Your personal eyewitness on the road – in Full HD

No more worry behind the wheel

Roads are dangerous; they are often busy and fast-moving, putting you at risk. And it's not only accidents that are on the rise, but also cash-for-crash scams.

The MiVue™ 733 WIFI has your back whilst you're on the road, recording every mile of your journey so you don't have to worry.

High quality, Full HD video recordings

Created to capture every detail, the MiVue 733 WIFI provides Full 1080p HD footage at 30 fps with 130° wide angle viewing and F2.0 aperture. For every second, you will get 30 frames of video, ensuring that all recorded footage is clear and indisputable.

Begin recording when you start your drive: the MiVue 733 WIFI dash cam starts recording the moment you start your car, storing your driving information.

WIFI connectivity – for fast, cable-free transfer

Transfer files using your MiVue app on your smartphone quickly and easily. You will always have a backup of your footage, stored securely on your phone.

Your safety is at the forefront

We understand how important it is to feel safe on the roads. That's why the MiVue 733 WIFI comes with safety features.

The MiVue 733 WIFI comes with Advanced Driver Assistance Systems, including Lane Departure Warning Systems, Forward Collision Warning System and Fatigue Warning. These features all work together to give you peace of mind during your journey.

If the integrated 3-axis G-sensor detects a sudden change of movement, the recording is instantly protected and cannot be overwritten.

GPS built-in – to record location and speed

A GPS location and your speed are logged on every recording; ensuring that you have the important evidence from your drive. The GPS module is stored inside the device, unlike most of the other dash cams currently on the market.

Your personal eyewitness on the road – in Full HD

Feature Highlights

- **2.7" (6.9cm) screen** – intuitive and user friendly
- **Full 1080p HD recording at 30 fps** – with the latest H.264 technology for high quality videos at a smaller file size
- **Integrated WIFI** – easily send your videos to your smartphone for back up, or share your experiences on social media via the MiVue app.*
- **130° wide angle view** – to clearly capture every detail at critical moments with wide dynamic range technology
- **F2.0 aperture lens** – allows more light through the sensor for superior video quality, particularly in low light condition
- **GPS tracking** – automatically records your driving information, including speed, altitude, longitude, latitude and heading
- **Advanced Driver Assistance Systems** – Forward Collision Warning System (FCWS), Lane Departure Warning System (LDWS) & Fatigue Warning (FA)
- **3-Axis G-Sensor** – records direction and force, including impact, turns and acceleration
- **Rotating mount design** – mount is easily rotated to any desired angle for video evidence collection
- **Parking mode** – motion detection activates and records from a parked car with no driver present**
- **MicroSD™ card** – recommend Class 10 microSD™ up to 128 GB

Technical Specifications

Size:	87.8 x 52.2 x 31.9 (mm)
Weight:	100 g
Display size:	2.7 inch (16:9)
Recording resolution:	Full HD 1080p at 30 fps
High quality glass lens:	4G+1 IR
Video format:	.MOV (H.264)

Box contents

- Mio MiVue 733 WIFI
- In-vehicle charger
- In-vehicle mounting bracket
- Quick Start Guide
