **File Format** to choose the file format for your scan.

8. Scroll down to select **File Name** and change it if necessary.

9. Select any additional scan settings as necessary.

10. Select **Presets** to save your scan settings.

    Note: Presets can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

11. Select **Save**.

    Your product scans your original and saves it in the selected location.

Scanning a Document in Epson ScanSmart

You can scan and review documents and photos in Epson ScanSmart.

Note: The images in this guide show Windows screens. Mac screens may be slightly different. Depending on your product model and software version, not all options may be available.

1. Load your original into the product.

2. Open Epson ScanSmart on your computer. Do one of the following:

   • **Windows 11:** Click ■, then search for **Epson ScanSmart** and select it.

   • **Windows 10:** Click ■ > **Epson Software** > **Epson ScanSmart**.

   • **Windows 8.x**: Navigate to the **Apps** screen and select **Epson ScanSmart**.

- **Windows (other versions)**: Click ![Windows icon] or **Start**, and select **All Programs** or **Programs**. Select **Epson Software** > **Epson ScanSmart**.
- **Mac:** Open the **Applications** folder, open the **Epson Software** folder, and select **Epson ScanSmart**.

You see a screen like this:
3. Select an option for the **Scan area** setting, if necessary.

   Note: The **Scan area** setting limits the scan area to a selected size starting at the placement arrow on the scanner bed. It does not scale the image to the selected size.

4. Select **SCAN**.

The original is scanned. When scanning is complete, you see a screen like this:
5. You can review, edit, or reorder the scanned images as follows:

   - Select **+ Scan** to scan more originals.

   - Select **Delete** to delete selected scanned images.

   - Select **Rotate Right** to rotate each scanned image.

   - Select **Crop** to crop the selected image.

   - Control-click two images, select **Stitch Images**, and follow the on-screen instructions to combine them into a single image.

6. If Photo Mode is automatically detected, the following enhancement options are available:

   - **Auto Color Enhancement**: automatically adjusts the brightness, contrast, and saturation of your photos

   - **Restore Faded Colors**: restores the colors in faded photos automatically

   - **Remove Red Eye**: automatically removes the red-eye effect from your photos

   - **Auto Cropping**: automatically crops the scanned image edges

7. When you finish reviewing and editing the scanned images, click **Next**.

You see a screen like this:
8. Select an option to save, send, or print the scanned images. See the links below.

Saving a Scan
Attaching a Scan to Email
Sending a Scan to a Cloud Service
Printing a Scan

Parent topic: Scanning

Saving a Scan

You can save a scanned image to your computer in a variety of formats.

1. Make sure your originals are scanned and reviewed. See the link below.

2. In the **Select Action** window, click **Save**.

You see a screen like this:
3. Change the settings as follows:

   - The document type and scan date for the file name are automatically detected. You can change them as necessary.

   - You can save the scanned image in a variety of formats. If you select Searchable PDF as the **File type** setting, you can select the OCR (Optical Character Recognition) language.

   - Select the folder on your computer where the document is saved.

4. Click **Save**.

Parent topic: Scanning a Document in Epson ScanSmart

Attaching a Scan to Email

You can attach a scanned image to an email as a file attachment.

Note: Your email app and account settings should be configured before scanning. You must install a MAPI-type email program such as Outlook Express, Windows Live Mail, Entourage, or Mac Mail. Web-based email services such as Gmail are not supported. If you do not have a supported email program, you see an error message.

1. Make sure your originals are scanned and reviewed. See the link below.

2. In the **Select Action** window, click **Attach to Email**.

   You see a screen like this:
3. Change the settings as follows:

   - The document type and scan date for the file name are automatically detected. You can change them as necessary.

   - You can save the scanned image in a variety of formats. If you select Searchable PDF as the **File type** setting, you can select the OCR (Optical Character Recognition) language.

   - If you also want to save a copy of the scanned image to your computer, make sure the checkbox is selected and select the folder on your computer in which to save the file.

4. Click **Attach to E-mail**.

   Your email program opens with the file attached to a new email.

   Parent topic: Scanning a Document in Epson ScanSmart

Sending a Scan to a Cloud Service

You can upload scanned images to a cloud service.

1. Make sure your originals are scanned and reviewed. See the link below.

2. In the **Select Action** window, click one of the cloud service send options.

   You see a screen like this:
3. Log in to your account.

   Note: You may need to allow Epson ScanSmart access to your account. The first time you log in, you may be prompted to enter an authentication code.

4. Change the settings as follows:
   • Select the folder in your account where you want to send the document.
   • The document type and scan date for the file name are automatically detected. You can change them as necessary.
   • You can save the scanned image in a variety of formats. If you select Searchable PDF as the **File type** setting, you can select the OCR (Optical Character Recognition) language.
   • If you also want to save a copy of the scanned image to your computer, click the checkbox.
5. Click **Send**.

Parent topic: Scanning a Document in Epson ScanSmart

Printing a Scan

You can print your scanned image and save the scanned file to your computer.

Note: Printing scanned images is available only with Epson printers.

1. Make sure your originals are scanned and reviewed. See the link below.
2. In the **Select Action** window, click **Print**.

    You see a screen like this:
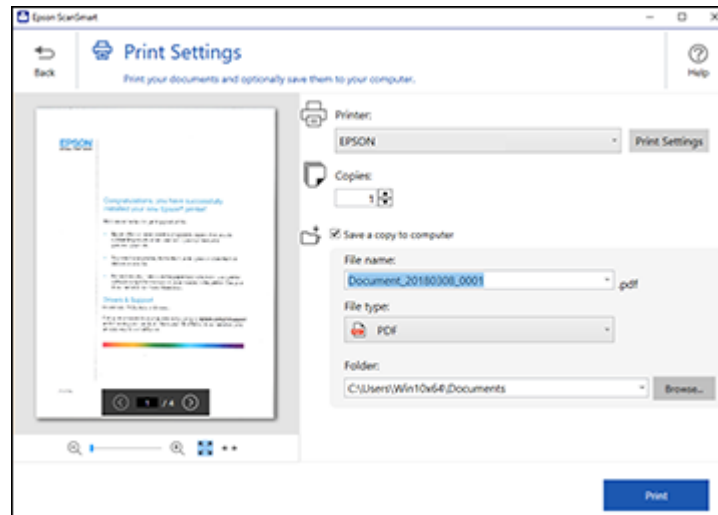

3. Change the settings as follows:
    *   Select the Epson printer and change the print settings, if necessary.
    *   Select the number of copies you want to print.
    *   If you also want to save a copy of the scanned image to your computer, click the checkbox.
    *   The document type and scan date for the file name are automatically detected. You can change them as necessary.
    *   You can save the scanned image in a variety of formats. If you select Searchable PDF as the **File type** setting, you can select the OCR (Optical Character Recognition) language.
    *   Select the folder on your computer in which to save the file.

4. Click **Print**.

Changing the Epson Product

If you are using more than one Epson product with Epson ScanSmart, you can change the product that you are using with your computer.

Note: A product connected to your computer via USB takes priority over a product with a Wi-Fi connection.

1. On the main screen, click **Change**.

You see a screen like this:
2. Select the Epson product you want to use with your computer and click **OK**.

   Parent topic: Selecting Epson ScanSmart Settings

Changing the Scan Settings

You can change detailed scan settings such as the resolution, document size, and more.

Note: If you select **Auto Mode**, you cannot change the scan settings.

1. Click the ⚙ **Settings** button.

You see a screen like this:
2. Do one of the following:

- To change Document Mode settings, select **Document Mode** > **Custom Settings**.
- To change Photo Mode settings, select **Photo Mode** and click **Close**. When you start a scan, you will be prompted to select scan settings.

You see a screen like this:
3. Change the settings as necessary and click **Save**.

Parent topic: Selecting Epson ScanSmart Settings

Changing the File Name Settings

You can change the default file naming method for your scans.

1. Click the ⬜ **Settings** button.

   You see a screen like this:
2. Click the **File Name Settings** tab.

You see a screen like this:
3. Change the settings as necessary:
   - Enter a prefix for the file name.
   - Select the date format.
   - Select a numbering format as the counter format.
4. Click **Close**.

Parent topic: Selecting Epson ScanSmart Settings

Changing the Save Settings

You can change the file type options for saving your scans.

1. Click the ⚙ **Settings** button.

You see a screen like this:
2. Click the **Save Settings** tab.

You see a screen like this:
3. Click **Options** for a file format and change the settings as necessary.
4. Click **Open folder after saving** to open the file folder after a file is saved.
5. Click **Close**.

Save Settings

Parent topic: Selecting Epson ScanSmart Settings

Save Settings

You can change the settings for how scanned images are saved.

PDF Options

Setting	Options	Description
General	**Generate PDF/A File**	Creates a PDF that conforms to PDF/A-1 standards
	Create file with all pages	Saves all pages as one file
	Compression Level	Selects the compression level for color or grayscale images

JPEG Options

Setting	Options	Description
Image Quality Options	—	Sets a compression level by moving a slider or entering a value. File size increases the higher the resolution is.
Encoding (Windows only)	**Standard**	Images load from top to bottom in a web browser. It takes longer to load the entire image.
	Progressive	Images first load completely at low resolution and then adjust to high resolution in a web browser
Embed ICC Profile (Windows only)	—	Allows you to add ICC profiles to the image

TIFF Options

Setting	Options	Description
Byte Order	**Windows** **Macintosh**	Specifies the operating system where the scanned image will be used
Compression (Windows only)	—	Specifies the compression format and level for Color/Grayscale and B&W images. File size increases with higher quality.
Embed ICC Profile (Windows only)	—	Allows you to add ICC profiles to the image

Customizing Action Icons

You can customize which scan action icons appear on the **Select Action** screen.

Note: You can also customize them by clicking the **Customize** icon on the **Select Action** screen.

1. Click the ⚙ **Settings** button.

    You see a screen like this:
2. Click the **Customize Actions** tab.

You see a screen like this:
3. Choose which action icons to display by selecting or deselecting each checkbox. Click the arrow icons to move the icons up or down in the display order you want.

4. Click **Close**.

Parent topic: Selecting Epson ScanSmart Settings

Scanning in Epson Scan 2

Epson Scan 2 gives you access to basic and advanced scanning features. You can scan your document and save the scanned image in various file formats in your operating system's Documents or My Documents folder, or open it in your scanning program. You can preview the scanned image and select or change settings as necessary.

Note: If you are using your Epson product with the Windows 10 S operating system, you cannot use the software described in this section. You also cannot download and install any Epson product software from the Epson website for use with Windows 10 S; you must obtain software only from the Windows Store.

1. Start Epson Scan 2.

You see this window:
2. Select the **Document Source** setting that matches where you placed your original, or select **Auto Detect** to have Epson Scan 2 automatically detect the source.

3. Select the **Scanning Side** setting if you are scanning from the ADF.

4. Select the **Document Size** setting that matches the size of your original, or select **Auto Detect** to have Epson Scan 2 automatically detect the size. You can select **Customize** to enter a custom size, if necessary.

5. Select the image type of your original and how you want it scanned as the **Image Type** setting.

6. Select the **Resolution** setting you want to use for your scan.

7. Select the **Rotate** setting to rotate the scanned image.

8. Select the **Correct Document Skew** setting to correct skewed originals, image contents, or both.

9. Click the **Preview** button.

   Epson Scan 2 previews your original and displays the results in the Epson Scan 2 window.
10. Reinsert your original into the ADF, if necessary.

11. Select any of the additional settings that you want to use on the Main Settings tab.

12. Click the **Advanced Settings** tab and select any settings that you want to use.

13. Select the format in which you want to save your scanned file as the **Image Format** setting. If necessary, select **Options** and select any desired format options.

14. Enter the file name for your scanned file in the **File Name** field. If necessary, select **Settings** to modify the file name settings.

15. Select the location in which you want to save your scanned file as the **Folder** setting. If necessary, select **Select** to create a new folder.

16. Click **Scan**.

    The product scans your original and saves the scanned file in the location you specified.

Placing Originals on the Product

Available Document Source Settings

You can select these Document Source options in Epson Scan 2:

Auto Detect
Automatically detects where the originals are placed on your product for scanning.

ADF
Selects the Automatic Document Feeder as the location where the originals are placed on your product for scanning.

Scanner Glass
Selects the scanner glass as the location where the originals are placed on your product for scanning.

Parent topic: Scanning in Epson Scan 2

Additional Scanning Settings - Main Settings Tab

You can select these additional scanning settings on the Epson Scan 2 Main Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

Stitch Images
When scanning double-sided originals, lets you lay out images from both sides of the original onto one scanned page.

Rotate
Rotates the original image clockwise to the desired angle before scanning it. Select **Auto** to allow your product to automatically rotate the image based on the orientation of the text (may take longer to scan).

Correct Document Skew
Corrects skewed originals, image contents, or both.

Add or edit pages after scanning
Lets you add, remove, or edit the pages in a scan, including rotating pages and changing the page order.

Note: To save multiple pages in a single file, you must select a file format that supports multiple pages such as **PDF** or **Multi-TIFF**. If you select another file format, each scanned image or page is saved as a separate file.

Skip Blank Pages
If the scanner detects marks from the other side of a blank page and adds the marks to the scanned image, adjust this setting to prevent this.

Parent topic: Scanning in Epson Scan 2

Additional Scanning Settings - Advanced Settings Tab

You can select these additional scanning settings on the Epson Scan 2 Advanced Settings tab. Not all adjustment settings may be available, depending on other settings you have chosen.

Remove Background
Removes the background of the originals.

Text Enhancement
Sharpens the appearance of letters in text documents.

Auto Area Segmentation
Makes black and white images clearer and text recognition more accurate by separating the text from the graphics.

Threshold
Adjusts the level at which black areas in text and line art are delineated, improving text recognition in OCR (Optical Character Recognition) programs.

Color Enhance

Enhances the shades of the color you select in the scanned image. This setting is available only if you select **Grayscale** or **Black & White** as the Image Type setting.

Brightness

Adjusts the overall lightness and darkness of the scanned image.

Contrast

Adjusts the difference between the light and dark areas of the overall scanned image.

Gamma

Adjusts the midtone density of the scanned image.

Unsharp Mask

Makes the edges of certain image areas clearer. Turn off this option to leave softer edges.

Descreening

Removes the ripple pattern that might appear in subtly shaded image areas, such as skin tones. This option improves results when scanning magazines or newspapers. (The results of descreening do not appear in the preview image, only in your scanned image.)

Edge Fill

Corrects shadowing around the edges of the image by filling the shadows with black or white.

Dual Image Output

Scans the original image twice using different output settings (Windows only).

Saving Scanned Documents as a Searchable PDF Using Epson Scan 2

You can scan a document and save the text in a searchable PDF. In a searchable PDF, text is recognized using Optical Character Recognition (OCR) and then embedded in the scanned original.

Note: The required Epson Scan 2 OCR Component is installed automatically when you install your product software as instructed on the *Start Here* sheet. If you install your scanner software programs individually, be sure to also install this component if you want to perform OCR.

1. Load your original in the product for scanning.

2. Start Epson Scan 2.

3. Select your scan settings.

4. Click **Preview** and adjust the area you want to scan, if necessary.

5. If you are using the ADF, reload the ejected original.

6. Select **Searchable PDF** as the Image Format setting.

7. Select **Options** from the Image Format list.

   You see this window:
8. Select any of the options on the General tab.

9. Select the **Text** tab.

10. Make sure the language used in the document text is selected as the **Text Language** setting.

11. Select the **Security** tab if you want to add a password to the PDF or protect printing or editing properties.

12. Click **OK**.

13. Confirm the **File Name** setting and select a **Folder** setting for your document.

14. Click **Scan**.

    The scanned image is saved as a searchable PDF.

Parent topic: Scanning in Epson Scan 2

Image Format Options

You can select different image formats and related options. For details on available options, click the **?** icon on the Epson Scan 2 Image Format Options window. Not all image formats have options.

BITMAP (*.bmp)
A standard image file format for most Windows programs.

JPEG (*.jpg)
An image format that lets you highly compress image data. However, the higher the compression, the lower the image quality. (The TIFF format is recommended when you need to modify or retouch your scanned image.)

PNG (*.png)
An image format that does not lose quality during editing.

TIFF (*.tif)
A file format created for exchanging data between many programs, such as graphic and DTP software.

Multi-TIFF (*.tif)
A TIFF file format when multiple pages are saved to the same file, allowing you to edit the images using a compatible program.

PDF (*.pdf)
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file.

Searchable PDF (*.pdf)
A document format that is readable by Windows and Mac systems using Adobe Reader, Acrobat, or other programs. You can save multi-page documents in one PDF file. Recognized text in the scanned document can be searched.

Parent topic: Scanning in Epson Scan 2

Scan Resolution Guidelines

The **Resolution** setting, measured in dpi (dots per inch), controls the amount of detail captured in your scans. Increasing the resolution raises the amount of detail captured but comes with the following disadvantages:

• Larger file sizes

• It takes longer to scan your originals, send/receive your scans by email or fax, and to print your scans

- The image may become too large to fit on your display or print on paper

If you plan to enlarge a scanned image so you can print it at a larger size, you may need to increase the resolution from the default resolution set by Epson Scan 2. Follow these guidelines to determine the resolution setting you need:

- You will scan the image at its original size but enlarge it later in an image-editing program.

  Increase the Epson Scan 2 Resolution setting in your scan. Increase the resolution by the same amount you will increase the image size to retain a high image quality. For example, if the resolution is 300 dpi (dots per inch) and you will double the image size later, change the Resolution setting to 600 dpi.

- You will scan the image at 100% or a smaller size.

  Select the Epson Scan 2 Resolution setting based on how you will use the scanned image:

  - Email/view on a computer screen/post on the web: 96 to 200 dpi
  - Print/fax/convert to editable text (OCR)/create searchable PDF: 200 to 300 dpi

Parent topic: Scanning in Epson Scan 2

Faxing

See these sections to fax using your product.

Note: This product allows you to store names, telephone numbers, and fax data in its memory even when the power is turned off. Make sure you restore all of the default settings if you give away or dispose of the product. This will erase all of your network settings and fax data.

Connecting a Telephone or Answering Machine

You must connect your product to a telephone wall jack to send or receive faxes. If you want to use the same telephone line to receive calls, you can connect a telephone or answering machine to your product using an additional phone cable.

Note: If you do not connect a telephone to your product, make sure Receive Mode is set to **Auto**. Otherwise, you cannot receive faxes.

1. Connect a phone cable to your telephone wall jack and to the **LINE** port on your product.
Note: If you have a DSL or ISDN connection, you must connect the appropriate DSL filter, or ISDN terminal adapter or router to the wall jack to be able to use the line for faxing or voice calls using your product. Contact your DSL or ISDN provider for the necessary equipment.
2. If you are connecting a telephone or answering machine to your product using a second phone cable, remove the cap from the **EXT** port on your product.
3. Connect a second phone cable to your telephone or answering machine and to the **EXT** port on your product.
Note: If you connect an answering machine and Receive Mode is set to **Auto**, set the number of rings before your product answers a call to a number that is higher than your answering machine's setting for the number of rings.

Setting the Number of Rings to Answer

Parent topic: Setting Up Fax Features

Using the Fax Setup Wizard

You can setup the product's basic fax settings using the Fax Setting Wizard. This wizard is automatically displayed when the product is turned on for the first time. You can also change these settings individually from the Fax Settings menu.

Note: These settings can be locked by an administrator. If you cannot access or change these setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Fax Settings** > **Fax Setting Wizard**.

You see a screen like this:

3. Select **Proceed**.

4. On the Fax Header screen, use the displayed keypad to enter the sender name for your fax source, such as your name or a business name. You can enter up to 40 characters. Select **OK** when you are done.

5. On the Your Phone Number screen, use the displayed keypad to enter your fax number, up to 20 characters. Select **OK** when you are done.

   Note: The name and phone number in the fax header identifies the source of the faxes you send.

6. On the Distinctive Ring Setting screen, do one of the following:

   • If you have subscribed to a distinctive ring service from your telephone company, select **Proceed**. Select the ring pattern to be used for incoming faxes or select **All**. Go to the next step.

   • If you do not have a distinctive ring service, select **Skip** and go to step 9.

   Note: Distinctive ring services allows you to have several phone numbers on one phone line. Each number is assigned a different ring pattern. You can use one number for voice calls and another for fax calls. Select the ring pattern assigned to fax calls in the DRD Setting. If you select a ring pattern other than **All**, Receive Mode is automatically set to **Auto**.

7. On the Proceed screen, confirm the displayed settings and select **Proceed**, or press the back arrow to change the settings.

8. On the Run Check Fax Connection screen, select **Start Checking** and follow the on-screen instructions to check the fax connection and print a report of the check result. If there are any errors reported, try the solutions on the report and run the check again.

If the Select Line Type screen appears, select the correct line type.

If the Dial Tone Detection screen appears, select **Do Not Detect**. However, disabling the dial tone detection function may drop the first digit of a fax number and send the fax to the wrong number.

