Cooling Solutions

PORTABLE COMPUTER ROOM AIR CONDITIONING UNIT

Model: SRXCOOL12K

Plug-and-Play Cooling Wherever You Need It

Tripp Lite's SRXCOOL12K is a convenient cooling solution that almost anyone can install almost anywhere. Compact, portable and completely self-contained, SRXCOOL12K is perfect for spot cooling and area cooling in network closets, server rooms, data centers and other locations with heat-sensitive equipment. Installation is quick, simple and does not require a disruptive construction project or the costly services of an electrician, plumber or HVAC specialist. SRXCOOL12K is also the only cooling solution in its class to support remote management.

Compact Cooling Power

- Packs 3,5 kW (12 000 BTU) into a 300 x 505 mm footprint
- Prevents equipment failures and malfunctions caused by temperature fluctuations and overheating
- Directs area cooling through its adjustable louvers
- Focuses on hot spots through its flexible output duct

Simple Installation

- Rolls into place on built-in casters
- Plugs into a standard outlet (CEE 7/7 plug)
- Does not require an external condenser, refrigerant piping or hiring outside contractors
- Does not require a floor drain or water collection tank (the built-in evaporator expels condensate)
- Includes all parts required for setup

Convenient Operation

- Supports unattended startup and shutdown
- Automatically restarts after power failures
- Allows you to monitor temperatures, receive alerts, review logs and control settings from any location (requires SRCOOLNET accessory)

SRXCOOL12K Feature Focus

LED Control Panel

SRXCOOL12K has an easy-to-read control panel with diagnostic LEDs for local management.

Exhaust Kit

The included exhaust kit allows SRXCOOL12K to remove hot air from the room through a dropped ceiling, window or return duct.

Adjustable Louvers

SRXCOOL12K has adjustable louvers for general area cooling. It provides a quick fix for cooling rooms that were not designed for IT equipment, such as converted network closets in older buildings. SRXCOOL12K also dehumidifies and filters the air.

Flexible Output Duct

SRXCOOL12K's flexible output duct focuses cool air where it's needed most. When you connect the duct near the top of a rack enclosure, cool air naturally sinks and provides even temperature distribution.

Remote Management

Using SRCOOLNET and Tripp Lite's free PowerAlert software, you can manage hundreds of SRXCOOL12K units through a single interface.

SRCOOLNET

The optional SRCOOLNET remote management accessory allows you to monitor temperatures, receive alerts, access logs, change settings and automate operation over the network from any location.

SPECIFICATIONS

Model:	SRXCOOL12K
Cooling Capacity:	3,5 kW (12 000 BTU/h)
Refrigerant Type:	R410A (Complies with environmental standards worldwide.)
Nominal AC Input:	230 V / 50 Hz
Plug Type:	Schuko (CEE 7/7)

Input Cord Length:	1,83 m (6 ft.)
Dimensions:	778 x 300 x 505 mm (30,63 x 11,81 x 19,88 in.)
Unit Weight:	33,5 kg (73,9 lb)
Compliance:	Tested to EN60335-2-40, EN60335-1, EN62233, RoHS

Accessories

SRCOOLNET	Network management module adds Ethernet interface to SRXCOOL12K for remote management via SNMP, Web or telnet. Supports centralized management through Tripp Lite's free PowerAlert software.
ENVIROSENSE	Environmental sensor connects to SRCOOLNET with a 3,66 m (12 ft.) cord to provide remote temperature and humidity monitoring. Can monitor and control alarms, security and telecom devices through contact closure communications. Can also monitor up to three additional sensors.
