

Kanguru Remote Management Console™ (KRMC) Premium Package

Kanguru Remote Management Console™ (KRMC)™ is a powerful security application designed for remotely managing Kanguru Defender® hardware encrypted data storage devices. With the KRMC-Hosted **Advanced Package**, an Administrator or Data Security Officer can monitor a variety of security aspects for Kanguru Defender encrypted devices belonging to their organization, creating a highly-secure data environment.

The Premium Package is Your Full-Service Solution With All Available Features and Benefits:

- **All Standard Package Features:**
 - Remotely Enable & Disable Lost or Stolen Drives
 - Strong Password Management
 - Access Control Restrictions
 - SSPM (Self Service Password Management)
- **All Advanced Package Features:**
 - Secondary Administrative Accounts
 - Auditor Accounts
 - Device Groups
 - Single Sign-On (Via SAML)
 - Connection to a SIEM Server for Event Monitoring
- **Premium Package Features:**
 - Endpoint Protection (Antivirus/Antimalware) Powered by Bitdefender®
 - Active Directory (AD) Disable
 - Monitor File/Folder Activity Down to Remote Device Level

Additional Features of the Premium Package:

AD Disable (Active Directory)

AD Disable is a synchronizing service between KRMC and the Active Directory. Once configured, any drive connected with a user will be automatically and concurrently disabled if the administrator chooses to disable the user account.

New to KRMC? See this introduction to Kanguru's remote management platform:

Monitor Defender File/Folder Activity

Defender's File Monitoring is a constant file auditing feature on the Defender drives, excluding the HDDs and SSDs. When configured, it will monitor file changes on a given Defender device and send the details up to KRMC down to the remote device level. Types of file changes reported are creation, deletion, and modification.

Practical Use Case

A KRMC-Hosted PREMIUM Account is a top-level remote management package for organizations such as Department of Defense, Government, Healthcare, Financial/Banking, Research and other critical security environments that must meet specific regulations. This all-inclusive package helps maintain strict security policies for all remote Defender devices.

Available in 1, 2, and 3-Year Packages.