Parent topic: Setting Up Basic Fax Features
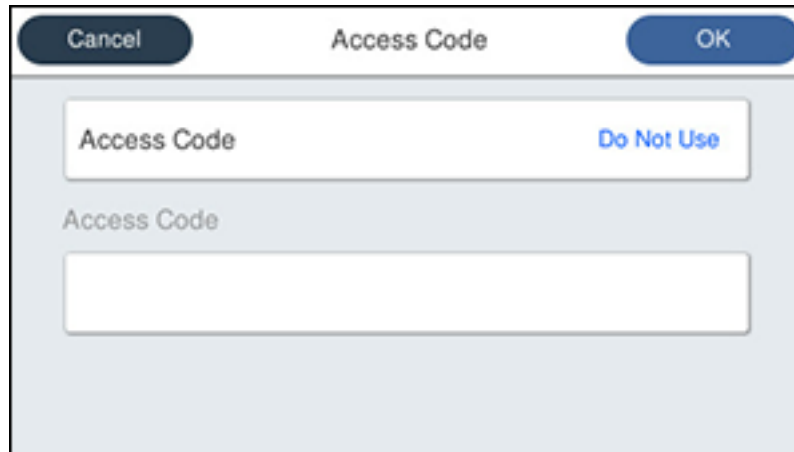

Selecting the Line Type

If you connect the product to a PBX phone system or terminal adapter, you must change the product's line type. PBX (Private Branch Exchange) is used in office environments where an external access code such as "9" must be dialed to call an outside line. The default Line Type setting is PSTN (Public Switched Telephone Network), which is a standard home phone line.

Note: This setting can be locked by an administrator. If you can't access or change this setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Line Type** > **PBX**.

   You see a screen like this:

3. Select **Access Code**.

4. Select **Use**.

5. Select the Access Code field.

6. Use the displayed keypad to enter the access code, such as 9, and select **OK**.

Parent topic: Setting Up Basic Fax Features

Setting the Number of Rings to Answer

If you connect an external answering machine and select to receive faxes automatically, make sure the Rings to Answer setting is correct. The number of rings should be higher than the number of rings your answering machine is set to for answering a call.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the 🏠 home button, if necessary.

2. Select **Settings** > **General Settings** > **Fax Settings** > **Basic Settings** > **Rings to Answer**.

   You see a screen like this:
3. Select the number of rings and select **OK**. Make sure to select a number higher than the number of rings your answering machine is set to for answering a call.

Note: An answering machine picks up every call faster than the product, but the product can detect fax tones and start receiving faxes. If you answer the phone and hear a fax tone, check that the product has started receiving the fax, then hang up the phone.

Parent topic: Setting Up Basic Fax Features

Selecting Advanced Fax Settings

You can select a variety of advanced fax settings.

Note: These settings can be locked by an administrator. If you cannot access or change these setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.

2. Select **Settings** > **General Settings** > **Fax Settings**.

   You see a screen like this:

3. If you want to create shortcuts for up to three fax operations, select **Quick Operation Button** and select a setting and a shortcut button.

   Note: These shortcuts are displayed on the Fax Settings tab in the main **Fax** screen.

4. Select the group of settings you want to change.

Parent topic: Setting Up Fax Features

Basic Settings - Fax

Set the basic options you want to use for incoming and outgoing faxes.

Setting	Options	Description
Fax Speed	Fast(33,600bps)	Sets the speed at which you send and receive faxes.
	Medium(14,400bps)	
	Slow(9,600bps)	
ECM	On	Turns on Error Correction Mode (ECM) to automatically correct errors in sent or received fax data.
	Off	Turns off Error Correction Mode (ECM); color faxes cannot be sent or received.
Dial Tone Detection	On	Automatically dials the number you enter for faxing when the product detects a dial tone.
	Off	Turns off automatic dial tone detection, which may be necessary if the product is connected to a PBX (Private Branch Exchange) or a TA (Terminal Adapter). However, turning this setting off may cause the product to drop the first digit of a fax number.
Line Type	PSTN	Selects a standard phone line (Public Switched Telephone Network).
	PBX	Selects Private Branch Exchange, the type of phone line used in office environments where an access code such as 9 must be used to call an outside line.
Header	Your Phone Number	Select to enter the header information and your phone number for inclusion on outgoing faxes.
	Fax Header	

Setting	Options	Description
Receive Mode	Manual	Lets you confirm whether an incoming fax should be printed; a telephone must be connected to the product
	Auto	Automatically receives and prints faxes.
Distinctive Ring	All	If you are using a Distinctive Ring Service on your phone line, your telephone company can assign two or more phone numbers to the same line and assign different ring patterns to each. If you use this service, select the number of rings for your fax number so your product can receive faxes on the correct number of rings. Select **All** for phones lines that do not use this service.
	Single	
	Double	
	Triple	
	Double&Triple	
Rings to Answer	1 to 9	Sets the number of rings before your product receives a fax. If Receive Mode is set to **Auto** and an answering machine is connected to the product, make sure this setting is set higher than the number of rings your answering machine is set to answer a call.
Remote Receive	Off	Lets you start receiving faxes using your phone instead of operating the product (if the Receive Mode is set to **Auto**). When you select **On**, you must also set a **Start Code**. If you are using a cordless handset with its base connected to the product, you can start receiving the fax by entering the code using the handset.
	On	
	Start Code	
Rejection Fax	Various	Lets you automatically reject faxes from blocked numbers, with blank headers, or from unrecognized contacts.

Parent topic: Selecting Advanced Fax Settings

Send Settings - Fax

Set the send options you want to use for outgoing faxes.

Setting	Options	Description
Batch Send	Off	Sorts outgoing faxes by recipient in the product's memory, and then sends them as a batch.
	On	
Save Failure Data	Off	Saves faxes that failed to be sent in the product's memory. You can resend the faxes from the product's Job Status menu. When you select **On**, you can select a time period to store the saved faxes.
	On	
Wait Time for Next Original	Off	Sets a time in between sending the next fax
	On	
Fax Preview Display Time	Off	Sets a time for previewing the scanned document on the LCD screen before it is sent
	On	

Parent topic: Selecting Advanced Fax Settings

Receive Settings - Fax

Set the save/forward or print options you want to use for incoming faxes.

Save/Forward Settings

Setting	Options	Description
Unconditional Save/Forward	Save to Inbox	Saves received faxes in printer's inbox
	Save to Computer	Converts received faxes to PDFs and saves them on a computer connected to the printer
	Save to Memory Device	Converts received faxes to PDFs and saves them on an external memory device connected to the printer
	Forward	Forwards received faxes to another fax machine, or converts them to PDFs and forwards them to a shared folder on a network or an email address. Forwarded faxes are deleted from the printer.
	Email Notifications	Sends an email notification after a fax is received, printed, saved, or forwarded

Setting	Options	Description
Conditional Save/Forward	—	Sets up conditions to save, forward, or print received faxes. Select **Enable** to enable a condition. Select the arrow icon to enter conditions and other settings.
Common Settings	Inbox Settings	Sets up what happens when the fax memory is full, or sets up a password for the inbox
	Email Subject to Forward	Specifies a subject when forwarding a fax to an email address

Print Settings

Setting	Options	Description
Auto Reduction	On	Select to reduce the size of large received faxes to fit on the paper size in the selected paper source.
	Off	Select to print large incoming faxes at their original size on multiple sheets, if necessary.
Split Page Settings	Delete Print Data After Split	Select how to split large incoming faxes across multiple sheets when using the **Auto Reduction** option.
	Overlap When Split	
Auto Rotation	On	If you have loaded A4-size paper, select **On** to rotate landscape-oriented incoming faxes so that they print correctly on the paper.
	Off	
Add Reception Information	On	Select **On** to include the date, time, the sender's information, and a page number in the header of your incoming faxes.
	Off	
2-Sided	On	Select **On** to print incoming faxes double sided. You can also select the **Binding Margin**.
	Off	
Print Start Timing	All Pages Received	Select to print incoming faxes after the product receives all of the pages of the document.
	First Page Received	Select to print incoming faxes as soon as the product receives the first page of the document.

Setting	Options	Description
Collation Stack	On	Select **On** to print incoming faxes so that the pages are stacked in the correct page order. (When the product is low on memory, this option may not be available.)
	Off	
Print Suspend Time	Off	Select **On** to set a time period to stop automatic printing of faxes or reports and save received faxes in the product's memory. (Make sure there is enough free memory before using this function.)
	On	
	Time to Stop	
	Time to Restart	
Quiet Mode	On	Select **On** to reduce noise during printing (printing speed may be reduced).
	Off	

Parent topic: Selecting Advanced Fax Settings

Report Settings - Fax

Set the options you want for fax reports.

Setting	Options	Description
Forwarding Report	Print on Error	Prints a report after forwarding a received document only if an error occurs
	Print	Prints a report after forwarding a received document
	Do Not Print	Does not print a report after forwarding a received document
Backup Error Report	On	Select **On** to print a report when a backup error for sending faxes occurs
	Off	
Fax Log Auto Print	Off	Does not print a fax log
	On(Every 30)	Prints a fax log after every 30 fax jobs are completed
	On(Time)	Prints a fax log at a specified time. If the number of completed fax jobs exceeds 30, the fax log prints before the specified time.

Setting	Options	Description
Attach Fax Image to Report	Off	Does not include an image on the Transmission Report
	On(Large Image)	Prints a Transmission Report that includes the upper part of the first page of the sent document
	On(Small Image)	Prints a Transmission Report that includes a reduced size of the entire first page of the sent document
Report Format	Simple	Prints a simple fax report
	Detail	Prints a fax report that includes error codes
Output Method	Print	Prints fax reports
	Save to Memory Device	Saves fax reports to an inserted memory device. Select **Create a folder to save fax data** to create a folder on the inserted memory device.
	Forward	Forwards fax reports to a specified destination

Security Settings - Fax

Set the security options you want to use for fax data.

Setting	Options	Description
Direct Dialing Restrictions	Off	Does not restrict dialed fax numbers.
	On	Allows faxing only to numbers stored in the contacts list or history.
	Enter Twice	Requires you to enter fax numbers twice to prevent errors.
Broadcasting Restrictions	Off	Select **On** to allow only one fax number to be entered as the recipient
	On	
Confirm Address List	Off	Selects whether or not to display a recipient confirmation screen before a fax is sent.
	On	
Backup Data Auto Clear	Off	Automatically erases sent or received fax data from your product's memory.
	On	

Setting	Options	Description
Clear Backup Data	—	Deletes all sent or received fax data remaining in your product's memory; run this function if you are giving away or disposing of your product.

Setting Up the Fax Utility - Windows

You can set up the FAX Utility for Windows for use with your product.

Note: Before using the FAX Utility for Windows, make sure you have set up the fax features on your product using the product control panel. Also first confirm that you can send and receive faxes using the control panel.

1. Do one of the following:

   - **Windows 11:** Click , then search for **EPSON Software** and select it.

   - **Windows 10:** Click and select **EPSON Software**.

   - **Windows 8.x**: Navigate to the **Apps** screen.

   - **Windows (other versions)**: Click or **Start** > **Programs** or **All Programs** > **EPSON Software**.

2. Select **FAX Utility**.

The first time you use the FAX Utility, you see this introduction window:
3. Read about the FAX Utility and click **Return to the main window** at the bottom of the window.

You see this window:
4. Click **Select Printer** and follow the on-screen instructions to transfer your product's fax settings to the FAX Utility.

   Note: For detailed information, click **Help** or **Open Online Help**.

   Parent topic: Setting Up Fax Features

Setting Up Fax Features Using the Fax Utility - Mac

You can set up your fax header and select your fax settings using the FAX Utility for Mac.

1. In the Apple menu or the Dock, select **System Preferences**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select the **FAX** option for your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.

2. Double-click **FAX Utility**, if necessary.

   You see a window like this:
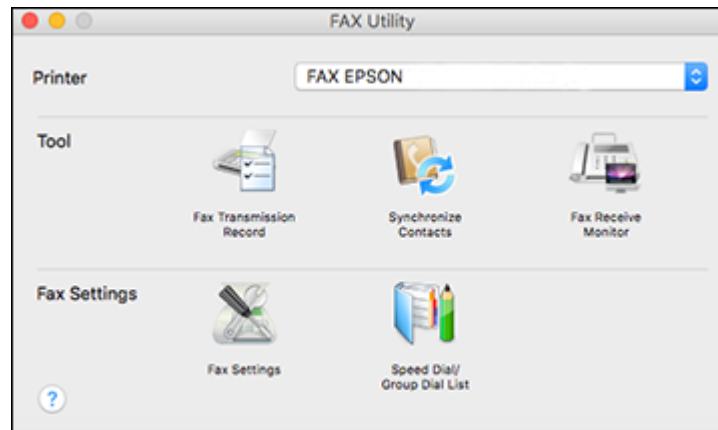

3. Select your **FAX** product in the Printer list.

4. Select **Fax Settings**.

5. Follow the prompts that appear on the screen to enter your fax header information and select your fax settings.

   Note: For detailed information, select the FAX Utility **?** icon.

   Parent topic:

Setting Up Contacts and Contact Groups

You can set up a list of contacts and their fax numbers so you can quickly select them for faxing. You can also set up contact groups to send a fax message to multiple contacts.

Note: Contacts can be locked by an administrator. If you cannot access or change contacts, contact your administrator for assistance.

Parent topic: Faxing

Creating a Contact

You can create a list of contacts to save frequently used fax numbers.

Note: You can create up to 200 contacts and contact groups combined.

1. Press the ⌂ home button, if necessary.

2. Select **Fax**.

    You see a screen like this:
3. Select **Contacts**. Enter the administrator password, if necessary.

    You see a screen like this:
4. Select the [icon] icon.

5. Select **Add Contact**.

   You see a screen like this:

6. Select the registry number you want to use for the contact you are adding.

7. Select the **Name** field, use the displayed keyboard to enter the contact name (up to 30 characters), and select **OK**.

8. Select the **Index Word** field, use the displayed keyboard to enter a word to use when searching for an entry (up to 30 characters), and select **OK**.

   Note: This field is automatically populated after you enter the name. This field is optional.

9. Select the **Fax Number** field, and use the numeric keypad on the LCD screen or the buttons on the product to enter the fax number. You can enter up to 64 characters. Select **OK** when you are done.

   Note: If necessary, enter an outside line access code (such as **9**) at the beginning of the fax number. If the access code has been set up in the **Line Type** setting, enter the **#** pound sign instead of the code.

10. Set the **Fax Speed**, **Subaddress**, and **Password** settings, if necessary.

11. Select **OK**.

Parent topic: Setting Up Contacts and Contact Groups

Editing or Deleting a Contact

You can edit or delete any of the contacts on your list.

1. Press the ⌂ home button, if necessary.
2. Select **Fax**.

   You see a screen like this:

3. Select **Contacts**. Enter the administrator password, if necessary.

4. Select the [>] icon next to the contact you want to edit or delete.

    You see a screen like this:
5. Do one of the following:

    • To delete the contact, select **Delete** and select **Yes** on the confirmation screen.

    • To edit the contact, select **Edit**, select the item you want to change, enter the correct information, and select **OK**. When you are finished editing, select **OK**.

    Parent topic: Setting Up Contacts and Contact Groups

Creating a Contact Group

You can create a group of contacts so that you can easily send faxes to multiple recipients.

Note: You can create up to 200 contacts and contact groups combined.

1. Press the ⌂ home button, if necessary.

2. Select **Fax**.

You see a screen like this:
3. Select **Contacts**. Enter the administrator password, if necessary.

4. Select the ![icon] icon.

5. Select **Add Group**.

You see a screen like this:
6. Select the registry number you want to use for the group you are adding.

7. Select the **Group Name** field, use the displayed keyboard to enter the group name (up to 30 characters), and select **OK**.

8. Select the **Index Word** field, use the displayed keyboard to enter a word to use when searching for a group (up to 30 characters), and select **OK**.

   Note: This field is automatically populated after you enter the group name. This field is optional.

9. Select **Contact(s) Added to the Group**.

   You see your contacts list.

10. Select each contact you want to include in your group.

   Each selected contact is highlighted.

11. Select **Close**.

12. Select **OK**.

Parent topic: Setting Up Contacts and Contact Groups

Editing or Deleting a Contact Group

You can edit an existing contact group to add or delete entries. You can also delete the entire contact group.

1. Press the ⌂ home button, if necessary.
2. Select **Fax**.

You see a screen like this:

3. Select **Contacts**. Enter the administrator password, if necessary.

4. Select the ⟩ icon next to the group you want to edit or delete.

   You see a screen like this:
Note: If you want to delete the entire group, select **Delete**.

5. To edit the group, select **Edit**.

6. Select **Contact(s) Added to the Group**.

   You see a list of the contacts in your group.

7. Select the contact you want to add or delete.

   Each selected contact is highlighted.

8. Select **Close**.

9. Select **OK**.

Sending a Stored Fax
Dialing Fax Numbers from a Connected Telephone

Parent topic: Sending Faxes

Sending a Fax Using the Keypad, Contact List, or History

You can send a fax from your product control panel by entering the fax number, or selecting the number from either the contact list or fax history.

Note: You can send a black-and-white fax to up to 200 recipients at a time, or send a color fax to one recipient at a time. If your recipient's fax machine does not print in color, your fax is automatically sent in black-and-white.

Note: The product can queue up to 50 black-and-white fax jobs. You can check or cancel fax jobs in the queue using the Job Status menu.

1. Place your original on the product for faxing.

2. Press the ⌂ home button, if necessary.

3. Select **Fax**.

   You see a screen like this:
Note: To fax a double-sided document, place your document in the ADF and turn on the **ADF 2-Sided** setting. (You cannot fax double-sided documents in color.)

4. Do one of the following to select fax recipients:

   • Select **Keypad** and enter a fax number. Select **OK** when done. To add another fax number, repeat the same steps. You can also use the numeric keypad on the control panel to enter a fax number.

   Note: If direct dialing has been restricted, you can only select the number from the contact list or fax history. If necessary, enter an outside line access code (such as 9) at the beginning of the fax

number. If the access code has been set up in the **Line Type** setting, enter the **#** pound sign instead of the code. If your fax number requires a brief pause, select the [ ] icon to insert a pause symbol (–).

- Select **Contacts** to display the contact list. Select one or more contacts (select the contact again to deselect it). You can also select the **Search for Contacts** field to search for recipients by name, index name, or entry number. Select **Close** when you are finished.
- Select **Recent** to display the sent fax history.

Note: To delete entered recipients, select the **Select Recipient** field, select the recipient you want to delete, and select **Remove**.

5. If you need to change any fax settings, select **Fax Settings** and select your settings.

6. If you want to preview your fax in black-and-white on the LCD, press the [ ] **Preview** icon. (If the preview looks incorrect, select **Cancel**, reposition the document or change the fax settings, and repeat this step.)

   Note: If you do not touch the preview screen for the amount of time selected as the **Settings** > **General Settings** > **Fax Settings** > **Send Settings** > **Fax Preview Display Time** setting, your product sends the fax automatically. You cannot preview images when the Direct Send setting is turned on.

7. If you want to save your fax settings for later use, select **Presets** and add a new entry.

8. Select the [ ] **Send** icon.

   Note: To cancel faxing, select the ⊘ stop button. You can also cancel the job or check the job status from the Job Status menu.

   Your product scans your original and prompts you to place additional pages, if necessary.

After scanning your originals, your product dials the number and sends the fax.

Note: Your product does not save sent color faxes to its memory. If the **Save Failure Data** option is enabled, faxes that failed to be sent are stored to the product's memory and you can resend them from the Job Status menu screen.

Sending a Fax at a Specified Time

You can send a fax at a time of your choice.

Note: Make sure the product's date and time settings are correct. You can only send faxes in black-and-white when you use this option.

1. Place your original on the product for faxing.
2. Press the ⌂ home button, if necessary.
3. Select **Fax**.

   You see a screen like this:
4. Enter a fax number or select a number from the **Contacts** or **Recent** lists.
5. Select **Fax Settings**.
6. Select **Send Fax Later**.
7. Select **On**.
8. Select **Time**, use the displayed keypad on the LCD screen to enter your desired time, and select **OK**.

9. Select the ⬦ **Send** icon.

> **Note:** To cancel faxing, select the ▽ stop button.

After scanning your originals, your product dials the number and sends the fax at the specified time.

Note: If the product is turned off at the specified time, the fax is sent when it is powered on.

Disconnecting a USB Device

After you finish working with a USB device, follow these steps to remove it.

1. If your product is connected to your computer using a USB cable, do one of the following:

    • **Windows**: Open the **My Computer**, **Computer**, **This PC**, or **Windows Explorer** utility. Then right-click the name of your USB device (listed as a removable disk) and select **Eject**.

    • **Mac**: Drag the removable disk icon for your USB device from the desktop into the trash.

    Caution: Do not remove a USB device before completing the procedure above or you may lose data from the flash drive.

2. Pull the USB device or cable out of the USB port on the front of the product.

Refilling Ink and Replacing the Maintenance Box

When the ink level is below the lower line on an ink tank, you need to refill it.

Before checking the ink levels or refilling an ink tank as described here, be sure to read the ink safety precautions.

