Helping you achieve more than ever before

Flexible and easy to use

They don't come much easier to use than these devices, from set up out of the box to daily use. Also, if you're working on large documents, these multifunction devices give you the opportunity to focus on your work while it processes your documents. Whether it's printing double sided automatically, thus saving the environment and paper, or using the Automatic Document Feeder for multi-page scanning it's sure to improve your efficiency and productivity.

Print securely via the cloud

Send your prints with a piece of mind. This built-in feature within Brother Cloud Apps provides secure printing to remote printers without requiring the user to connect to a corporate network. Documents are uploaded to a web browser or sent via email, and can only be retrieved for printing after a password for the print job is entered at the destination machine, ensuring that only authorised personnel can access sensitive data.

Send scanned documents directly to emails

Streamline your workflow process by conveniently sending a scanned document directly to an email application. Using predefined settings where you can set the resolution and file format, simply scan directly from the machine or from Brother Control Center4 or Brother iPrint&Scan app.

Scanning technology

These multifunction machines do so much more than print. The scanning opportunities available can significantly enhance and simplify your workflow. You can scan in colour or mono at high speeds to several destinations to boost productivity.

Professional print quality

Who says you need to spend more to create professional quality prints? With our devices, you can expect print quality of the highest order, at quick, hassle-free speeds.

The latest ink cartridge technology

We've reengineered our ink cartridges to hold more ink and created an internal ink storage tank that delivers more pages of uninterrupted printing without sacrificing the compact, desktop size. Also, thanks to the page gauge feature you can check remaining ink levels on your LCD display to help avoid interrupted printing.

Brother's original supplies offer peace of mind and quality guaranteed.

You wouldn't put the wrong fuel in your car, would you? To get the most out of your Brother printer, don't compromise on ink; only Brother genuine ink gives you the perfect print performance every time.

Brother's genuine ink supplies will not only help keep your printer in the best possible condition for unrivaled print quality, they are more consistent than non-genuine supplies.

You will also save money by avoiding the incurring costs for re-prints or dead-on-arrival cartridges, Brother ink helps you get it right first time.
