Product Description

You're always a winner with the Swissgear 8120 USB Gaming Laptop Backpack. Created for gamers, this specialized backpack is designed to safely and securely transport your gaming components and accessories. Plus, a handy, external USB outlet lets you keep your devices charged, hassle-free, wherever you go (battery pack NOT INCLUDED). At the rear of the backpack, a deep, padded compartment with securing strap protects gaming laptops up to 17" or standard, full-sized gaming consoles, while the large main compartment features numerous specialty storage options. A padded, felt-lined keyboard pocket with elastic securing strap stores standard sized keyboards. A hanging loop keeps gaming headphones secured, while a mouse pocket and handheld gaming console pocket are both lined with felt to prevent scratches. Other interior storage compartments include a large, zippered mesh bag for adapters and cables, a power bank pocket, and side elastic loops to secure other essentials.

On the front of the bag, a large padded pocket contains two deep gusseted accessory pockets for equipment storage, a large, padded mesh slip pocket that is ideal for controllers, and a detachable key ring to keep keys and key fobs within reach. One side-access zippered accessory pocket gives you added organization for smaller items, and another side pocket offers convenient water bottle storage. Adjustable compression straps help keep interior contents secured in place. On the move, comfort is key, with ergonomically contoured, padded shoulder straps that feature breathable mesh fabric, shock absorbers, thumb ring pulls and an adjustable sternum strap. A padded, airflow back panel provides superior back ventilation and added support. Other carrying options include a wire-reinforced, padded top carry handle and an add-a-bag panel fits over the extension handle of rolling luggage for secure stacking. Made for resilience with molded PVC, 1200D Ballistic Fabric, and coated polyester that wipes clean, this backpack is built for action.