Caution: If the ink level is below the lower line on the ink tank, fill it to the upper line on the ink tank. Continued use of the product when the ink level is below the lower line on a tank could damage the product.

Caution: Visually check the ink levels in the product's ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

Ink Safety Precautions

Note: Epson strongly recommends the use of genuine ink to ensure optimal print quality and performance.

Ink Handling Precautions

• Keep ink bottles and the ink tanks out of the reach of children. Do not allow children to drink from or handle the ink bottles and bottle caps.

• Do not tilt or shake an ink bottle after opening it; otherwise, ink may leak.

• If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If discomfort or vision problems persist, see a doctor immediately. If ink gets into your mouth, spit it out and see a doctor right away.

• Do not shake or squeeze the ink bottles.

- If ink spills, wipe it up immediately. To prevent the ink from spreading, blot the spill with a dry cloth, then wipe it with a damp cloth. The ink will be hard to remove once it has dried.

Ink Refilling Precautions

- Use ink bottles with the correct part number for this product.

- Epson's warranties do not extend to any damage caused by the use of third-party ink or ink not designed for your printer.

- Do not open the ink bottle package until you are ready to fill an ink tank. Ink bottles are vacuum packed to maintain reliability. If you leave an ink bottle unpacked for a long time before using it, print quality may be affected.

- If the ink level is below the lower line on an ink tank, refill the ink. Continued use of the product when the ink level is below the lower line on an ink tank could damage the product.

- Visually check the ink levels in the product's ink tanks to confirm the actual ink levels. Continued use of the product when the ink is expended could damage the product.

- For optimum printing results, refill the ink tanks to the upper line at least once a year.

- After bringing an ink bottle inside from a cold storage site, allow it to warm up at room temperature for at least three hours before using it.

- Use the ink bottle before the date printed on the package.

- After opening an ink bottle, Epson recommends using it as soon as possible.

- Store ink bottles in a cool, dark place. Keep them out of direct sunlight.

- Store the ink bottles in the same environment as the product. When storing or transporting an opened ink bottle, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when you transport the bottle.

- Handle ink carefully. Ink may splatter when the ink tanks are being filled or refilled with ink. If ink gets on your clothes or belongings, it may not come off. If ink adheres to the area around the tank, wipe it off using a lint-free, clean cloth or cotton swab.

Ink Bottle and Ink Tank Information

- To maintain optimum print head performance, some ink is consumed from all ink tanks during printing and when performing maintenance operations, such as cleaning the print head. Ink may also be consumed when the product is turned on.

- Part of the ink from the included bottles is used for printer setup. You will notice ink levels in the tank decrease during charging. This decrease is normal and does not affect the stated in-box yields.

- Quoted ink yields may vary depending on the images you are printing, the paper type you are using, how often you print, and environmental conditions such as temperature.

- The ink bottles may contain recycled materials, but this does not affect product function or performance.

- When printing in monochrome or grayscale, color ink may be used instead of black ink, depending on the paper type or print quality settings. This is because a mixture of color inks is used to create black.

- A reserve amount of ink remains in the tank when your product indicates that a refill is necessary.

Checking Ink and Maintenance Box Levels - Windows
Checking Ink and Maintenance Box Levels - Mac
Disabling Special Offers with Windows

Parent topic: Refilling Ink and Replacing the Maintenance Box

Checking the Ink Levels on Your Product

To confirm the actual ink remaining, visually check the ink levels in the product's ink tanks. Make sure the ink levels are above the lower line on the ink tanks. If any of the ink tanks are below the lower line, fill them to the upper line on the ink tank.

Note: The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

As a precaution, perform regular visual inspections of the ink tanks to ensure ink levels do not fall below the lower line. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Purchase Epson Ink and Maintenance Box

You can purchase genuine Epson ink, maintenance boxes, and paper at epson.com (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Note: Epson's warranties do not extend to any damage caused by the use of third-party ink or ink not designed for your printer.

The included initial ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature.

Ink Bottle and Maintenance Box Part Numbers

Parent topic: Refilling Ink and Replacing the Maintenance Box

Ink Bottle and Maintenance Box Part Numbers

Use these part numbers when you order or purchase new ink bottles or a new maintenance box. Use the ink by the date printed on the package.

Ink color	Part number
Black	542120
Cyan	542220
Magenta	542320
Yellow	542420

Maintenance box part number: C12C934591

Parent topic: Purchase Epson Ink and Maintenance Box

Refilling the Ink Tanks

Make sure you have a new ink bottle handy and have read the ink safety precautions before you begin.

You can continue to use the product even if one or more ink tanks are not filled all the way. However, for the most accurate ink level monitoring, fill all the ink tanks up to the upper line.

Note: The product has a low ink alert system. The accuracy of this system depends on the user refilling the ink tanks correctly. The product cannot directly measure the ink levels in the tanks; instead it

estimates the amount of ink remaining by internally monitoring ink usage. The low ink alert system may generate inaccurate messages if the ink tanks are not refilled according to these instructions.

As a precaution, perform regular visual inspections of the ink tanks to ensure ink levels do not fall below the lower line. Continued use of the product when the ink level is below the lower line on the tank could damage the product.

Caution: If ink spills, wipe it off immediately with a damp towel to avoid permanent stains. If ink gets on your clothes or belongings, it may not come off.

1. Turn on your product.
2. Open the ink tank cover, then open the cap for the ink tank you are going to fill.
3. Hold the ink bottle upright and slowly turn the bottle cap to remove it.

Caution: Do not shake or squeeze the ink bottle. Do not touch the top of the bottle after its cap is removed.

Warning: If ink gets on your skin, wash it thoroughly with soap and water. If ink gets into your eyes, flush them immediately with water. If ink gets into your mouth, spit it out immediately. Seek medical advice if problems persist. Keep the ink bottles out of the reach of children and do not drink the ink.

4. Insert the ink bottle into the filling port and wait for the ink to fill the tank. Do not squeeze the bottle. Ink flows into the tank and stops automatically when the ink is filled to the upper line.
Note: Refer to the color-coded sticker on the ink tank unit to identify the color of each tank. Do not force the bottles into position; they are keyed for each color.

Note: If ink does not flow from the bottle, lift and reinsert the bottle.

5. When the ink tank is full, remove the ink bottle and securely close it with the cap.

Note: If any ink remains in the bottle, store the bottle upright for later use.

6. Close the ink tank cap.
7. Repeat the previous steps as necessary for each ink tank you need to refill.

8. Close the ink tank cover.
9. Select **Settings** > **Maintenance** > **Fill Ink** and follow the on-screen instructions to reset the ink levels.

Parent topic: Refilling Ink and Replacing the Maintenance Box

Maintenance Box Replacement

The maintenance box stores surplus ink that gets collected during printing or print head cleaning. When you see a message on the LCD screen, follow the on-screen instructions to replace the maintenance box.

Note: When the maintenance box is full, you cannot print or clean the print head until it is replaced. However, you can perform operations that do not require ink, such as scanning.

Note the following precautions when replacing the maintenance box:

- Do not remove the maintenance box or its cover except when replacing the maintenance box; otherwise, ink may leak.
- Do not touch the green chip on the side of the maintenance box.
- Do not tilt the maintenance box after removing it or ink may leak.
- Do not touch the openings in the maintenance box or you may get ink on you.
- Do not drop the maintenance box or subject it to strong shocks.
- If you cannot replace the cover, the maintenance box may not be installed correctly. Remove and reinstall the maintenance box.
- Do not store the maintenance box in high or freezing temperatures.
- Do not replace the maintenance box during printing; otherwise, ink may leak.

• Keep the maintenance box out of direct sunlight.

Caution: Do not reuse a maintenance box that has been removed and left uninstalled for a long period. Keep the maintenance box away from direct sunlight.

Note: The maintenance box is a user-replaceable part and is not covered by the product warranty.

Print Head Maintenance

If your printouts become too light, or you see dark or light bands across them, you may need to clean the print head nozzles. Cleaning uses ink, so clean the nozzles only if print quality declines.

You can check for clogged nozzles before you clean them so you don't clean them unnecessarily.

Note: You may not be able to clean the print head when the ink level in any of the tanks is low. You may have to refill the ink tank first.

If you still see white or dark lines or gaps in your printouts, even after cleaning the print head several times, you can run a Power Cleaning.

Checking the Nozzles Using the Product Control Panel

You can check the print head nozzles using the control panel on your product.

1. Make sure there are no errors on the LCD screen.

2. Load a few sheets of plain paper in the product.

3. Press the ⌂ home button, if necessary.

4. Select **Settings** > **Maintenance** > **Print Head Nozzle Check**.

   You see a screen like this:

5. Select **Start**.

   The nozzle pattern prints.

6. Check the printed pattern to see if there are gaps in the lines.

   Print head is clean

Print head needs cleaning

7. Do one of the following:

   • If there are no gaps, select **O**.

   • If there are gaps or the pattern is faint, select **X** and continue.

8. Follow the instructions on the screen to clean the print head, check the nozzles, and repeat the process as necessary.

   Caution: Never turn off the product or open the front cover during a cleaning cycle or you may not be able to print.

If you don't see any improvement after cleaning the print head up to 3 times, wait at least 12 hours without printing or longer if printing. Then try cleaning the print head again. If quality does not improve, run a Power Cleaning. If quality still does not improve, contact Epson.

Cleaning the Print Head Path

If the print quality has not improved after cleaning and aligning the print head and cleaning the paper path, the print head path inside the printer may be smeared with ink.

To clean the print head path, use the following:

• Several cotton swabs

• ¼ cup (59 ml) water containing 2 to 3 drops of mild dish detergent

• A small flashlight

Caution: Do not use any other liquid to clean the print head path or you may damage your product. Do not use tissue paper to clean the inside of the product. The print head nozzles may become clogged with lint.

1. Turn off the product.

2. Unplug the power cable.

3. Disconnect any connected cables.

4. Close the document cover, if necessary.

5. Lift up the scanner unit with both hands until it locks.
Caution: Do not touch the flat white cable, translucent film, or ink tubes inside the product. Doing so may cause a malfunction.
6. Using the flashlight, check the translucent film shown here for ink smears.
| 1 | Translucent film |
| 2 | Print head rail |

Caution: Do not touch the print head rail or wipe the grease off of it. You may not be able to print.

7. Moisten a cotton swab with the water and detergent mixture, and squeeze out any excess moisture. Lightly wipe the ink off the translucent film.
Caution: Do not press too hard on the film or you may dislocate the anchor springs and damage your product.

8. Use a new, dry cotton swab to dry the translucent film.

9. Repeat steps 7 and 8 as necessary to clean all ink smears.

10. When the translucent film is dry, close the scanner unit.

11. Reconnect any disconnected cables, plug in the power cord, and turn on the product.

Checking the Sheet Counter - Windows

You can check the number of sheets of paper that have fed through the product by checking the sheet counter.

1. Access the Windows Desktop and right-click the 🖨 icon for your product in the right side of the Windows taskbar, or click the up arrow and right-click 🖨.

2. Select **Printer Settings**.

3. Click the **Maintenance** tab.

4. Select **Printer and Option Information**.

   You see this window:

5. After checking the number of sheets fed into the printer, click **OK** to close the window.

   Note: The number of sheets is displayed only when Epson Status Monitor 3 is enabled.

   Parent topic: Checking the Number of Sheets Fed

Checking the Sheet Counter - Mac

You can check the number of sheets of paper that have fed through the product by checking the sheet counter.

1. In the Apple menu or the Dock, select **System Preferences** or **System Settings**. Select **Print & Fax**, **Print & Scan**, or **Printers & Scanners**, select your product, and select **Options & Supplies**. Select **Utility** and select **Open Printer Utility**.

2. Select **Printer and Option Information**.

   You see this window:
3. After checking the number of sheets fed into the printer, click **OK** to close the window.

Cleaning and Transporting Your Product

See these sections if you need to clean or transport your product.

Cleaning Your Product

To keep your product working at its best, you should clean it several times a year.

Caution: Do not use a hard brush, benzene, alcohol, or paint thinner to clean the product or you may damage it. Do not use oil or other lubricants inside the product or let water get inside it. Close the rear paper feed slot when you are not using it, to keep out dust.

1. Turn off the product.

2. Wait for the ⏻ power light to turn off, then unplug the power cable.

3. Disconnect any connected cables.

4. Remove all the paper from the product.

5. Clean the outer case and control panel with a soft, dry cloth. Do not use liquid or chemical cleansers.

6. Clean any paper cassettes using a soft brush.

7. Clean the scanner glass and the glass area on the left with a soft, lint-free cloth (microfiber is recommended), moistened with a little glass cleaner.

   Caution: Do not spray glass cleaner directly on the glass and do not press the glass surface with any force.
Note: If lines appear on the printout or in scanned images, carefully clean the scanner glass on the left.

8. Clean the document mat using a soft, lint-free cloth (microfiber is recommended), moistened with a mild detergent.
9. Wipe the document mat with a clean, dry cloth.

10. Open the ADF cover.
11. Use a soft, dry, lint-free cloth (microfiber is recommended) to clean the rollers and the interior of the ADF.
12. Close the ADF cover.

Parent topic: Cleaning and Transporting Your Product

Transporting Your Product

If you need to store your product or transport it a long distance, prepare it for transportation as described here.

Caution: During transportation and storage, follow these guidelines:

• Because the product is heavy, two or more people should lift and carry it using the hand positions shown here:
- Avoid tilting the product, placing it vertically, or turning it upside down; otherwise ink may leak. When storing or transporting the printer, place it in a plastic bag and fold it closed.
- When storing or transporting an ink bottle after removing its seal, do not tilt the bottle and do not subject it to impacts or temperature changes. Otherwise, ink may leak even if the cap on the ink bottle is tightened securely. Be sure to keep the ink bottle upright when tightening the cap, and take measures to prevent ink from leaking when transporting the ink bottles.
- Do not put opened ink bottles in the box with the product.

1. Turn off the product.
2. Wait for the ⏻ power light to turn off, then unplug the power cable.
3. Disconnect any connected cables.
4. Remove all the paper from the product and make sure there are no originals on the scanner glass.
5. Lift up the scanner unit.

6. Make sure the print head is in the home position on the right and move the transportation lock to the transport position.
Caution: Do not touch the translucent film inside the product; otherwise, you may damage your product.

7. Secure the print head to the case with tape as shown.
8. Lower the scanner unit.

9. Close the rear paper feed slot and output tray and lower the control panel.
10. Place the printer in a plastic bag and fold it closed.

11. Place the product in its original packing materials, if possible, or use equivalent materials with cushioning around the product.
Keep the product level during transportation. If print quality has declined when you print again, clean and align the print head. Make sure you remove the tape securing the print head before using the printer.

Accessing the Web Config Utility

You can select your product's network settings and confirm its operating status using a web browser. You do this by accessing your product's built-in Web Config utility from a computer or other device that is connected to the same network as your product.

1. Print a network status sheet.

2. Locate the IP address for your product that is listed on the network status sheet.

3. On a computer or other device connected to the same network as your product, open a web browser.

4. Enter your product's IP address into the address bar.

5. On the first visit to the Web Config utility, you will be prompted to set an administrator password. The administrator password is required to access the full capabilities of the Web Config utility.

You see the available Web Config utility options.

Printing a Network Status Sheet

Changing the Administrator Password in Web Config

You can set an administrator password using your product's control panel, Web Config, or EpsonNet Config. You use the same administrator password in all cases.

Note: If you forget your administrator password, contact Epson for support.

1. Access Web Config and select the **Product Security** tab.
2. Select **Change Administrator Password**.
3. Enter a user name, if necessary.
4. Do one of the following:
    - If you have set an administrator password before, enter the current password, then enter and confirm the new password in the fields provided.
    - If you have not set an administrator password before, enter a new password and confirm it in the fields provided.
5. Click **OK**.

Note: To restore the administrator password to the default value, select **Restore Default Settings** on the **Change Administrator Password** screen.

Checking Status Information

You can check information about the printer using the Web Config interface.

Note: Depending on the features of your product, not all of the options below may be available. Some options are not available unless you are logged in to the Web Config interface.

1. Enter the IP address of the printer to access Web Config and log in as an administrator, if necessary.

2. Select the **Status** tab and choose one of the following options:

   • Select **Product Status** to view information such as ink level and maintenance box status.

   • Select **Network Status** to view network information such as the IP address and network connection status.

   • Select **Usage Status** to view information about the number of prints and historical information about the product.

   • Select **Hardware Status** to view information about the product functions.

   • Select **Job History** to view information about the jobs completed on the product.

Parent topic: Configuring Product Settings

Managing the Network Connection

You can check or update the network information for your product using the Web Config interface.

1. Enter the IP address of the product in a web browser and log in as an administrator.

2. Select the **Network** tab, then select **Basic**.

3. Check or update the settings as necessary.

4. Select **Next** to see a summary of the network settings.

5. Select **OK** to accept the changes.

   Note: The network connection will be temporarily interrupted to enable the new settings.

6. Select the other network options as necessary:

  • **Wi-Fi**: Displays the current wireless network connection information. Select **Setup** to run the wireless setup again or **Disable Wi-Fi** to turn off Wi-Fi.

  • **Wired LAN**: Displays the current settings for the wired connection. Change the settings as necessary and then select **Next** to view the changes. Confirm the information and select **OK** to apply the changes.

  • **Wi-Fi Direct**: Displays the current settings for the Wi-Fi Direct network. Adjust the settings as necessary and select **Next** to view the changes. Confirm the information and select **OK** to apply the changes.

Network Settings

Wi-Fi or Wired Networking

Network Settings

The following network settings are available under the **Network** tab in the Web Config interface.

Basic

Setting	Description
Device Name	Displays the Device Name. You can enter a new name to change the name of the device.
Location	Displays a user-entered location for the printer
Obtain IP Address	Sets the IP Address; if set to **Manual**, enter the information in the appropriate fields
Set using BOOTP	Enables IP addressing using BOOTP
Set using Automatic Private IP Addressing (APIPA)	Enables IP addressing using APIPA
IP Address	Displays the IP address. If you are manually entering the IP address, enter it in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255). Make sure the address is unique and does not conflict with any other device on your network.

Setting	Description
Subnet Mask	Displays the subnet mask. If you are manually entering the subnet mask, enter it in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255).
Default Gateway	Displays the default gateway address. If you are manually setting the default gateway, enter it in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255).
DNS Server Setting	Selects the DNS server setting. If the **Obtain IP Address** setting is set to **Manual**, this setting is also set to **Manual**.
Primary DNS Server	Enter the address of the primary DNS server in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255).
Secondary DNS Server	Enter the address of the secondary DNS server in the format xxx.xxx.xxx.xxx (where xxx is a number between 0 and 255).
DNS Host Name Setting	Sets the DNS Host Name selection method
DNS Host Name	Displays the current DNS Host Name.
DNS Domain Name Setting	Sets the DNS Domain Name selection method
DNS Domain Name	Specifies the DNS domain name. The name must conform to the following format: • Enter between 2 and 249 characters using only the characters "A-Z", "a-z", "0-9", hyphen "-", and a period "." • The first character cannot be a "0-9", hyphen "-", or a period "." • The last character cannot be a hyphen "-" or a period "." • Each label in the domain name must be between 1 and 63 characters and separated by a period. • The total number of characters in the host and domain name must not exceed 251.
Register the network interface address to DNS	Allows you to register the host and domain names through a DHCP server that supports Dynamic DNS
Proxy Server Setting	Enables the use of a proxy server
Proxy Server	Specifies the name of the proxy server in either IPv4 or FQDN format

Setting	Description
Proxy Server Port Number	Specifies the port number for the proxy server (between 1 and 65535)
Proxy Server User Name	Specifies the user name for the proxy server (0-255 ASCII characters [0x20-0x7E])
Proxy Server Password	Specifies the password for the proxy server (0-255 ASCII characters [0x20-0x7E])
IPv6 Setting	Enables the use of IPv6 addressing
IPv6 Privacy Extension	Enables the use of private IPv6 addresses
IPv6 DHCP Server Setting	Enables the use of a IPv6 DHCP server
IPv6 Address	Specifies the IPv6 address. The address must conform to the following format: • xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx / prefix • xxxx is a hexadecimal number from 1 to 4 digits, and the prefix is a decimal number from 1 to 128. • If there are consecutive blocks where xxxx is all zeros, it can be omitted as ::. (Only one block can be omitted).
IPv6 Address Default Gateway	Specifies the IPv6 address of the default gateway. The address must conform to the following format: • xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx • xxxx is a hexadecimal number from 1 to 4 digits • If there are consecutive blocks where xxxx is all zeros, it can be omitted as ::. (Only one block can be omitted).
IPv6 Link-Local Address	Displays the valid IPv6 Link-Local Address
IPv6 Stateful Address	Displays the valid IPv6 Stateful Address
IPv6 Stateless Address 1	Displays the valid IPv6 Stateless Address 1
IPv6 Stateless Address 2	Displays the valid IPv6 Stateless Address 2
IPv6 Stateless Address 3	Displays the valid IPv6 Stateless Address 3

Setting	Description
IPv6 Primary DNS Server	Specifies the address for the IPv6 primary DNS server. The address must conform to the following format: • xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx • xxxx is a hexadecimal number from 1 to 4 digits • If there are consecutive blocks where xxxx is all zeros, it can be omitted as ::. (Only one block can be omitted)
IPv6 Secondary DNS Server	Specifies the address for the IPv6 secondary DNS server. The address must conform to the following format: • xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx: xxxx • xxxx is a hexadecimal number from 1 to 4 digits • If there are consecutive blocks where xxxx is all zeros, it can be omitted as ::. (Only one block can be omitted)
IEEE802.11k/v	Enables the use of IEEE802.11k/v network environments
IEEE802.11r	Enables the use of IEEE802.11r network environments

Wired LAN

Setting	Description
Link Speed and Duplex	Selects the communication mode for the wired connection
IEEE 802.3az	Enables the use of IEEE 802.3az network environments

Wi-Fi Direct

Setting	Description
Wi-Fi Direct	Enables the product's Wi-Fi Direct network
SSID	You can change part of the SSID for the product.
Password	Specifies the password for the Wi-Fi Direct network. **Note:** Changing the password will disconnect any devices currently connected to the network.

