AXIS T92E Housing Series protects the Axis network camera in adverse indoor and outdoor conditions.

AXIS T92E Housing Series is available in two models: AXIS T92E05 Protective Housing and AXIS T92E20 Outdoor Housing.

AXIS T92E20 features an internal shell for storing heat in cold environments. Fan ventilation for hot environments transfers excess to the outer chassis for efficient cooling.

AXIS T92E05/T92E20 feature IP66 and NEMA 4X protection rating against the ingress of dust, wind-blown dust, rain, high pressure water jets from any direction, hose-directed water, and damage from external ice formation. In addition, they are IK10-rated for protection against impact and vandal acts.
Easy and quick installation using either Power over Ethernet or High Power over Ethernet connection. The network cable is further protected in the wall mount to enhance the vandal protection.

The Arctic Temperature Control functionality ensures that the cameras can start up even at -40 °C (-40 °F) following a power failure.
Various brackets and accessories are available for AXIS T92E Housing Series, such as ceiling and wall brackets, column mounts and adapters. AXIS T92E Series comes with a wall bracket with an internal cable channel and ball joint.
