

SmartPro 1950VA 1950W 120V Line-Interactive Sine Wave UPS - 7 Outlets, Extended Run, Network Card Option, LCD, USB, DB9, 2U Rack/Tower, TAA

MODEL NUMBER: SMART2200RXLTAA

Provides complete battery backup and pure sine wave power output for servers, switches and other highend distributed IT equipment.

Features

1.95kVA/1.95kW/120V Battery Backup for Distributed IT, Telecom or Enterprise Deployments This line-interactive UPS system provides reliable battery backup and AC power protection against blackouts, brownouts, surges and line noise that can damage your valuable IT equipment. The SMART2200RXLTAA is ideal for large and small network devices, high-end workstations, storage and security equipment in labs, server rooms and data centers.

Reliable, Expandable Battery Backup Keeps You Operational Through Power Outages

The field-replaceable, hot-swappable VRLA battery modules allow you to work through short power failures and give you enough time to safely save files and shut down your system in case of a prolonged blackout. Switchover from line to battery power happens within milliseconds to maintain continuous operation of connected equipment without interruption or rebooting. Extra runtime is available by connecting up to four optional extended battery modules (BP72VRXLTAA, sold separately). The SMART2200RXLTAA restarts automatically once power is restored, regardless of battery charge level, saving you a costly site visit.

Automatic Voltage Regulation (AVR) Corrects Low- and High-Voltage Conditions

Built-in AVR corrects abnormal voltage conditions without using the battery. The SMART2200RXLTAA maintains regulated 120V nominal output during brownouts and overvoltages from 80V to 151V while keeping the battery fully charged and ready to take over in case of power failure.

Pure Sine Wave Output and Unity Power Factor

Pure sine wave output power ensures maximum stability while unity power factor ensures the most watts possible at each power rating, providing maximum compatibility with sensitive equipment.

Optional LXE Network Management Card Allows Remote Control and Access 24/7

The WEBCARDLXE (sold separately) enables access to advanced features like switchable load banks, automatic email messaging on power events, and full remote control of the UPS. The IP-based Auto Probe feature ensures network uptime by communicating with other network devices and automatically rebooting IT equipment when a loss of connectivity is detected. *Note:* The SMART2200RXLTAA is not compatible with WEBCARDLX.

Highlights

- Compliant with the Federal Trade Agreements Act (TAA) for GSA Schedule purchases
- Pure sine wave output ensures maximum stability and compatibility with equipment
- Automatic voltage regulation corrects abnormal voltage conditions without using the battery
- Add external battery modules (sold separately) to extend UPS runtime during power outages
- WEBCARDLXE (sold separately) allows full remote control of UPS and access to advanced features

Package Includes

- 1950VA 1950W 120V Line-Interactive UPS
- USB cable
- DB9 cable
- Rack-mounting hardware
- Tower support stands
- Safety instructions
- Quick Start Guide

Managed NEMA Outlets Protect Your Connected Components

One L5-20R and six 5-20R outlets provide connected equipment with pure sine wave AC output and allow you to monitor power consumption down to the outlet group level. Power provided by these outlets is filtered to protect connected equipment against damaging surges and line noise. Four 5-20R outlets are grouped into two programmable load banks that let you shed non-critical loads to extend runtime for critical loads. Front and rear cooling fans help protect equipment from overheating.

Automatic Voltage Regulation (AVR) Corrects Low- and High-Voltage Conditions

AVR protects your equipment from incremental hardware damage, data loss and performance problems caused by brownouts. The SMART2200RXLTAA maintains regulated 120V nominal output during brownouts and overvoltages from 80V to 151V while keeping the battery fully charged and ready to take over in case of power failure.

Premium Protection from EMI/RFI Line Noise Helps Your Equipment Perform Better

This UPS system filters out disruptive electromagnetic and radio frequency interference that can inflict hardware damage or data loss. This EMI/RFI filtering also helps your connected components perform better and last longer.

ENERGY STAR-Certified to Help You Save Money and Protect the Environment

By meeting strict U.S. Department of Energy and U.S. Environmental Protection Agency requirements, this ENERGY STAR 2.0 UPS system provides high operational efficiency to signal a reduction in BTU emissions, save on utility and cooling costs and help protect the environment.

Intuitive Front-Panel Interface for Convenient UPS Operation and Monitoring

The two-line front-panel LCD monitoring screen features 10 selectable screens that allow quick access to a wide range of detailed UPS and site power information. LEDs show UPS status: a green light means utility power is on, an orange light means the UPS is in battery mode and a red light indicates an active alarm or fault. The control panel rotates to accommodate both rack-mount and tower configurations.