Setting	Description
Frequency Range	Selects the frequency range used by the Wi-Fi Direct network.
IP Address	Specifies the IP address for the Wi-Fi Direct network. If set to **Manual**, enter the IP address in the provided fields.

Setting Control Panel Options

You can configure the behavior of the product control panel using the Web Config interface or the menus on the control panel.

1. Enter the IP address of the product in a web browser and log into Web Config as an administrator.

2. Select **Device Management** > **Control Panel** and set the following items as necessary:

   - **Language**: Sets the display language

   - **Panel Lock**: Requires an administrator login to access some menu settings on the control panel. The administrator password must be set to enable this feature.

   - **Operation Timeout**: Cancels operations and automatically logs out users after a selected time period. You can select a time period between 10 seconds and 240 minutes.

Related topics

Sending Email Notifications

You can set up email notifications that will be sent when an event occurs on the product. You can register up to five destinations.

Note: You must have configured a mail server before setting up notifications.

1. Enter the IP address of the product in a web browser and log into Web Config as an administrator.

2. Select the **Device Management** tab, then select **Email Notification**.

3. Set the contents of the email subject line by selecting items from the drop-down menus.

   Note: You cannot select the same item in both menus. If the Location setting is longer than 32 bytes, it will be truncated in the Subject line.

4. Enter up to five email addresses to receive the notification emails, and select the language of the notification email.

5. In the Notification Settings area, select one or more email addresses to receive a notification for each event.

6. Click **OK** to apply the settings.

Note: To clear the email notification settings, select **Restore Default Settings**. This clears all email notification settings, not just the changes made in the current session.

Parent topic: Configuring Product Settings

Adjusting Power Saving Settings

The product can automatically enter sleep mode or turn off after it has not been used for a while. You can set the delay before the product enters sleep mode or turns off.

1. Log in to the Web Config interface as an administrator.

2. Select the **Device Management** tab, then select the **Power Saving** setting.

3. Set **Sleep Timer** to the number of minutes before the product enters a low-power mode.

4. Select **Power Off Timer** to set the amount to time of inactivity before the product turns off.

   Note: If you are using a printer with the fax feature enabled, select **None**.

Note: You can also configure the power saving settings using the control panel by selecting **Settings** > **General Settings** > **Basic Settings** and selecting the feature you want to change.

Importing and Exporting Product Settings

Follow the instructions in these sections to import and export your product's settings using the Web Config software.

Exporting Settings Using Web Config
Importing Settings Using Web Config

Parent topic: Configuring Product Settings

Exporting Settings Using Web Config

You can export your product's settings and optionally encrypt the settings file with a password.

1. Log in to the Web Config interface as an administrator.

2. Select the **Device Management** tab, then select **Export and Import Setting Value**.

3. Select **Export**.

4. Select the settings you want to export.

Note: If you select a parent category, the child categories are also selected. By default, items that are unique on the network, such as IP address, cannot be selected. If you want to export these items, select **Enable to select the individual settings of device**. It is recommended that you export only unique items when replacing a product on the network, otherwise you may encounter conflicts on the network.

5. Enter an encryption password, if desired.

6. Click **Export** and save the file.

Parent topic: Importing and Exporting Product Settings

327

Importing Settings Using Web Config

You can import settings to your product that you have exported previously. If encryption was used when the settings were exported, obtain the necessary password before you import.

1. Log in to the Web Config interface as an administrator.

2. Select the **Device Management** tab, then select **Export and Import Setting Value**.

3. Select **Import**.

4. Click **Browse** and select the exported settings file.

5. If necessary, enter the decryption password.

6. Click **Next**.

7. Select the settings to import and click **Next**.

8. Click **OK**.

The selected settings are imported to the product.

Parent topic: Importing and Exporting Product Settings

Updating Firmware Using Web Config

If your product is connected to the Internet, you can update the product firmware using Web Config.

1. Access Web Config and select **Device Management** > **Firmware Update**.

2. Click **Start** to check for the latest firmware.

3. If there is a firmware update, click **Start** to begin the update.

   Note: Make sure the product is not in use and clear any errors on the LCD screen before starting the update.

Parent topic: Configuring Product Settings

Synchronizing the Date and Time with a Time Server

You can synchronize the product with an NTP time server to set the date and time on the product.

Note: If you are using a CA certificate or Kerberos authentication, it is recommended to use a time server to set the date and time.

1. Log in to the Web Config interface as an administrator.

2. Select the **Device Management** tab, then select the **Date and Time** > **Time Server** setting.

3. Set **Use Time Server** to **Use**.

4. Enter the time server address in **Time Server Address**. You can use the IPv4, IPv6, or FQDN format for the address. You are limited to 252 characters.

5. Enter an update interval (up to 10080 minutes) in **Update Interval (min)**.

6. Click **OK** to update the settings.

Parent topic: Configuring Product Settings

Clearing the Internal Memory

You can delete the contents of the product's internal memory, such as password-protected print jobs and downloaded PCL fonts and macros using the Web Config interface. You cannot select individual items to delete.

1. Log in to the Web Config interface as an administrator.

2. Select the **Device Management** tab, then select the **Clear Internal Memory Data** setting.

3. Select **Delete** and confirm your selection.

Parent topic: Configuring Product Settings

Restoring Default Product Settings

You can reset the product to the default settings using the Web Config interface.

1. Log in to the Web Config interface as an administrator.

2. Select the **Device Management** tab, then select the **Restore Default Settings** setting.

3. Select an option from the drop-down list. You can either restore network settings or all data and settings.

4. Select **Execute** and confirm your selection to restore the product settings

Parent topic: Configuring Product Settings

Configuring Security Settings

Follow the instructions in these sections to configure internal security features for your product using the Web Config software.

Restricting Features Available for Users
Disabling the External Interface

Parent topic: Administering Your Product

Restricting Features Available for Users

Follow the instructions in these sections to restrict users from using certain product features and create an administrator password to lock the restrictions using the Web Config software.

User Feature Restriction
Configuring User Feature Restrictions

Parent topic: Configuring Security Settings

User Feature Restriction

You can restrict available product features for individual users, with different features available to each user. This requires users to log into the product control panel with their user name and password before they can use control panel features.

With Windows, you can also restrict printing and scanning from the product software. This requires users to log into the printing or scanning software, and allows the software to authenticate the users before printing or scanning proceeds. For instructions on setting up software restrictions, see the help utility in the printing or scanning software.

Parent topic: Restricting Features Available for Users

Configuring User Feature Restrictions

You can create up to 10 user accounts and restrict access to control panel features separately for each one.

Note: If you are using an authentication system, it uses the number one user account. If you create other user accounts, use the number two to number 10 user accounts.

1. Access Web Config and select the **Product Security** tab.

2. Select the **Enables Access Control** checkbox.

3. If you have configured the product for an LDAP server or IEEE 802.1x network, you can deselect the **Allows printing and scanning without authentication information from a computer** checkbox to prevent the product from receiving jobs sent from these sources:

   • The default operating system driver

   • A PCL or PostScript printer driver

   • Web services such as Epson Connect

- Smartphones and other mobile devices

4. Click **OK**.

5. Select **User Settings**.

6. Click **Add**.

7. Enter a name for a user in the User Name field following the guidelines on the screen. Use ASCII (0x20-0x7E) characters.

8. Enter a password for the user in the Password field following the guidelines on the screen.

   Note: If you need to reset a password, leave the password field blank.

9. Select the checkbox for each function you want the user to be able to perform, and deselect the checkbox for each function you want to restrict access to.

10. Click **Apply**.

    Note: When you edit a completed user account, you see a **Delete** option. Click it to delete a user, if necessary.

Note: You can import and export a list of user features using EpsonNet Config. See the help utility in the software for instructions.

Parent topic: Restricting Features Available for Users

Disabling the External Interface

You can restrict the ability to connect from a computer using a USB connection or accessing a connected USB device or memory card.

Note: Depending on your product features, not all of the options listed below may be available.

1. Access Web Config and select **Product Security** > **External Interface**.

2. Select **Memory Device** and do one of the following:
   - Select **Disable** to prevent access to a USB device or memory card.
   - Select **Enable** to allow access to a USB device or memory card.

3. Select **PC Connection via USB** and do one of the following:
   - Select **Disable** to prevent a computer from connecting to the product over a USB connection

- Select **Enable** to allow a computer to connect to the product over a USB connection

4. Click **OK** to save your setting.

Parent topic: Configuring Security Settings

Setting Up Password Encryption

You can set up password encryption to protect confidential information stored in the product.

1. Log in to the Web Config interface as an administrator.

2. Select the **Product Security** tab and select **Password Encryption**.

3. Select **On** and select **OK**.

   A message appears about restarting the product. Select **OK**.

4. Turn the product off and then on again to apply the password encryption setting.

   Note: The product may take longer than usual to turn on. This is normal.

Configuring Protocols and Services in Web Config

You can enable or disable protocols using Web Config.

1. Access Web Config, select **Network Security**, and select **Protocol**.

2. Select or deselect the checkbox next to the service name to enable or disable a protocol.

3. Configure any other available protocol settings.

4. Click **Next**.

5. Click **OK**.

6. Select and configure services and protocol settings as necessary.

After the protocols restart, the changes are applied.

Protocol Settings

Parent topic: Using Your Product on a Secure Network

Protocol Settings

Protocols

Name	Description
Bonjour	Bonjour is used to search for devices and AirPrint
SLP	SLP is used for push-scanning and network searching in EpsonNet Config
WSD	Add WSD devices, or print and scan from the WSD port
LLTD	Displays the product on the Windows network map
LLMNR	Use name resolution without NetBIOS even if you cannot use DNS
LPR	Print from to the LPR port
RAW(Port9100)	Print from the RAW port (Port 9100)
IPP	Print over the Internet, including AirPrint
FTP	Print over FTP
SNMPv1/v2c	Remotely set up and monitor your product
SNMPv3	Remotely set up and monitor your product with the SNMPv3 protocol

Bonjour Settings

Setting	Options/Description
Use Bonjour	Search for or use devices through Bonjour (you cannot use AirPrint if disabled)

Setting	Options/Description
Bonjour Name	Displays the Bonjour name
Bonjour Service Name	Displays the Bonjour service name
Location	Displays the Bonjour location name
Top Priority Protocol	Selects the protocol that is the top priority for Bonjour printing
Wide-Area Bonjour	Enables the Wide-Area Bonjour protocol; register all products on the DNS server to locate them over the segment

SLP Settings

Setting	Options/Description
Enable SLP	Enable the SLP function to use the Push Scan function and network searching in EpsonNet Config

WSD Settings

Setting	Options/Description
Enable WSD	Enable adding devices using WSD, and printing and scanning from the WSD port
Printing Timeout (sec)	Enter the communication timeout value for WSD printing between 3 and 3,600 seconds
Scanning Timeout (sec)	Enter the communication timeout value for WSD scanning between 3 and 3,600 seconds
Device Name	Displays the WSD device name
Location	Displays the WSD location name

LLTD Settings

Setting	Options/Description
Enable LLTD	Enable LLTD to display the product in the Windows network map
Device Name	Displays the LLTD device name

LLMNR Settings

Setting	Options/Description
Enable LLMNR	Enable LLMNR to use name resolution without NetBIOS, even if you cannot use DNS

LPR Settings

Setting	Options/Description
Allow LPR Port Printing	Allow printing from the LPR port
Printing Timeout (sec)	Enter the timeout value for LPR printing between 0 and 3,600 seconds

RAW (Port9100) Settings

Setting	Options/Description
Allow RAW (Port9100) Printing	Allow printing from the RAW port (Port 9100)
Printing Timeout (sec)	Enter the timeout value for RAW port (Port 9100) printing between 0 and 3,600 seconds

IPP Settings

Setting	Options/Description
Enable IPP	Enable IPP communication for products that support IPP are displayed (you cannot use AirPrint if disabled)
Allow Non-secure Communication	Allow the printer to communicate without any security measures (IPP)
Communication Timeout (sec)	Enter the timeout value for IPP printing between 0 and 3,600 seconds
Require PIN Code when using IPP printing	Select whether or not to require a PIN code when using IPP printing. If you select **Yes**, IPP print jobs without PIN codes are not saved in the product.

Setting	Options/Description
URL(Network)	Displays IPP URLs (http and https) when the product is connected using wired LAN or Wi-Fi (the URL is a combined value of the product's IP address, Port number, and IPP printer name)
URL(Wi-Fi Direct)	Displays IPP URLs (http and https) when the product is connected using Wi-Fi Direct (the URL is a combined value of the product's IP address, Port number, and IPP printer name)
Printer Name	Displays the IPP printer name
Location	Displays the IPP location

FTP Settings

Setting	Options/Description
Enable FTP Server	Enable FTP printing for products that support FTP printing
Communication Timeout (sec)	Enter the timeout value for FTP communication between 0 and 3,600 seconds

SNMPv1/v2c Settings

Setting	Options/Description
Enable SNMPv1/v2c	Enable SNMPv1/v2c for products that support SNMPv3
Access Authority	Set the access authority when SNMPv1/v2c is enabled to **Read Only or Read/Write**
Community Name (Read Only)	Enter 0 to 32 ASCII characters
Community Name (Read/Write)	Enter 0 to 32 ASCII characters

SNMPv3 Settings

Setting	Options/Description
Enable SNMPv3	Enable SNMPv3 for products that support SNMPv3
User Name	Enter 1 to 32 characters
Authentication Settings	Select an algorithm and set a password for authentication

Setting	Options/Description
Encryption Settings	Select an algorithm and set a password for encryption
Context Name	Enter 1 to 32 characters in Unicode (UTF-8)

Configuring a Server Certificate for the Product

Parent topic: Using Your Product on a Secure Network

Configuring SSL/TLS Settings

If your product supports HTTPS, you can configure SSL/TLS to encrypt communications with your product.

1. Access Web Config and select **Network Security** tab.

2. Select **SSL/TLS** and select **Basic**.

3. Select one of the options for the **Encryption Strength** setting.

4. Select **Enable** or **Disable** for the **Redirect HTTP to HTTPS** setting as necessary.

5. If necessary, enable a TLS version.

6. Click **Next**.

   You see a confirmation message.

7. Click **OK**.

Parent topic: Configuring SSL/TLS Communication

Configuring a Server Certificate for the Product

You can configure a server certificate for your product.

1. Access Web Config and select the **Network Security** tab.

2. Under **SSL/TLS**, select **Certificate**.

3. Select one of the following options:

   • **CA-signed Certificate**: Select **Import** if you have obtained a CA-signed certificate. Choose the file to import and click **OK**.

- **Self-signed Certificate**: Select **Update** if you have not obtained a CA (Certificate Authority)-signed certificate and want the product to generate a self-signed certificate.

4. Click **Next**.

    You see a confirmation message.

5. Click **OK**.

Parent topic: Configuring SSL/TLS Communication

Configuring IPsec/IP Filtering

Follow the instructions in these sections to configure IPsec/IP traffic filtering using Web Config.

About IPsec/IP Filtering
Configuring the Default IPsec/IP Filtering Policy
Configuring the Group IPsec/IP Filtering Policies
IPsec/IP Filtering Policy Settings
IPsec/IP Filtering Configuration Examples
Configuring an IPsec/IP Filtering Certificate

Parent topic: Using Your Product on a Secure Network

About IPsec/IP Filtering

You can filter traffic to the product over the network based on IP address, service, and port by configuring a default policy that applies to every user or group connecting to the product. For control of individual users or user groups, you can configure group policies.

Note: IPsec is supported only by computers running Windows Vista or later, or Windows Server 2008 or later.

Parent topic: Configuring IPsec/IP Filtering

Configuring the Default IPsec/IP Filtering Policy

You can configure the default policy for IPsec/IP traffic filtering using Web Config.

1. Access Web Config and select the **Network Security** tab.

2. Under **IPsec/IP Filtering**, select **Basic**.

3. Select **Enable** to enable IPsec/IP filtering.

4. Select the filtering options you want to use for the default policy.

5. Click **Next**.

You see a confirmation message.

6. Click **OK**.

Parent topic: Configuring IPsec/IP Filtering

Configuring the Group IPsec/IP Filtering Policies

You can configure group policies for IPsec/IP traffic filtering using Web Config.

1. Access Web Config and select the **Network Security** tab.

2. Under **IPsec/IP Filtering**, select **Basic**.

3. Click a tab number for the policy number you want to configure.

4. Select the **Enable this Group Policy** checkbox.

5. Select the filtering options you want to use for this group policy.

6. Click **Next**.

   You see a confirmation message.

7. Click **OK**.

8. If you want to configure additional group policies, click the next tab number and repeat the configuration steps as necessary.

Parent topic: Configuring IPsec/IP Filtering

IPsec/IP Filtering Policy Settings

Default Policy Settings

Setting	Options/Description
Access Control	**Permit Access** to permit IP packets to pass through
	Refuse Access to prevent IP packets from passing through
	IPsec to permit IPsec packets to pass through
IKE Version	Select the version of the Internet Key Exchange (IKE) protocol that matches your network environment
Authentication Method	Select an authentication method, or select **Certificate** if you have imported a CA-signed certificate
Pre-Shared Key	If necessary, enter a pre-shared key between 1 and 127 characters long

Setting	Options/Description
Confirm Pre-Shared Key	Confirm the pre-shared key you entered
ID Type	If you selected **IKEv2** as the **IKE Version** setting, select the ID type from the list.
ID	If you selected **IKEv2** as the **IKE Version** setting, enter the necessary ID information
Encapsulation	If you selected **IPsec** as the **Access Control** option, select one of these encapsulation modes: **Transport Mode**: if you are using the product on the same LAN; IP packets of layer 4 or later are encrypted **Tunnel Mode**: if you are using the product on an Internet-capable network, such as IPsec-VPN; the header and data of IP packets are encrypted
Remote Gateway(Tunnel Mode)	If you selected **Tunnel Mode** as the **Encapsulation** option, enter a gateway address between 1 and 39 characters long
Security Protocol	If you selected **IPsec** as the **Access Control** option, select one of these security protocols: **ESP**: to ensure the integrity of authentication and data, and encrypt data **AH**: to ensure the integrity of authentication and data; if data encryption is prohibited, you can use IPsec
Algorithm Settings	Select the encryption algorithm settings for the security protocol you selected

Group Policy Settings

Setting	Options/Description
Access Control	**Permit Access** to permit IP packets to pass through **Refuse Access** to prevent IP packets from passing through **IPsec** to permit IPsec packets to pass through

Setting	Options/Description
Local Address(Printer)	Select an IPv4 or IPv6 address that matches your network environment; if the IP address is assigned automatically, select **Use auto-obtained IPv4 address**
Remote Address(Host)	Enter the device's IP address (between 0 and 43 characters long) to control access, or leave blank to control all addresses; if the IP address is assigned automatically, such as by DHCP, the connection may be unavailable, so configure a static address instead
Method of Choosing Port	Select the method you want to used for specifying ports
Service Name	If you selected **Service Name** as the **Method of Choosing Port** option, select a service name option here; see the next table for more information
Transport Protocol	If you selected **Port Number** as the **Method of Choosing Port** option, select one of these encapsulation modes: **Any Protocol** **TCP** **UDP** **ICMPv4** See the Group Policy Guidelines table for more information.
Local Port	If you selected **Port Number** as the **Method of Choosing Port** option, and **TCP** or **UDP** for the **Transport Protocol** option, enter the port numbers that control receiving packets (up to 10 ports), separated by commas, for example **25,80,143,5220**; leave this setting blank to control all ports; see the next table for more information
Remote Port	If you selected **Port Number** as the **Method of Choosing Port** option, and **TCP** or **UDP** for the **Transport Protocol** option, enter the port numbers that control sending packets (up to 10 ports), separated by commas, for example **25,80,143,5220**; leave this setting blank to control all ports; see the next table for more information

