DATASHEET

INTRODUCTION

Milesight AI Outdoor Parking Management Pro Bullet Plus Camera delivers a complete parking management system with three detection modes: **Occupancy Detection** for large-scale space monitoring, **Parking Detection with LPR** for precise space and license plate management, and **Parking Violation Detection** to identify illegal parking. Combined with 24/7 scene adaptability, it provides an all-in-one solution for smarter, more efficient outdoor parking management.

AI Outdoor Parking Management Pro Bullet Plus Camera

KEY FEATURES

Intelligent AI Parking Detection

Occupancy Detection based on AI algorithm can realize simultaneous detection and management of up to 100 parking spaces with up to 98% detection accuracy.

Parking Detection with LPR based on AI LPR algorithm can realize simultaneous detection and management of up to 6 parking spaces with LPR.

Parking Violation Detection can further identify and record illegal parking behavior.

These three parking management modes greatly help guide parking and realize more efficient and intelligent parking management.

Up to 6 Parking Spaces for Parking Detection with LPR

Up to 100 Parking Spaces for Occupancy Detection.

High Accuracy

Parking Violation Management

Excellent Scene Adaptability

With a series of cutting-edge image technologies, AI Outdoor Parking Management has excellent scene adaptability. The wide field of view of the motorized zoom lens allows for a wider monitoring range, while the 4K resolution ensures that the images are sharp enough. In addition, under the 1/1.8" STARVIS starlight sensor and image-based frame accumulation technology, it also ensures the detection of parking lots at night, providing 24/7 surveillance monitoring.

High compatibility

To maximize the usability and compatibility, the AI Outdoor Parking Management Camera supports CGI/APIs, which allows the easy open integration with third-party platforms. The network protocol such as HTTP(s) offers a wide range of options for data processing. The parking information is transmitted to the third-party parking system to help form a complete set of solutions, guide the driver to find the parking space quickly and realize intelligent management.

Unique Structure Design

The unique structure design of the camera enlarges the space and greatly saves efforts for installers, such as the integrated cable management bracket of Pro Bullet Plus Camera. And the IP67-rated weather proofing and IK10-rated vandal proofing allow to protect the camera against adverse impacts to ensure the robust performance.

Flexible Configuration

The configuration of Parking Space Detection is very flexible and convenient. Area Name, Planned Spaces of Area, Distribution and Numbering Scheme of the detection area can be customized, which provides a easy detection area configuration method and conforms to user habits. And the red overlay of the occupied parking space provides a more intuitive interface.
