Kodak alaris

Meet FADGI requirements and be ready for the M-19-21 mandate

FADGI-compliant scanners, software, and services from Kodak Alaris

Streamlined, 3-star compliant bundles from Kodak Alaris

As of January 1, 2023, all records submitted to the National Archives and Records Administration (NARA) and Library of Congress for permanent archive must be at least 3-star compliant with the Federal Agencies Digital Guidelines Initiative (FADGI). These government agencies will no longer accept paper records. Only digital records will be accepted, and these digital files must meet FADGI 3-star guidelines for text-based documents.

To simplify FADGI compliance, Kodak Alaris has created the **Kodak** i5250 and **Kodak** i5850 FADGI-compliant Scanner Bundles. These scanners deliver the specific image quality output set forth in the FADGI guidelines, so you can be assured that all digital submissions to NARA, the Library of Congress, or any future agency, will comply with these requirements.

Smarter, better bundles
It's a complete package that takes the complexity out of FADGI compliance.

Kodak i5250 or Kodak i5850 Scanner
- Mid-to-high volume productivity at up to 155 ppm in FADGI-required portrait mode

- Each scanner is individually calibrated and characterized to ensure compliant images and interaction with **Kodak** AQIST (Archival Quality Image Scanning Tool) Software

- Switch between FADGI and non-FADGI modes for greater flexibility and value

Kodak AQIST Software
- Empowers scanning and FADGI-compliant images from these **Kodak** Scanners (and future compliant models)—no other apps or drivers (TWAIN, ISIS, WIA) can create FADGI-compliant images

- Contains the unique Device Configuration File created during the production characterization process

- Creates uncompressed color TIFF images—at 300 or 400 dpi—and places them in a batch output folder

- Purchase also includes a printed Digital Imaging Conformance Evaluation (DICE) target, needed for ongoing calibration

Onsite, enhanced Service and Support
- All bundles include professional installation and extended service to ensure compliant images for the life of the product

- Comprehensive configuration and calibration

- In-person training and extensive documentation provided

- Extra Preventive Maintenance Service included to maintain compliance and quality

- One-year onsite, same business day warranty

Working with your dedicated government sales team at Kodak Alaris is the best path to FADGI compliance

You rely on us for superb customer service and document imaging know-how. Combine this with FADGI-ready bundles from Kodak Alaris and achieve compliance fast.

- Every i5250 and i5850 Scanner undergoes a robust, characterization process—including collection of device output data and custom profile creation using a single DICE level target.

- This process accounts and adjusts for varied scanner conditions that could cause image-quality issues, such as start-of-day scanning, ongoing use, and environmental variances.

- All device output data collected is reviewed using Image Science Associates GOLDENTHREAD Software to assure various device conditions are operating within the FADGI 3-star range.

- After characterization, each unit carries a custom **Kodak** AQIST Software profile and corresponding DICE level target to ensure continued compliance.

- Each unit comes with a Certificate of Compliance, so you know it is FADGI and TAA-compliant out-of-the-box.

- Kodak Alaris received the Buyer's Lab 2022 Scanner Line of the Year Award, proof that scanners like these consistently produce the best image quality, combined with robust workflow automation, and world-class paper handling.

Specification highlights

Features	
Speed	**i5250 FADGI Bundle**: 150 ppm/300 ipm (LTR/landscape @ 300 dpi); 125 ppm/250 ipm (LTR/portrait/FADGI mode @ 300 dpi) **i5850 FADGI Bundle**: 210 ppm/420 ipm (LTR/landscape @ 300 dpi); 155 ppm / 310 ipm (LTR/portrait/FADGI mode @ 300 dpi)
Feeder/Elevator	Automatic 750-sheet elevator design; automatic document feeder with four settings: continuous feed, 100-sheet, 250-sheet, 500-sheet and full 750-sheet batches
Paper	With standard feeder: 45 g/m^2 (12 lb.) bond to 200 g/m^2 (110 lb.) index With ultra-lightweight feeder accessory: 25 g/m^2 (7 lb.) rice paper to 80 g/m^2 (20 lb.) bond
Recommended Daily Volume	No limit with i5000 Series Scanners
Minimum PC Configuration (PC sold separately)	Operating system: WINDOWS 10 Enterprise/Pro Editions only (version 21H1/20H2) CPU: Intel i7 – 10700 2.9 GHZ or Higher Graphics: Nvidia GTX1070 chipset or higher (must support CUDA) RAM: 16 GB or higher Primary Storage: 500 GB SSD or higher *Secondary Storage (recommended): 500 GB SSD or higher
Environmental Factors	ENERGY STAR qualified scanners, 2008 EuP
Software Support	Standard Software – WINDOWS bundled software: TWAIN, ISIS, WIA Drivers. KOFAX certified. Optional Software – **Kodak** Capture Pro Software, **Kodak** Info Input Solution (WINDOWS only)
Warranty	One-year onsite, same business day warranty with 4 Periodic Maintenance Services

ENVIRONMENTALLY APPROVED

EPEAT® Silver: Kodak i5000 Series Scanners have achieved the status of EPEAT® Silver and meet ENERGY STAR® guidelines for energy efficiency and for the reduction of hazardous substances and waste products.

ENERGY STAR® certified scanners are independently certified to save energy without sacrificing features or functionality.

To learn more about our EPEAT status, visit AlarisWorld.com/go/EPEAT

*Kodak Alaris recommends including a secondary SSD to avoid potential performance issues within the WINDOWS System volume