Setting	Options/Description
IKE Version	Select **IKEv1** or **IKEv2** depending on the device that the product is connected to
Authentication Method	If you selected **IPsec** as the **Access Control** option, select an authentication method here
Pre-Shared Key	If you selected **Pre-Shared Key** as the **Authentication Method** option, enter a pre-shared key between 1 and 127 characters long here and in the **Confirm Pre-Shared Key** field
ID Type	If you selected **IKEv2** as the **IKE Version** setting, select the ID type from the list
ID	If you selected **IKEv2** as the **IKE Version** setting, enter the necessary ID information
Encapsulation	If you selected **IPsec** as the **Access Control** option, select one of these encapsulation modes: **Transport Mode**: if you are using the product on the same LAN; IP packets of layer 4 or later are encrypted **Tunnel Mode**: if you are using the product on an Internet-capable network, such as IPsec-VPN; the header and data of IP packets are encrypted
Remote Gateway(Tunnel Mode)	If you selected **Tunnel Mode** as the **Encapsulation** option, enter a gateway address between 1 and 39 characters long
Security Protocol	If you selected **IPsec** as the **Access Control** option, select one of these security protocols: **ESP**: to ensure the integrity of authentication and data, and encrypt data **AH**: to ensure the integrity of authentication and data; if data encryption is prohibited, you can use IPsec
Algorithm Settings	Select the encryption algorithm settings for the security protocol you selected

Group Policy Guidelines

Service name	Protocol type	Local/Remote port number	Controls these operations
Any	—	—	All services
ENPC	UDP	3289/Any port	Searching for a product from applications such as printer or scanner drivers, or EpsonNet Config
SNMP	UDP	161/Any port	Acquiring and configuring MIB from applications such as printer or scanner drivers, or EpsonNet Config
LPR	TCP	515/Any port	Forwarding LPR data
RAW (Port9100)	TCP	9100/any port	Forwarding RAW data
IPP/IPPS	TCP	631/Any port	Forwarding AirPrint data (IPP/IPPS printing)
WSD	TCP	Any port/5357	Controlling WSD
WS-Discovery	UDP	3702/Any port	Searching for a product from WSD
Network Scan	TCP	1865/Any port	Forwarding scan data from Document Capture Pro
Network Push Scan	TCP	Any port/2968	Acquiring job information on push scanning from Document Capture Pro
Network Push Scan Discovery	UDP	2968/Any port	Searching for a computer during push scanning from Document Capture Pro
FTP Data (Local)	TCP	20/Any port	Forwarding FTP printing data to FTP server
FTP Control (Local)	TCP	21/Any port	Controlling FTP printing to FTP server
FTP Data (Remote)	TCP	Any port/20	Forwarding scan data and received fax data to FTP client; controls only an FTP server that uses remote port 20
FTP Control (Remote)	TCP	Any port/21	Forwarding scan data and received fax data to FTP client

Service name	Protocol type	Local/Remote port number	Controls these operations
CIFS (Local)*	TCP	445/Any port	Sharing a network folder on CIFS server
CIFS (Remote)*	TCP	Any port/445	Forwarding scan data and received fax data to a folder on CIFS server
NetBIOS Name Service (Local)	UDP	137/Any port	Sharing a network folder on CIFS server
NetBIOS Datagram Service (Local)	UDP	138/Any port	
NetBIOS Session Service (Local)	TCP	139/Any port	
NetBIOS Name Service (Remote)	UDP	Any port/137	Forwarding scan data and received fax data to a folder on CIFS server
NetBIOS Datagram (Remote)	UDP	Any port/138	
NetBIOS Session Service (Remote)	TCP	Any port/139	
HTTP (Local)	TCP	80/Any port	Forwarding Web Config and WSD data to a HTTP or HTTPS server
HTTPS (Local)	TCP	443/Any port	
HTTP (Remote)	TCP	Any port/80	Communicating with Epson Connect, firmware update, and root certificate update on a HTTP or HTTPS client
HTTPS (Remote)	TCP	Any port/443	

* To control forwarding of scan and received fax data, share a network folder, or receive fax data from PC-Fax, select **Port Number** as the **Method of Choosing Port** option and specify the port numbers for CIFS and NetBIOS.

Parent topic: Configuring IPsec/IP Filtering

IPsec/IP Filtering Configuration Examples

You can configure IPsec and IP filtering in a variety of ways, as shown in the examples here.

Receiving IPsec Packets Only

Use this example only for configuring a default policy.

• **IPsec/IP Filtering**: **Enable**

• **Access Control**: **IPsec**

• **Authentication Method**: **Pre-Shared Key**

• **Pre-Shared Key**: Enter a key up to 127 characters long

Receiving Printing Data and Printer Settings

Use this example to allow communication of printing data and printer settings from specified services.

Default policy:

• **IPsec/IP Filtering**: **Enable**

• **Access Control**: **Refuse Access**

Group policy:

• **Access Control**: **Permit Access**

• **Remote Address(Host)**: Client IP address

• **Method of Choosing Port**: **Service Name**

• **Service Name**: Select **ENPC**, **SNMP**, **HTTP (Local)**, **HTTPS (Local)**, and **RAW (Port9100)**

Receiving Access from Only a Specified Address for Product Access

In these examples, the client will be able to access and configure the product in any policy configuration.

Default policy:

• **IPsec/IP Filtering**: **Enable**

• **Access Control**: **Refuse Access**

Group policy:

• **Access Control**: **Permit Access**

• **Remote Address (Host)**: Administrator's client IP address

Parent topic: Configuring IPsec/IP Filtering

Configuring an IPsec/IP Filtering Certificate

You can configure a certificate for IPsec/IP traffic filtering using Web Config.

1. Access Web Config and select the **Network Security** tab.

2. Under **IPsec/IP Filtering**, select **Client Certificate**.

3. Click **Import** to add a new client certificate and enter any necessary settings.

4. Click **OK**.

Parent topic: Configuring IPsec/IP Filtering

Connecting the Product to an IEEE 802.1X Network

Follow the instructions in these sections to connect the product to an IEEE 802.1X network using Web Config.

Configuring an IEEE 802.1X Network
IEEE 802.1X Network Settings
Configuring a Certificate for an IEEE 802.1X Network
IEEE 802.1X Network Status

Parent topic: Using Your Product on a Secure Network

Configuring an IEEE 802.1X Network

If your product supports IEEE 802.1X, you can use it on a network with authentication provided by a RADIUS server with a hub as an authenticator using Web Config.

1. Access Web Config and select the **Network Security** tab.

2. Under **IEEE802.1X**, select **Basic**.

3. Select **Enable** as the **IEEE802.1X (Wired LAN)** setting.

4. To use the product on a Wi-Fi network, enable your product's Wi-Fi settings. See your product's *User's Guide* for instructions.

   The status of the connection is shown as the **IEEE802.1X (Wi-Fi)** setting.

   Note: You can share the network settings for Ethernet and Wi-Fi networking.

5. Select the IEEE 802.1X setting options you want to use.

6. Click **Next**.

   You see a confirmation message.

7. Click **OK**.

Parent topic: Connecting the Product to an IEEE 802.1X Network

IEEE 802.1X Network Settings

You can configure these IEEE 802.1X network settings in Web Config.

Setting	Options/Description
IEEE802.1X (Wired LAN)	Enable or disable settings (**IEEE802.1X** > **Basic**)
IEEE802.1X (Wi-Fi)	Displays the IEEE802.1X (Wi-Fi) connection status
Connection Method	Displays the current network connection method
EAP Type	Select one of these authentication methods for connections between the product and a RADIUS server: **EAP-TLS** or **PEAP-TLS**: You must obtain and import a CA-signed certificate **PEAP/MSCHAPv2** or **EAP-TTLS**: You must configure a password
User ID	Enter an ID between 1 and 128 ASCII characters for authentication on a RADIUS server
Password	Enter a password between 1 and 128 ASCII characters for authentication of the product.
Confirm Password	Enter the authentication password again
Server ID	Enter a server ID between 1 and 128 ASCII characters for authentication on a specified RADIUS server; server ID is verified in the subject/subjectAltName field of a server certificate sent from the RADIUS server
Certificate Validation	Select a valid certificate regardless of the authentication method; import the certificate using the **CA Certificate** option
Anonymous Name	If you selected **EAP-TTLS**, **PEAP-TLS** or **PEAP/MSCHAPv2** as the **Authentication Method** setting, you can configure an anonymous name between 1 and 128 ASCII characters instead of a user ID for phase 1 of a PEAP authentication
Encryption Strength	Select one of the following encryption strengths: **High** for AES256/3DES **Middle** for AES256/3DES/AES128/RC4

Parent topic: Connecting the Product to an IEEE 802.1X Network

Configuring a Certificate for an IEEE 802.1X Network

If your product supports IEEE 802.1X, you can configure a certificate for the network using Web Config.

1. Access Web Config and select the **Network Security** tab.

2. Under **IEEE802.1X**, select **Client Certificate**.

3. Click **Import** to add a new client certificate.

4. Click **OK**.

Parent topic: Connecting the Product to an IEEE 802.1X Network

IEEE 802.1X Network Status

You can check the status of the IEEE 802.1X network settings by printing a status sheet from your product.

The network status sheet displays the information in this table for IEEE 802.1X networks.

Status ID	Status description
Disable	IEEE 802.1X is disabled
EAP Success	IEEE 802.1X authentication is confirmed and the network connection is available
Authenticating	IEEE 802.1X authentication in progress
Config Error	Authentication failed because the user ID was not set
Client Certificate Error	Authentication failed because the client certificate is out of date
Timeout Error	Authentication failed because there is no answer from the RADIUS server and/or authenticator
User ID Error	Authentication failed because the product's user ID and/or certificate protocol is incorrect
Server ID Error	Authentication failed because the server ID on the server certificate and the server's ID do not match
Server Certificate Error	Authentication failed because the server certificate is out of date or the chain of the server certificate is incorrect
CA Certificate Error	Authentication failed because the CA certificate is incorrect, not imported, or out of date

Status ID	Status description
EAP Failure	Authentication failed because the client certificate is incorrect (EAP-TLS or PEAP-TLS), or the user ID or password is incorrect (PEAP/MSCHAPv2 or EAP-TTLS)

Using a Digital Certificate

Follow the instructions in these sections to configure and use digital certificates using Web Config.

About Digital Certification

Obtaining and Importing a CA-signed Certificate

CSR Setup Settings

CSR Import Settings

Deleting a CA-signed Certificate

Updating a Self-signed Certificate

Importing a CA Certificate

Deleting a CA Certificate

Parent topic:

About Digital Certification

You can configure the following digital certificates for your network using Web Config:

CA-signed Certificate
You can ensure secure communications using a CA-signed certificate for each security feature. The certificates must be signed by and obtained from a CA (Certificate Authority).

CA Certificate
A CA certificate indicates that a third party has verified the identity of a server. You need to obtain a CA certificate for server authentication from a CA that issues it.

Self-signed Certificate
A self-signed certificate is issued and signed by the product itself. You can use the certificate for only SSL/TLS communication, however security is unreliable and you may see a security alert in the browser during use.

Parent topic:

Obtaining and Importing a CA-signed Certificate

You can obtain a CA-signed certificate by creating a CSR (Certificate Signing Request) using Web Config and submitting it to a certificate authority. The CSR created in Web Config is in PEM/DER format. You can import one CSR created from Web Config at a time.

1. Access Web Config and select **Network Security**.

2. Select one of the available network security options and select a certificate option.

3. In the CSR section, select **Generate**.

4. Select the CSR setting options you want to use.

5. Click **OK**.

   You see a completion message.

6. Select **Network Security**, select your network security option, and select **Certificate** again.

7. In the CSR section, click the **Download** option that matches the format specified by your certificate authority to download the CSR.

   Caution: Do not generate another CSR or you may not be able to import a CA-signed certificate.

8. Submit the CSR to the certificate authority following the format guidelines provided by that authority.

9. Save the issued CA-signed certificate to a computer connected to the product.

   Before proceeding, make sure the time and date settings are correct on your product. See the product's *User's Guide* for instructions.

10. Select **Network Security Settings** and select one of the following network security options and corresponding certificates:

    • **SSL/TLS** and select **Certificate**

    • **IPsec/IP Filtering** and select **Client Certificate**

    • **IEEE802.1X** and select **Client Certificate**

11. In the CA Certificate section, click **Import**.

12. Select the format of the certificate as the **Server Certificate** setting.

13. Select the certificate import settings as necessary for the format and the source from which you obtained it.

14. Click **OK**.

    You see a confirmation message.

15. Click **Confirm** to verify the certificate information.

CSR Setup Settings

You can select these settings when setting up a CSR in Web Config.

Note: The available key length and abbreviations vary by certificate authority, so follow the rules of that authority when entering information in the CSR.

Setting	Options/Description
Key Length	Select a key length for the CSR
Common Name	Enter a name or static IP address from 1 to 128 characters long; for example, **Reception printer** or **https://10.152.12.225**
Organization, **Organizational Unit**, **Locality**, **State/Province**	Enter information in each field as necessary, from 0 to 64 characters long in ASCII; separate any multiple names with commas
Country	Enter a two-digit country code number as specified by the ISO-3166 standard
Sender's Email Address	Enter the sender's email address for the mail server setting

CSR Import Settings

You can configure these settings when importing a CSR in Web Config.

Note: The import setting requirements vary by certificate format and how you obtained the certificate.

Certificate format	Setting descriptions
PEM/DER format obtained from Web Config	**Private Key**: Do not configure because the product contains a private key **Password**: Do not configure **CA Certificate 1/CA Certificate 2**: Optional

Certificate format	Setting descriptions
PEM/DER format obtained from a computer	**Private Key**: Configure a private key **Password**: Do not configure **CA Certificate 1/CA Certificate 2**: Optional
PKCS#12 format obtained from a computer	**Private Key**: Do not configure **Password**: Optional **CA Certificate 1/CA Certificate 2**: Do not configure

CA-signed Certificate Import Settings

Setting	Description
Server Certificate or **Client Certificate**	Select the certificate format. For an SSL/TLS connection, the Server Certificate is displayed. For an IPsec/IP Filtering, IEEE802.1x, or S/MIME connection, the Client Certificate is displayed. **Note:** Depending on your product, not all connection types may be available.
Private Key	If you obtain a certificate of the PEM/DER format by using a CSR created from a computer, specify a private key file that matches the certificate.
Password	If the file format is **Certificate with Private Key (PKCS#12)**, enter the password for encrypting the private key that is set when you obtain the certificate.
CA Certificate 1	If your certificate's format is **Certificate (PEM/DER)**, import a certificate from a certificate authority that issues a CA-signed Certificate to be used as the server certificate. Specify a file if necessary.

Setting	Description
CA Certificate 2	If your certificate's format is **Certificate (PEM/DER)**, import a certificate from the same certificate authority that issued CA Certificate 1. Specify a file if necessary.

Parent topic: Using a Digital Certificate

Deleting a CA-signed Certificate

You can delete an imported CA-signed certificate with Web Config when the certificate expires or if you have no more need for an encrypted connection.

Note: If you obtained a CA-signed certificate from Web Config, you cannot import a deleted certificate; you must obtain and import a new certificate.

1. Access Web Config and select **Network Security**.

2. Select one of the following network security options and corresponding certificate:

   - **SSL/TLS** and select **Certificate**

   - **IPsec/IP Filtering** and select **Client Certificate**

   - **IEEE802.1X** and select **Client Certificate**

3. Click **Delete**.

   You see a completion message.

4. Click **OK**.

Parent topic: Using a Digital Certificate

Updating a Self-signed Certificate

If your product supports the HTTPS server feature, you can update a self-signed certificate using Web Config.

1. Access Web Config and select **Network Security**, select **SSL/TLS**, and select **Certificate**.

2. Click **Update**.

3. Enter an identifier for your product from 1 to 128 characters long in the **Common Name** field.

   Note: You can add up to 5 IPv4 addresses, IPv6 addresses, host names, or FQDNs; separated by commas. The first value is assigned to the Common Name field, and the rest are added to the Alias field of the certificate subject. You cannot enter a space before or after a comma.

4. Select a validity period for the certificate as the **Certificate Validity (year)** setting.

5. Click **Next**.

   You see a completion message.

6. Click **OK**.

7. Click **Confirm** to verify the certificate information.

   Parent topic: Using a Digital Certificate

Importing a CA Certificate

You can import a CA certificate using Web Config.

1. Access Web Config and select **Network Security**.

2. Select **CA Certificate**.

3. Select **Import**.

4. Select the CA certificate you want to import.

5. Click **OK**.

When you see the **CA Certificate** page and the imported certificate is displayed, the import is finished.

Parent topic: Using a Digital Certificate

Deleting a CA Certificate

You can delete an imported CA certificate with Web Config when the certificate expires or if you have no more need for an encrypted connection.

1. Access Web Config and select **Network Security Settings**.

2. Select **CA Certificate**.

3. Locate the certificate you want to remove and click the **Delete** button next to it.

4. Click **OK** to confirm the deletion.

5. Click **Reboot Network**, and then check that the deleted CA Certificate is not listed on the updated screen.

Checking for Software Updates

It's a good idea to check Epson's support website occasionally for free updates to your product software. Visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product.

Note: Epson strongly recommends the use of genuine ink to ensure optimal printing quality and performance.

- **Windows**: Your printer software automatically checks for updates. You can also manually update the software by selecting **Software Update** here:

  - Accessing the Windows Desktop and right-clicking the [icon] icon for your product in the right side of the Windows taskbar, or clicking the up arrow and right-clicking [icon].

  - On the **Maintenance** tab in the printer settings window

You can also update the software by selecting **EPSON Software Updater** in the **EPSON** or **Epson Software** program group, accessible by the **Start** button, or on the **Start** or **Apps** screens, depending on your version of Windows.

- **OS X**: You can manually update the software by opening the **Applications** > **Epson Software** folder and selecting **EPSON Software Updater**.

- **macOS 10.12.x, 10.13.x, 10.14.x, or 10.15.x**: You can manually update the software by opening the **App Store**, selecting **Updates**, searching for a software update option for Epson Software, and selecting **Update**.

Product Status Messages

You can often diagnose problems with your product by checking the messages and status icons on its LCD screen. You can also check for errors by pressing the ⓘ **Job/Status** button and selecting **Printer Status**.

Note: If the LCD screen is dark, press the screen to wake the product from sleep mode.

LCD screen message	Condition/solution
Printer error. Turn the power off and on again. If the problem persists, contact Epson Support.	Turn the product off and then back on again. If the error persists, check for and remove any jammed paper or protective materials from the product. If the error still persists, contact Epson for support.
Printer error. Contact Epson Support. Non-printing features are available.	The product may be damaged, but features such as scanning are still available. Contact Epson for support.
Printer error. For details, see your documentation.	The product may be damaged. Contact Epson for support.
Paper out in XX. Load paper. Paper Size: XX/Paper Type: XX	Load the size and type of paper in the indicated paper source.
The printer's borderless printing ink pad is nearing the end of its service life. It is not a user-replaceable part. Please contact Epson support.	The ink pad is near the end of its service life and the message will be displayed until the ink pad is replaced. Contact Epson for support. (To resume printing, press **OK**.)

LCD screen message	Condition/solution
The printer's borderless printing ink pad has reached the end of its service life. It is not a user-replaceable part. Please contact Epson support.	The ink pad is at the end of its service life. Turn off the product and contact Epson for support. You can still perform operations that do not use ink, such as scanning.
Paper Setup Auto Display is set to Off. Some features may not be available. For details, see your documentation.	AirPrint is not available when the **Paper Setup Auto Display** setting is turned off. Change the **Paper Setup Auto Display** setting to **On**.
No dial tone detected.	Make sure the phone cable is connected correctly and the phone line works. If you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the **Line Type** setting to **PBX**. Use a # (hash) instead of the actual access code when entering an outside fax number. This makes the connection more secure. If you still cannot send a fax, turn off the **Dial Tone Detection** setting. (Turning off the Dial Tone Detection setting may cause the product to drop the first digit of a fax number.)
Failed to receive faxes because the fax data capacity is full. Touch the Job/Status at the bottom of the Home Screen for details.	Press the ⓘ **Job/Status** button, select **Printer Status**, and resolve any printer errors that prevented faxes from printing. Make sure the product is connected to a computer or that an external USB device is connected to the product.
The combination of the IP address and the subnet mask is invalid. See your documentation for more details.	Contact your product administrator.
To use cloud services, update the root certificate from the Epson Web Config utility.	Contact your product administrator.
Check that the printer driver is installed on the computer and that the port settings for the printer are correct.	On a Windows computer, go to **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click the printer and select **Printer Properties**. Make sure the printer port is selected correctly in the **Ports** tab. Select the **USBXXX** setting for a USB connection or **EpsonNet Print Port** for a network connection.
Recovery mode	Contact your product administrator.

Running a Product Check

Running a product check helps you determine if your product is operating properly.

1. Disconnect any interface cables connected to your product.

2. Load plain paper in the paper cassette.

3. Press the ⌂ home button, if necessary.

4. Select **Settings** > **Maintenance**.

   You see a screen like this:

5. Select **Print Head Nozzle Check**.

You see a screen like this:

6. Select **Start**.

   The nozzle pattern prints.

