

SAMSUNG

A woman is seen from the back, sitting at a desk and using a silver Samsung Galaxy Book4 Pro laptop. The laptop screen displays a gallery of images. To her right, a smartphone is lying on a dark blue surface, also displaying a gallery of images. The background shows a modern office or home workspace with a white desk and a patterned rug.

**Heavyweight
performance in a
lightweight package**

The Galaxy Book4 Pro keeps you at your peak efficiency for longer.

Maximise your productivity with the laptop built for professionals. The Galaxy Book4 Pro offers incredibly strong performance for all your day-to-day tasks, while still being easily portable.

The Galaxy Book4 Pro is luxuriously thin and light, ideal for quickly slipping in and out of your bag. But it doesn't sacrifice usability to save space, boasting a 16" or 14" anti-reflective touchscreen display that ensures clarity throughout the workday.

SAMSUNG

Layers of data-saving security

You can work confidently in our high-speed, connected world thanks to the layers of solid security built into your Galaxy Book4 Pro.

Microsoft Secured Core protects your operating system and apps. Intel® chip security protects the integrity of your hardware. Military-grade Samsung Knox adds an extra layer of reliable security. Say goodbye to malicious threats and hello to a fortress of security. But such security doesn't come at the cost of mobility—in fact, it enhances it. You can access all the tools you need to complete your work, from anywhere, safe in the knowledge that cybercriminals will have a very hard time getting in the way.

Assistance at the ready

You can achieve more in your workday by calling on Microsoft's AI assistant—Copilot¹. You can call up Copilot at the click of a button to achieve a wide variety of Microsoft 365 tasks. Whether you're drafting a vital email, trying to find patterns in a spreadsheet, or looking for answers in a long report, Copilot can help. This cloud-based assistant can generate limitless creative options and ideas in seconds, helping you stay ahead of the curve.

Sleek, slim and super powerful

Go anywhere work takes you and know you've got the computing power in your bag to run even the most intense apps. The Galaxy Book4 Pro's Intel® Core™ Ultra 7/5 processor and AI-enabling NPU, drives next generation apps with ease. So, whether you're creating large presentations, running machine learning applications, or even watching your favourite movies on the train home, you'll enjoy a smooth experience. You'll be the envy of your colleagues and clients as well. The Galaxy Book4 Pro is as stunning as it is practical—thin and light, and built to feel totally luxurious.

1. Microsoft Copilot for Microsoft 365 subscription required.

Get up close and personal with your work, thanks to a brilliant touchscreen

Getting down to business no longer means being limited to a keyboard and mouse. The Galaxy Book4 Pro's 14" to 16" Dynamic AMOLED 2X display is a super-responsive touchscreen, so not only does it look amazing, you can drag and drop files, copy and paste and navigate with your fingertips. Now you can pinch to zoom, tap to select and swipe just like you do on your tablet or smartphone.

With the power of the new Intel® Core™ Ultra 7/5 processor, you'll enjoy a razor-sharp image and seamless touchscreen performance. And you'll get that same premium experience anywhere you go – even under bright lights – thanks to the anti-reflective coating.

Pair your devices to make an ecosystem that's much more than the sum of its parts

Smash that important presentation and take care of all your admin as if it were nothing, just by taking advantage of seamless Galaxy connectivity.

By scanning a QR code with your Galaxy phone's camera, you can easily pair it with your Galaxy Book4 Pro and use all your mobile apps on a bigger screen². That means you can work through documents on your phone as if they were saved to your laptop, or use your phone screen as a handy clicker and prompter when presenting³. You'll never feel more productive than when your phone and laptop work together. You can also share files with your team in an instant through Quick Share⁴. If the work is really sensitive, you can also opt for Private Share, which utilises block-chain based file-sharing technology to protect your work in transit. It's never been safer to send data across Galaxy devices.

A laptop that is smarter about its battery usage –so you can stay on the go for longer⁵

Now you can spend the whole workday jumping between meetings and work, without worrying about your battery. The Galaxy Book4 Pro's smart, NPU-enabled AI ensures that your remaining charge is spent as efficiently as possible. You can work through those long days, without having to keep an eye on the battery level. If you do start running low, you can get back in the game fast thanks to the compact 65W USB C charger.
