Incorrect position

TIPS / TROUBLESHOOTING

- The JBuds Talk works with almost any recording software installed on macOS, Windows, or Linux. Review in your software's setting and adjust accordingly.
- No additional drivers/software are needed for the JBuds Talk. Simply plug in and setup in device settings.
- JBuds Talk will not work through most tablets or mobile phones due to their power limitations. The output power source needs to produce 5v or greater to operate.
- JBuds Talk will not work through a power bank/battery pack. It will only work with USB-A input with an operating system.
- If you are connecting through a USB hub or 3rd party adapter, make sure the product has the correct power output support and connection support.
- Using external speakers for playback can cause microphone reverberation and echo. It is recommended to use headphones/earbuds for recording playback if this occurs.
