Fits everywhere

The ACK-3401U is so compact that it easily blends into the smallest working environments. With its width of just under 22 cm, it does not necessarily forego on comfort functions like an numpad. Thanks to the 2 m cable, it can be used flexibly and does not have to be installed in the immediate area of the workstation.
Since there is a cable and no batteries need to be changed, it can be installed in a stationary position.

Super mini keyboard

Super Mini

With 220x110x10 mm, the keyboard is hardly bigger than a bar of chocolate and fits into the smallest working environments. For example it can be used to gain valuable crafting space on a Raspberry Pi® workbench.

Modest

The design is simple, timeless and reduced to a minimum, leaving the stage to other devices. But you can rely on the silent helper, he will never run out of power due to his wired nature.

X-Type-membranetechnology

The X-Type-membrane makes typing much quieter than with conventional keyboards, but despite this, the X-Type-membrane has the following advantage: a pleasantly soft haptic feedback.
