DRD *True3D Sound*

Extend your iPod and Mobile music

Looking to expand the capabilities of your music mobile phone? Genius introduces its latest iPod speaker; *iTempo^{TM} 800BT,* it's easy to listen to music from a MP3 cellular phone using a Bluetooth A2DP connection. It's also the ideal choice to turn your iPod into a mini-stereo system. The *iTempo^{TM} 800BT* has superior sound quality and wide frequency with built-in DRD$^{®}$ sound effect technology. The DRD$^{®}$ is true 3D technology that controls the bass equalizer and reproduces crisp sound without distorting the middle tone. Integrating the custom-designed 70mm drivers and sound effect solution, it delivers surprisingly powerful, room-filling sound and creates quality bass without a subwoofer.

The *iTempo^{TM} 800BT* has an embedded iPod dock station, two different cradles for iPod nano and iPod mini, and one iPod stand with two spindles for the other different types of iPods (except iPod shuffle). It also includes an S-Video connector to connect to your TV or monitor if you need to transfer a video/photo from your iPod. Use the USB cable to download music thru the PC directly while charging the iPod. The convenient secondary AUX input jack is for connection with other audio devices, such as laptops, CD player and other MP3 players with a stereo cable included. A wireless remote lets you control the iPod and speaker conveniently.

Let *iTempo^{TM} 800BT* provide true digital audio sound to entertain you at home no matter if you have an iPod, MP3 cellular phone or other stereo devices. Just ask your salesperson where you can get one of these new audio systems from Genius.

Made for **iPod**

Features:

- Rich, full sound from a one piece design with 20 watts RMS output power
- DRD$^{®}$ 3D surround IC enhances true stereo clear sound performance
