

## HDMI / DVI-D Bi-Directional Cable - 2 Meter - (M/M)

SKU: 900941

The HDMI / DVI-D Bi-Directional Cable (M/M) enables you to connect a DVI-D device to a HDMI device. You can connect a DVI-D graphics card to a HDMI-enabled display, or you can connect a HDMI device to a DVI-D monitor. It's quick solution to your connectivity needs without the need for additional adapters or dongles.

- HDMI to DVI-D or DVI-D to HDMI 2 Meter cable; works both directions
- Supports Resolutions up to 1920 x 1080 (FHD)
- HDMI Male and DVI-D Male connections
- 2 Meter cable eliminates the need for additional cables or adapters
- Works with most digital signal devices

## HDMI / DVI-D Bi-Directional Cable - 2 Meter - (M/M)

### Key Features:

- Supports resolutions up to 1920 x 1080 @ 60Hz (FHD)
- Connect your HDMI device to a SL DVI-D display, TV or projector (Bi-Directional supports HDMI to DVI-D or DVI-D to HDMI)
- Supports AMD Eyefinity Multi-Display
- No O/S driver required
- Plug 'n Play with no power input requirement

## Technical Specifications

### Part #

900941

### Host Connection

HDMI

### Display Connection

SL DVI-D

### Maximum Resolution Supported

Resolutions up to 1920 x 1080 @ 60Hz (FHD)

### Ports

HDMI (M)  
SL DVI-D (M)

## Cable Length

2m

## Warranty

### Warranty:

1-Year Limited

## FAQ

### What are Active Adapters?

These adapters have a chip that helps convert video for the GPU. Your GPU will be able to do this for two monitors but an active adapter is needed for more. Active adapters can only be adapter off of a DP or mDP on a graphics card or docking station. The reason for this is a feature that DP has that makes it natively active. Should you be connecting a DP monitor to a DP or mDP port on a card active adapters are unnecessary.

### What are Passive Adapters?

Non active adapters are called passive adapters. There is no easy way to tell the difference between an active and passive adapter. Most often they look exactly alike. Most manufacturers put the word active somewhere on their active adapters, like VisionTek. Though this is not always the case. Rule of thumb is, if it does not say active on the adapter assume it is passive.

## What are the different types of DVI?

**DVI-D (Single Link)**

For California Residents Only:

**WARNING: Cancer and Reproductive harm. For more information, go to [www.p65warnings.ca.gov](http://www.p65warnings.ca.gov)**

\* Please, Note that Proposition 65 may be best defined as a “Right To Know” law in California and Prop 65 warning labels are not an indication that a product is violating safety standards or regulations. The Prop 65 warning label does not mean our products inevitably cause cancer or reproductive harm. We do not consider our products harmful when used as intended. However, it is a necessary precaution to provide the warning because of this California law.