Advanced Communications Ports Allow for Automatic Saves and Shutdowns

RS-232 and USB ports connect to a device for a variety of communication options (cables are included). A dry-contact relay port can be programmed through the LCD to provide reliable communications to automation and industrial components. The RPO/ROO port permits emergency shutdown or remote restart of all connected equipment.

Versatile Installation Options

You can mount the SMART2200RXLTAA in just 2U of space in an EIA-standard 19-inch rack using the included hardware. You can also adapt it for tower installation using the included support stands. The 10-foot power cord with NEMA 5-20P plug connects to a compatible AC outlet.

TAA-Compliant for GSA Schedule Purchases

The SMART2200RXLTAA is compliant with the Federal Trade Agreements Act (TAA), which makes it eligible for GSA (General Services Administration) Schedule and other federal procurement contracts.

Specifications

OVERVIEW		
UPC Code	786689816056	
UPS Type	Line-Interactive	
INPUT		
Input Phase	Single-Phase	
Rated input current (Maximum Load)	16.0A	
Nominal Input Voltage(s) Supported	120V AC	

Naminal Innut Vallage 5	00\/ 454\/ (newpolemode), adjustable to 70\/ 450\/ (newpolemode)
Nominal Input Voltage Description	80V-151V (normal mode); adjustable to 70V-153V (extended mode)
UPS Input Connection Type	5-20P
UPS Input Cord Length (ft.)	10
UPS Input Cord Length (m)	3.1
Recommended Electrical Service	20A 120V
Maximum Input Amps	16
ОИТРИТ	
Output Capacity (VA)	1950
Output Capacity (kVA)	1.95
Output Capacity (Watts)	1950
Output Capacity (kW)	1.95
Power Factor	1
Nominal Voltage Details	120v nominal output in battery mode
Frequency Compatibility	50 / 60 Hz
Output Voltage Regulation (Line Mode)	120V (-13%, +15%)
Output Voltage Regulation (Battery Mode)	-10%, +6%
Load Management Receptacles	Two switched two outlet load banks.
Output AC Waveform (AC Mode)	Pure Sine wave
Output AC Waveform (Battery Mode)	Pure Sine wave
Nominal Output Voltage(s) Supported	100V; 110V; 120V; 125V
Output Receptacles	(6) 5-20R; (1) L5-20R
Individually Controllable Load Banks	Yes
BATTERY	
Battery Type	Valve Regulated Lead Acid (VRLA)
Runtime Full Load (min.)	4 min. (1950W)
Runtime Half Load (min.)	12 min. (975W)
Expandable Runtime	Yes
Expandable Battery Runtime	Extended runtime supported via optional 72V DC BP72VRXLTAA external battery packs.
Expandable Runtime Description	BP72VRXLTAA (Limit 4)
DC System Voltage (VDC)	72
Battery Recharge Rate (Included Batteries)	Less than 4.5 hours from 10% to 90% (typical, full load discharge)

Battery Access	Front panel battery access door
Internal UPS Replacement Battery Cartridge	744-A4852
Battery Replacement Description	Hot-swappable, user replaceable batteries
VOLTAGE REGULATION	
Voltage Regulation Description	Automatic voltage regulation (AVR) maintains line power operation with an input voltage range of 83 to 145
Overvoltage Correction	Reduces incoming voltage between 132-151V by 13%
Undervoltage Correction	Boost incoming voltages between 88-102V by 15%
USER INTERFACE, ALERTS & CON	TROLS
Front Panel LCD Display	Front panel rotatable LCD information and configuration screen offers detailed UPS and site power status and operating data, plus configuration of voltage, operating mode, alarm function and a variety of additional options (see manual for detailed LCD configuration and monitoring options)
Switches	5 pushbutton switches control OFF / ON power status, ENTER, UP, and DOWN selection and ESC control functions
Alarm Cancel Operation	Press the ESC (Escape) button on the front panel display to silence the alarm. Check the alarm condition and perform the applicable action to resolve the condition. If the alarm status changes, the alarm beeps again, overriding the previous alarm silencing
Audible Alarm	Audible alarm indicates UPS startup, power-failure, low-battery, overload, UPS fault and remote shutdown conditions
LED Indicators	UPS status (Solid Green); Battery Mode (Solid Orange) / Battery Low Warning (Flashing Orange); Fault/Alarm (Solid Red)
SURGE / NOISE SUPPRESSION	
EMI / RFI AC Noise Suppression	Yes
AC Suppression Joule Rating	380
AC Suppression Response Time	Instantaneous
PHYSICAL	
Primary Form Factor	Rackmount; Tower
Rack Height	2U
Cooling Method	Fan
Installation Form Factors Supported with Included Accessories	4 post 19 inch rackmount; Tower
Installation Form Factors Supported with Optional Accessories	4 post rackmount short-depth (4POSTRAILKITWM)
