

3D Protection for iPad Air 2, Light Gray/Red Edge

THZ52201US

Overview

Let's face it – you're not climbing Everest with your iPad Air 2. You need to protect your tablet but your everyday bumps and drops are tame compared to the hazards you might find on Everest. With the Targus 3D Protection iPad Air 2 case, you can keep your device safe without weighing it down in a bulky case. It's a rugged case without the rugged price tag.

Superior Protection - With a ribbed, shock-absorbing tray and a reinforced cover, the Targus 3D Protection case is engineered for high-performance protection. 3D Protection cases pass Mil. Spec. for 4 ft. drops, so you can entrust your iPad Air 2 to this protective case.

Ruggedized Outer Edge - A rugged case is all about details. The 3D Protection case has bolstered edges to protect your iPad against accidental knocks with the furniture. The case's elastic band keeps the case shut when you're ready to go. Details keep your iPad secure.

Artistic Structural Design - This is protection you can see. The structural beam design of the 3D Protection's cover repels dirt and water, giving you a firm surface to grip. It's a design you can depend on.

Adjustable Angles for Comfortable Viewing and Typing - Your iPad is versatile – so is this case. The 3D Protection iPad Air 2 tablet stand offers adjustable viewing angles and the custom tray lets you access all of your device's buttons and ports. Protective to the core without the rugged price – that's the 3D Protection.
