

Steel Anchor with Glue Kit

The Steel Anchor is the ideal complement to our cable locks, providing a strong, permanent anchoring point when there are no suitable fixtures to loop the cable around. This anchor can be securely attached to virtually any surface using four screws and permanent glue, combined with a rubber grip coating on the base. Once fastened, the cable lock holds the unique Security Shield in place to prevent the screws from being accessible. Manufactured using processes that reinforce and strengthen the steel, the Single Steel Anchor is a highly durable, tamper-resistant security solution.
