

Finally, a durable and ergonomically designed iPad for use in healthcare, education, and beyond.

Beam Makes The Case

The Beam iPad cases are built on years of protecting iPhones in hospital settings. Beam's impact-resistant polycarbonate shell is ready to protect mobile devices from drops in healthcare, education, and field service. Our disinfectant-ready plastics allow for high-grade cleaners—we go way beyond anti-microbial. And our cases are designed for IP54 to mitigate dust and liquid intrusion. Our cases are mount compatible with VESA adapters for flexible usage. And with unimpeded access to the iPad ports, you can easily connect multiple units for charging and provisioning in multi-bay sync cabinets. Beam iPad cases offer proven protection in hospital hallways, classrooms, and remote job sites.

4ft drop-rated, splash resistant case designed for the iPad 10.2 & iPad Air

Access to the iPad buttons, ports and cameras, allows for easy operation, charging and syncing of the iPad

Secured with 4 (T7) Torx screws to restrict access to only those who need it.

Cleanable with concentrated disinfectants to protect your users

Removable rear-facing adapters with an alternate coverplate, to make it easy to connect to any VESA compatible mount, or proprietary solutions like Compulocks stands and mounts.

Ergonomically designed with your users in mind.

Beam for iPad 10.2 | SKU: GM-220 | MSRP: \$99.99

Beam for iPad Air | SKU: GM-240 | MSRP: \$99.99
