

Data Sheet PRIMERGY TX1330 M6 Tower Server

Empowering SMEs with the ultimate expandable server solution

PRIMERGY portfolio offers a fantastic blend of systems, solutions and expertise to guarantee maximum productivity, efficiency and flexibility, delivering confidence and reliability. PRIMERGY server systems deliver workload-optimized x86 industry standard servers for any workload and business demand. Since there is no single server solution to meet all these needs, Fujitsu offers a broad server portfolio consisting of expandable tower servers for remote and branch offices, versatile rack-mount servers and densityoptimized multi-node servers. Whatever the size of your business - large enterprise with multiple sites, or a small or medium-sized company with limited space and budget – with the right choice of server, your IT can become the business enabler you have always wanted it to be.

PRIMERGY TX1330 M6

The PRIMERGY TX1330 M6 is a powerhouse server, equipped with Intel® Xeon® E-2400 processors and up to 128GB DDR5 memory. Offering unmatched versatility, it supports up to 24x 2.5-inch hot-plug storage devices, advanced RAID controllers, and redundant power supplies. Ideal for SMEs, its high performance and reliability ensure seamless operation across various business applications, from file/print and web hosting to ERP/CRM and email. With advanced management features like iRMC S6 and the Fujitsu Infrastructure Management Suite, it's the perfect solution for SMEs seeking efficiency, scalability, and ease of management in their IT infrastructure.

Features & Benefits

Main Features

Powerful Processing

■ Equipped with Intel® Xeon® E-2400 processors, the TX1330 M6 offers robust computing power for handling demanding workloads with ease. Whether running complex applications, processing large datasets, or supporting virtualization environments, the server's powerful processors ensure optimal performance and efficiency, enabling users to accomplish tasks quickly and effectively.

Expandable Memory

■ With support for up to 128GB DDR5 memory, the TX1330 M6 provides ample memory capacity to handle multitasking and data-intensive applications effectively. The high-speed DDR5 memory enhances system responsiveness, enabling smooth operation even under heavy workloads. Whether managing databases, running virtual machines, or processing high-resolution media files, users can rely on the TX1330 M6 to deliver exceptional performance and reliability.

Versatile Storage Options

■ The TX1330 M6 offers versatile storage configurations to accommodate varying storage needs. With support for up to 24 2.5-inch hot-plug storage devices, users can store and access large amounts of data with ease. Whether deploying a file server, hosting databases, or implementing data backup solutions, the TX1330 M6 provides the flexibility to adapt to changing storage requirements, ensuring scalability and efficiency for diverse business applications.

High Availability

Featuring redundant power supplies and fans, the TX1330 M6 ensures high availability and reliability, minimizing the risk of downtime and protecting critical business operations. The redundant components provide failover protection, ensuring uninterrupted operation even in the event of hardware failures. With the TX1330 M6, businesses can maintain continuity and reliability, ensuring smooth operation and peace of mind for mission-critical applications.

Benefits

- By harnessing the powerful processing capabilities of the TX1330 M6, businesses can tackle complex tasks with ease, such as data analysis, virtualization, and database management. This results in faster decision-making, improved efficiency, and enhanced competitiveness in the market. Moreover, employees experience smoother operation and reduced wait times, leading to increased productivity and job satisfaction.
- With the TX1330 M6's support for up to 128GB DDR5 memory, businesses can run memory-intensive applications seamlessly, ensuring optimal performance and responsiveness. Employees can multitask efficiently without experiencing slowdowns, leading to faster completion of tasks and improved workflow efficiency. Additionally, the expandable memory capacity future-proofs the server, allowing businesses to accommodate growing workloads and data requirements with ease.
- The TX1330 M6's versatile storage configurations provide businesses with the flexibility to store and access large volumes of data efficiently. Whether it's hosting critical business applications, storing multimedia content, or managing backups, the server's extensive storage options ensure data accessibility and reliability. This enables businesses to maintain continuity of operations, comply with data retention policies, and support evolving storage needs without compromising performance or scalability.
- With redundant power supplies and fans, the TX1330 M6 ensures high availability and reliability, minimizing the risk of unplanned downtime and associated costs. Businesses can rely on continuous access to critical applications and data, maintaining productivity and customer satisfaction. The server's robust design provides peace of mind, allowing businesses to focus on their core activities without worrying about hardware failures or service disruptions, ultimately enhancing business continuity and resilience.

