

15.6" Laptop Backpack with Removable Accessory Organizer Case - Business Travel Backpack - Ergonomic Commuter Computer Bag - Durable Ballistic Nylon - NoteBook/Tablet Pockets

Product ID: NTBKBAG156

Designed for short or long-distance commutes, this travel-friendly 15.6" laptop backpack is designed to fit all of your essentials, including your laptop charger, display adapters, wireless mouse and more. The bag is constructed of heavy-duty ballistic nylon, and has built-in notebook and tablet sleeves to ensure your devices are protected, even when dropped. It also has multiple storage pockets to keep your items secure. The commuter laptop bag is equipped with an accessories case that can be easily removed to take with you to meetings or presentations, making it ideal for business professionals on-the-go.

The removable travel accessories pouch (10.5in x 5.25in x 3in) is stored in its own compartment in the backpack, and was designed to be easily accessed using the lower side pocket of the backpack so you don't have to search through or displace any items in your bag. It is designed with the same ballistic nylon as the backpack to ensure durability. The Velcro dividers can be customized to suit your needs, and the bungee grid is perfect for storing your smaller devices and cables. Once the case is removed, the main compartment of the laptop bag can be extended (by collapsing the Velcro-tied wall) to provide you with more room to store any other essentials required for a short or long-term trip.

The computer bag is contoured to protect your shoulders and back, and features ergonomic and breathable padding to help relieve any pressure and strain put on your body. It is designed for short distances, like commuting back and forth to the office or for long-distance tradeshows or customer visits, ensuring comfortability no matter what you're doing. The laptop bag also features adjustable shoulder straps, wide zippers and a soft, and padded handle that is easy to grip. The stable bottom allows the bag to stay upright when set down.

Whether you're on your way to the office or the airport, this business travel backpack has you covered. It has an integrated trolley sleeve that fits perfectly on your rolling luggage, letting you bundle your bags together. The laptop backpack also meets most airline and TSA carry-on requirements, ensuring ease when traveling. There are also multiple practical storage pockets, including a velvet-lined compartment to store your sunglasses, an expanding side pocket for your water bottle, an inner keychain and mesh pockets for your miscellaneous items and a zippered pocket on the shoulder strap to keep your phone, passport, work badge, etc. secure and easily accessible.

This notebook backpack is backed by a StarTech.com limited lifetime warranty, and free lifetime technical support.

Certifications, Reports and Compatibility
