

SmartFit™ Dual Monitor Arm with Crossbar and Handle

Get a handle on effortless monitor adjustments.

K58272WW

Product Description

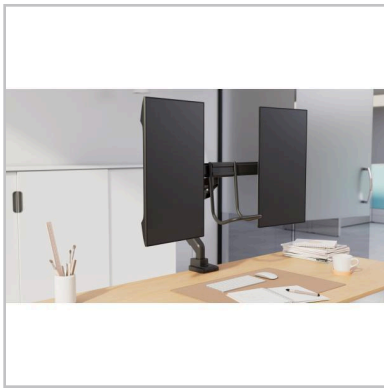

Most monitor arms require significant effort to reposition displays. This presents an ergonomic challenge for professionals using shared workspaces. The SmartFit™ Dual Monitor Arm with Crossbar and Handle allows users to fine-tune ergonomic positioning with less physical exertion. A hand grip offers effortless monitor adjustments, allowing users to smoothly raise or lower their monitors using the lightest of touches. The counterbalancing force of a gas spring makes even the heaviest dual-monitor configurations feel weightless, so anyone can quickly adapt the workstation to fit their unique needs and preferences. Whether users need to raise their displays to reduce neck strain, tilt them for better visibility, or reorient the layout for a collaborative session, an easy-grip handle puts the power of ergonomic customization right at their fingertips.

Features

- SmartFit™ simplifies setting displays at proper eye-level viewing angles for ergonomic comfort.
- Easy-grip handle supports convenient monitor adjustments.
- Supports separate horizontal adjustments for each monitor for more comfortable viewing.
- The gas spring mechanism supports effortless height adjustments.
- Securely accommodates up to two 32" monitors weighing up to 19.8lbs (9kg) each.
- C-clamp or grommet mount base supports a hassle-free installation.
- 2-Year limited warranty.

Specifications