Technical details

PRIMERGY TX1330 M6			
Base unit	PRIMERGY TX1330 M6		PRIMERGY TX1330 M6
Housing types	Rack	Tower	Tower
Power supply	Hot-plug	Hot-plug	Standard
Product Type	Mono Socket Rack Server	Mono Socket Tower Server	Mono Socket Tower Server
Mainboard			
Mainboard type	D4132		
Chipset	Intel® C266		
Processor quantity and type	1 x Intel® Xeon® E-2400 processor family / Intel® Pentium® processor		
Processor	Intel® Xeon® processor E-2488 (8	C/16T, 3.20 GHz, up to 5.2 GHz, 4,800MH	z)
	Intel® Xeon® processor E-2486 (6C/12T, 3.50 GHz, up to 5.2 GHz, 4,800MHz)		
	Intel® Xeon® processor E-2478 (8C/16T, 2.80 GHz, up to 4.5 GHz, 4,800MHz)		
	Intel® Xeon® processor E-2468 (8C/16T, 2.60 GHz, up to 4.4 GHz, 4,800MHz)		
	Intel® Xeon® processor E-2456 (6	C/12T, 3.30 GHz, up to 4.6 GHz, 4,800MH	z)
	Intel® Xeon® processor E-2436 (6	C/12T, 2.90 GHz, up to 4.4 GHz, 4,800MH	z)
	Intel® Xeon® processor E-2434 (4	C/8T, 3.40 GHz, up to 4.6 GHz, 4,800MHz	
	Intel® Xeon® processor E-2414 (4	C/4T, 2.60 GHz, up to 4.3 GHz, 4,800MHz	
	Intel® Pentium® Gold G7400 (2C/4T, 3.70 GHz, 4,800 MHz)		
Memory slots	4		
Memory slot type	UDIMM (DDR5)		
Memory capacity (min max.)	16 GB - 128 GB		
Memory protection	ECC

Rack infrastructure	Rack Mount Kit			
	Rack Mount Kit			
	Cable Arm 2U for PRIMECENTER- and 3rd-party racks			
Notes				
Compatibility	If and to the extent a list of components or certain compatibilities are specified in the product data sheet, these component lists and compatibility specifications are exhaustive. Using deviating or other system components and applications together with the product may but does not necessarily have to lead to compatibility problems. A final statement and/or commitment on the compatibility of such deviating or other system components and applications can only be provided after a corresponding verification through a dedicated compatibility testing.			
Continuity management	The product may in connection with and depending on the specific configuration include elements to support time- and performance-critical applications, however high availability (e.g., 99.9999%) and failsafe performance is not a standalone product feature. If and to the extent the product is to be used in such business-critical environments, it is within the sole responsibility of the user to set up the specific additional technical features (e.g., Storage Cluster), redundancies, and operational conditions as required to ensure such high availability or failsafe performance.			
Security	The properties of the product provide a baseline for product security and therefore end-customer IT security. However, these properties are not sufficient on their own to protect the product from all existing threats, such as intrusion attempts, data exfiltration and other forms of cyberattacks. To customize security settings, please use the configuration options as available for the respective product. During operation, the IT security of this product is within the responsibility of the respective administrator/end-user of the product. Please note, that Fujitsu as a manufacturer does not make any policy prescriptions or advocacy statements regarding IT security best practices and/or general product operation.			
Warranty				
Manufacturer warranty period	1 year			
Warranty type	Onsite warranty			
Warranty Terms & Conditions Product Support - the perfect extension	http://support.ts.fujitsu.com/warranty/Index.asp?LNG=COM			
Recommended Service	24x7 Onsite Service with 4h Onsite Response Time			
Service Lifecycle	at least 5 years after shipment, for details see https://support.ts.fujitsu.com/

More information

Fujitsu products, solutions & services

In addition to PRIMERGY TX1330 M6, Fujitsu provides a range of platform solutions. They combine reliable Fujitsu products with the best in services, know-how and worldwide partnerships.

Fujitsu Portfolio

Built on industry standards, Fujitsu offers a full portfolio of IT hardware and software products, services, solutions and cloud offering, ranging from clients to datacenter solutions and includes the broad stack of Business Solutions, as well as the full stack of Cloud offerings. This allows customers to select from alternative sourcing and delivery models to increase their business agility and to improve their IT operation's reliability.
