# USB SuperBooster Wall Plate

**Decora style wall plate with integrated transmitter/receiver
sends a USB signal up to 150ft over Cat5**

29342

Conquer USB length limitations and put your USB devices where you need them with the patent pending USB SuperBooster Wall Plate from Cables To Go. This wall plate solution extends the distance of a USB device to a host computer up to 150ft so you can place your USB projector, camera, printer, or any other USB device exactly where you want it! The USB SuperBooster Wall Plate is powerful yet simple, with no drivers to install or special software required. It is also compatible with any computer that supports USB.

This plug-and-play device consists of a transmitter unit and receiver unit incorporated into two, single gang Decora compatible wall plates. The transmitter/receiver pair is connected via standard Cat5, Cat5E, or Cat6 UTP cable allowing for easy in-wall installation. This makes for a clean, finished installation important for home owners, classrooms, offices and anywhere you don't want visible cables lying around. Use pre-terminated network cables or pull unterminated cable and use the included tool-less IDC RJ45 connectors. The USB SuperBooster Wall Plate is self-powered so no external power source is required.

Application:

- *Extends the distance of a USB device to a host computer up to 150ft providing the flexibility to place a USB projector, camera, printer, or any other USB device where ever desired.*
- *Ideal for use with USB projectors, cameras, printers, web cams, interactive whiteboard, and any other USB device.*
