

USB-C to VGA Video Adapter with USB Power Delivery - 1920 x 1200 - White

Product ID: CDP2VGAUCPW

The USB-C to VGA adapter lets you connect a USB-C laptop, such as your Macbook or MacBook Pro, to a VGA display. The video adapter features USB Power Delivery, which enables you to power your laptop while you're outputting video to a VGA display.

USB Type-C is a universal connectivity standard that combines all of your essential functions into one dynamic port. This adapter works with USB-C devices that pass a DisplayPort video signal, such as the MacBook and Chromebook Pixel™. It's also compatible with Thunderbolt™ 3 ports.

The perfect travel companion for your MacBook with USB-C

With its all-white design and support for USB Power Delivery, this USB-C video adapter is the perfect accessory for your USB-C equipped MacBook. The adapter is compact and lightweight, so it fits easily into your MacBook bag or carrying case, which is great for BYOD (Bring Your Own Device) applications at the office.

While the adapter looks great next to your MacBook or HP® ENVY, it also works with any USB-C computer that supports DisplayPort ALT mode, such as your Windows® laptop.

Charges your laptop

Unlike some video adapters that take up your laptop's USB-C charge port while you're outputting video and prevent you from charging your computer, this video adapter features an additional USB-C port dedicated to USB Power Delivery. This means you can charge your laptop, even while outputting video, by simply connecting the laptop's power adapter to the additional port. It's the perfect solution for laptops that only have a single USB-C port.

Promotes portability

This USB Type-C video adapter maximizes portability with a lightweight, small-footprint design. It's the perfect accessory to carry with your MacBook or Chromebook, fitting easily into your laptop bag or carrying case. Its ultra-portable design makes this adapter perfect for BYOD (Bring Your Own Device) applications at the office.

Connects easily

This adapter lets you utilize the versatile USB Type-C port on your portable device. USB Type-C is a reversible connector, so no matter how you plug it in, the adapter will always connect, saving you the hassle and embarrassment of struggling with your device when you're trying to deliver a presentation or share information.

Maintains crystal-clear picture quality

With support for video resolutions up to 1920x1200 or 1080p, you'll be surprised at the picture quality the adapter provides, even when connected to a legacy VGA monitor, projector or television. The adapter harnesses the video capabilities built into your USB-C connection to deliver every detail in stunning high-definition.

The CDP2VGAUCPW is backed by a 2-year StarTech.com warranty and free lifetime technical support.

Certifications, Reports and Compatibility

Applications

- Charge your USB Type-C laptop and output video using the same USB-C port
- Carry the adapter with you when you travel, and connect to any VGA TV, monitor or projector
- Connect to BYOD (Bring Your Own Device) and CYOD (Choose Your Own Device) workstations at your office

Features

- Charge your laptop and output VGA video using the same USB-C port, with USB Power Delivery
- Hassle-free connection with the reversible USB-C connector
- Maximum portability with a small footprint and lightweight design
- Thunderbolt 3 port compatible
- Crystal-clear picture quality with support for HD video resolutions up to 1920x1200