7. Do one of the following, depending on the results of the product check:

   • If the page prints and the nozzle check pattern is complete, the product is operating properly. Any operation problem you may have could be caused by your computer, cable, software, or selected settings. Check the other solutions in this guide or try uninstalling and reinstalling your printer software.

   • If the page prints but the nozzle check pattern has gaps, clean the print head.

   • If the page does not print, the product may have a problem. Check the other solutions in this manual. If they do not work, contact Epson.

Where to Get Help

Resetting Control Panel Defaults

If you have a problem with settings on the product control panel, you can reset them to their factory defaults. You can choose which settings to reset or reset them all.

Note: This setting can be locked by an administrator. If you cannot access or change this setting, contact your administrator for assistance.

1. Press the ⌂ home button, if necessary.
2. Select **Settings** > **General Settings** > **System Administration**. Enter the administrator password, if necessary.
3. Scroll down and select **Restore Default Settings**.

   You see a screen like this:
4. Select one of these options:
   - **Network Settings**: Resets all network settings
   - **Copy Settings**: Resets all settings for copying
   - **Scan Settings**: Resets all settings for scanning
   - **Fax Settings**: Resets all settings for faxing
   - **Clear All Data and Settings**: Resets all control panel settings including the contacts list

You see a confirmation screen.

5. Select **Yes** to reset the selected settings. (Select **No** if you want to cancel the operation.)

Solving Setup Problems

Check these sections if you have problems while setting up your product.

Product Does Not Turn On or Off
Noise After Filling the Ink
Software Installation Problems

Parent topic: Solving Problems

Product Does Not Turn On or Off

If you cannot turn the product on or off, try these solutions:

• If you cannot turn on your product, make sure the power cord is securely connected and hold down the power button a little longer.

• If you cannot turn off your product, hold down the power button a little longer. If you still cannot turn off your product, unplug the power cord, plug the power cord back in, then turn your product on and off again using the power button.

Parent topic: Solving Setup Problems

Noise After Filling the Ink

If you hear noises from your product after filling the ink tanks with ink, check these explanations:

• The first time you fill the tanks with ink, the product must charge its print head. Wait until charging finishes before you turn off the product, or it may charge improperly and use excess ink the next time you turn it on. Your product is finished charging the print head when the ⏻ power light stops flashing.

• If the product's print head stops moving or making noise, and the charging process has not finished after approximately 20 minutes, turn off your product. Turn it back on and check to see if charging is still in progress. If it is still in progress, contact Epson for help.

Parent topic: Solving Setup Problems

Software Installation Problems

If you have problems while installing your product software, try these solutions:

- Make sure your product is turned on and any necessary cables are securely connected at both ends. If you still have problems installing software, disconnect the cable and carefully follow the instructions on the *Start Here* sheet. Also make sure your system meets the requirements for your operating system.

- Close any other programs, including screen savers and virus protection software, and install your product software again.

- In Windows, make sure your product is selected as the default printer and the correct port is shown in the printer properties.

- If you see any error message or your software does not install correctly in Windows, you may not have software installation privileges. Contact your system administrator.

- If you are printing over a network, make sure your product is set up properly on the network.

Parent topic: Solving Problems

Product Cannot Connect to a Wireless Router or Access Point

If your product has trouble finding or connecting to a wireless router or access point, try these solutions:

• If you are connecting the product via Wi-Fi Protected Setup (WPS) and the Wi-Fi icon on your product's LCD screen is not lit or does not appear, make sure you select one of the WPS options from the product control panel within 2 minutes of pressing the WPS button on your router.

• Make sure to place your product within contact range of your router or access point. Avoid placing your product near a microwave oven, cordless phone, or large metal object, such as a filing cabinet.

• Verify that your router or access point is operating correctly by connecting to it from your computer or another device.

• Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.

• You may need to disable the firewall and any anti-virus software on your wireless router or access point.

• Try restarting your router following the instructions in your router documentation.

    Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router.

• Check to see if access restrictions, such as MAC address filtering, are set on the router or access point. If access restrictions are set, add your product's MAC address to your router's address list. To obtain your product's MAC address, print a network status sheet. Then follow the instructions in your router or access point documentation to add the address to the list.

• If your router or access point does not broadcast its network name (SSID), follow the instructions that came with your product to enter your wireless network name manually.

• If your router or access point has security enabled, determine the kind of security it is using and any required password or passphrase for connection. Then make sure to enter the exact WEP key or WPA passphrase correctly.

• Check if your computer is restricting the available wireless channels. If so, verify that your wireless access point is using one of the usable channels and change to a usable channel, if necessary.

• If you cannot connect your product to a device using Wi-Fi Direct, you may have exceeded the maximum number of devices connected to your product (8). Print a network status sheet or access Web Config on the browser for your device and check the number of connected devices. If 8 devices are already connected, disconnect a device by deleting the product's SSID from the Wi-Fi screen of that device. If fewer than 8 devices are connected, check the accuracy of your other network settings, move your device closer to your product, and try connecting again.

- If you are using a Wi-Fi Direct connection that suddenly disconnects, the Wi-Fi Direct password on your device may have been changed. If necessary, delete the existing **DIRECT-xxxxxxxx** connection settings from your device and enter a new password. See your device documentation for instructions.

Network Software Cannot Find Product on a Network

If EpsonNet Setup cannot find your product on a network, try these solutions:

- Make sure your product is turned on and connected to your network. Verify the connection using your product control panel.

- Check if your network name (SSID) contains non-ASCII characters. Your product cannot display non-ASCII characters.

- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.

- Make sure your product is not connected to a guest network.

- If necessary, reinstall your product software and try running EpsonNet Setup again:

  1. Reset your product's network settings to their factory defaults.

  2. **Windows only:** Uninstall your product software.

  3. Restart your router following the instructions in your router documentation.

     Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router, so note the next step before restarting it.

  4. Download your product software from the Epson website using the instructions on the *Start Here* sheet.

- If you have replaced your router, reinstall your product software to connect to the new router.

- Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing detection of your device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

Uninstall Your Product Software

Wireless Network Connection is Unstable on a Mac

If you connected a device to a USB 3.0 port on your Mac, you may experience wireless network interference between your product and your Mac.

If you cannot connect to your product over the wireless network or the connection becomes unstable, move the device connected to your Mac USB 3.0 port further away from your Mac.

Parent topic: Solving Network Problems

Cannot Print Over a Network

If you cannot print over a network, try these solutions:

- Make sure that your product is turned on.

- Make sure you install your product's network software as described in your product documentation.

- Print a network status sheet and verify that the network settings are correct. If the network status is **Disconnected**, check any cable connections and turn your product off and then on again.

- Print a network connection report and check the codes and messages on the report to help determine the cause of the problem.

- If you are using TCP/IP, make sure the product's IP address is set correctly for your network. If your network does not assign IP addresses using DHCP, set the IP address manually.

- Make sure your computer and product are both using the same wireless network.

- If network printing is slow, print a network status sheet and check the signal strength. If it is poor, place your product closer to your router or access point. Avoid placing your product near a microwave oven, cordless phone, or large metal object, such as a filing cabinet.

- Try restarting your router following the instructions in your router documentation.

  Note: If you are reading these instructions online, you will lose your Internet connection when you restart your router.

- Check to see if your wireless router or access point has an enabled Privacy Separator function that is preventing printing from a device over the network. See your router or access point documentation for instructions on disabling the Privacy Separator function.

- If you are connecting the product wirelessly via EpsonNet Setup and the Wi-Fi connection icon is not lit or does not appear on the product's LCD screen, make sure your product software was installed correctly. If necessary, reinstall your software.

Cannot Scan Over a Network

If you have problems scanning over a network, try these solutions:

- If you cannot scan from your product control panel, make sure you restarted your computer after installing the product software. Make sure the Event Manager program is not being blocked by your firewall or security software.

  Note: If you are using a 5 GHz wireless router, set the router to operate in dual band (2.4 GHz and 5 GHz) mode. If your router uses a single network name (SSID) for both the 2.4 GHz and 5 GHz band, give each band its own network name (SSID) instead, such as Home Network 2.4 GHz and Home Network 5 GHz. See your router documentation or contact your internet service provider for instructions.

- If you are scanning a large original at a high resolution, a network communication error may occur. Try scanning again at a lower resolution.

- If network communication was interrupted while starting Epson Scan 2, exit Epson Scan 2, wait a few seconds, and restart it. If Epson Scan 2 cannot restart, turn off your product, turn it back on, and try restarting Epson Scan 2 again.

- Check the scanner setting and reset the connection if necessary using Epson Scan 2 Utility:

  Windows 11: Click , then search for **Epson Scan 2 Utility** and select it. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

  Windows 10: Click and select **EPSON** > **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

  Windows 8.x: Navigate to the **Apps** screen, select **EPSON**, and select **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

  Windows (other versions): Click or **Start** > **All Programs** or **Programs** > **EPSON** > **Epson Scan 2** > **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

  Mac: Open the **Applications** folder, click **Epson Software**, and click **Epson Scan 2 Utility**. Make sure your product is selected. If necessary, select the **Other** tab and click **Reset**.

- You may need to disable the firewall and any anti-virus software on your wireless router or access point.

Originals Do Not Feed From the Automatic Document Feeder

If your originals do not feed when placed in the ADF, try these solutions:

- Make sure the **ADF** icon lights up on the Copy, Fax, or Scan screen on the LCD screen. If not, reload the originals.

- Make sure the size, weight, and number of your originals are supported by the ADF.

- Make sure the originals are loaded correctly.

- Make sure the document is not curled or creased.

- Try cleaning the inside of the ADF.

- Do not load originals above the arrow mark on the ADF edge guide.

Paper Ejection Problems

Parent topic:

Paper Feeding Problems

If you have problems feeding paper, try these solutions:

- If paper does not feed for printing, remove it from the rear paper feeder or cassette. Reload it, then adjust the edge guides. Make sure the paper stack is not above the tab on the edge guides inside the cassette or rear paper feeder.

- Place the product on a flat surface and operate it in the recommended environmental conditions.

- Be sure to insert the paper cassette all the way into your product.

- If multiple pages feed at once, remove the paper, fan the edges to separate the sheets, and reload it.

- Do not load more than the recommended number of sheets. For plain paper, do not load paper above the arrow mark on the edge guides.

- Make sure your paper meets the specifications for your product.

- If paper jams when you print on both sides of the paper, try loading fewer sheets.

- Make sure the paper size and paper type settings are correct for the paper source.

- Run the paper guide cleaning utility to clean the paper path.

- For best results, follow these guidelines:

  - Use new, smooth, high-quality paper that is not curled, creased, old, too thin, or too thick.

  - Load paper in the cassette printable side down.

  - Follow any special loading instructions that came with the paper.

Paper Jams Inside the Product

If you see a message that paper has jammed in the product, follow the on-screen instructions to locate and remove the jammed paper.

Take the following precautions when removing jammed paper from the product:

- Remove the jammed paper carefully. Using too much force may damage the product.

- Unless specifically instructed, avoid tilting the product, placing it on its side, or turning it upside down, as ink may spill.

Warning: Never touch the buttons on the control panel while your hand is inside the product. If the product starts operating, it may cause an injury. Do not touch any protruding parts inside the product.

Solving Problems Printing from a Computer

Check these sections if you have problems while printing from your computer.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

Parent topic:

Nothing Prints

If you have sent a print job and nothing prints, try these solutions:

- Make sure your product is turned on and connected to your computer.

- Make sure any interface cables are connected securely at both ends.

- If you connected your product to a USB hub, make sure it is a first-tier hub. If it still does not print, connect your product directly to your computer instead of the hub.

- Make sure the printer status is not offline or pending.

- Run a product check to see if a test page prints. If the test page prints, check to see if your product software is installed correctly.

- Make sure you set the transportation lock to the unlocked (printing) position.

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. Print the image at a lower resolution or if necessary, increase your system's memory.

- In Windows, make sure your product is selected as the default printer and the printer port setting matches the printer connection port.

- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.

- In Windows, do one of the following to open the Epson Printer Connection Checker and follow the on-screen instructions to check the connection status:

  - **Windows 11**: Click , then search for **Epson Printer Connection Checker** and select it.

  - **Windows 10**: Click and select **Epson Software** > **Epson Printer Connection Checker**.

  - **Windows 8.x**: Navigate to the **Apps** screen and select the **Epson Printer Connection Checker** icon.

- **Windows 7**: Click ![icon] and select **All Programs** > **Epson Software** > **Epson Printer Connection Checker**.

- On a Mac, make sure the printer is added to the printer list and the printer is not paused.

- Make sure your product is selected as the printer in your printing program.

Product Icon Does Not Appear in Windows Taskbar

If you do not see your product icon in the Windows taskbar, first try restarting your computer. If that does not work, try this solution:

1. Do one of the following:

   - **Windows 11:** Click ![icon], search for **Settings** and select it. Select **Bluetooth & devices** > **Printers & scanners**. Select your product name and select **Printing preferences**.

   - **Windows 10:** Click ![icon] and select ![icon] (Settings) > **Devices** > **Printers & scanners**. Select your product name and select **Manage** > **Printing preferences**.

   - **Windows 8.x**: Navigate to the **Apps** screen and select **Control Panel** > **Hardware and Sound** > **Devices and Printers**. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.

   - **Windows 7**: Click ![icon] and select **Devices and Printers**. Right-click your product name, select **Printing Preferences**, and select your product name again if necessary.

2. Click the **Maintenance** tab.

3. Click the **Extended Settings** button.

4. Select **Enable EPSON Status Monitor 3** and click **OK**.

5. Click the **Monitoring Preferences** button.

6. Click the checkbox for the option that adds the shortcut icon to the taskbar.

7. Click **OK** to close the open program windows.

Parent topic: Solving Problems Printing from a Computer

Printing is Slow

If printing becomes slow, try these solutions:

- Make sure your system meets the requirements for your operating system. If you are printing a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory.

- If you are using Windows 7, close the **Devices and Printers** window before you print.

- On a Mac, make sure you download and install the Epson printer driver.

- Make sure **Quiet Mode** is turned off.

- Clear space on your hard drive or run a defragmentation utility to free up existing space.

- Close any programs you are not using when you print.

- If your product is connected to a USB hub, connect it directly to your computer instead.

- If printing becomes slower after printing continuously for a long time, the product may have automatically slowed down to protect the print mechanism from overheating or becoming damaged. Let the product rest with the power on for 30 minutes, then try printing again.

- If you are printing over a wireless network, factors such as interference, network traffic, or weak signal strength may affect your printing speed.

For the fastest printing, select the following settings in your product software:

- Make sure the paper type setting matches the type of paper you loaded.

- Turn on any high speed settings in your product software.

- Select a lower print quality setting.

- Make sure the ink drying time has not been increased for double-sided printing.

- **Windows**: Click the **Maintenance** or **Utility** tab, select **Extended Settings** or **Speed and Progress**, and select the following settings:

  - **Always Spool RAW Datatype**

  - **Page Rendering Mode**

  - **Print as Bitmap**

- **Mac**: Select **System Preferences** or **System Settings**, select **Printers & Scanners**, and select your product. Select **Options & Supplies**, select **Options** (or **Driver**), and enable the **Bidirectional printing** setting.

If printing is still slow and you are using Windows 7 or Windows Vista, try the following:

1. Click and select **Computer** or **My Computer**. Double-click the **C:** drive and open these folders: **ProgramData > EPSON > PRINTER**.

   Note: If you do not see the ProgramData folder, open the **Organize** menu and select **Folder and search options**. In the window that appears, click the **View** tab, select **Show hidden files, folders, and drives** in the Advanced settings list, and click **OK**.

2. Right-click the **EPAUDF01.AUD** file and select **Delete**.

3. Restart your computer and try printing again.

Selecting Basic Print Settings - Mac

Blank Pages Print

If blank pages print unexpectedly, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.

- If a blank page exists in a document you are printing and you want to skip printing it, select the **Skip Blank Page** setting in your printer software, if available.

- Run a print head nozzle check to see if any of the nozzles are clogged. Then clean the print head, if necessary.

- Make sure your product is selected as the printer in your printing program.

- You may need to refill the ink. Visually check the ink levels.

Related tasks

Selecting Basic Print Settings - Windows

Incorrect Margins on Printout

If your printed page has incorrect margins, try these solutions:

- Make sure you selected the correct paper size settings in your printing program and printer software.

- Make sure you selected the correct margins for your paper size in your printing program.

- Make sure your paper is positioned correctly for feeding into the product.

- When placing originals on the scanner glass, align the corner of the original with the corner indicated by the arrow. If the edges of the copy are cropped, move the original slightly away from the corner.

- Clean the scanner glass and the document cover. If there is dust or stains on the glass, the copy area may extend to include the dust or stains.

- Load paper in the correct direction and slide the edge guides against the edges of the paper.

- Select the appropriate original size in the copy settings.

You can use the preview option in your printer software to check your margins before you print.

Incorrect Characters Print

If incorrect characters appear in your prints, try these solutions before reprinting:

- Make sure any cables are securely connected at both ends.

- In Windows, delete all jobs from the Windows Spooler. Click **Print Queue** on the Maintenance tab in the printer settings window, and cancel any stalled print jobs.

- If your product is connected to a USB hub, connect it directly to your computer instead.

- If incorrect characters still appear in your prints, try connecting your product using a different cable.

- If your computer entered sleep mode the last time you printed, the next print job after your computer exits sleep mode may contain garbled characters. Print your document again.

Parent topic: Solving Page Layout and Content Problems

Incorrect Image Size or Position

If your printed image is the wrong size or in the wrong position, try these solutions:

- Make sure you selected the correct paper size and layout settings in your printing program and printer software.
- Make sure you selected the correct paper size on the control panel.
- Make sure your paper is positioned correctly for feeding into the printer.
- Slide the edge guides against the edges of the paper.
- Clean the scanner glass and document cover.
- If the edges of a copy are cropped, slightly move the original away from the edges of the scanner glass.
- Make sure you selected the correct margins for your paper size in your printing program.
- Be sure to select the appropriate original size setting for your original in the copy settings.

You can use the preview option in your printer software to check your margins before you print.

Solving Print Quality Problems

Check these sections if your printouts have problems with print quality, but your image looks fine on your computer screen.

Note: When printing using AirPrint, the available print settings are different from those covered in this manual. See the Apple website for details.

White or Dark Lines in Printout
Blurry or Smeared Printout
Faint Printout or Printout Has Gaps
Grainy Printout
Incorrect Colors

Parent topic: Solving Problems

White or Dark Lines in Printout

If you notice white or dark lines in your prints (also called banding), try these solutions before you reprint:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.

- Make sure the paper type setting matches the type of paper you loaded.

- Make sure you loaded the printable side of the paper correctly for your product.

- Turn off any high speed settings in your product software.

- Adjust the print quality in the product software.

- If you continue to see horizontal or vertical bands or streaks in your printouts after cleaning and aligning the print head, you can finely tune the horizontal or vertical alignment in the Maintenance menu.

- You may need to refill the ink. Visually check the ink levels.

- If you have not used the product for a long time, run the Power Cleaning utility.

  Note: Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

Blurry or Smeared Printout

If your printouts are blurry or smeared, try these solutions:

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.

- Use a support sheet with special paper, or load special paper one sheet at a time.

- Make sure your paper meets the specifications for your product.

- Use Epson papers to ensure proper saturation and absorption of genuine Epson inks.

- Make sure the paper type setting in your product software matches the type of paper you loaded.

- Make sure you loaded the printable side of the paper correctly for your product.

- If you are printing on thick paper or envelopes, make sure you select the appropriate settings.

- When manually printing 2-sided, make sure the ink is completely dry before loading the paper.

- Remove each sheet from the output tray as it is printed.

- Avoid handling printouts on glossy paper right after printing to allow the ink to set.

- Do not stack printouts immediately after printing.

- Turn off any high speed settings in your product software.

- If you print on both sides of a sheet of paper, smudges may appear on the reverse side of heavily saturated or dark images. If one side of a sheet will contain a lighter image or text, print that side first. Make sure the ink has dried before reloading the paper to print on the other side. Adjust the density and/or ink drying time settings.

- The ink levels may be low and you may need to refill the ink. Visually check the ink levels.

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.

- Clean the paper path.

- Do not press too hard on the original or the document cover when you are scanning originals on the scanner glass.

- Clean the scanner glass.

- Clean the ADF.

- Use the ink before the date printed on the package.

- If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and run the Power Cleaning utility. Then run a nozzle check to see if print quality has improved.

- If you have not used the product for a long time, run the Power Cleaning utility.

  Note: Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

Note: Your product will not operate properly while tilted at an angle. Place it on a flat, stable surface that extends beyond the base of the product in all directions.

Faint Printout or Printout Has Gaps

If your printouts are faint or have gaps, try these solutions:

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.

- The ink levels may be low. Visually check the ink levels.

- Make sure the paper type setting matches the type of paper you loaded.

- Make sure your paper is not damp, curled, old, or loaded incorrectly in your product.

- Adjust the print quality in the product software.

- Clean the paper path.

- If you have not used the product for a long time, run the Power Cleaning utility.

