The Galaxy Book4 is the heart of an exciting new range, designed for businesses of all sizes. It features all the amazing features and impressive specifications of the range, at a smaller price. It's ideal for outfitting entire teams, getting them into action at a moment's notice. This seriously hard-working all-rounder of a business laptop comes with a 15.6" display for real portability and viewing comfort.

Professional looks, professional power

Big task landed on your lap? Deadline coming up fast? You can get it all done with your Galaxy Book4. With more than enough processing power to handle intense multi-tasking, you can run multiple productivity apps, take calls and get your admin done, all at the same time.

The Intel® Core™ 7/5 processor inside drives next-generation apps with ease. So, whether you're presenting to your hybrid working team or managing your inventory, you can be confident that your laptop can handle it. The Galaxy Book4 is designed to look fantastic while pushing past the limits of laptop power. It's thin enough to slip into a work bag and carry anywhere, it's your key to anywhere productivity.

Let your AI assistant take the wheel, so you can focus on what's really important

Now you can do everything you've dreamed of in your workday, without breaking a sweat. Microsoft's AI assistant, Copilot, is ready to help you get it done. With one tap, you can call up Copilot to complete a wide variety of tasks across the Microsoft 365 suite—whether that's writing a formal email, identifying patterns in big spreadsheets of data, or drafting a presentation in a matter of minutes¹.

A seamlessly connected ecosystem

Finish off that to-do list faster by connecting your Galaxy devices to each other. Just by scanning a QR code with your phone's camera, you can easily pair it with your Galaxy Book4 and use all your mobile apps on a bigger screen². And if you need to transfer a photo, a video, or even just some plain text, you can open up File Explorer³ to drag and drop files across devices as if they were one seamless package². Everything from creative workflows to data analysis can be made smooth, simple and more effective.

Then once you've done your bit for the project, you can share files with your team in an instant with Quick Share⁴. If the work is really sensitive, you can also opt for Private Share, which utilises block-chain based file-sharing technology to protect your work in transit. It's never been safer to send data across Galaxy devices.

Stay supercharged, anywhere

When you're hopping between the commute, the office and long meetings, you need a battery you can rely on. You'll always have enough charge to get it done¹. And if you do start running low, you can plug in the universal charger for super-fast charging. That's a quick way to get back in action.

Double your screens and your output

Maximise your portable screen space and maximise your productivity. Whether you're taking video calls, presenting a PowerPoint, or even just putting on a little entertainment as you work, you can create more workspace instantly by turning your Galaxy tablet or smartphone into a Second screen². And with multi control, you can even use your laptop's keyboard and trackpad to work across your Galaxy Tab and Galaxy smartphone, as if it were one seamless device³. It's a complete home office setup you can take anywhere.

Come through crystal clear on calls

Look even sharper on video calls by turning the finely tuned cameras of your Galaxy smartphone into a dedicated webcam⁴. Just connect your smartphone to your Galaxy Book4 and you're good to go. You can also use classic filters to change your look, ensure you're always centred with auto-framing and blur background distractions automatically. You can also change your perspective with a tap, flipping between front and rear cameras to change your view without losing quality.
