

Logitech Spotlight 2 Presentation Remote – Graphite

Captivate your audience with Spotlight 2, an advanced presentation remote. Haptic feedback gives you refined control of your presentation. Customizable actions let you perform personalized functions with confidence. Use advanced digital highlighting effects like Spotlight, Squarelight, and Magnify to emphasize important details. Spotlight 2 is made to deliver powerful presentations.

Features

- Advanced presentation remote: Haptic feedback, digital highlighting, and customizable actions; ideal for professionals and educators; for remote, hybrid, and in-person meetings
- Haptic feedback: Pressing the highlight button activates subtle haptic vibrations, confirming that you've performed the correct action, so you stay confident and in control
- Advanced digital highlighting effects: Use Spotlight, Squarelight, Magnify, Annotate, or the digital pointer to call attention to your slides(1) Also comes with a laser pointer
- Customizable actions: Take advantage of the Action Button to assign your most-used shortcuts like start, pause, and mute with a single click using the Logi Options+ App
- Guided breathing: A haptics-guided breathing exercise on Logi Options+ App helps you gain focus and build confidence before your presentation(1)
- Two ways to connect: Easy pairing with Bluetooth® or the secure, high-performance Logi Bolt USB-C receiver for reliable connections and plug-and-play presentations
- Quick charge: Get 3 months of use in one full charge and up to 3 hours from a 1-minute charge. Battery life may vary based on user and computing conditions
- Cross-platform compatibility: For macOS and Windows, use this advanced clicker across PowerPoint, Google Slides, Keynote, Zoom, and Teams
