### Manufacturer

Swissgear

### Product Name

2910 USB Gaming Laptop Backpack

### Product Color

Black

### Product Description

It's game on, wherever you are with the Swissgear 2910 USB Gaming Laptop Backpack. Built for action, on screen and off, this specialized backpack is made to safely and securely transport all of your gaming components and accessories. A deep compartment on the back of the backpack unzips to reveal padded protection for gaming laptops up to 17" or standard, full-sized gaming consoles. In the roomy main compartment, a keyboard pocket is designed to hold standard sized keyboards, a zippered mesh bag is perfect for stashing adapters and cables, and a clever organizer panel gives you more accessory pockets, a power bank pocket, and a neoprene pocket for a mouse.

On the bag's exterior, three gusseted front access pockets are fleece-lined and molded to hold your accessories perfectly. A top pocket with interior securing strap holds your gaming headphones, and below that, two accessory pockets fit standard controllers and handheld gaming consoles. Store rolled up mouse pads or water bottles in the two exterior mesh pockets with cinch adjusters to secure items in place, and use the zippered accessory pockets on the side of the backpack to keep smaller essentials organized. A side carabiner lets you attach extra gear for added convenience. Wherever you go, you can keep devices charged, hassle-free, using the handy external USB outlet (battery pack NOT INCLUDED). Ergonomically contoured, padded shoulder straps feature an integrated accessory pocket with key ring, breathable mesh fabric, shock absorbers, thumb ring pulls, and an adjustable sternum strap, while the padded, airflow back panel with mesh fabric provides superior back ventilation and support. For resilience, this backpack is made of 1680D Ballistic Fabric with wire reinforcement in the top padded carry handle.

## Product Features

- Deep, padded laptop/console compartment is specially designed for built-in protection of gaming laptops up to 17" or standard, full-sized gaming consoles