   Note: Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

Grainy Printout

If your printouts are grainy, try these solutions:

- Make sure you loaded the printable side of the paper correctly for your product.

- Select a higher print quality setting and turn off any high speed settings in your product software.

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.

- Adjust the print quality in the product software.

- You may need to increase the image resolution or print a smaller size; see your software documentation.

  Note: Images from the Internet may be low resolution and not result in a high quality printout.

- If you enlarged the image size in an image-editing program, you need to increase the image resolution setting to retain a high image quality. Increase the image resolution by the same amount you increase the image size. For example, if the image resolution is 300 dpi (dots per inch) and you will double the image size for printing, change the resolution setting to 600 dpi.

  Note: Higher resolution settings result in larger file sizes, which take longer to process and print. Consider the limitations of your computer system when selecting a resolution, and select the lowest possible resolution that produces acceptable quality to keep file sizes manageable.

Incorrect Colors

If your printouts have incorrect colors, try these solutions:

- Make sure the paper type setting matches the paper you loaded.

- Make sure the **Black/Grayscale** or **Grayscale** setting is not selected in your printer software.

- If you selected **Standard-Vivid** (Windows) or **Normal-Vivid** (Mac) as the quality setting in the printer software, try selecting **Standard** (Windows) or **Normal** (Mac) instead.

- Run a nozzle check to see if any of the print head nozzles are clogged. Then clean the print head, if necessary.

- The ink levels may be low and you may need to refill the ink. Visually check the ink levels.

- If you printed when the ink levels were too low to be seen in the ink tank windows, refill the ink tanks to the upper lines and run the Power Cleaning utility. Then run a nozzle check to see if print quality has improved.

- After you print, the colors in your printout need time to set as the ink dries. During this time, the colors may look different than you expect. To speed up drying time, do not stack your printouts on top of each other.

- Your printed colors can never exactly match your on-screen colors. However, you can use a color management system to get as close as possible. Try using the color management options in your printer software.

- For best results, use genuine Epson paper.

- If you have not used the product for a long time, run the Power Cleaning utility.

  Note: Power Cleaning consumes a lot of ink, so run this utility only if you cannot improve print quality by cleaning the print head.

Solving Scanning Problems

Check these solutions if you have problems scanning with your product.

Note: For solutions when using the Epson ScanSmart software, see the Epson ScanSmart help utility.

Scanning Software Does Not Operate Correctly

Cannot Start Epson Scan 2

Scanning is Slow

Cannot Save a Scan to a Shared Folder Over a Network

Parent topic: Solving Problems

Scanning Software Does Not Operate Correctly

If your scanning software does not operate correctly, try these solutions:

- Make sure your computer has adequate memory and meets the system requirements for your operating system.

- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart your scanning software.

- If you upgraded your operating system but did not reinstall your scanning software, try reinstalling it.

- In Windows, make sure your product is listed as a valid device in the **Scanners and Cameras** control panel.

- If you are scanning with the ADF, make sure the ADF and document covers are closed.

- Try scanning at a lower resolution or increase the free space on the computer's hard disk. Scanning stops if the total data size reaches the limit.

Windows System Requirements

Cannot Start Epson Scan 2

If you cannot start Epson Scan 2, try these solutions:

- Make sure your product is turned on and any interface cables are securely connected at both ends.

- If your product is connected to a USB hub, connect it directly to your computer instead.

- If you scan at a high resolution over a network, a communication error may occur. Lower the resolution.

- If you are scanning with the ADF, check that the document cover and ADF cover are closed.

- Make sure Epson Scan 2 is selected as your scanning program.

- Make sure your computer is not running in a power-saving mode, such as sleep or standby. If so, wake your system and restart Epson Scan 2.

- Check the connection setting and test the connection using Epson Scan 2 Utility:

  Windows 11: Click , search for **Epson Scan 2 Utility** and select it. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

  Windows 10: Click and select **EPSON** > **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

  Windows 8.x: Navigate to the **Apps** screen and select **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

  Windows (other versions): Click or **Start** > **All Programs** or **Programs** > **EPSON** > **Epson Scan 2** > **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

  Mac: Open the **Applications** folder, click **Epson Software**, and click **Epson Scan 2 Utility**. Make sure the correct product is selected. If necessary, select the **Other** tab and click **Reset**.

- Make sure you do not have multiple versions of Epson Scan 2 installed. If you do, uninstall both versions and install one version.

- If you upgraded your operating system but did not reinstall Epson Scan 2, try reinstalling it.

- If the user restriction feature (Access Control) is enabled, a user ID and password are required to scan. If you do not know the user ID or password, contact your administrator for assistance.

Parent topic: Solving Scanning Problems

Scanning is Slow

If scanning becomes slow, try these solutions:

- Scan your original at a lower resolution, if possible.

- Make sure your system meets the requirements for your operating system. If you are scanning a high-resolution image, you may need more than the minimum requirements. If necessary, increase your system's memory or reduce the resolution.

Parent topic: Solving Scanning Problems

Cannot Save a Scan to a Shared Folder Over a Network

If you cannot save a scan to a shared folder when scanning over a network, or saving takes a very long time, try these solutions:

- If you cannot scan to a shared folder over the network, make sure you did the following:

  - Created a shared folder on your computer (Windows).

  - If you registered the shared folder path to your product's control panel contact list or entered the path manually to scan, make sure you used the correct path.

  - Make sure the network folder does not already contain a file of the same name. If so, rename the file and try again.

- If you still cannot scan to the shared folder, your network type may be set to **Public**. You cannot scan to a shared folder when using a public network. Follow the steps here to check and change your network type, if necessary. Be sure to log into your Windows computer as an administrator.

  Note: The name of available network types varies in the different Windows versions. For details on selecting Windows network sharing settings, see Windows help.

  Windows 10:

  1. Click and select **Settings**.

2. Select **Network & Internet**.

3. Click your network type: **Ethernet** or **Wi-Fi**.

4. Click your network name.

5. Make sure the **Make this PC discoverable** setting is set to **On**. Select this setting when connected to a private network so you can save a scan to a shared folder. If you select **Off**, you cannot save your scan to a shared folder on a private network.

Windows 8.1:

1. At the Start screen, type **PC Settings** to automatically search the system.

2. Click **Network** in the PC Settings window.

3. Click your network name.

4. Make sure **Find devices and content** is set to **On**. Select this setting when connected to a private network so you can save a scan to a shared folder. If you select **Off**, you cannot save your scan to a shared folder on a private network.

Windows 8.0:

1. At the Start screen, type **Settings** to automatically search the system.

2. Select **Settings** when it appears and type **Network** into the search field.

3. Right-click your network name in the window that appears and click **Turn sharing on or off**.

4. When you see this message, select **Yes**:

   Do you want to turn on sharing between the PCs and connect to devices on this network?

   Select this setting when connected to a private network so you can save a scan to a shared folder. If you select **No**, you cannot save your scan to a shared folder on a private network.

Windows 7:

1. Click 🪟 or press the Windows key on your keyboard.

2. Type **Network and Sharing Center** into the search field.

3. Under View your active networks, make sure **Home network** or **Work network** is selected when connected to a private network so you can save a scan to a shared folder. (If you need to change the network type, click the network type name.) If you select **Public network**, you cannot save a scan to a shared folder.

• If saving your scan to a shared folder takes a very long time, make sure the DNS setting and the DNS domain name are correct. Contact your network administrator for instructions.

Solving Scanned Image Quality Problems

Check these sections if a scanned image on your computer screen has a quality problem.

Note: For solutions when using the Epson ScanSmart software, see the Epson ScanSmart help utility.

Image Consists of a Few Dots Only
Line of Dots Appears in All Scanned Images
Straight Lines in an Image Appear Crooked
Scanned Image Quality Problems
Image Colors are Patchy at the Edges
Ripple Patterns Appear in an Image
Scanned Image Edges are Cropped
Parent topic: Solving Problems

Image Consists of a Few Dots Only

If your scanned image consists only of a few dots, try these solutions:

- Make sure you placed your original for scanning facing the correct way.
- If the **Image Type** setting is **Black & White**, adjust the **Threshold** and scan again. (The **Image Option** must be set to **None** or **Color Enhance**.)
- Remove any lint or dirt from your original.
- Do not press on the original or the document cover with too much force.

Parent topic: Solving Scanned Image Quality Problems

Placing Originals on the Product

Line of Dots Appears in All Scanned Images

If a line of dots appears in all your scanned images, try these solutions:

- Clean the scanner glass with a soft, dry, lint-free cloth or use a small amount of glass cleaner on the cloth, if necessary. Paper towels are not recommended.

Caution: Do not spray glass cleaner directly on the scanner glass.

- Make sure any interface cables are securely connected at both ends.

If you are scanning from the ADF, make sure the ADF edge guides fit against the loaded originals. You can also try cleaning the ADF and scanning again.

Parent topic: Solving Scanned Image Quality Problems

Placing Originals on the Product

Scanned Image Quality Problems

If you encounter quality problems with your scanned image, try these solutions:

Image is Distorted or Blurry

- Do not move your original or your product during scanning.
- Your product will not operate properly while tilted at an angle. Place your product on a flat, stable surface that extends beyond its base in all directions.
- Adjust these Epson Scan 2 settings (if available) and try scanning again:
  - Increase the **Resolution** setting.
  - If the **Image Type** setting is **Black & White**, adjust the **Threshold** setting.

- If the **Image Type** setting is **Color** or **Grayscale**, select the **Unsharp Mask** setting.

- If the **Image Type** setting is **Black & White**, select **Text Enhancement**. If the **Image Type** setting is **Color** or **Grayscale**, change the **Text Enhancement** setting to **High**.

Image is Too Dark

- If the **Image Type** is set to **Color** or **Grayscale**, adjust the **Brightness** setting.

- Check the brightness and contrast settings of your computer monitor.

Back of Original Image Appears in Scanned Image

- Place a piece of black paper on the back of the original and scan it again.

- Adjust these Epson Scan 2 settings (if available) and try scanning again:

  - Select the **Advanced Settings** tab and adjust the **Brightness** setting.

Scanned Image Colors Do Not Match Original Colors

Printed colors can never exactly match the colors on your computer monitor because printers and monitors use different color systems: monitors use RGB (red, green, and blue) and printers typically use CMYK (cyan, magenta, yellow, and black).

Check the color matching and color management capabilities of your computer, display adapter, and the software you are using to see if they are affecting the palette of colors you see on your screen.

To adjust the colors in your scanned image, adjust these Epson Scan 2 settings (if available) and try scanning again:

- If the **Image Type** setting is **Color** or **Grayscale**, adjust the **Contrast** setting.

- If the **Image Type** setting is **Black & White** or **Grayscale**, adjust the **Color Enhance** setting.

Additional Scanning Settings - Advanced Settings Tab

Image Colors are Patchy at the Edges

If you are scanning a thick or warped original, cover its edges with paper to block external light as you scan it.

Parent topic: Solving Scanned Image Quality Problems

Ripple Patterns Appear in an Image

You may see a ripple pattern (called a moiré) in scanned images of printed documents. This is caused by interference from differing pitches in the scanner's screen and your original's halftone screen. To reduce this effect, adjust these Epson Scan 2 settings (if available) and try scanning again:

• Select the **Descreening** setting.

• Select a lower **Resolution** setting.

Parent topic: Solving Scanned Image Quality Problems

Related references

Additional Scanning Settings - Advanced Settings Tab

Scanned Image Edges are Cropped

If the edges of a scanned image are cropped, make sure your original is placed correctly for scanning. If necessary, move your original away from the edges of the scanner glass slightly.

In the Epson Scan 2 or Epson ScanSmart settings, set the **Edge Fill** setting to **None**.

Solving Faxing Problems

Check these solutions if you have problems faxing with your product.

Cannot Send or Receive Faxes
Cannot Receive Faxes with a Telephone Connected to Your Product
Fax Memory Full Error Appears
Sent Fax is Received in an Incorrect Size
Received Fax is Not Printed

Parent topic: Solving Problems

Cannot Send or Receive Faxes

If you cannot send or receive faxes, try these solutions:

• Use **Check Fax Connection** on the control panel (**Settings** > **General Settings** > **Fax Settings** > **Check Fax Connection**) to run the automatic fax connection check. Try the solutions suggested in the report.

- If you are faxing from a computer, use the Epson FAX Utility to send your fax.
- Make sure the recipient's fax machine is turned on and working.
- Make sure paper is loaded correctly in your product.
- Make sure you have set up your header information and have not blocked your caller ID. Otherwise, your faxes might be rejected by the recipient's fax machine.
- If user restriction has been enabled, you may need to enter a user name and password. Contact your administrator for assistance.
- If you did not connect a telephone to your product, set the Receive Mode setting to **Auto** so you can receive faxes automatically.
- Check that the cable connecting your telephone wall jack to your product's **LINE** port is secure.
- Print a fax connection report using your product control panel or fax software to help diagnose the problem.
- Verify that the telephone wall jack works by connecting a phone to it and testing it.
- If there is no dial tone and you connected the product to a PBX (Private Branch Exchange) phone line or Terminal Adapter, change the **Line Type** setting to **PBX**. If you still cannot send a fax, turn off the product's dial tone detection setting. (Turning off the dial tone setting may cause the product to drop the first digit of a fax number.)
- If you connected your product to a DSL phone line, you must connect a DSL filter to the phone jack to enable faxing over the line. Contact your DSL provider for the necessary filter.
- If you are connected to a DSL phone line, connect the product directly to a telephone wall jack and send a fax. If it works, the problem may be caused by the DSL filter. Contact your DSL provider.
- If your telephone line has static, turn off your product's error correction mode fax communication setting and try faxing again.
- Try lowering your product's fax speed setting.
- If a communication error occurs, change the **Fax Speed** setting to **Slow(9,600bps)** on the control panel.
- Make sure the error correction mode (ECM) setting is turned on if you are trying to send or receive a color fax.
- If your telephone line uses call waiting and you have trouble receiving faxes, turn off call waiting to prevent disruption of incoming faxes.
- If you have subscribed to a call forwarding service, the product may not be able to receive faxes. Contact your service provider for assistance.

- If the recipient fax machine does not answer your call within 50 seconds after the product has finished dialing, add pauses after the fax number to send the fax.

- Check your inbox and delete faxes after reading or printing them. If the inbox is full, the product cannot receive faxes.

- When sending faxes using the subaddress feature, ask the recipient if their fax machine can receive faxes using this feature. Check that the subaddress and password are correct, and that they match with the recipient subaddress and password. Check this when receiving faxes as well.

- Check if the sender's fax number is registered to the **Rejection Number List**

- If you enabled **Rejection Fax** options, check if the sender is blocked, did not set up header information, or is not registered in your contacts list, as necessary.

- If you have not connected a telephone to the printer, set the **Receive Mode** setting to **Auto** on the control panel.

- If you are receiving faxes using the Epson FAX Utility, check that your product is registered as a fax product in your operating system:

  Windows: Make sure the product appears in **Devices and Printers**, **Printer**, or **Printers and Other Hardware**. If the product does not appear, uninstall and re-install the Epson FAX Utility.

  Mac: Select **System Preferences** or **System Settings** > **Printers & Scanners** (or **Print & Scan** or **Print & Fax**) and make sure your product appears. If your product does not appear, click **+** and add your product. If the product does appear, double-click it and make sure it is not paused.

Note: Do not turn the product off while it is receiving a fax. Otherwise, the fax transmission will be lost.

Note: If your product is connected to a VoIP (Voice over Internet Protocol) phone line, keep in mind that fax machines are designed to work over analog phone lines. Epson cannot guarantee that fax transmission will work when using VoIP.

If your phone line includes voice mail answering services, calls or faxes may be inadvertently received by your voice mail service.

Cannot Receive Faxes with a Telephone Connected to Your Product

If you cannot receive faxes when a telephone is connected to your product, try these solutions:

• Make sure your telephone is connected to your product's **EXT** port.

• Make sure the Receive Mode is set to **Manual**.

Note: When answering a call that is a fax, wait until the product's LCD screen displays a message that a connection has been made before you hang up.

Parent topic: Solving Faxing Problems

Related tasks

Fax Memory Full Error Appears

If you see an error message telling you that the product's fax memory is full, try these solutions:

• If you set the product to save received faxes in the product's memory or inbox, delete any faxes you have already read.

   Note: Your product can store up to 100 faxes before its inbox is full.

• If you set the product to save received faxes on a computer, turn on the selected computer. Once the faxes are saved on the computer, they are deleted from the product's memory.

• If you set the product to save received faxes on a memory device, connect the selected memory device containing the save fax folder to the product. Once the faxes are saved on the memory device, they are deleted from the product's memory.

   Note: Make sure the memory device has enough available memory and is not write protected.

• If the memory is full, try the following:

   • Send a monochrome fax using the direct sending feature

- Send your faxes in smaller batches
- If the product cannot print a received fax due to a product error, such as a paper jam, the memory full error may appear. Clear any product errors, then ask the sender to resend the fax.

Parent topic: Solving Faxing Problems

Sent Fax is Received in an Incorrect Size

If your recipient receives a fax in an incorrect size, try these solutions:

- If you are sending a fax using the scanner glass, make sure your original is placed correctly and that the correct paper size is selected on the control panel.
- Clean the scanner glass and document cover.

Parent topic: Solving Faxing Problems

Uninstall Your Product Software

If you have a problem that requires you to uninstall and re-install your software, follow the instructions for your operating system.

Uninstalling Product Software - Windows

Uninstalling Product Software - Mac

Parent topic: Solving Problems

Uninstalling Product Software - Windows

You can uninstall and then re-install your product software to solve certain problems.

1. Turn off the product.

2. Disconnect any interface cables.

3. Do one of the following:

   - **Windows 11**: Click [icon], then search for **Settings** and select it. Select **Apps** or **System** > **Apps & features**. Then select the program you want to uninstall and select **Uninstall**.

   - **Windows 10**: Click [icon] and select [icon] (Settings) > **Apps** or **System** > **Apps & features**. Then select the program you want to uninstall and select **Uninstall**.

   - **Windows 8.x**: Navigate to the **Apps** screen and select **Control Panel** > **Programs** > **Programs and Features**. Select the uninstall option for your Epson product, then select **Uninstall/Change**.

     Note: If you see a **User Account Control** window, click **Yes** or **Continue**.

     Select your product again, if necessary, then select **OK**, and click **Yes** to confirm the uninstallation.

   - **Windows (other versions)**: Click [icon] or **Start**, and select **All Programs** or **Programs**. Select **EPSON**, select your product, then click **EPSON Printer Software Uninstall**.

Note: If you see a **User Account Control** window, click **Yes** or **Continue**.

In the next window, select your product and click **OK**. Then follow any on-screen instructions.

4. Do one of the following to uninstall Epson Event Manager, then follow any on-screen instructions:

   • **Windows 11/Windows 10/8.x**: Select **Epson Event Manager** and click **Uninstall**.

   • **Windows 7**: Open the Windows **Control Panel** utility. Select **Programs and Features**. (In Classic view, select **Programs** and click **Uninstall a program**.) Select **Epson Event Manager** and click **Uninstall/Change**.

5. Do one of the following to uninstall Epson Scan 2, then follow any on-screen instructions:

   • **Windows 11/Windows 10**: Select **Epson Scan 2** and click **Uninstall**.

   • **Windows 8.x/Windows 7**: Select **Epson Scan 2** and click **Uninstall/Change**.

6. Do one of the following to uninstall Epson ScanSmart, then follow any on-screen instructions:

   • **Windows 11/Windows 10**: Select **Epson ScanSmart** and click **Uninstall**.

   • **Windows 8.x/Windows 7**: Select **Epson ScanSmart** and click **Uninstall/Change**.

7. Restart your computer, then see the *Start Here* sheet to re-install your software.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

Parent topic: Uninstall Your Product Software

Uninstalling Product Software - Mac

In most cases, you do not need to uninstall your product software before re-installing it. However, you can download the Uninstaller utility from the Epson support website to uninstall your product software as described here.

Note: If you find that re-installing your product software does not solve a problem, contact Epson.

1. To download the Uninstaller utility, visit epson.com/support (U.S.) or epson.ca/support (Canada) and select your product.

2. Click **Downloads**.

3. Select your operating system, click **Utilities**, locate the Uninstaller utility, and click **Download**.

4. Run the file you downloaded.

5. Double-click the **Uninstaller** icon.

6. In the Epson Uninstaller screen, select the checkbox for each software program you want to uninstall.

7. Click **Uninstall**.

8. Follow the on-screen instructions to uninstall the software.

9. Reinstall your product software.

Note: If you uninstall the printer driver and your product name remains in the **Print & Fax**, **Print & Scan**, or **Printers & Scanners** window, select your product name and click the **–** (remove) icon to remove it.

Parent topic: Uninstall Your Product Software

Where to Get Help

If you need to contact Epson for technical support services, use the following support options.

Internet Support

Visit Epson's support website at epson.com/support (U.S.) or epson.ca/support (Canada) and select your product for solutions to common problems. You can download drivers and documentation, get FAQs and troubleshooting advice, or e-mail Epson with your questions.

