[5] HP recommends that the number of printed pages per month be within the stated range for optimum device performance, based on factors including supplies replacement intervals and device life over an extended warranty period.

[6] Duty cycle is defined as the maximum number of pages per month of imaged output. This value provides a comparison of product robustness in relation to other HP LaserJet or HP Color LaserJet devices, and enables appropriate deployment of printers and MFPs to satisfy the demands of connected individuals or groups.

[7] Declared per ISO 9296 and 7729; values are subject to change. For current information see www.hp.com/support/ljp2015. Configuration tested: base model, printing on A4 paper at 26 ppm.

[8] Values subject to change. See www.hp.com/support/ljp2015 for current information. Power numbers are the highest values measured using all standard voltages.

[9] Declared yield value in accordance with ISO/IEC 19752