Speak to a Support Representative

Before you call Epson for support, please have the following information ready:

• Product name

• Product serial number (located on a label on the product)

• Proof of purchase (such as a store receipt) and date of purchase

• Computer configuration

• Description of the problem

Then call:

• U.S.: (562) 276-4382, 7 a.m. to 4 p.m., Pacific Time, Monday through Friday

• Canada: (905) 709-3839, 7 a.m. to 4 p.m., Pacific Time, Monday through Friday

Days and hours of support are subject to change without notice. Toll or long distance charges may apply.

Purchase Supplies and Accessories

You can purchase genuine Epson ink and paper at epson.com (U.S. sales) or epson.ca (Canadian sales). You can also purchase supplies from an Epson authorized reseller. To find the nearest one, call 800-GO-EPSON (800-463-7766) in the U.S. or 800-807-7766 in Canada.

Parent topic: Solving Problems

Technical Specifications

Paper Specifications

Note: Since the quality of any particular brand or type of paper may be changed by the manufacturer at any time, Epson cannot guarantee the quality of any non-Epson brand or type of paper. Always test a sample of paper stock before purchasing large quantities or printing large jobs.

Single-sheets

Size	A4 (8.3 × 11.7 inches [210 × 297 mm])
	Letter (8.5 × 11 inches [216 × 279 mm])
	Legal (8.5 × 14 inches [216 × 356 mm])
	B5 (7.2 × 10.1 inches [182 × 257 mm])
	Executive (7.25 × 10.5 inches [184 × 267 mm])
	8.5 × 13 inches (216 × 330 mm)
	Mexico-Oficio (8.5 × 13.4 inches [216 × 340 mm])
	Oficio 9 (8.46 × 12.4 inches [215 × 315 mm])
	A5 (5.8 × 8.2 inches [148 × 210 mm])
	A6 (4.1 × 5.8 inches [105 × 148 mm])
	B6 (5 × 7.2 inches [128 × 182 mm])
	Half Letter (5.5 × 8.5 inches [140 × 216 mm])
	4 × 6 inches (102 × 152 mm)
	5 × 7 inches (127 × 178 mm)
	8 × 10 inches (203 × 254 mm)
Paper types	Plain paper and thick paper
	Note: Your product also supports compatible papers distributed by Epson. See the link at the end of this topic for a list of compatible Epson papers.
Weight	Plain paper: 17 lb (64 g/m^2) to 24 lb (90 g/m^2)
	Thick paper: 25 lb (91 g/m^2) to 68 lb (256 g/m^2)

Envelopes

Size	No. 10 (4.1 × 9.5 inches [105 × 241 mm])
Paper types	Plain bond paper
Weight	20 lb (75 g/m^2) to 27 lb (100 g/m^2)

Ink Specifications

Note: Epson's warranties do not extend to any damage caused by the use of third-party ink or ink not designed for your printer.

The included initial ink bottles must be used for printer setup and are not for resale. The printer ships with full ink bottles and part of the ink from the first bottles is used to charge the print head. Yields vary considerably based on images printed, print settings, paper type, frequency of use and temperature.

Color	Black, Cyan, Magenta, Yellow
Ink life	Do not use if the date on the package has expired

Temperature	Storage: –4 to 104 °F (–20 to 40 °C)
	1 month at 104 °F (40 °C)
	Ink freezes at 5 °F (–15 °C)
	Ink thaws and is usable after approximately 2 hours at 77 °F (25 °C)

Safety and Approvals Specifications

United States	Safety: UL60950-1
	EMC: FCC part 15 Subpart B class B
Canada	Safety: CAN/CSA C22.2 No. 60950-1
	EMC: CAN ICES-3 (B)/NMB-3 (B)

This equipment contains the following wireless module:

• Manufacturer: Seiko Epson Corporation

• Type: J26H005

This product conforms to Part 15 of FCC Rules and RSS-210 of the IC Rules. Epson cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation of the device.

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment (or its transmit antenna) that is installed outdoors is subject to licensing.

This equipment complies with FCC/IC radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines in Supplement C to OET65 and RSS-102 of the IC radio frequency (RF) Exposure rules. This equipment should be installed and operated so that the radiator is kept at least 7.9 inches (20 cm) or more away from a person's body (excluding extremities: hands, wrists, feet and ankles).

Important Safety Instructions

Before using your Epson product, read and follow these safety instructions.

General Product Safety Instructions
Wireless Connection Safety Instructions
LCD Screen Safety Instructions
Telephone Equipment Safety Instructions

Parent topic: Notices

General Product Safety Instructions

- Be sure to follow all warnings and instructions marked on the product.

- Use only the type of power source indicated on the product's label.

- Use only the power cord that comes with the product. Do not use the cord with any other equipment. Using another cord or using the provided cord with other equipment may cause fires or shock.

- Make sure the AC power cord meets the relevant local safety standard.

- Place the product near a wall outlet where the plug can be easily unplugged.

- Avoid plugging the product into an outlet on the same circuit as a photo copier or air control system that regularly switches on and off, or on an outlet controlled by a wall switch or timer.

- Do not let the power cord become damaged or frayed. Place it to avoid abrasions, cuts, fraying, crimping, and kinking. Do not place objects on top of it and do not allow it to be stepped on or run over. Be careful to keep the cord straight at each end.

- If you use an extension cord with the product, make sure the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating. Also, make sure the total ampere rating of all devices plugged into the wall outlet does not exceed the wall outlet's ampere rating.

- Always turn off the product using the power button, and wait until the power light stops flashing before unplugging the product or cutting off power to the electrical outlet.

- If you will not be using the product for a long period, unplug the power cord from the electrical outlet.

- Place the product on a flat, stable surface that extends beyond its base in all directions. It will not operate properly if it is tilted or at an angle.

- Allow space behind the product for the cables, and space above the product so that you can fully raise the document cover.

- Leave enough space in front of the product for the paper to be fully ejected.

- Avoid locations that are subject to rapid changes in heat or humidity, shocks or vibrations, or dust.

- Do not place or store the product outdoors.

- Do not place the product near excessive heat sources or in direct sunlight.

- Leave enough room around the product for sufficient ventilation. Do not block or cover openings in the case or insert objects through the slots.

- Keep the product away from potential sources of electromagnetic interference, such as loudspeakers or the base units of cordless telephones.

- Keep your product at least 8.7 inches (22 cm) away from cardiac pacemakers to prevent your product's radio waves from affecting the operation of the pacemaker.

- When connecting the product to a computer or other device with a cable, ensure the correct orientation of the connectors. Each connector has only one correct orientation. Inserting a connector in the wrong orientation may damage both devices connected by the cable.

- Do not sit or lean on the product. Do not place heavy objects on the product.

- Do not touch the flat white cable or ink tubes inside the product.

- Do not move the print head by hand; this may damage the product.

- Do not put your hands inside the product while it is printing.

- Do not spill liquid on the product or use the product with wet hands.

- Do not use aerosol products that contain flammable gases inside or around the product. Doing so may cause fire.

- Do not press too hard on the scanner glass when placing originals.

- Do not open the scanner section while the product is copying, printing, scanning, or performing any other functions.

- Be careful not to trap your fingers when closing the document cover or scanner unit.

- Except as specifically explained in your documentation, do not attempt to service or disassemble the product yourself.

- Unplug the product and refer servicing to qualified service personnel under the following conditions: if the power cord or plug is damaged; if liquid has entered the product; if the product has been dropped or the case damaged; if the product does not operate normally or exhibits a distinct change in performance. Adjust only those controls that are covered by the operating instructions.

- If any of the ink tanks are not filled up to the lower line, refill the ink soon. Prolonged use of the product when the ink level is below the lower line could damage the product.

- Before transporting the product, make sure that the transportation lock is set to the locked position and that the print head is in the home (far right) position.

- When storing or transporting the product, do not tilt it, stand it on its side, or turn it upside down; otherwise, ink may leak.

- Do not attempt to move the product by yourself.

Parent topic: Important Safety Instructions

Wireless Connection Safety Instructions

Radio waves from this product may adversely affect the operation of medical equipment or automatically controlled devices, such as pacemakers, automatic doors or fire alarms. When using this product near such devices or inside a medical facility, follow the directions from authorized staff members at the facility, and follow all posted warnings and directions on the device to avoid causing an accident.

Parent topic: Important Safety Instructions

LCD Screen Safety Instructions

- Use only a dry, soft cloth to clean the LCD screen. Do not use liquid or chemical cleansers.

- If the LCD screen is damaged, contact Epson. If the liquid crystal solution gets on your hands, wash them thoroughly with soap and water. If the liquid crystal solution gets into your eyes, flush them immediately with water. If discomfort or vision problems remain after a thorough flushing, see a doctor immediately.

- Do not press too hard on the LCD screen or subject it to heavy impacts.

- If the LCD screen chips or cracks, do not touch or attempt to remove the broken pieces; contact Epson for support.

Parent topic: Important Safety Instructions

Telephone Equipment Safety Instructions

When using telephone equipment, you should always follow basic safety precautions to reduce the risk of fire, electric shock, and personal injury, including the following:

- Do not use the Epson product near water.

- Avoid using a telephone during an electrical storm. There may be a remote risk of electric shock from lightning.

- Do not use a telephone to report a gas leak in the vicinity of the leak.

Caution: To reduce the risk of fire, use only a No. 26 AWG or larger telecommunication line cord.

Parent topic: Important Safety Instructions

FCC Compliance Statement

For United States Users

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the Administrative Council for Terminal Attachments ("ACTA"). On the surface of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

Applicable certification jack Universal Service Order Codes ("USOC") for the equipment: RJ11C.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical,

the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations, or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If you have problems with this product and require technical or customer support, please visit www.epson.com for more information.

This product is not intended to be repaired by the customer. If you experience trouble connecting this equipment to a telephone line, please contact:

Name: Epson America, Inc.

Address: 3131 Katella Ave., Los Alamitos, CA 90720 U.S.A.

Telephone: (562) 981-3840

If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

This equipment may not be used on coin service provided by the telephone company. Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer.

The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or other electronic device, including fax machines, to send any message unless such message clearly contains in a margin at the top or bottom of each transmitted page or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity, or other individual sending the message and the telephone number of the sending machine or such business, other entity, or individual. (The telephone number provided may not be a 900 number or any other number for which charges exceed local or long-distance transmission charges.)

In order to program this information into your fax machine, click the link below for instructions on entering fax header information.

According to the FCC's electrical safety advisory, we recommend that you may install an AC surge arrester in the AC outlet to which this equipment is connected. Telephone companies report that electrical surges, typically lightning transients, are very destructive to customer terminal equipment connected to AC power sources and that this is a major nationwide problem.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful

interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause interference to radio and television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

• Increase the separation between the equipment and receiver.

• Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

• Consult the dealer or an experienced radio/TV technician for help.

WARNING

The connection of a non-shielded equipment interface cable to this equipment will invalidate the FCC Certification or Declaration of this device and may cause interference levels which exceed the limits established by the FCC for this equipment. It is the responsibility of the user to obtain and use a shielded equipment interface cable with this device. If this equipment has more than one interface connector, do not leave cables connected to unused interfaces. Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

For Canadian Users

1. This product meets the applicable Innovation, Science and Economic Development Canada technical specifications.

2. The Ringer Equivalence Number indicates the maximum number of devices allowed to be connected to a telephone interface. The termination of an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.

CAN ICES-3(B)/NMB-3(B)

Le présent produit est conforme aux spécifications techniques applicables d'Innovation, Sciences et Développement économique Canada.

L'indice d'équivalence de la sonnerie (IES) sert à indiquer le nombre maximal de dispositifs qui peuvent être raccordés à une interface téléphonique. La terminaison d'une interface peut consister en une combinaison quelconque de dispositifs, à la seule condition que la somme des IES de tous les dispositifs n'excède pas cinq.

CAN ICES-3(B)/NMB-3(B)

Binding Arbitration and Class Waiver

1. DISPUTES, BINDING INDIVIDUAL ARBITRATION, AND WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS

1.1 **Disputes**. The terms of this Section 1 shall apply to all Disputes between you and Epson. The term "Dispute" is meant to have the broadest meaning permissible under law and includes any dispute, claim, controversy or action between you and Epson arising out of or relating to this Agreement, Epson branded products (hardware and including any related software), or other transaction involving you and Epson, whether in contract, warranty, misrepresentation, fraud, tort, intentional tort, statute, regulation, ordinance, or any other legal or equitable basis. "DISPUTE" DOES NOT INCLUDE IP CLAIMS, or more specifically, a claim or cause of action for (a) trademark infringement or dilution, (b) patent infringement, (c) copyright infringement or misuse, or (d) trade secret misappropriation (an "IP Claim"). You and Epson also agree, notwithstanding Section 1.6,that a court, not an arbitrator, may decide if a claim or cause of action is for an IP Claim.

1.2 **Binding Arbitration**. You and Epson agree that all Disputes shall be resolved by binding arbitration according to this Agreement. **ARBITRATION MEANS THAT YOU WAIVE YOUR RIGHT TO A JUDGE OR JURY IN A COURT PROCEEDING AND YOUR GROUNDS FOR APPEAL ARE LIMITED**. Pursuant to this Agreement, binding arbitration shall be administered by JAMS, a nationally recognized arbitration authority, pursuant to its code of procedures then in effect for consumer related disputes, but excluding any rules that permit joinder or class actions in arbitration (for more detail on procedure, see Section 1.6 below). You and Epson understand and agree that (a) the Federal Arbitration Act (9 U.S.C. §1, et seq.) governs the interpretation and enforcement of this Section 1, (b) this Agreement memorializes a transaction in interstate commerce, and (c) this Section 1 shall survive termination of this Agreement.

1.3 **Pre-Arbitration Steps and Notice**. Before submitting a claim for arbitration, you and Epson agree to try, for sixty (60) days, to resolve any Dispute informally. If Epson and you do not reach an agreement to resolve the Dispute within the sixty (60) days), you or Epson may commence an arbitration. Notice to Epson must be addressed to: Epson America, Inc., ATTN: Legal Department, 3131 Katella Ave., Los Alamitos, CA 90720 (the "Epson Address"). The Dispute Notice to you will be sent to the most recent address Epson has in its records for you. For this reason, it is important to notify us if your address changes by emailing us at EAILegal@ea.epson.com or writing us at the Epson Address above. Notice of the Dispute shall include the sender's name, address and contact information, the facts giving rise to the Dispute, and the relief requested (the "Dispute Notice"). Following receipt of the Dispute Notice, Epson and you agree to act in good faith to resolve the Dispute before commencing arbitration.

1.4 **Small Claims Court**. Notwithstanding the foregoing, you may bring an individual action in the small claims court of your state or municipality if the action is within that court's jurisdiction and is pending only in that court.

1.5 **WAIVER OF CLASS ACTIONS AND CLASS ARBITRATIONS. YOU AND EPSON AGREE THAT EACH PARTY MAY BRING DISPUTES AGAINST THE OTHER PARTY ONLY IN AN INDIVIDUAL CAPACITY, AND NOT AS A PLAINTIFF OR CLASS MEMBER IN ANY CLASS OR REPRESENTATIVE PROCEEDING, INCLUDING WITHOUT LIMITATION FEDERAL OR STATE CLASS ACTIONS, OR CLASS ARBITRATIONS. CLASS ACTION LAWSUITS, CLASS-WIDE ARBITRATIONS, PRIVATE ATTORNEY-GENERAL ACTIONS, AND ANY OTHER PROCEEDING WHERE SOMEONE ACTS IN A REPRESENTATIVE CAPACITY ARE NOT ALLOWED. ACCORDINGLY, UNDER THE ARBITRATION PROCEDURES OUTLINED IN THIS SECTION, AN ARBITRATOR SHALL NOT COMBINE OR CONSOLIDATE MORE THAN ONE PARTY'S CLAIMS WITHOUT THE WRITTEN CONSENT OF ALL AFFECTED PARTIES TO AN ARBITRATION PROCEEDING.**

1.6 **Arbitration Procedure**. If you or Epson commences arbitration, the arbitration shall be governed by the rules of JAMS that are in effect when the arbitration is filed, excluding any rules that permit arbitration on a class or representative basis (the "JAMS Rules"), available at http://www.jamsadr.com or by calling 1-800-352-5267, and under the rules set forth in this Agreement. All Disputes shall be resolved by a single neutral arbitrator, and both parties shall have a reasonable opportunity to participate in the selection of the arbitrator. The arbitrator is bound by the terms of this Agreement. The arbitrator, and not any federal, state or local court or agency, shall have exclusive authority to resolve all disputes arising out of or relating to the interpretation, applicability, enforceability or formation of this Agreement, including any claim that all or any part of this Agreement is void or voidable. Notwithstanding this broad delegation of authority to the arbitrator, a court may determine the limited question of whether a claim or cause of action is for an IP Claim, which is excluded from the definition of "Disputes" in Section 1.1 above. The arbitrator shall be empowered to grant whatever relief would be available in a court under law or in equity. The arbitrator may award you the same damages as a court could, and may award declaratory or injunctive relief only in favor of the individual party seeking relief and only to the extent necessary to provide relief warranted by that party's individual claim. In some instances, the costs of arbitration can exceed the costs of litigation and the right to discovery may be more limited in arbitration than in court. The arbitrator's award is binding and may be entered as a judgment in any court of competent jurisdiction.

You may choose to engage in arbitration hearings by telephone. Arbitration hearings not conducted by telephone shall take place in a location reasonably accessible from your primary residence, or in Orange County, California, at your option.

a) Initiation of Arbitration Proceeding. If either you or Epson decides to arbitrate a Dispute, both parties agree to the following procedure:

(i) Write a Demand for Arbitration. The demand must include a description of the Dispute and the amount of damages sought to be recovered. You can find a copy of a Demand for Arbitration at http://www.jamsadr.com ("Demand for Arbitration").

(ii) Send three copies of the Demand for Arbitration, plus the appropriate filing fee, to: JAMS, 500 North State College Blvd., Suite 600 Orange, CA 92868, U.S.A.

(iii) Send one copy of the Demand for Arbitration to the other party (same address as the Dispute Notice), or as otherwise agreed by the parties.

b) Hearing Format. During the arbitration, the amount of any settlement offer made shall not be disclosed to the arbitrator until after the arbitrator determines the amount, if any, to which you or Epson is entitled. The discovery or exchange of non-privileged information relevant to the Dispute may be allowed during the arbitration.

c) Arbitration Fees. Epson shall pay, or (if applicable) reimburse you for, all JAMS filings and arbitrator fees for any arbitration commenced (by you or Epson) pursuant to provisions of this Agreement.

d) Award in Your Favor. For Disputes in which you or Epson seeks $75,000 or less in damages exclusive of attorney's fees and costs, if the arbitrator's decision results in an award to you in an amount greater than Epson's last written offer, if any, to settle the Dispute, Epson will: (i) pay you $1,000 or the amount of the award, whichever is greater; (ii) pay you twice the amount of your reasonable attorney's fees, if any; and (iii) reimburse you for any expenses (including expert witness fees and costs) that your attorney reasonably accrues for investigating, preparing, and pursuing the Dispute in arbitration. Except as agreed upon by you and Epson in writing, the arbitrator shall determine the amount of fees, costs, and expenses to be paid by Epson pursuant to this Section 1.6d).

e) Attorney's Fees. Epson will not seek its attorney's fees and expenses for any arbitration commenced involving a Dispute under this Agreement. Your right to attorney's fees and expenses under Section 1.6d) above does not limit your rights to attorney's fees and expenses under applicable law; notwithstanding the foregoing, the arbitrator may not award duplicative awards of attorney's fees and expenses.

1.7 **Opt-out. You may elect to opt-out (exclude yourself) from the final, binding, individual arbitration procedure and waiver of class and representative proceedings specified in this Agreement by sending a written letter to the Epson Address within thirty (30) days of your assent to this Agreement (including without limitation the purchase, download, installation of the Software or other applicable use of Epson Hardware, products and services) that specifies (i) your name, (ii) your mailing address, and (iii) your request to be excluded from the final, binding individual arbitration procedure and waiver of class and representative proceedings specified in this Section 1. In the event that you opt-out consistent with the procedure set forth above, all other terms shall continue to apply, including the requirement to provide notice prior to litigation.**

1.8 **Amendments to Section 1**. Notwithstanding any provision in this Agreement to the contrary, you and Epson agree that if Epson makes any future amendments to the dispute resolution procedure and class action waiver provisions (other than a change to Epson's address) in this Agreement, Epson will obtain your affirmative assent to the applicable amendment. If you do not affirmatively assent to the applicable amendment, you are agreeing that you will arbitrate any Dispute between the parties in accordance with the language of this Section 1 (or resolve disputes as provided for in Section 1.7, if you timely elected to opt-out when you first assented to this Agreement).

1.9 **Severability**. If any provision in this Section 1 is found to be unenforceable, that provision shall be severed with the remainder of this Agreement remaining in full force and effect. **The foregoing shall not apply to the prohibition against class or representative actions as provided in Section 1.5. This means that if Section 1.5 is found to be unenforceable, the entire Section 1 (but only Section 1) shall be null and void.**
